The Morrisburg tack factory will increase the number of machines used from twenty-five to fifty. A steam heating plant is now being installed.

H. McInnes, formerly of Thornton's hardware store, Norwood, has accepted a position as city traveler with the Kemp Manufacturing Co., Winnipeg.

The Consolidated Plate Glass Co., Wellington street W., Toronto, have bought property at 241 Spadina Ave., that city, and during the winter will erect a five storey brick warehouse, to cost $100,000. It is expected the new building will be ready by May 1, 1911.

Mr. John Irwin, who since February last has been manager of the Toronto office of Brandram-Henderson, left on Thursday night for Montreal to assume his new duties as assistant to manager Edwards.

Prince & Co., 550 Bloor Street, West, Toronto, have purchased the hardware and plumbing stock of T. W. Slean, 544 Bloor Street West. Mr. Slean is removing to Oakville, where he will establish a plumbing business.

The exhibit of the Imperial Steel and Wire Co., Collingwood, at the Great Northern Exhibition, contained what was claimed to be the largest roll of poultry netting made in America. The roll stood 126 inches high, on a platform 20 feet square.

Western Canada.

The Weaver Patent Oil Can Attachment Co., Calgary, has been incorporated.

C. W. Tray, hardware merchant, Lethbridge, Alta., is retiring from business.

H. W. Storey, Francis, Sask., will open a hardware store on Jan. 1 at Camrose, Alta.

Mooney and King, hardware dealers, Biggar, Saskatchewan, have dissolved, A. W. Mooney to continue.

L. G. Moffatt, Winnipeg, has gone to Perdue, Sask., to take up his share in the hardware firm of Moffat Bros.

Wood-Vallance Hardware Co. have purchased the warehouse property of Ashdown Hardware, Nelson, for $5,000.

The Saskatoon Hardware Co. secured the heating and plumbing contract of the John Deere Co.'s building, Saskatoon.

John R. Groat, hardware merchant, Elkhorn, Man., has been visiting in Victoria with a view to locating there permanently.

E. Johnson, plumber, tinsmith and fitter, has purchased the stock of E. Ryckman, Nelson, B. C., and leased the store on Sirdar Ave.

J. S. N. Dougall, Montreal, was in Winnipeg last week arranging to establish a permanent agency of the Dougall Varnish Co. there.

The hardware business conducted for the past four years by McDonald & Voight, in Dauphin, Man., has been formed into a limited company under the same name.

F. A. Sparles, Minneapolis, is in Saskatoon supervising the installation of a steam heating apparatus at the Empire Hotel. He intends to start a heating business there.

The hardware firm of Armstrong & Turnbull, Fillmore, Saskatchewan, have dissolved partnership. J. F. Turnbull will take the hardware department, and Mr. Armstrong the tin shop.

Wm. Bownness, hardware merchant, Victoria, B. C., was one of the large sufferers in the million-dollar conflagration in that city on Oct. 27. His hardware stock and large new building were completely destroyed, according to telegraphic despatches.

The J. D. Fraser Hardware Company of North Vancouver, scored a notable triumph in securing the recently awarded contract from the city council for one thousand feet of fire hose. The company procured the order in the face of competing tenders from several companies who bid direct instead of through local representatives.

The Canadian Fairbanks Co. have laid the foundation pillars of a substantial corrugated iron warehouse at Saskatoon, where they intend housing the heavier class of their stock, such as gasoline engines, large safes, etc. The building will be 80 x 50 feet, and will be a permanent structure. Next spring they intend to erect a very imposing building of brick and terra cotta, facing on 23rd street.

Maritime.

Mack-Buchanan is the name of a new hardware firm about to open up business at Liverpool, N.S. Mr. Mack was with The McLean Hardware Co., from the old days of J. N. Mack & Co., and has been doing their buying for the last ten years. Mr. Buchanan served his apprenticeship with the same firm. Both have a strong connection with the buying public in their vicinity.

United States.

C. Cowles & Co., New Haven, Conn., have purchased the "Murphy Line" of handles, including all styles and patterns of Drop, Grab, Inside and Lever Lock Handles, also the good will for this line, of the G. W. J. Murphy Company, Merrimac, Mass.

STEEL BOUNTIES TO CEASE.

Ottawa, Oct. 26.—The government, it is learned, will take no action regarding the question of bounties or duties on iron and steel.

Iron and steel bounties, that is the bounties that are paid on pig iron, puddled bars and steel ingots, will expire on December 31 next. The bounty paid on the manufacture of steel rods, however, will not cease until July 1, next. Payment may be made after June 30 on rods actually made and sold prior to that date.

The legislation regarding steel rods was passed last session at the instance of Hon. W. S. Fielding. During the discussion in committee on the bill, the question was asked of the minister of finance whether a duty would be imposed to take the place of the bounties. Mr. Fielding replied: "We certainly have no such intention at present; what may come in the future, I cannot say." The government has now decided to take no action.

News and Methods of Canadian Hardwaremen

St. John Hardwareman Passes Away—Novel Stove Display in Peterboro Window—Napanee Hardwareman Finds Go-Carts a Profitable Line—Another Hardware Millinery Window.

WILLIAM McAVITY DEAD.

St. John, Oct. 26.—William McAvity, for forty five years associated with the firm of T. McAvity & Sons, wholesale and retail hardware dealers and foundrymen, and supervisor of the manufacturing branch of the business, died last Friday night after a lingering illness, having suffered from paralysis for the past seven years. He was stricken while returning from a visit to New York, where he had gone to be present at the international yacht races, having been an enthusiastic yachtsman. His apprenticeship in some of the largest Boston machine shops served him well in his direction of the large manufacturing end of the McAvity business. He was a practical machinist, and took a keen interest in the workmen employed by the firm. He was born April 29, 1846, and was a son of Thomas McAvity, the founder of the firm. He leaves besides his wife, four brothers: Thomas, John A., George and Stephen S., all in the firm, and four sisters.

J. B. Douglas, Amherst, who with W. B. Tennant, of this city, was interested a short time ago in the purchase of the Silliker Car Works in Haliafx, announces that $400,000 will be added to the present capital. The car works will remain in Halifax.

The W. S. Loggie Co., general merchants, Chatham, are installing a large vault with double walls of brick, with an air space between, and so arranged that a stream of water will envelope the inner walls of the vault at any time desired.

AN ORIGINAL STOVE WINDOW.

Peterboro, Oct. 26.—Josh Gamble, recently with the Higgins Hardware Company, has accepted a position with Dobbie & Son, Brockville.

Mr. Morton, of the Peterboro Hardware, has gone to Vancouver, to a position there.

The Best Stove Co. have a very attractive window this week. A range is fitted up in the window, which is dressed to represent a kitchen. The mistress of the house has apparently been called away, leaving the breakfast things on the table. A kettle is boiling on the stove (kept so by means of a gas jet placed inside the stove) and a tramp has taken advantage of an open door to help himself to the goodies on the table. The window has caused a good deal of favorable comment on the originality of the dresser, Ray Best.

The Peterboro Lock Manufacturing Company's staff are busily working overtime, getting out entirely new designs in locks and lock sets, which they will soon place on the market, they having recently greatly enlarged their plant, putting in a quantity of new machinery.

The Rapid Tool Co. has also greatly increased their staff, under Mr. Rees, their new superintendent.

Alec. Archibald, master plumber, has three or four large contracts in hand, including the heating of the Schneider block, and plumbing and heating of the new Knox Church.

A HARDWARE TRADE WEDDING.

Hamilton, Oct. 24.—The marriage was celebrated here on Thursday last of William Vallance, Jr., son of William Vallance, president of Wood, Vallance & Co., wholesale hardware merchants. The bride was Miss Arvilla A. Gurney, daughter of the late Charles Gurney, at one time connected with E. and C. Gurney, stove founders. Mr. Vallance, senior, presented the young couple with a new home on Bay street. Hugh Vallance, Montreal, was one of the guests at the wedding.

TRADE GOOD AT NAPANEE.

Napanee, Oct. 26.—M. S. Madole, who has been in the hardware business here for over twenty years, reports that trade this year has excelled in volume, and from a financial standpoint, that of any previous season. Mr. Madole, the interior of whose store is shown in the accompanying picture, has recently installed two new silent salesmen. His store is 32 feet wide by 110 feet in depth, besides which he has a tinshop and workroom below, with space for an iron storage room, and with two flats and a warehouse 30 x 40 feet, for storage of general hardware stock.

Interior of M. S. Madole's Store at Napanee.

Two lines shown in the illustration are go-carts, and charcoal in bags. The former has proven to be a very profitable line, according to Mr. Madole, and has helped to popularize the store with the women folk. He also has a large turnover each year on the charcoal for domestic use, he having carried the line ever since it was placed on the market in this form, and the Napanee grocers having left the line to the hardware merchants.

HARDWARE MILLINERY STYLES.

Chatham, Oct. 21.—Close on the heels of the fall millinery openings in the dry goods stores, Westman Bros. hardware have been displaying some decidely stylish hardware millinery in connection with window displays of gas heaters. A display this week gives three stylish designs in headgear. A tall hat is made up of five inverted stewpans (granite) of varying sizes, one above the other, trimmed with a small broom at the side, and a bunch of gas stove "bricks" neatly wired together. A similar design, though wider and not so high, is made up of five inverted dish-pans, one above another, trimmed with a tissue-paper "whisk" at the side, and five pokers neatly arranged in the front. These "hats" are displayed mounted on lengths of stove pipe.

A striking design appropriately labeled, "The New Hat," parodies one of the most popular hats of the season. It consists of a huge tin tub, painted black, with a circlet of gas stove "bricks" going the entire distance around the top of the crown, and squares of tin and oilcloth at the side. This hat is displayed on Westman's "dummy" figure. As it overhangs the face very decidedly, a large hole is cut in the front of the hat to permit the wearer to look through.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Oct. 27.—So far as local hardware trade is concerned, there is a marked quietness both in wholesale and retail branches. The wholesalers have had a big rush, and it is apparent that merchants are well stocked with a wide range of goods, and are waiting for business in their centres to clear out their lines. Wholesalers, however, are doing quite a sorting business just now, and deliveries of Christmas lines are being made to all parts of the West. There are many lines which are moving that are not in the following list, such as household goods, heating goods, which include oil stoves, furnaces and ranges. Winter sporting goods are going quite well, and this line will continue.

Some notable advances have been made this week in tin plate, terne plate and solder. The reason that the goods have been advanced is that prices have been forced up in the Old Country, owing to the inability of the factories to supply the demand. Sheet zinc is reported very strong, and an advance is confidently expected.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅝ and smaller, 65; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corugated iron, 28 gauge, $3.87; pressed standing seamed roofing, 28, painted. $2.83; galvanized. $3.87; 26, $3.24.

Canada Plates—Half polish, 6 and 7-inch, $3.40; 8-inch, $3.65; full polish, 6 and 7-inch, $4.15; 8-inch, $4.40.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾-oz., $4.80; Queen's Head, 23, $4; 24. $4.20; 26, $4.60; 28, $4.80.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $4.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9½c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 5 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—6-in., $6.69; 7-in., $9.31.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.10; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 30; japanned ware, 35.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

Paints and Oils.

There has been no easing off in the oil and paint trade up to the present date, and wholesalers and jobbers are shipping heavily in a wide range of finishing supplies. The mixed paint market is held firm, and the output is quite satisfactory.

Linseed Oil.—During the past week there has been a slight weakness noted in the seed market, and the Winnipeg price to-day is $2.34 a bushel. It is quite improbable that linseed oil will go any higher than the present quotations, raw being $1.15 and boiled $1.18. The competition of the English oil assists in keeping the market weak here, and it may be that without this competiton the market would advance.

Turpentine.—The output of turpentine has weakened considerably, due no doubt to the high price which prevails. The market stands at $1.10 to-day, but predictions are for a $1.25 market in Winnipeg very soon. The crop in the South is very short, and it is believed that extremely high prices will have to be paid for the pure stuff.

It is reported that a large quantity of adulterated stuff is on the market which has taken the place of pure turpentine, which owing to natural causes has been forced to high price.

Putty & Glass—These lines form a very heavy part of the trade at the present time. There is much glazing to be done, and it is believed that the demand will continue for some time yet. Putty in barrels, $2.90; in cases, $3.15; in kegs, $3.40.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 16c; Sunlight, 18½c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

NEW COMPANIES.

The Gullberg, Ekberg Co., Kenora, Ont., capital $10,000; to manufacture and sell tar, creosote, turpentine, charcoal, etc. Provisional directors, J. E. Gullberg, A. Ekberg and Eric Ekberg.

Windsor Superior Mfg. Co., Windsor; capital, $100,000; to manufacture wares made wholly or in part of metal. Incorporators, Walter Bong, Jno. A. Smith, Windsor, and S. T. Allen, Detroit.

SHERWIN-WILLIAMS AGENCY PROPOSITION

We have reproduced several of these letters in a little folder which we will send upon request. One of these letters is shown below:

Rossburn, Man., August 19th, 1910

The Sherwin-Williams Co.,
Winnipeg, Man.

Dear Sirs: Answering your letter of August 16th, asking for expression of opinion as to the value of your agency.

We attribute our success in selling paints to the fact that we are handling the right kind, Sherwin-Williams, keeping a well assorted stock neatly displayed, and taking every advantage of your advertising helps, as well as advertising extensively ourselves through our store paper. We back this up by constant personal work and a thorough knowledge of what each finish will do.

We have had two painters busy all summer, and can trace 75% of the work acquired to the assistance given by your personal letters and the Decorative Department.

We are getting $2.75 a gallon for every gallon of SWP sold this season and have sold four times more paint this year than last year.

We find your agency, through advertising done, draws many people to our store other than our regular customers.

Wishing you every success, we are,

Yours very truly,
ROSSBURN HARDWARE CO.,
(Signed) G. M. Watson.

Stove Manufacturers Honor Retiring President

Illuminated Address and Diamond Pin Presented to John H. Tilden, Hamilton, on the occasion of His Retiring From the Stove Trade and Removal from Hamilton to Chicago.

A number of intimate friends and associates connected with the stove manufacturing industry of Canada, met at the Waldorf Hotel, Hamilton, on Wednesday, Oct. 19, to informally say "Good-bye" to John H. Tilden, who is retiring from the stove foundry business with which he has been connected for a number of years, and at the same time present him with an illuminated address and diamond pin as a testimonial.

After short speeches had been made by several of the stove manufacturers present, eulogistic of the sterling business qualifications of Mr. Tilden, and expressing the sincere good wishes of all present for his future health and prosperity, S. D. Robinson, vice-president of the Stove Manufacturers' Association, addressed Mr. Tilden as follows:

"On behalf of the C. S. M. A. whose offices of president and treasurer you have so graciously filled, we wish to convey to you the very great feeling of regret occasioned at your leaving our midst, not only in the capacity of an officer that will be hard to do without, but on account of the strength of your presence and personality, which has been always as a tonic to this Association, both in a social and progressive way.

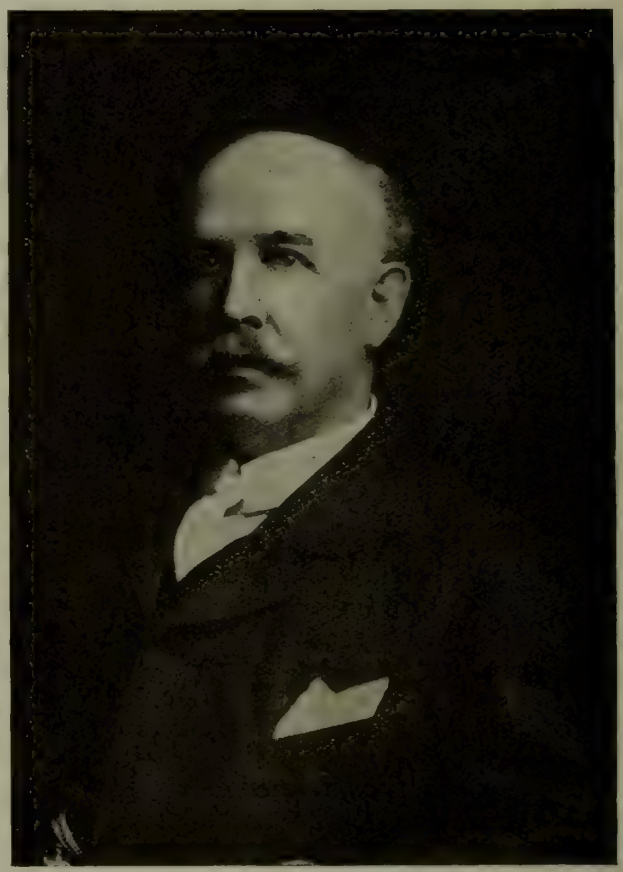
"The members have expressed a wish that this meeting be more in the form of a social gathering, and no words sufficiently express the feelings that have been conveyed by the various members, when approached on the matter of attending this meeting, and on behalf of the association wish to convey our great appreciation for the amount of time and attention, as well as guidance you have brought to bear upon the affairs of same.

"We ask you to accept a slight token of our appreciation in the form of this little souvenir pin, together with the accompanying address, which has been prepared on behalf of the association to indicate to you their feelings on the occasion of your severing your connection with their mutual stove interest."

Illuminated Address.

To John H. Tilden, Esq.

Sir:—As you are now retiring from the position of President and Treasurer of the Canadian Stove Manufacturers' Association, we are reluctantly compelled to accept your resignation, but in so doing desire to express to you the high appreciation of the administrative ability, tact and energy which you have displayed in the conduct of the affairs of this association.



You have been connected with the stove manufacturing business in various capacities since 1870, a period of about 40 years, and have done good service, not only to the industries in which you were specially interested but to all the stove manufacturers of Canada, who at one time were associated together as the Canadian Iron Founders' Association, later, as the Caloric Club and at the present time and for several years past as the Canadian Stove Manufacturers' Association, and from which you will be missed, not only for your kindly, sociable disposition, but also for the knowledge, ripe experience and sound judgment which you brought to bear on matters of interest and importance to our association.

We beg your acceptance of the accompanying souvenir which we trust may always remind you of the many pleasant meetings over which you have presided.

In whatever sphere of activity you may interest yourself, we pray that you may always enjoy that measure of success you so richly deserve, and in parting, rest assured that you carry with you the best wishes of the Canadian Stove Manufacturers' Association.

Signed on behalf of the C. S. M. A.

S. D. Robinson, Vice-President.
James G. Insole, Secretary.
Hamilton, Oct. 19, 1910.

JOHN H. TILDEN, Hamilton.

Mr. Tilden, from whom the gathering had been kept secret, was taken completely by surprise, but replied briefly, expressing regret that circumstances had necessitated his removal to another city and resignation from a position it had given him pleasure to fill. The kind expressions and tokens of friendship would be cherished by him in his new sphere and it would be impossible for him to forget or sever the friendships developed during his long connection with the stove trade in Canada.

Mr. Tilden, it is understood, is to remove to Chicago to accept the presidency of a bank in which his brother is largely interested.

A STOVE TRADE REMINISCENCE.

An interesting story is told in connection with the recent resignation of W. H. Carrick from the general management of the Gurney Foundry Company, Toronto, to succeed John H. Tilden, as president and general manager of Gurney-Tilden & Company, Hamilton.

Some years ago Mr. Edward Gurney noticed that Mr. Carrick was not looking well, having been working very hard and taking little recreation, nights and even holidays having been spent in looking after the details of his duties. Mr. Gurney suggested a holiday but Mr. Carrick insisted that he was well and did not need a rest. Diplomacy was, therefore, resorted to by Mr. Gurney in

getting Mr. Carrick away from his desk. Coming down one morning he said to Mr. Carrick:

"I have some very important business to look after at London, but cannot spare the time to cross the ocean so I want you to undertake it. Let me know how soon you can get away."

The ruse succeeded and Mr. Gurney carried it out further by telling Mr. Carrick:

"I do not want to worry you regarding the details of this matter so I have drawn up full instructions in this letter. Take a holiday on the way over and when you get to London you can give the matter your attention."

When Mr. Carrick arrived at London the instructions he received through the letter were:

"Cash this cheque and take a three months' holiday."

Mr. Carrick's faithful application to the details of the business he has in hand is well-known to all who know him and the incident related illustrates one of the traits of his character which has made it possible for him to rise to the high position he now occupies in the stove trade in Canada.

WATER-BACKS AND COILS.

A water-back of the average size contains about two-thirds of a square foot, or 100 sq. in. of heating surface, that is, surface against which the heat of the fire strikes.

The number of gallons this will heat per hour depends upon several conditions, among which may be mentioned the size and quality of the fuel used, the manner in which the range is operated, and the extent to which the fire is kept free from ashes. Various tests have demonstrated that one sq. ft, of water will under ordinary conditions of firing, heat twenty-five gallons of water per hour from an ordinary temperature to 180 or 185 degrees Fahrenheit, which is about the temperature desired in water for domestic purposes. On days when the range is used for baking or roasting this amount can be increased about 30 per cent. The estimate given is based upon a cast iron water back of usual thickness, clean and free from incrustations of lime or magnesia.

A water back or coil will, as a rule, heat two square feet of radiation for each gallon of range boiler capacity; thus, if a water back in a range is warming twenty-five gallons of water in the range boiler, it should warm approximately 50 sq. ft. of radiation in a pipe coil or radiator. If the surrounding conditions are good, this may be increased to 70 or 75 sq. ft.

In estimating the capacity of pipe coils placed in the fire-pot of a furnace it must be remembered that but a part of the coil is actual heating surface, and that only such portion as is, receives the benefit of the heat from the fire. It is wise to place at least one square foot of coal (3 lineal feet of 1 inch pipe) for each fifteen gallons of water to be warmed. A coil placed in such a position that its full area is effective will do more than double this amount of work. —Sheet Metal Shop.

METHODS OF DISPLAYING RANGES

It is not always an easy matter to display kitchen ranges to the best advantage. When they are simply lined up against one another on the floor of the store it is difficult work to move them about so that the customer can see the back and sides as well as the front.

A Minneapolis hardware dealer, according to The Hardware Trade, has solved this problem, having devised a very simple truck platform on which the ranges are placed. The trucks raise the ranges about six inches from the floor, they being constructed of wood, with ordinary casters on the four corners, so that the stoves can be easily moved.

This plan is even better than the ordinary stove casters, which are sold by jobbing houses, as there is not the chance for dirt to collect as when the ranges are placed on the floor level.

In the window difficulty is sometimes experienced in arranging a display which is more than so much iron in the window. In order to sell goods it is necessary to emphasize the good features of the range or baseburner displayed, as well as to show the stove itself. This is accomplished in the window display shown herewith, three base burners being shown, one closed and two open, to show the construction of the fire pot. Then, on the wall in between the stoves, are two long sheets on which are featured the main selling points of the goods displayed. The "why" and "because" is good salesmanship, as many customers will read the points made before entering the store, and will thus be ready to talk over the details of purchase more intelligently than if they had merely seen a baseburner in the window.

Effective Display of Baseburners in which Strong Arguments are Brought out on Window Cards in the Background of the Display.

THE BRISTLE BRUSH.

As announced in last week's Hardware and Metal that brush prices had been advanced by manufacturers to jobbers about 10 per cent., the scarcity of good bristles being the cause.

The best grade of bristles are obtained chiefly in Russia. This country and the United States are small brittle producers, despite the fact that hog raising is an important industry in America. This is due to the fact that here hogs are raised for the market, and are killed young. The bristles obtained, as a result, are short, crooked and of the wrong color, being used only for the cheapest kind of brushes. The value of bristles is determined by length, stiffness and color, white being the desired shade. Russian bristles are the best on the market, but good supplies are obtained from France, Germany, China, Siberia and India.

BIG DEMAND FOR NEW RIFLE.

The Marlin Firearms Co., New Haven, Conn., report an unprecedented demand for their new Model 27 rifle which, they state, is the first and only .25-20 or .32-20 caliber repeating rifle with trombone action. These well known calibers are extremely popular, for they are the most powerful sizes made that are adapted for use in settled districts, and they are serviceable for both hunting and target work. The new model incorporates about every desirable feature that can be placed in a repeating rifle, and the gun is said to sell at a very moderate price, with a good profit for the dealer. All hardware firms who take an interest in fire arms and sporting goods will find it to their advantage to look into the merits of this new gun while it is still a novelty and in such heavy demand.

A. C. and B. M. Bochner, late of Toronto, have purchased the business of the Guelph Metal Co.

No. 32

PAINT A NECESSITY.

In pushing a paint sale many merchants fail to emphasize the point that paint is not a luxury, but a necessity. They dilate upon the beauty of a freshly painted house or floor, and therefore give the customer the idea that paint is very nice when money can be spared, but it is something that can easily be put on one side when other things are wanted. In other words, the impression is given that paint is somewhat of an extravagance.

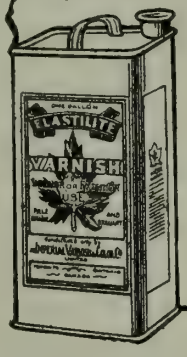
This is totally wrong, and very unfair to the manifold merits of paint. The merchant, while not forgetting the beauty of paint should lay most stress upon its hygienic and preservative qualities, and that in consequence of these paint must in all fairness be classed as a necessity, and not a luxury. This is a point that will score most with a probable customer.

Paint is a deadly foe to microbes. Nothing unhealthy can lurk around a properly painted board, whether it is on the outside of a building, or part of a dark cupboard. There is no rough surface for dust to collect. The place is at once rendered sanitary and perfectly healthy to the family.

Can paint under such circumstances be considered a luxury?

Then the preservative qualities are equally important. To the property owner the strongest convincing point is the fact that a properly painted house is protected against deterioration, and at the same time is considerably improved as a selling proposition. The investor's first impressions last with him the longest. The house itself, on examination, may suit him very well, but if he is disappointed with the exterior appearance, if the outside belies the interior, then the property owner has much harder work to swing the sale. This is but natural. Is paint an extravagance there?

A house painted regularly every three to five years will long outlast the one that has been painted but intermittently. The weather is not allowed to play havoc with the material. Is paint a luxury there?



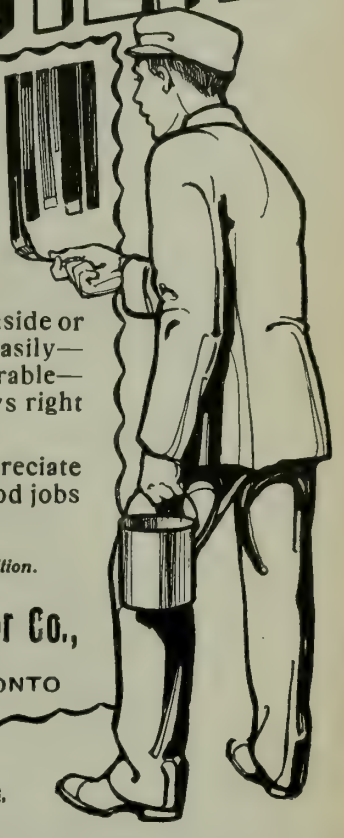
Another strong point in meeting the old excuse that there is no money this year to spend on painting, but that probably next year something will be done, is the one that to put off painting is not an economy, but on, the other hand, an extravagance. The damage done upon the woodwork by the storms of one winter alone, not only spoils the surface,

ELASTILITE

"No Varnish Like It"

ELASTILITE certainly is **the** all-purpose Varnish—it's made for people who want a good Varnish at short notice, for any kind of work, inside or out. Flows freely—brushes easily—dries well—is extremely durable—has a beautiful finish that stays right on the job from first to last.

Specially good for Hospital, Institution and other high-class trade.



Your trade will appreciate ELASTILITE—"good for good jobs—not bad for the other kind."

but so affects the material that maybe the whole strength of the structure is imperilled. The damage done through this procrastinations is much more than the entire cost of the painting. Where is the economy, and where is the extravagance in this case? There is no doubt that money spent upon paint is just as necessary as money spent upon life insurance.

These points are not sufficiently dwelt upon by the merchant. There is a lot of ignorance among the prospective users of paint as to the value of paint, and the merchant to get the best results must throw light in these quarters. In all his advertising he must never lose a chance of impressing upon his district the many qualitiles of paint over and above its very apparent one of appearance. Properly put the hygienic and preservative qualities of paint are undoubtedly its strongest selling points. we doubt if few commodities have such a claim upon the pockets of the people. But the merchant must not hide the virtues of paint under a bushel.

PAINT AND OIL MARKETS

MONTREAL.

Oct. 28.—Sorting up orders are coming in steadily, and manufacturers and jobbers seem satisfied with conditions. Plenty of painting is going on, the higher cost all the way round not apparently checking, to any great extent, the demand.

Linseed oil and turpentine present no new features from that of the past few weeks. There is still a very bullish tendency, while with linseed oil there is no anxiety on the part of holders to sell. There is very little flaxseed offering. The tendency of English holders to quote lower figures for next year's early delivery shows that some relief in the tension is anticipated. Despite the high prices, there is a fair inquiry. All other lines are firm, in sympathy with prevailing conditions, and the demand is on the whole good. Turpentine and linseed oil have been advanced in some quarters.

Turpentine—There is still a very firm feeling in turpentine, and reports from the South as to the strength of supplies does not tend to relieve the situation. Prices, therefore, are very firm, and 1c has been added to quotations, making the prices range from $1.01 to $1.03. The demand is fair.

Linseed Oil—Linseed is still extremely bullish, and there is very little oil offering. The only break in the horizon seems to be the fact that English holders are accepting lower figures for next year's delivery. All the flaxseed offering is eagerly snapped up by grinders. On the whole, trade is not bad, considering the high price. The market has risen in some quarters, and prices are now a cent or two higher, ranging from $1.08 to $1.10 for raw, and $1.11 to $1.13 for boiled.

White Lead—The market, although unchanged, is naturally very firm. There is a good demand, stimulated no doubt by the belief that an advance is likely to occur at any time. We quote $6 to $6.50, according to brand.

Varnishes—There is a good call for varnishes and japans. The large users are buying freely, while a stimulation is noted in household tins. The market has a very firm tone.

Putty—There is a fair demand considering all things. Good consignments are going by boats, and the market is firm. We quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Oct. 27.—The feature of the market is a further advance in turpentine, of three cents, as a result of the storm which swept over the coasts of Cuba and the Southern States.

The demand for shipment of turpentine called for all the available supplies, so that the price is now at the highest point that the world has ever known, with the exception of the few years during the American Civil war.

As the season is now fully advanced, the price will likely remain at about its present point for the next few months.

In regard to linseed oil, it is impossible to tell when these advanced prices are likely to change. The price for linseed oil in Great Britain, and the price of flaxseed in Chicago, are still maintained at the very highest points.

The rate of freight on oil from Great Britain from this time forward will be at winter figures, so that for the next few months there does not appear to be any prospect of relief in this direction.

Linseed Oil—Prices quoted for oil run from $1.10 to $1.13 for raw, and $1.13 to $1.16 for boiled, and there seems to be no chance of an immediate drop from this high figure. One jobber, in fact, predicts further advances in November. The state of the market is such that some uneasiness is manifested on the part of manufacturers, who are now facing the problem of stocking up in this commodity for supplies for manufacturing ready mixed paints during the winter.

Turpentine.—Undoubtedly the feature this week is the announcement of an advance in turpentine. Some quotations are made as high as $1.07, though the general run ranges down to $1.04. One jobber quotes $1.01, but is quite apparently below the market. One reason for this continuous rise in turpentine is found in the recent hurricane. The resultant damage, and the delays to communication have had their effect on the

Quick Drying Floor Varnish

Gold Medal

Inside and Outside Varnish

If furniture, or interior woodwork of either hard or soft wood, is in need of renovation, DEPENDON will meet every requirement. It dries free from tack in a few hours, and if desired can be polished in twelve. It will please your trade.

If a floor varnish is called for, one that makes a splendid finish on any class of work. we recommend our **Everlastic** Quick Drying Floor Varnish. It dries hard, and comes mighty near being an "everlastic" coating. It is "elastic" and tough, and does not easily scratch or mar. It dries dust-free in about eight hours, has a brilliant lustre, and can be walked on next day.

If porch woodwork and front door, or bathrooms should need treatment, **Gold Medal** is unrivalled. It is smooth flowing and easily applied, is durable, and will resist moisture and changing temperature.

With these three Varnishes for household purposes in stock, you need no others. Cultivate simplicity.

Write for our favorable quotations.

Fills a long-felt want!

MOORAMEL

One of the MOORE LINE (Made in Canada)

The demand for Enamel Finish is daily increasing, and the want of a satisfactory ENAMEL at a reasonable price has at last been met by MOORAMEL.

'Mooramel' is the purest white color, works easily, sets slowly and flows like a high grade varnish. It dries dust free in a few hours, and dries HARD in 24 hours. 'Mooramel' is made only in white, but can be tinted to any desired shade by mixing with oil color.

Get ready to supply the demand. There's a 'well-worth-while' profit in selling 'Mooramel.'

Write for prices.

BENJAMIN MOORE & COMPANY LIMITED

West Toronto

New York Chicago Cleveland

market. The primary reason for the extremely high price of turpentine is, of course, the inadequacy of the supply. It was stated in one quarter to-day that trading was fair, the painters being as busy now as at any time during the year.

White Lead.—The trade remains fairly active. Prices show no change, pure white lead being quoted at $5.90 to $6.00. "Government standard" is still at $5.65. The market seems shaping towards an advance.

Varnishes and Japans—An advance is recorded by jobbers in varnishes and japans of 20 cents per gallon for the better grades and 10 cents for the cheaper varieties. This is following the advance made by manufacturers several weeks ago. The new price lists are not yet out. The increase is due to the steady upward trend in the price of oil. There is a good demand.

Putty.—The price of putty remains stationary. It is freely sold. Bulk in barrels is quoted at $2.20; in 100-lb. drums, $2.45. Bladders in barrels are quoted at $2.70; in 100-lb. irons at $2.80; 25-lb. loose, $2.55; cased, $2.60; 12½ lbs. cased, $2.80. "Special" putty sells at 10 cents less than the prevailing prices, and "pure" at 35 cents above.

Rosin—The general condition of the paint and oil market is reflected in the rosin trade. The price remains high, and sales are not very great, although the trading is, under all circumstances, satisfactory. "B" Rosin is $3.25 per hundred pounds.

Petroleum.—There is some activity apparent in the petroleum trade, prices showing no change. Canadian prime white coal oil is quoted at 13c; American water white, 14c; Pratt's Astral at 17c.

TURPENTINE AND ITS SUBSTITUTES.

According to Grimaldi, the nature of oil used in varnishes, for example, may be divided by the following method: 25 to 30 grammes of the sample are mixed with 50 c. c. of water, the mixture steam distilled and the oil coming over dried over calcium chloride and redistilled. The first 2 or 3 c. c., which should boil below 170 degrees, are collected, and one drop is dissolved in 2 c. c. of a solution of phenol in twice its weight of carbon tetrachloride, and the solution is then brought into contact with the vapor of bromine emitted from a carbon tetrachloride solution. Rosin spirit gives a yellow color, changing to green; wood turpentine gives a carmine red color, changing to violet; whilst in the case of pure turpentine the liquid is either colorless or at most very faintly yellow.

PAINT MANUFACTURER MARRIED.

With cheers resounding through the building, the lady members of the staff being especially prominent in this respect, W. B. Ramsay, of A. Ramsay & Son Co., Paint Makers, Montreal, was presented last week with a handsome case of old English china mounted in silver from the employes of the company, as a tribute of esteem on the occasion of his marriage.

Evan Jones, accountant for the firm, made the presentation on behalf of the donators, and referred to the paternal interest with which many of them regarded Mr. Ramsay, as they had watched him grow up from boyhood to manhood, and had been so pleased to see him following closely in the footsteps of his father. It was a fact worth recording that two of the donators were present at the marriage of Mr. Ramsay, senior, some 40 years back, while many others approached that number of years. There had been no royal road for Mr. Ramsay. He had started right in on the bottom floor, and had worked his way from department to department, until he was now assistant-general manager. He had gone into the industry thoroughly, having spent some time abroad studying the color business, and

W. B. RAMSAY, Montreal.

also spent some years in Winnipeg, so that there was little about the paint and glass business that Mr. Ramsay did not understand. As to his popularity with them, he thought that occasion, and more particularly the enthusiasm then being shown was sufficient indication.

Mr. Ramsay, undismayed by the "tigers," briefly returned his thanks, and said that it was his one desire to retain the esteem of all, and to do everything in his power to promote the interests of those connected with the business. He would always remember that occasion. With still more enthusiasm the company broke up, and the marketing of paint again became supreme.

Fort William is building a $72,000 police station. The contract for the heating plant and plumbing was awarded to the Fort William Hardware Co., for $5,064.

General Instructions

in selling the

CANADA PAINT CO.'S PAINTS

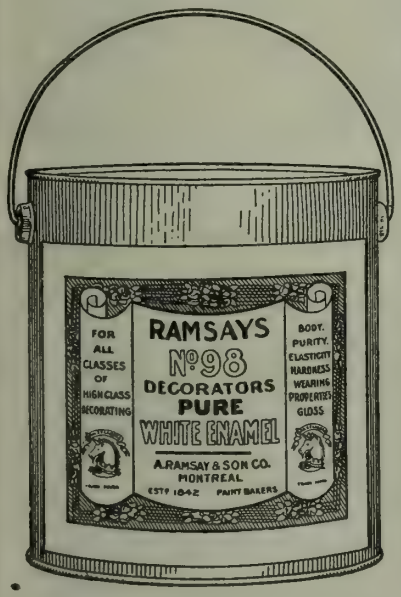
A number of salesmen in Hardware establishments are frequently at a loss in talking to a prospective buyer or in handing out a tin of Ready Mixed Paint, about the properties of the Paint and how it should be used. A few hints may be given, and if they are attended to and judiciously conveyed to the customer while the parcel is being done up, they will probably be appreciated, and will tend to show that the Salesman knows his business and takes an interest in his work.

The surface to be painted should be clean, dry and absolutely free from grease. All places showing sap and all knots must be shellacked. Do not grudge a little labor in preparing the surface; the operator will be well rewarded when the work is done. All Ready-to-Use Paint should be thoroughly stirred from the bottom of the tin, and if the surface to be painted is dry and porous the paint for first coat should be thinned by adding a little Raw Linseed Oil for outside purposes or a small quantity of Turpentine for inside work.

Never apply a second coat until the first is hard.

Paint not actually in use must be kept covered, otherwise it is liable to become "gummy" and unworkable.

Point out the necessity of keeping the brushes in good order. They must either be new or thoroughly cleared of old paint to do first-class work and avoid "streaks." Keep the "small boy" and the Cat out of the way until the job is thoroughly dry.



Finally, see that each package of Paint and Varnish bears the name of the

CANADA PAINT Company, Limited

Decorators' Pure White Enamel

We are telling you about this Enamel, just so that you will know where to procure a high grade white, for high grade work, when you want it. Many Canadian dealers are paying exorbitant prices for an imported Enamel, because they do not know that right here in Canada is to be found an Enamel that outclasses any of the imported goods.

This is the sign—

If any dealer wants to see just what Ramsay's No. 98 is like, he can have a sample for the asking of it. A sample is all that is necessary to prove that Decorators' Enamel need not be imported into this country at high prices.

Would you like to have a sample?

GLIDDEN'S

GREEN LABEL

Argument regarding the quality of Glidden's ***Green Label Varnishes*** and Glidden's ***Jap-a-Lac*** is superfluous. It stands to reason that we could not continue our heavy advertising unless the public liked our goods after trying them, and bought them again and again.

It's simply a question of "brass tacks" as to whether our combined varnish and ***Jap-a-Lac*** proposition is as profitable as any one of the several hundred you have to choose from.

You know what has been offered to you by others. The question is,—Do you know what ***We*** are offering?

Please remember, until you have heard from us, you cannot be fully satisfied that you have heard the best.

You have hundreds of articles for sale, and varnish is one of the many. ***We*** sell ***only*** varnish. It is our business to know what our competitors are doing, and when we tell you that our combined Varnish and ***Jap-a-Lac*** proposition is the best for you, we are honest in our statement.

When we say the ***Best,*** we mean "Best Quality," "Most Profitable," "Best Advertised," and "Easiest Sold."

We sincerely state to you that any concern that has spent the money we have to increase the consumption and demand for articles which you sell and benefit by, ought to have your hearty support, especially so if profit is as great as on unadvertised lines.

We do not believe an argument can be brought up, based upon good business principles, why you should not handle our ***Green Label Varnishes*** and ***Jap-a-Lac.***

A chance to explain our proposition is all we ask. Won't you write us before deciding upon the varnish and colored varnish connection you wish to make?

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	**"Taxite"**
International Varnish Co, Ltd., Toronto, Canada	**"Klensa"**
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	**"Expedite"**
British American Paint Co., Victoria, B.C.	**"Bapco"**
Mount Royal Color and Varnish Co., Montreal, Canada	**"Scrape-off"**
James Robertson Co., Ltd., Toronto, Canada	**"Robertson's Paint and Varnish Remover"**
Sanderson Pearcy Co., Ltd., Toronto, Canada	**"Devolite"**
Stewart & Wood, Toronto, Canada	**"Solvo"**
Martin-Senour Company, Ltd., Montreal, Canada	**"Martin-Senour Paint and Varnish Remover"**

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

Knowledge is Power

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

May we send you a copy of our comprehensive catalogue? You'll find details therein of the very book suited to your individual needs.

TECHNICAL BOOKS, 143-149 University Ave., TORONTO

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

Rates: 2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion when box number is required.

COPYRIGHTED, 1909, BY THE STANLEY RULE & LEVEL CO.

Stanley Tools

"BAILEY" IRON SPOKE SHAVES Nos. 51 to 65 are superior in style and finish to any on the market.

STANLEY RAZOR EDGE SPOKE SHAVES Nos. 72 to 85 are so called from the shape of the Cutter, which is Hollow Ground, giving a keen cutting edge. The adjustable front can be moved up or down and a coarse or fine shaving can be cut.

The STANLEY UNIVERSAL SPOKE SHAVE No. 67 has both Handles detachable so that either of them can be screwed into the socket on the top of the stock, thus allowing the Spoke Shave to be worked into the corners, or panels, as no other Spoke Shave can do. They are supplied with both a straight and curved bottom.

STANDARD THE WORLD OVER

Stanley Rule & Level Co.

EVERY TOOL GUARANTEED

Maxwell's Latest

is the "Champion High Speed Washer." This machine differs from the famous "Puritan" only in the driving mechanism. The

Champion High-Speed Washer

is run, as the illustration shows, by a lever. This lever also starts the balance wheel, which revolves four times for every stroke. The great momentum of this balance wheel helps to turn the dolly block and makes the "Champion" run very smoothly and easily.

It is sure to be a splendid seller.

David Maxwell & Sons : : St. Mary's, Ont.

"IMPERIAL" ANTI-FREEZING WINDMILL

FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary. Always fitted with 1¼ flanges unless other size is specified.

Fig. 18

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

CONGO
NEVER LEAK ROOFING
The NEVER-LEAK GUARANTEED ROOFING

Congo on Maryland Terra Cotta Company's Buildings—Baltimore, Maryland

We don't suppose you care a rap what Congo is made of—what interests you is *how long it is going to wear.* What it is made of interests us because we give with every roll a *Surely Bond Guarantee,* the like of which no other manufacturer has offered.

Herewith are a few of the features that make it possible for us to guarantee Congo 2 or 3 ply for *10 years.*

It never gets hard or brittle. It never breaks or peels off. It is giving as perfect satisfaction in Europe, India and Australia, where we ship thousands of rolls, as in America.

Congo doesn't run, rot, buckle up or shrink.

The caps, nails and cement which we furnish free, are the best money can buy

We don't use the old *tin caps* for Congo, but *galvanized caps* which never rust.

FREE SAMPLE

You can satisfy yourself as to its lightness, pliability and wonderful waterproof qualities by writing to-day for a Free Sample. As to its wearing properties—we guarantee them. Can any reasonable man ask more?

Marksmen are not Prejudiced Fools!

and when they see that the best scores are made with Ross Rifles, that sportsmen armed with Ross Rifles come home with the best bags, they naturally arm themselves with same rifles.

Dealers just as naturally and intelligently prepare themselves to meet the marksman's wishes, otherwise there is a lost sale in the effort to sell some other arm.

To sell the best rifle made to the marksman who knows its possibilities and wants it at a good profit is the simple A.B.C. of business.

Write for catalogue, price lists and discounts to the trade.

Sell Clark Heaters and Coal

Here's the "BIG HIT" Assortment

2 Leader Heaters
2 No. 5B Heaters
2 No. 7D Heaters

6 Dozen Clark Fuel Brickettes (Best Grade)

Some of these heaters you can sell as low as $1.20 and make a good profit.

The Proposition to Dealers is Mighty Interesting

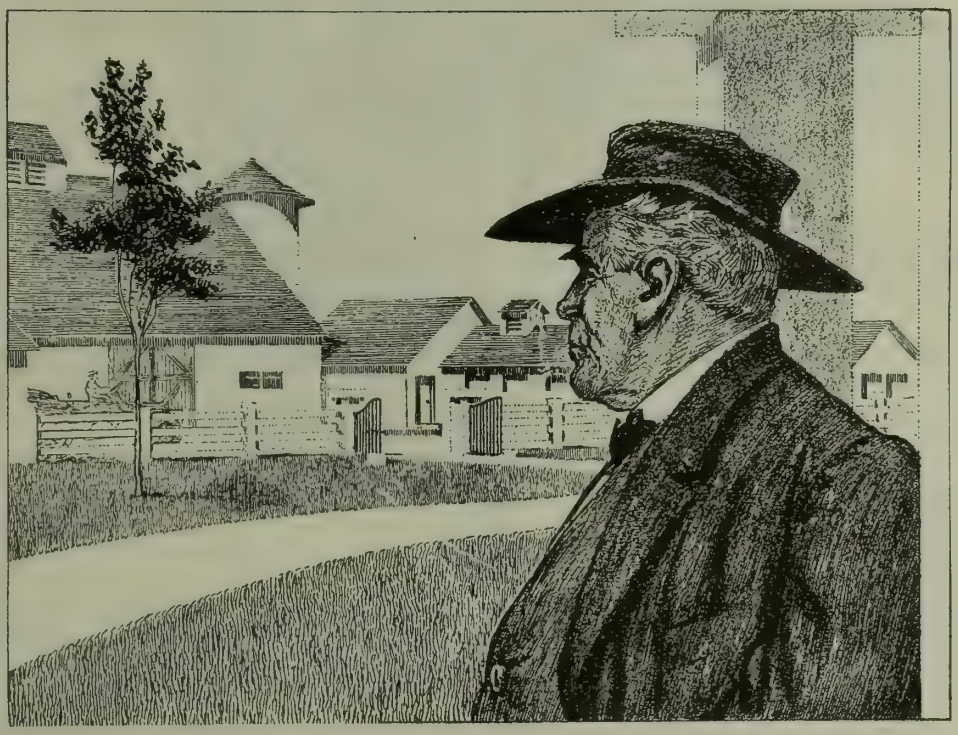
Its a proposition that means ready sales and liberal profits.

Everyone who drives or owns a carriage, wagon, sleigh, automobile—any kind of vehicle—needs them. Everybody traveling in cold weather needs them. The need is known—the demand is positive—It's for the dealer to supply the product and pocket the profits.

Clark Heaters and Clark Coal sell wherever displayed. The wonderful compactness, the unique principe of heat distribution, the neat appearance, the low price—all are factors that make Clark Heaters the unchallenged leaders.

Our guarantee goes with each, and the guarantee protects the dealer and the consumer.

And the coal is just such another proposition. To **prove conclusively** that it's better than other fuel, we give a guarantee, **with each brickette,** that it will give 25 per cent more heat than any other heater fuel made.



DEALERS——ACT NOW

The season is on. Send for the "Big Hit" assortment and add more dollars to your profit. Send to your jobber. Put a heater just inside your store—where customers can **feel** the goodness of it. "Warm them up" to the necessity of buying from **you.** We'll help.

CHICAGO FLEXIBLE SHAFT COMPANY, 250 ONTARIO STREET, CHICAGO

"Big Hit"

"Samson" Ready Roofing

The growing prosperity of Canadian farmers means more and better farm buildings, with all that that means to the hardware trade.

This is a good month to push "Samson" Roofing, for old buildings as well as new ones, and for every kind of building in town and country.

Many dealers have had splendid success with this line, which measures up to the "Samson" standard of quality, and allows a fair margin of profit.

We give security of satisfaction as well as good value. "Samson" goods are genuinely good.

The Thos. Davidson Mfg. Co., Limited

MONTREAL and WINNIPEG

DISSTON No. 5 HANDY SAW CLAMP

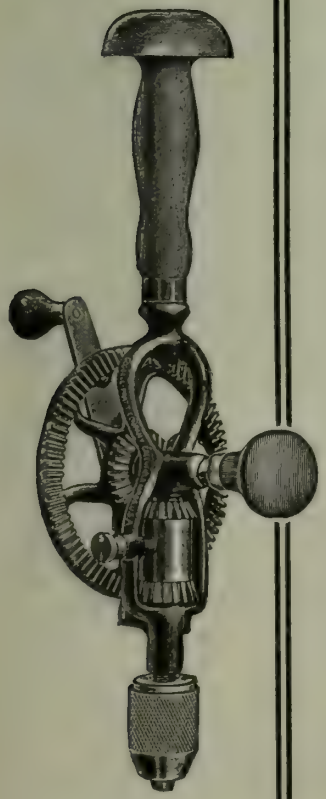
This No. 5 Handy Saw Clamp has been designed with the view of making it light, strong, durable and so compact that it will take up the least possible space in a tool-chest.

The material is grey iron. The arches are re-inforced to give requisite strength where needed.

The eccentric lever for tightening permits of quick and positive action.

There being three points of pressure on the jaw, proper contact with the blade is obtained along the entire length of the jaws, which insures the holding of the saw-blade firmly and rigidly in position.

Fastened to bench by screws
Length over all, 14¾ inches
Filing length of jaw, 13 inches
Weight of clamp, 3¾ lbs.



We also make the No. 6 Handy Saw Clamp, which is of the same pattern, with the addition of screw-lugs for fastening to the bench. These lugs fold snugly to body of clamp, thus taking up small space in tool-chest.

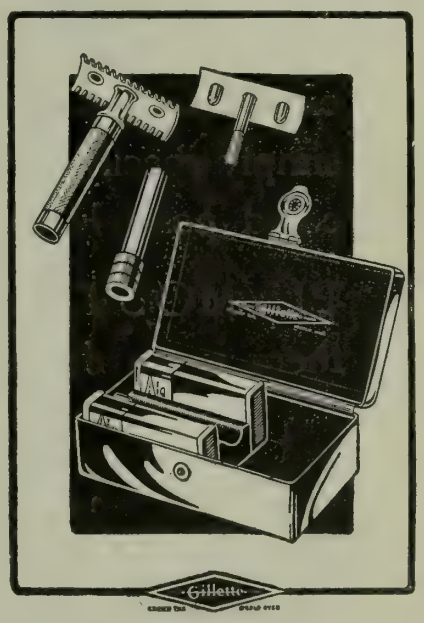
EVERY TRAP PERFECT

VICTOR TRAPS will not lose fur. They are sure to go and sure to hold. Every trap is warranted perfect. This means everything to the trapper. Fur prices are high and there will be a big demand for traps this Fall.

Be sure, therefore, that your trap stocks are complete.

Oneida Community, Ltd.

Niagara Falls, Ont.



Don't Rest With a Handful of GILLETTES!

Show an Assortment!

Go after the GILLETTE Christmas trade as if you really mean to get a good slice of it. There's no reason in the world why you shouldn't.

It's well worth going after, too, for retailers will make over a quarter of a million dollars out of GILLETTES this Christmas season.

As a Christmas "Specialty Leader" the GILLETTE Safety Razor is in a class by itself. Show us a man who wouldn't welcome a GILLETTE for Christmas—unless he already has one, and then he'd like a box of blades.

A well-arranged window full of GILLETTES, backed by the advertising cards we supply, is one of the most enticing displays you can put up. It will quickly draw new faces into your store, particularly if you feature the Christmas idea.

Go after the ladies' trade particularly. They buy thousands of GILLETTES every year for Christmas presents.

The splendid range of styles—standard, pocket edition and combination sets—and the magnificent gold, silver and gun-metal finishes of both razors and cases, make it easy to satisfy every taste. And the prices, $5 up, are just right for Christmas trade.

The more GILLETTES you stock, and the more you display in your windows and showcases, the more you'll sell—and the more customers you'll have coming back regularly for blades.

If you haven't stocked up yet, don't put it off another day. Order at once to insure delivery in good time.

Monarch
MALLEABLE
The "Stay Satisfactory" Range

A Perfect Range Would Be Built With Malleable Iron

By using Malleable Iron in preference to cast iron in building MONARCH Ranges, we have obtained two advantages. First:—The toughness of the metal permits a construction that gives a better service to the user. Second:—The same feature prevents breakage in shipping and in use. Malleable iron is unbreakable and can be worked cold under the hammer—that's how we can make such a firm construction.

The Malleable Iron frames on the MONARCH are jointed to the steel body with rivets or malleable lugs. This connection is solid and permanent. If we used cast iron it would be necessary to make the joints with stove bolts and caulk them with stove putty, which at best makes only a temporary connection. With the constant expansion and contraction of the iron, the stove putty loosens and falls out, thereby creating air leaks into the flues, which lessens the efficiency of the range.

The MONARCH oven is held in L-shaped Malleable Iron frames. With this riveted construction the joints of the oven to the steel body are practically air-tight and so rigid that they cannot open up, even after years of service. It is impossible for "air leaks" through joints like these.

The top frame being of Malleable Iron, is drawn down into the top of the steel body under pressure and riveted into place. There is no stove putty used in this joint—it is tight without it.

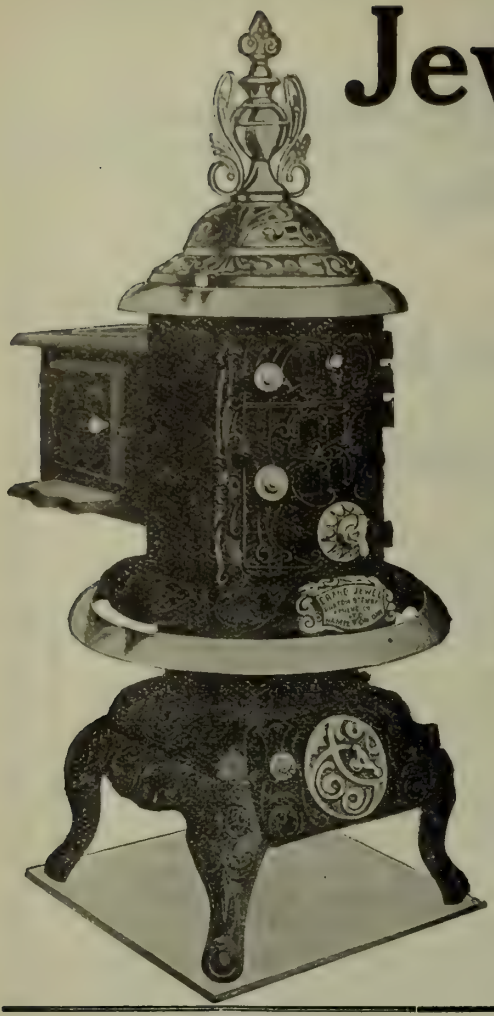
By making the plates and covers of Malleable Iron they will not crack or break, even when made of less thickness than those of cast iron. Nor will they warp with even three times the service that would ordinarily ruin cast iron.

All doors and door frames are of Malleable Iron. We use Malleable Iron in the MONARCH Range only where it will increase its actual value to the dealer and to the user of the Range.

How We Are Specialists

Instead of making all varieties of cook stoves, cast and steel ranges of different patterns, heating stoves and furnaces, our entire organization and equipment is employed wholly in making MONARCH Malleable Ranges.

There is but one quality, and as the operations in making all sizes of MONARCH Ranges are identical, every workman becomes an expert in the line of work he performs. By this specializing we can give you the MONARCH Range at practically the same price that you pay for a cast iron range that might be classed as a first-quality-article in its line.



A proper retail price can be maintained on MONARCH Ranges, for our specializing is to your advantage when you show how the range is made and why Malleable Iron is used.

"Our Plan"

We offer you an assistance in selling MONARCH Ranges by working directly with your customers. Not by simply mailing a few disconnected circular letters to a promiscuous list, but by a good application of salesmanship on parties who have given some indications of being in the market for a range, thus making sales you otherwise would not get. We originated this plan of assistance several years ago. It has been copied by other manufacturers, but never successfully, for it can apply only to MONARCH Ranges—a line of one quality throughout—from which our selling arguments are taken.

We have plenty of evidence to support every claim set forth here and we ask any dealer who will concede that there is a possibility for his trade in ranges to be improved, to write us for our catalogue, prices and full information regarding "OUR PLAN" of assistance.
MONARCH Ranges are now delivered from warehouse stock at Winnipeg with prices quoted F.O.B. that point.

If your jobber does not handle these goods, write for descriptive circulars and prices to

The
Queen City Oil Company, Ltd.
TORONTO

Mr. Hardware Dealer! —How many merchants do you know in your town?

Suppose you know only one round dozen.

If you can show them how to make their stores more attractive—you stand to make some money.

Because they'll do more business.

Before passing up this proposition figure it out for yourself.

There's a certain profit in MATERIAL for this dozen and—further profit in the ERECTION.

But, consider the effect these will have on the other merchants in your town.

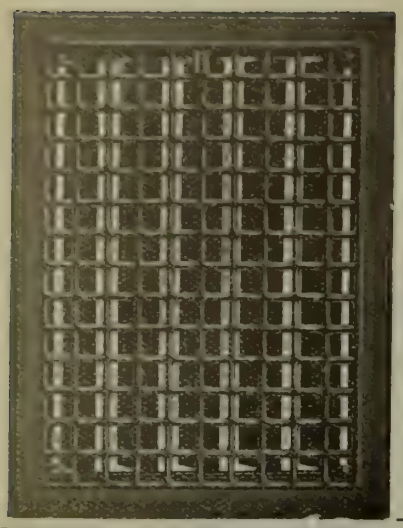
It will create a big demand for artistic interiors— for

METALLIC
Ceilings and Walls

—and every square yard erected means profit to you.

"Metallic" Ceilings and Walls are just as essential in the home.

They are FAR SUPERIOR to the ordinary decoration — MORE ARTISTIC, MORE ECONOMICAL and PERFECTLY SANITARY.



"Metallic" is the cleanest and brightest interior decoration on the market and is ABSOLUTELY FIREPROOF.

Write to-day for illustrated design catalogue—it means dollars and cents to you.

Send measurements of store or home for complete estimate of cost.

Manufacturers of "Eastlake" Steel Shingles and "Metallic Building Materials.

FIX UP YOUR CHIMNEYS

Even the best stove or furnace will be unsatisfactory if the chimney does not draw well. But the

"Zephyr Ventilator"

will give a good draft to any chimney. It will even allow the burning of soft coal in the stove, with good results.

We want you to sell the "Zephyr Ventilator" in your town. There is money in it, and the satisfaction that it gives will bring you new customers. **The "Zephyr"** cannot be excelled for ventilating the rooms of **Clubs, Steam Laundries,** etc. **The "Zephyr" makes high chimneys unnecessary.**

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Ridging No. 872 is a Good Seller.
It's Galvanized Steel at a "Wood-Price."

An energetic hardware dealer can sell a good many lengths of Ridging No. 872 in a season. Very few will choose to erect an ordinary wood ridge when the advantages of No. 872 are explained to them. For one thing it is much more ornamental than wood. And because it is made of galvanized steel, it is also several times as durable as wood. No. 872 is easy to erect. It is made on special machinery, in ten-foot lengths, and is absolutely straight. The lengths fit together accurately. No wood filler is required. And you can sell No. 872 at practically the same price as an ordinary wood ridge. How many lengths are you going to sell during the remainder of the year? There's a good margin of profit for you in each sale you make.

If you are a strong believer in quality you'll surely choose

"Brantford" "Roofing"

If Quality is a serious consideration with you—if you believe in providing your customers with the highest-grade roofing produced—you'll certainly stock up liberally with Brantford Roofing.

Brantford Roofing is for the quality-trade. The pure wool felt foundation is made to our own specifications. It costs us 33 1-3 p.c. more than the ordinary felt used for ready roofings. The saturation is 99 per cent. pure Asphalt.

Brantford Roofing is made especially to withstand the severe Canadian climate—and it has given unbounded satisfaction to those who have roofed with it.

The longer you handle Brantford Roofing the more enthusiastically you'll push it. It's a winner. And it's made by a firm who are loyal to the trade. Write us to send you samples and prices by first mail.

A Self-Selling Range

is the range most worthy of your attention. And that is just why you should be handling "Monarch Diamond" Planished Steel Ranges. Their good points are so numerous, and so plain to be seen that little or no argument is required to make sales.

MONARCH DIAMOND

HIGH GRADE THE DIAMOND LINE RIGHT PRICE

Planished Steel Ranges

burn any kind of fuel. They have large, roomy ovens that cannot warp or be in any way affected when in use by cold air currents along the floor or elsewhere. The BODY is THREE-PLY—two layers of heavy steel between which is a layer of asbestos. The FIRE-BOX is splendidly proportioned and is fitted with easily-removable duplex grate bars. The Front Key Plate is hinged, allowing access to fire for broiling, etc. Reservoir holds three pails of water, is made of heavy planished steel retinned inside. Fire Door is extra large; takes in rough wood; it is made double, outside nickel which does not tarnish.

No matter what line you have been handling it will pay you to look into the "Monarch Diamond" proposition.

Hardware Convention at Peterboro to be a Big Affair

Executive Committee of Ontario Association Ratifies the Details of Proposed Program—Window Competition to be a Feature—Former Canadian Invited to Deliver an Address—Travelers Have Added to Program — Concert Substituted For Banquet—Very Little Space Left in Large Exhibition Hall — Permanent Badge Adopted—Railways Make Concession.

The Executive Committee of the Ontario Retail Hardware and Stove Dealers' Association met at Toronto on Thanksgiving Day, all the members being present, as follows: D. Cinnamon, Lindsay, president; R. C. Chown Belleville; M. S. Madole, Napanee; W. J. Bell, Beeton; H. Occomore, Guelph; W. A. Rankin, Ottawa; W. F. Macpherson, Prescott; R. H. Blackmore, St. Thomas; C. W. Conn, Tillsonburg; John Caslor, Toronto, treasurer, and Weston Wrigley, Toronto, Secretary. D. Brocklebank, Arthur, chairman of the Mutual Insurance Committee, was also present.

The secretary reported that arrangements were well under way for the sixth annual convention to be held at Peterboro, Feb. 21 to 24, 1911. The armouries have been secured, a hall 176 x 80 being available for the exhibition with a meeting hall upstairs and an office also available for the secretary and treasurer. A large hall in the Collegiate Institute building adjoining the armouries is also available for special gatherings where an attendance of over 300 is expected. The reception committee of the Peterboro City Council had advised that accommodation was available as follows: Oriental hotel, 200, $2 per day; National, 150, $2; White, 40, $1.50; Snowden, 30, $1.50; Grand, 40, $1.50; Albion, 50, $1.50; Maple Leaf, 30, $1.50; Montgomery, 20, $1.25; Royal, 12, $1; Windsor, American, King George, Munro and Crown, 10 each, $1 per day. A reception committee will meet the visiting hardwaremen at the depot and cards containing a map of the business section of the city, and locating the depots, hotels, public buildings, armouries, hardware stores and hardware factories, will be distributed.

The Oriental hotel has been selected as convention headquarters. A card will also be placed in all the leading hotels in Ontario advising them to avoid Peterboro during Hardware convention week.

Exhibition an Assured Success.

Although it is still about four months before the convention will assemble, the space in the large armouries has been almost completely taken up, only four of the seventy odd booths not having been allotted or held under option. E. F. Walter & Co., Montreal; the Glidden Varnish Company, Toronto, and D. J. Barker & Company, Picton, are the latest to arrange for displays. Yale & Towne, Stamford, Conn., are also expected to make a display, a feature of which will be an automatic demonstration of their goods in actual use. This is the class of displays that are being encouraged, displays that will enable visiting hardwaremen to learn more about the manufacture and practical uses of the goods they have in stock so that they will be better equipped to sell them intelligently.

The exhibition hall, which is 176 x 80 feet in size and has an area of over 14,000 square feet, is to be divided into booths with a frontage of twelve and a depth of ten feet. There will be about 70 booths, each constructed of framework, decorated with bunting and capped with a sign by the association according to a universal scheme of decoration. Some of the booths will also be fitted with wires for special lighting and mechanical devices.

An Interesting Program.

The exhibition hall is to be open every morning, from 9 to 12, but will be closed during the convention meetings in the afternoon. The convention will sit from 1.30 to 4.30 p.m., after which the exhibition hall will be thrown open until 5.30.

On Tuesday afternoon, however, the hall will be closed all afternoon, the convention being open to travelers, manufacturers, etc., who will be invited to give short talks on "Methods of Salesmanship." A committee of travelers will be asked to assist in making the "travelers' hour" a success.

On Tuesday and Wednesday evenings band concerts will be given in the exhibition hall. On Tuesday evening only retailers will be admitted and on Wednesday evening the general public will be allowed to attend, a nominal fee of ten cents being charged. On Wednesday evening the association members will be engaged in their "Question Box" discussion, which this year will be in charge of a committee of which Wm. Magladery, Liskeard, Ontario, is chairman. On Thursday evening retailers, exhibitors and travelers will fraternize together in a social evening in the Collegiate Institute, Walter H. Cottingham, president of the Sherwin Williams Co., Cleveland, who began at the bottom of the ladder as a hardware clerk at Peterboro, has been invited to deliver an address on "Price Maintenance" and in addition to this one of the best professional entertainers in the country will be secured to assist the "Hardware Chorus" and such trade talent as can be secured to make up an enjoyable program. Instead of a formal banquet with lengthy toasts and responses, a buffet lunch will be served during and after the concert.

Peterboro hardware manufacturers will name certain hours on Wednesday, Thursday and Friday mornings when their plants will be open for inspection.

Window Dressing Competition.

Several prizes will be offered for the best dressed windows of hardware, paints, stoves, etc., but the details of this part of the program will not be decided upon until the Peterboro hardware retailers have been consulted. Suggestions sent to the secretary regarding the competition will receive consideration.

PETERBORO ARMORIES, WHERE CONVENTION WILL BE HELD.

Fig. 1 shows Entrance to Convention Hall. Fig. 2 shows Entrance to Exhibition Hall, and Fig. 3 Indicates Location of Collegiate Institute.

Special Railway Rates.

Arrangements have been made for special railway rates, which guarantee a single fare to all attending the convention, the Association assuring the railway companies of an attendance of over 300. Part of the arrangement is that return tickets will be issued free to those desiring to return home at any time during the convention. Much friction was caused at the London convention a year ago by the refusal of the railway agents to issue free return tickets until 300 certificates had been handed in to the railway officer. This delay will not be experienced at the Peterboro meeting.

The two telegraph companies and the Bell Telephone Company were asked to follow the example of American tele-

graph and telephone companies in allowing delegates to convention to send personal messages to their home addresses free during the night hours. The request was refused, however, by each of the companies, on the ground that no precedent existed for this in Canada.

Permanent Badge Selected.

A gold plated button in the shape of a padlock was selected as a permanent badge to be worn by the retailers and travelers belonging to the Association. The design and finish is very attractive, it being copied after the button universally used by members of the retail hardware associations in the United States. One of the buttons will be given with each receipt for membership in the association for 1911.

The Gillette Safety Razor Company are, in addition, getting up a handsome badge to be worn by those attending the Peterboro convention.

Other Business.

An invitation to affiliate with the International Ironmongers' Association, with headquarters in London, England, and with branches in various European countries, was not favorably considered at the present time.

A suggestion that an organizer be placed in the field to secure provisional applications for policies in the proposed mutual fire insurance company was not accepted. A letter was read from Attorney-General Foy, to the effect that the statutes of Ontario are now being revised, and the suggested amendments to the Ontario Insurance Act would be brought before the commission shortly.

The secretary reported that the stove "lien notes" or "rent agreements" had been taken up by members in an encouraging manner, and a new issue had been printed, with several improvements over the first issue. Orders and requests for samples had been received from as far east as Nova Scotia, and as far west as North Dakota. The "rent agreement" is likely to be reprinted for use by several of the State Retail Hardware Associations. The "Blank form" committee are now working on a plumbing order form which will be suitable for general use by members.

The joint committee reported that they had been in correspondence with representatives of the Wholesale Hardware Association, and arrangements are being made for a conference in January to discuss matters affecting both jobbing and retail branches of the trade.

Action was taken on a complaint made by Purvis Bros., Sudbury. An explanation has been asked of the firm complained of.

Another complaint regarding the marketing of coal oil without any marks showing the weight, gravity, etc., was also dealt with.

Notice of the decision of the white lead manufacturers to discontinue marketing a second grade lead as "No. 1" in Ontario, as a result of the protest made by the Ontario Retail Hardware goods, such as silverware, cutlery, shav-

Association, was read and favorably commented upon.

An offer was received from F. C. Lariviere, Montreal, to give free consultation on business matters to members of the Ontario Association during the convention. Mr. Lariviere will remain in his room on hours to be announced, and any who desire advice on business system, financial matters, etc., can have same without cost.

Convention Committees.

W. F. Macpherson, Prescott, J. S. Weichel, Elmira, and E. A. Humphries, Parkhill, were requested to take steps to bring about the organization of a "Hardware chorus" during the convention. Another song sheet will be prepared with convention songs set to popular airs.

Press Committee, to issue reports of convention to daily press, A. W. Humphries, Parkhill, D. Brocklebank, Arthur, and D. Cinnamon, Lindsay.

Reception and Hotels Committee, to meet incoming trains, etc. Alderman Duffus, Aldermen Phelan, Alderman Turner, and representatives of Peterboro hardware manufacturing houses.

Membership Committee, to meet members at hotels and Armouries, and help enroll members, collect railway certificates, etc. Messrs. R. C. Chown, Belleville, W. J. Bell, Beeton, and H. Occomore, Guelph.

Exhibition committee, to supervise exhibition hall. M. S. Madole, Napanee, convener; superintendent of exhibits, Ray Best, Peterboro. The following members of the committee as officers of the day. For Tuesday, W. J. Bell, Beeton; Wednesday, C. W. Conn, Tillsonburg; Thursday, S. L. Adolph, Listowel; Friday, R. H. Blackmore, St. Thomas. A staff of doorkeepers special officers, etc., will be engaged to carry out the rules adopted governing the exhibition.

Resolution committee. H. Occomore, Guelph, convener; W. W. Bennett, Gananoque: W. F. Macpherson, Prescott, and Jas. Purvis, Sudbury.

Nominating committee. D. Brocklebank, Arthur; J. R. Hambly, Barrie; A. W. Humphries, Parkhill; A. Ballantyne, Brantford; and W. A. Rankin, Ottawa.

Question box committee. Wm. Magladery, Liskeard, convener; C. F. R. Taylor, Carleton Place; J. C. Wanless, Chatham; Geo. W. Ecclestone, Bracebridge; A. R. Dundas, Cobourg; and W. J. McMurty, Galt.

Program committee, to take charge of social evening, etc. Messrs. Morgan, Kingan and Higgins, Peterboro; R. C. Chown, Belleville, and H. J. Carter, Picton.

Discipline committee, M. S. Madole, Napanee, convener; W. J. Bell, Beeton; D. McNab, Orillia; W. A. Rankin, Ottawa; one exhibitor, A. A. Bittues, Montreal; and one traveler, S. E. Waffle, Smiths Falls.

These committees will stand subject to revision and additions at the opening of the convention.

Prizes Offered for Photos of Window Displays

Two photos of stove window displays have already been received in the competition for the four prizes of $5 each, in cash, offered for the best photos of window displays sent to Hardware and Metal. The prizes are divided into two divisions, one open to merchants and clerks in Canadian towns and cities over 5,000 population, and the other to competitors in places smaller than 5,000. The window competitions are as follows:

Competition Ending Dec. 1.

Places over 5,000—$5 in cash (donated by the Dominion Cartridge Co.) is offered for the best window display of sporting goods, and $5 for the best display of lighting fixtures, cutlery, stoves and house furnishings, builders' hardware, mechanics' tools or other seasonable lines. Special harvest or Thanksgiving displays, in which grain or farm products are used to trim the window will also be admitted, but the trim must be be secondary to the goods shown.

Places under 5,000—Two prizes of $5 each under exactly similar conditions.

Competition Ending Jan. 1.

Places over 5,000—$5 in cash for the best window display of holiday gift ing set-, cut glass, sporting goods, toys, lamps, tool cabinets, alarm clocks, watches, photographic supplies, or any other staple or special line sold in hardware stores.

Places under 5,000—$5 in cash for best window under exactly similar conditions.

Every photo which does not win a prize and is accepted for publication in Hardware and Metal, will be paid for by a year's subscription to Hardware & Metal or Busy Man's Magazine, each valued at $2, at the option of the sender.

Prizes for Best Holiday Ad.

Places over 5,000.—A prize of $5 is offered for the best newspaper advertisement featuring such holiday goods as cutlery, silverware, sporting goods, lamps, stoves, carpet sweepers, household goods or other lines usually sold in hardware stores. All that is necessary is to forward one or more clippings from your local paper with the name of the writer of the advertisement, and the name of the paper it was clipped from. Copies of booklets or circular letters used to push holiday trade will, however, be appreciated.

Photos and ads. should be postmarked not later than the date of closing the contest and addressed to the Editor Hardware & Metal, Toronto.

Leather Belting and Factory Supplies as Side Lines

The Hardware Store the Best Medium—The District Should be Looked Over Carefully Before The Stock is Bought, to Save Over-Stocking—The Value of the Personal Call — Side Lines Increase General Business—The Department Should be Well Displayed—

Merchants should pay more attention to leather belting and factory supplies as a side line. In the first place there is considerably more profit in these articles than in the majority of staples which nowadays are cut so fine that the profit is infinitesimal. In the second place, as we have pointed out before, the more departments a merchant has, the greater the chance of securing the combined trade of the district, and of making one article a leader for another.

Undoubtedly the hardware merchant is the correct medium for the sale of belting and factory supplies. Up to now, in the districts where factories are situated, and where the merchant has paid no attention to supplies, the users have to rely on the mill supply men, who can only call upon them at certain times, and if something is wanted in the interim, the factories have to send away for it, a course not very convenient, especially if anything is wanted quickly.

Leather belting does not always show signs of giving out in time for the foreman to have one on hand, and if a belt should go quickly, it means, probably, part of the plant being put out of business.

It is the same regarding any other factory supplies, such as steam gauges, oil cups, set screws, drill chucks and saws. Then again, it is a saving for a factory to make up as large a shipment as it can, when buying at a distance. Consequently, in an endeavor to do this, the supplies are allowed to run down so low that if any unexpected breakage happens there is nothing to replace it with.

Hardware Store The Best Medium.

It is evident from all sides that the merchant is absolutely the best medium for these lines, and this does not mean that it is necessary in starting to stock heavily. It must not be forgotten that a large stock of leather belting alone is somewhat costly. But the merchant can buy carefully. After deciding on taking up these lines, he should look over his district, and find out the number of shops and factories which should be customers of his. He should then go and speak to the heads of the businesses, or to the foremen, and find out exactly what they use, and a rough estimate of the wear and tear and breakages that occur during the year. Acting on this information he can lay in the stock with less chance of overstocking himself, and with considerable saving of expense.

For instance, if no one uses a 12 in. belt in his district, the dealer would be foolish to stock such belts. If he finds that they are all 6 in. belts, he should stock 6 in. belts, with perhaps one or two other sizes as a standby. And so on with other articles. Having gotten this stock in he should then proceed at once to let his probable customers know the fact. Filling his window with leather belts is not sufficient. Advertising in local papers is not sufficient. He should go right out to the factories and shops, and personally, or by means of a representative, tell the buyers what he has done, what he intends to do, and use all the powers of salesmanship that he has at his command. He will be met probably with the contention that they have always bought from a mill supply man, and barring certain objections, to which we have previously alluded, things are fairly satisfactory. Why then should the buyer go to him? The merchant must bring forth the arguments with which he meets the mail order house, and call attention to the fact that a mill supply man does nothing to maintain the upkeep of the district, does not circulate money in the district, and has done nothing to consolidate the buyer's own business. He should go on to explain the advantages of having a stock near at hand from which to draw, and also the fact that the buyer can see the very goods before he purchases them. Following this personal call he should give as much window-space to his lines as is possible, and on occasions he should make a very prominent display, and invite the buyers to attend, and thus maintain the interest of the factories in his store.

Apart from the question of considerably increasing the total revenue of the store by the aid of a profitable side line it must not be forgotten that the more customers that are brought into the store, the greater the chance of a sale, and a man who comes in for a belt or for some lacing may not stop at that but will see something else, maybe for his own private use, which will thus make an additional profit for the merchant. Then again his store gets talked of amongst the men in the shop. One will say to the other. "Where did the boss get this belt from? It seems a better one than the last." Then will come the reply, "from Mr. So & So the hardware merchant." Thus the name of the store gets talked about which is a fine advertisement for the merchant. Apart from that he goes up considerably higher in the estimation of these men, simply because he is stocking something with which they are thoroughly acquainted, and therefore his store assumes added importance in their eyes which means business when their own private affairs are concerned.

It is these little tributaries and streams which make a wide flow of business for the merchant, and the more he adds to such channels of strength the bigger he will get in a commercial sense.

Belting and factory supplies are not unwieldly stock, as the belting can be packed away easily and conveniently, while the factory supplies themselves are just like other tools. So far as display is concerned, it is astonishing how attractive a window can be made out of a few belts nicely rolled, and supplies attractively arranged around. It is not the articles themselves which make a window attractive. It is the harmonious way in which they are grouped, and if a merchant takes plain enamelware and arranges them attractively, he can produce an effect which is very much stronger than though he went to the trouble of designing something very spectacular, and produced an incongruous effect which spoilt the whole design. As we said, a few belts nicely rolled, supplemented with belt fasts, lacing, steam gauges, oil cups, set screws, waste, oil, emery cloth, drills, drill chucks, hammers, hack saws, etc., will make a very attractive window, and if the stock is all right a good business bringer.

It is a mistake for a merchant to let a good source of profit slip by him. Many a hardwareman sits on his chair and allows a large factory close at hand to buy thousands of dollars' worth of goods from a mill supply store hundreds of miles away. Those to whom this remark applies should at once get busy and look into the matter. They will find the belting manufacturers only too pleased to help him in any way, and to give them the necessary advice and encouragement when it is asked. Leather belting and factory supplies is a department that should be prominent in every hardware store where there is a factory nearby.

IRON INDUSTRY TO BOOM.

The Moose Mountain Mining Company, whose refinery near Sellwood, Ontario, has been operating on the dry process of separating ore by the use of magnets, is to be put into more active operation during the coming winter by the installation of a grondal plant, a wet process which consists in the crushing of the iron ore, passing it through a hundred-mesh sieve, and then washing the ore over an artificial dam, where revolving magnets collect the iron particles. After leaving the magnets the iron is briquetted and stacked ready for shipment.

It is expected that 2,500 tons of rough ore will be handled by the new plant daily, and that before spring 100,000 tons of iron will be ready for shipment. The refinery is operated by electric power generated from the Wahnapitae river.

D. D. Mann, of Mackenzie & Mann, was in New York this week attending the meeting of the Moose Jaw company, at which it was decided to increase the capacity of the Sellwood plant. John W. Gates, of the United States Steel Corporation, and Joseph Sellwood, Duluth, are also largely interested in the company.

Christmas Advertising Should be Planned Early

Not Only Should Suggestions be given of Suitable Gifts for Father, Mother, Sister and Brother, But Gifts Should be Tabulated According to Price in Order to Assist Buyers in Making Their Selections.

In preparing for his Christmas advertising campaign, the merchant must proceed along different lines to those he adopts at other times of the year. It is not necessary to impress upon the public the fact that buying is advisable or necessary. The average person is certain to have a list of friends and relatives for whom gifts must be purchased and is prepared to buy more or less extensively. The efforts of the merchant are devoted, therefore, to securing just as large a share as possible of this certain holiday trade. Yuletide advertising, to be effective, should proceed along the lines of suggestion, pointing out the advantages of selecting Christmas presents from the stock of the advertiser and giving convincing reasons why satisfaction can be assured. The wide awake merchant will give his most earnest efforts to holiday advertising because the competition he encounters is bound to be keener than at any other time of the year and, in order to keep his store to the front, ingenuity and perseverance are necessary.

The mind of the purchasing public is peculiarly susceptible to suggestion at Christmas time. The average person is generally in more or less of a quandary as to what Christmas presents to select. With father, mother, wife or husband, brother, sister and close friends to be provided for, the choosing of suitable gifts is often a problem that proves difficult of solution. "What are you going to buy for So-and-so?" is a query uttered between friends during the Christmas season, which generally meets with the answer: "Haven't the slightest idea. Can you suggest something?" Christmas shoppers are willing, and even eager, to consider suggestions. The merchant, who can bring before the public suitable suggestions in attractive form, is bound to reap the benefit in a splendid holiday trade.

Booklets Help Newspaper Ads.

An effective method adopted by many retailers is the distribution of booklets in which the matter is so arranged that suitable presents for different members of the family are grouped together. For instance, one page can be devoted to a list of articles from which a present for the mother of the family could be chosen. Another page could be devoted to men, a third to boys and a fourth to girls. The suggestions, to be effective, should be well displayed and illustrated, with descriptions of each article convincingly written. There is no use sending out a mere conglomeration of facts, crudely prepared and thrown together with no regard for appearance or the qualities that are calculated to catch the eye of the prospective purchaser. Christmas literature must be artistically arranged and the advantages of the particular line of goods advertised must be effectively demonstrated if good results are to be expected. The public demands this as the price of giving attention to the claims of the merchant.

Give Ideas as to Price.

The classified pamphlet, as outlined above, has been used to advantage in the past by hardware men. It could be improved upon in one respect. Although the public has generally only a vague idea as to what to get in the way of Christmas presents, it always has a pretty shrewd idea of how much is to be spent. The average person draws up a list of those to whom gifts are to be sent and then calculates how much it will be possible to expend on each one. It frequently happens that the articles are purchased with a view to meeting

Awarded first prize in Hardware & Metal's advertising contest (places over 10,000) last year. It could have been strengthened by a "personal talk" on the firm's ability to give prompt and efficient service during the holiday season. The ad. is an example of the unit system which makes each item distinct from other goods.

the financial estimate thus set. People will frequently inspect windows and visit stores until they find something that seems suitable enough and costs just about what they desire to pay. With this fact in mind, the merchant could render his Christmas booklet much more effective if he further classified his articles according to price. For instance, on the page devoted to suitable gifts for mother, articles costing a certain sum could be grouped together. Prices could be quoted on an ascending scale with opposite each figure a list of gifts that could be obtained for that amount. First would come, say, articles that could be purchased for fifty cents—small ware, kitchen utensils, useful gifts generally. Next would be grouped a number of slightly more valuable goods, listed, say, at seventy-five cents. From this point the scale would gradually be raised to the more attractive and more expensive lines, such as cutlery, cut glass, silverware, brass goods, etc. The same plan followed out with regard to each member of the family would make it possible for one to ascertain in a moment just what could be purchased for a certain person at the price which it is intended to spend. In arranging the matter in this way, the merchant would be putting into his advertising the approved method, now adopted by so many stores, of grouping together on one table all articles of a similar nature selling at one price.

Continuity of Purpose.

In order to get the best results the merchant must have continuity of purpose in his publicity propaganda. His newspaper advertising, his window displays and his circulars should all work together in the following out of a defined plan of campaign. If a circular were issued along the lines indicated, it would be advisable to have the newspaper ads. follow the same course to some extent, and to dress the store windows in accordance.

A case is recalled where a hardware merchant in Western Ontario used his windows to great advantage in this way. He first dressed his windows with articles suitable for boys, including tools, skates, shotguns, sleighs, knives and sporting goods. The whole made a display calculated to attract the attention of every youth, and insure strong recommendation from boys to their parents, to be sure and make selections from the stock on view. The next week a display of goods for girls was arranged, and so on, until each member of the family had been so honored. Coincidentally, attractive advertisements were inserted in the local papers, calling attention to the window displays, and advising purchasers not to make their selections until they had seen the stock presented. Much work was entailed by the carrying out of this plan, but the results fully justified the trouble and expense involved.

Fully as important as the adoption of progressive publicity methods, is the possession of a staff of clerks alive to the possibilities of the trade. A successful clerk must have ideas and be prepared to offer advice to customers. Frequently people walk into a store "just to look around." If allowed to roam around alone—as they too frequently are—the chances are that they will not see what they want, and leave for some other establishment. A live clerk can invariably make sales if he approaches these people in the right way. Their intention being to buy if they find something about what they want, he should ascertain if possible who the purchase is for, and about what price will be paid. He can then show a great variety of goods of the right description and price, and almost certainly strike upon something suitable. A clerk should be so well equipped with ideas and suggestions that customers could look to him for guidance in the selection of gifts. The merchant who desires to get the most out of the Christmas trade will see to it that his staff are prepared to thus fulfill one of the main essentials of salesmanship throughout the holiday season.

A prime necessity is to start in early with the advertising campaign. The early advertiser catches the trade. Get public attention first for your line of goods, and there is every certainty of liberal patronage. There is, however, not only the need to get ahead of competitors, but the very urgent necessity of stirring up the public to the wisdom of early shopping. The way in which so many people let matters slide until the very last moment makes the rush of business on the last few days so great that it cannot be handled to fullest advantage either for the merchant or the customer. Newspapers of late years have done considerable to stir the shopper out of the apathy which results in this wind-up rush, but it remains with the merchant to take the matter in hand and educate the public to an earlier activity.

The uncertainty that exists among purchasers as to what they want to buy arises to a great extent from the desire to show originality. Everyone knows that there are a line of goods which can be given to boys or girls, men or women, and which are quite suitable, but which have been given for years as Christmas boxes, and have become, in a sense, common. There are articles which, for instance, have been given to boys since Santa Claus made his first reindeer trip loaded down with gifts. When a person tries to decide what to give this year, these articles at once come to mind, and are generally dismissed as being too hackneyed a gift to be considered, provided something better can be thought of. To give an original gift is an uppermost desire in the mind of the average donor. The discovery of an article which could be classed as out of the ordinary, but yet quite suitable, will bring satisfaction to the purchaser, and even greater pleasure to the recipient.

For this reason it is wise for the merchant to display new lines. The hardware man who puts stress on his new designs and ideas in cut glass and brassware, or in any of the latest articles, will find that he has a ready sale. The public will take notice if he puts such goods to the front, thereby offering valuable suggestions for the selection of gifts out of the common. There is in every line of business a constant supply of articles which could safely be termed new. The farseeing salesman will keep these to the fore as much as possible. Furthermore, they should not be left for the customer to discover, but should be suggested whenever opportunity arises. A window display of unique goods will serve as a trade getter during the holiday season—or for that matter, at any season of the year. The public has a taste for novelties. The merchant can safely cater to this at the Christmas season without in any way hurting his sales in the established lines, for there is bound to be a constant demand for articles of common use, the new goods making a market of their own.

THE NEWSPAPER AD.

Many hardwaremen make very poor use of the space they pay good money to the local publisher for. They forget that the average customer takes it for granted that he carries a complete line of hardware and stoves and, as result, uses up good space in which to make general statements which cannot be expected to help sell goods.

Start off with a catch phrase or paragraph which is calculated to arouse interest and then follow up with the talking points of the article you wish to feature most in the ad. Talk in the ad. as you would to a customer in the store and if it is a stove that is being described say something like this:

A PROSPEROUS SUMMER OUGHT TO BE FOLLOWED BY A COMFORTABLE WINTER

We can help you to a comfortable winter by installing in your home one of our———— ranges or ——— base burners.

The ——— steel range is positively the best low-priced range in ———. It is not cheaply made, we simply make it a leader and sell it cheap. The materials that enter into its construction are the best and are carefully selected, being pig iron of the best quality. The oven is large and the bottom so braced that it will not warp. The fire box is sufficiently large and yet not so large that it is not economical with fuel. The dampers and drafts are arranged in a scientific manner and will give the best possible results. And the price is only $35.

Salesmanship Includes Educating the Customers

Buying Must Take Second Place to Selling, Says Merchant of Long Experience—Claims That the Dealer's Power to Suggest and to Talk Intelligently About His Goods Adds Greatly to His Business — Points Made by Ex-Grocer Carry Lessons for Hardware Merchants—Cannot Sell Specialties Unless They are in Stock.

By Henry Johnson, Jr.

The adage, "Well bought is half sold," has wrought an amount of harm impossible to calculate, and it should promptly be relegated to the scrap heap. For our business is primarily selling to which buying is a secondary incident—important, truly; but still secondary.

I can go into this another time in more extended detail, if desirable; but meantime let us adopt the saying of the successful Hebrew merchant: Any fool can buy goods, but it takes a merchant to SELL them." And while I am talking of this merchant, I'll tell you one thing he did. He was offered a line of shirt waists at 98 cents, or $1.06, or some such figure, and, while thinking over the proposition, he took one of the waists over to the sales counter and asked: "Girls, can you get $4.95 for these?" The girls examined the goods and came back with the unanimous verdict: "Of course, we can!" The waists were bought, advertised as a "great special," and sold—at $4.95 each. You can judge for yourselves whether this was a game of buying or of selling. I leave it to you.

Take Time to Educate.

The difference between the two stores in your town, with which you are familiar, lies in this faculty of SELLING as opposed to buying. You know they have about equal natural and locational advantages, but one makes money and grows, while the other about plays even and stands still. One is run on the selling idea, the other on the buying maxim. The aim of the one merchant is to get rid of his goods faster than they come in; the other is always looking for "bargains." One studies to tell what he has, attractively, in every way possible, while the other thinks that prices will talk alone — and so he does no particular talking himself. The one gives his customers so much to think about; keeps them so interested in what he is doing, that they have no time to listen for faint echoes of the doings of the other. The other "buys" at "right prices," and mostly keeps his stuff because he "is so busy buying that he has no time to advertise" and "cannot take time to educate the public."

This matter of "educating the public" is something to which caustic reference is frequently made, by the idle-minded, shallow-brained dealer. He does not think deeply enough to realize the great truth that we learn by teaching and that only through telling things to others do we learn them ourselves.

Was Against Suggestion.

The elder Johnson was a good merchant for his day; would be a good merchant were he alive to-day; but he had some fixed ideas and principles of his own. One idea was that we should advertise, telling people by the printed word what we had and the price thereof. Many things he could tell remarkably well and, with articles which he wanted to tell about, his descriptions were full, snappy, pithy, complete. Thus he was great on the tea, coffee, flour and kerosene which constituted the bulk of his business.

But another of his ideas was that when the customer came into the store we should be promptly courteous and attentive to that customer's wants, but should refrain from making suggestions; holding that it was not our business to "increase the customer's list of wants." He held that many worthy people would come for things they needed, and their needs might be modest—also their resources—so that it would needlessly embarass them, and maybe drive them away, to talk up articles which they might feel they could not afford. All of which may to-day be translated into the statement that any salesman, wholesale or retail, in any line of business, must be tactful; which means he must say and do the right thing at the right time and under the right circumstances.

A visit to a Big Store.

When it came my turn to handle the Johnson business something had quickened in me a desire to make the business a better business, an up-to-date business; and, as nearly as I can recollect it, the first inspiration came thru a visit to the once famous store of Chas. S. Slack, in Chicago. I remember well how staggering to my senses was the gorgeous display of groceries I saw there. I had no previous idea that there were so many things in the grocery line. Sardines at 60 cents, 75 cents, 90 cents, for a single box; goose liver sausage in short single casings packed in tin at $1.25 a tin; it was past belief. When I got back to our store a few days afterward I found a great change. It had been a "big store," but was now shrunk to very small proportions; and was as bare as it was small. Obviously, I had a long way to travel to reach a knowledge of the difference between what is called "long berry Mocha" and the true article from Aden or Mokha; and other things too numerous to mention "

Later on I began to reach out for some better trade. A sign which I had seen in a Chicago window read: "Table Luxuries" and it looked like a pretty sign to me. I gathered together the few items in our stock which might pass as the beginning of a fancy grocery stock and put them into a window. It was an old fashioned window, glazed with many small panes, but it was the background of the beginning. I remember that we had a few cans of hotel mushrooms, called for by those whom I looked upon as the high-livers; a modest stock of bottled mustard; a few bottles of "olive oil"; a little meat sauce, and a few other things. Surely a small line of "table luxuries," but the exhibit took the place of an untidy shelf of ——— soap which had spread its fly-specked length across that window—so was a step in advance. Best of all, however, this was the beginning of an effort to develop selling power; and in a few years that effort completely changed the character of that business.

Must Have the Goods to Sell.

A Chicago jobber whom I once consulted about putting in a small lot of candied cherries, Jordan almonds and angelica, told me: "You cannot sell fancy groceries unless you have them to sell," and therein ennunciated a great truth. The beginner must go slowly—especially on angelica—but he must have the courage to put in a few things such as are likely to appeal to the more fastidious and well-to-do trade; and, if he has that courage, he will likely have the further necessary initiative to SELL those things. And that is the way it works.

We learn by teaching. When a customer asks you what angelica is and you have to brush up your own knowledge so as to tell her you are "educating the public," to be sure; but note how your efforts educate yourself. And it is so throughout your entire business.

Good Profit on New Lines.

One great trouble with us is, has been, and I fear bids fair to be for some time to come, our fear to ask sufficient compensation for our efforts and enterprise. Whenever we got a new item into the old store the first question we asked ourselves was: "For how little can we afford to sell this?", which is a dangerous question. The proper plan is to add as wide a margin as the traffic will bear until the item is tested out. If it sells readily and becomes a staple, it is true that it can be handled for less: but even so, the price should not be reduced until there is plain evidence that you are asking too much, and that evidence you can recognize without special help. Also, conditions which may render it imperative on the part of your neighbor, whose trade is more of the staple, workingmen's or farmers' character, to reduce his price may not affect you at all; and my strong advice is that you be sure you have to cut the price before you do it.

Hardware and Metal Subscribers' Letter Box

Any Question on Trade Subjects Will be Answered by the Editor in This Department. Do You Want Any Address, Any Special Line of Goods, Anything Relating to the Hardware Trade? If Inquiry is of a Nature that the Correspondent Does Not Desire Publicity, He Can Use Initials or Nom de Plume.

Pitch for Roofing.

George A. White, Trenton, asks where pitch can be purchased in quantities.

Editor's Note.—The Paterson Mfg. Co., 361 King Street East, Toronto, market the entire output of pitch produced as a by-product of the Consumers Gas Co., Toronto. The price is 70 cents per 100 pounds in barrels of between 300 to 400 pounds, a better price being quoted in ton lots. The Hamilton Gas and Tar Co., Hamilton, are another firm from whom supplies can be secured.

Washing Machines.

A. Symon, Thessalon, Ont., asks for the name of the manufacturers of the One Minute Washing Machine.

Editor's Note.—White-Erhardt & Co., 121 Logan Avenue, Toronto.

Hot Water Heating.

"Hardware Merchant" writes: "I recently put in a hot water heating system in my store, but it is not giving thorough satisfaction. One of the branches is particularly sluggish and slow to heat up."

Editor's Note.—A Honeywell Heat generator would probably make the system work better. Write the Honeywell Heating Specialty Co., 1008 Eastern Townships Bank Building, Montreal.

Holiday Tool Cabinet.

"Subscriber" asks where he can secure cabinets of tools for sale as gifts to householders and boys during the holiday season.

Editor's Note.—Some jobbing houses have private brands of tools and specialize on the arrangement of cabinets suitable for mechanics as well as for the handy man who likes to do odd jobs around home and the small boy with a liking for manual training. Any jobber who does not assemble tool cabinets especially for customers can supply the cabinets gotten up by such manufacturers as North Brothers Mfg. Co., Philadelphia, or the Goodell-Pratt Co., Greenfield, Mass.

Mail Order Competition.

"A. G. I.," Swan Lake, Man., writes: "It appears to me that manufacturers of stoves who do not cater for this kind of trade and who must feel the effect of those low priced goods, could do the trade and themselves a lot of good by a careful investigation of the manufacture of these goods, the quality of the material used, the kind of workmanship, the weight of the material, the dimensions, etc., and compare them in tabulated form with their own manufacture and supply the trade with the facts. As it is now we have to decide that the regular lines of high priced goods are as good value as the low-priced goods, but it would be much better to know just where and how the difference is made up, and no one outside of a manufacturer can do this.

"There are other lines that could be taken up in the same way, and paint is one of them."

Editors Note.—The suggestions made are worthy of consideration by manufacturers of stoves and ranges. It is evident that mail order competition is being felt in some parts of the country and that there is a lack of information on the part of some who desire to put up a more intelligent fight to retain the trade of their community for the local stores.

The first thing a stove dealer who feels the competition of the catalogue houses should do is to compare the goods he handles with those pictured in the mail order house's printed matter and, in the case of a cheap stove, buy one himself, so that he can put it on his floor and use it to show to customers in comparison with his better grade goods. By measuring up the oven it will probably be found that it does not measure as much as is claimed for it by the catalogue house, and other deficiencies will also manifest themselves as a result of a careful comparison. The merchant is then in a position to show how his regular line is better value than the mail order range and he can prove it by a practical demonstration. He can, and should, advertise this better value and ask the people of his district to come and see the mail order range in his store before they send their money away to pay for goods they have not seen. And, if necessary, he can sell the mail order range at the catalogue price, plus freight, and cartage, the customer, of course, accepting delivery at the store, setting the stove up, and looking to the mail order house for the repairs. An offer of this kind will win confidence for the local dealer, and if backed up with a talk on quality and an offer to guarantee his own line, its a hundred to one that the mail order stove will remain on the floor as an object lesson.

Cheap stoves are, as a rule, made largely of scrap iron and, in consequence, cannot be expected to last as long as goods made by manufacturers whose good will is the reputation of their product. If they lose this reputation and good-will, their trade will fall off and they will be forced to market their product through mail order concerns instead of over their own name and through regular trade channels.

It is not an uncommon thing for stoves made by well known manufacturers to last for 30 to 40 years, while the cheap lines sold by some mail order houses will require repairs in three or four years. The catalogue house sells goods almost entirely upon a price basis and while some mail order houses may sell goods of fair quality the quality argument can be much better handled by the local dealer as he is in a position to actually show the goods and prove his statements.

Dry goods merchants may find it difficult to meet mail order competition on account of the larger variety of goods and styles offered by the catalogue houses, but even local dry goods men who show enterprise are winning out against the big city stores. Stove dealers therefore, with their own special lines having features not contained in the cheap mail order goods, have only themselves to blame if they let trade slip by them to the departmental stores. They have only to use enterprising methods of advertising and display to command attention and then follow up with common sense salesmanship methods. Their "quality talk" should beat the "price" talk in the mail order catalogue every time, providing he does not ask too large a margin of profit. Some merchants, of course, play into the hands of the big city stores by following the out-of-date methods of long profits and slow sales, whereas if mail order competition is to be successfully met, the modern method of smaller margins and quick turn overs must be followed.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Hammocks.—The Hohlfeld Manufacturing Co., Philadelphia, have published a handsomely catalogued list of their offerings in hammocks and couch hammocks for 1911. The catalogue is artistically designed, containing colored illustrations of each variety, over seventy being shown. Among the latest and novel lines shown are out-of-door bed hammocks, which are suspended from a frame with large canopy and are most comfortably upholstered; rigid back bed hammocks; davenport couch hammocks; collapsible couch hammocks; crib hammocks; upholstered couch hammocks of all styles and designs. Several new ideas in construction are shown in these lines. The patented spreader end castings on the pillow spreaders permit the use of three additional stringing cords. Nickeled brass caps on head and foot spreaders are an ornamental feature. Reinforced, double-center stringing in patterns where the divided suspension method of stringing is used, prevents sagging, and gives added strength. The catalogue is creditable in all respects, and displays to advantage the varied lines of the Hohlfeld Co.

A novel method of cutting down trees has been devised by a Berlin inventor. It consists in the use of a fine steel wire, which is looped about the tree and sawed back and forth by an electric motor. The heat generated is sufficient to burn a thin kerf through the wood. A tree 20 inches in diameter can be felled in six minutes. The charred butt of the tree may easily be marked with chalk, and the charcoal layer is so thin that it does not hide any decay or other defects in the wood.

CANADIAN COMPANY WINS APPEAL.

The Privy Council in England rendered an important decision this week which will no doubt be widely quoted in future cases involving disputes over the exclusive right to use certain words as trade marks.

It will be remembered that the Standard Sanitary Mfg. Co., Pittsburg, took action against the Standard Ideal Co., Port Hope, claiming that by long usage they had acquired the sole right to use the word "Standard" as a trade mark and that the Canadian company by using the word in their name and on their trade mark, had injured their business. The case was tried before the Court of King's Bench at Montreal, the judge favoring the Pittsburg company, and issuing an injunction to restrain the Canadian company from further use of the word.

An appeal was taken by the Standard Ideal Co. and the case has been awaiting a hearing before the Privy Council for over a year. The announcement of the award in favor of the Standard Ideal Company is, therefore, of importance to Canadian manufacturers, and the detail 6of the decision will be awaited with considerable interest.

PROMPT SERVICE AN ESSENTIAL.

The merchant who does not cater to his customers, to the extent of giving them prompt and courteous attention, should not feel surprised if his business fails to develop or even shows signs of falling off. One of the main essentials of the successful conduct of a retail business is to have the store service efficient. The customer demands this; if he does not get it, he goes elsewhere.

One day last week a Hardware and Metal representative dropped into a Toronto hardware store situated in a section where trade prospects undoubtedly are good. From outside appearances the store seemed well stocked and fairly prosperous. Inside, however, no one was to be seen. There being no bell or appliance of any kind on the door, the visitor's presence had not been announced, and no attendant came from the rear. After a number of minutes had passed, a young lady walked into the store from the shop behind and seemed surprised to find anyone there. The visitor asked for the proprietor, and, being informed that he was not in, walked out without any attempt having been made to learn his business. If he had been a customer, he would probably have been allowed to depart in the same way to seek another store, where he could find someone to look after him.

Such methods cannot help but lead to loss of trade. When a customer enters a store he should be made to feel that his business is desired. Unless all of the clerks are already engaged, the newcomer should be met at once and his needs ascertained. Nothing is more annoying to the customer, particularly if he is in a hurry, than to be forced to stand around while a tardy clerk carries on a protracted conversation with someone else, or busys himself with the stock. On Saturdays or during seasons when the rush trade is on, it will, of course, frequently happen that a customer will have to wait his turn. But in such cases the clerk nearest should greet him and possibly ask his forbearance until one of the staff is free to attend him. If a merchant does not maintain a large enough staff to insure the presence of at least one clerk in the store at all times, he should at least have an automatic appliance on the door to give notice of the entrance of customers. They cannot be expected to wait around in the hope that a clerk may chance to wander in and find them there.

BUSINESS MEN CO-OPERATE.

The building up of each city in Canada, and especially in the west, depends on the amount of confidence and good will borne by her citizens, and while it is possible for the Secretaries of Boards of Trade and Industrial Committees to do a certain amount in attracting manufacturers and making the city more attractive to live in, it really lies with the citizens individually as to whether a city will experience a continued era of progress and prosperity. The building up of Canada is not a one man's job, but that of all the citizens, requiring, of course, the aid of one or two men to organize and stimulate.

This has been exemplified in the City of Port Arthur, where in addition to the Board of Trade and Industrial Bureau, a live Commercial Club was organized this summer, one of the first big moves made by the Club being to invite the citizens and manufacturers of the city for a cruise around the harbor, visits being paid to five industries on the water front. Suitable literature had been prepared, showing the number of men employed, output of the plants, amount of horse power used, etc., and after returning, the party attended a Commercial Club Dinner.

And that the policy adopted is meeting with success is demonstrated by the fact that a new industry will be breaking the sod at Port Arthur next week, and six other industries are just closing negotiations for location in the city. The building permits to October 1, this year were $775,000, as compared with $570,000 last year.

Merchants in other towns should cooperate in a similar manner to that adopted by the business men of Port Arthur, who have adopted as their slogan, "Be an enthusiast, be an optimist, and be one."

METAL CEILINGS IMPROVE STORE INTERIOR.

A marked tendency of late has been the substitution of metal for the old time plaster ceiling. Metal has many advantages over plaster, both as regards utility and appearance but, from the hardware standpoint, the tendency is chiefly gratifying because it shows that merchants are getting away from the old idea of hanging a great variety of goods from the ceiling. The custom has not been entirely forgotten and many hardware stores can still be found which look like junk shops for the very reason that every possible square inch of ceiling room is utilized in this way. An unsightly appearance is lent to a store by a heterogeneous collection of lanterns, lamps and whips, dangling from the ceiling in all directions, obscuring the view of other goods and seriously interfering with the light. How much better by contrast is the more modern store with its handsome metal ceiling, from which is suspended a few lamps or lines of superior grade.

Appearance counts for much. While men customers would not be deterred perhaps from entering a badly arranged store, it is certain that women prefer to trade with establishments, which present a neat and bright appearance.

There are other features which accentuate the value of the metal ceiling. It does away with the danger of damage to goods through falling plaster or leaking water and in case of fire is a help in preventing the spread of the flames from one room to another.

HOW CUSTOMERS ARE WON.

"I've the best opposition in the country," said a hardware merchant from western Ontario to Hardware and Metal the other day. "He keeps a fair stock of staples, but is slow to display the special lines and seasonable goods which carries the best margin of profit. For instance, I had a display of ammunition in my window last month and did a tremendous business for our town, and not only did I have to supply my own customers, but also sold a lot of goods to men who usually buy from my opposition. He hadn't his stock of ammunition in yet, and so I got all the business."

And not only will the enterprising merchant who keeps his stock up-to-date get the profit on present sales, but also will he secure the regular trade of many whose custom he had not yet been favored with. A pleased customer will return and no one can be more pleased than one who has failed to have his wants supplied in one store and is able to get the goods required in another without the disappointment of having to wait for their arrival.

Your stock must be kept thoroughly up to date if only pleased customers are to pass out the front door of your store.

WESTERN BUSINESS CHANCES.

"Western Progress," issued by the C. P. R. information bureau, Winnipeg, tells of an auction sale of lands opening up a new townsite at 11 o'clock one morning, and at 3 o'clock the same afternoon ground was broken for a hardware store. This is a practical illustration of the fact that the hardware store, which handles supplies of even more importance to the new settler than food and clothing, is often in advance of the general store, and always ahead of the straight grocery and clothing stores in the new towns of the west.

In the current issue of "Western Progress," there are said to be openings for hardware stores at Cowley, Alta.; Candahar, Sask., and Jansen, Sask., and for tinsmiths at Cowley, Alta., and Sedgwick, Alta.

AVOID DEAD STOCKS.

There are many things in the trade that the retailer should avoid. One of them is the carrying of dead stock and particularly when the merchant cannot afford it. It always represents a loss because there's money invested in it.

Many dealers when offered a quantity price on some goods, snatch at it and tie up a lot of money. They never stop to figure out the interest on their money invested which would often more than repay them if they bought as necessity demanded.

There is still another way to look at the question. If a small dealer ties up considerable money in two or three articles he has not the means of getting a good assortment. Lack of assortment is often the cause of diverting trade to the mail order houses and in the end he loses more than he had gained by getting this quantity price.

Dead stocks are not relished by any merchant. The sooner he turns over his stock the better he likes it. Therefore it ought to be the aim of every dealer to see that all goods are disposed of in season. Summer goods should be moved out before too late and the same applies to the other seasons.

Avoid as much as possible the carrying of dead stock.

If you have any trouble in getting enthusiastic get out and rub up against people who are not built on the cold storage plan. Enthusiasm is contagious and you might catch a little of it.

Ideas are what count. If you cannot evolve your own, make haste to adopt some good ones from another source. Ideas you must have.

Don't stop with just being honest enough to refrain from picking a man's pocket. Be so honest that you would not think of keeping quiet about a purse you found on the street.

You can't get along with people unless you have tact. You can't develop your business far unless you can get along with people. With all your getting, get tact.

Straight Talks on Hardware Salesmanship

TALK No. 1 BY VICTOR LAURISTON

"Here's where the stove peddler has the advantage of me," says the hardwareman who deals in stoves. "He drives up to the farmer's house and dumps off his stove. He has just the one stove and it has the centre of the stage. In all the landscape there's not one unfamiliar thing to distract the farmer's attention while the peddler talks stove. Here, when we bring in a man to look at our stoves, there's a dozen different stoves to begin with—and all the rest of the store besides."

To which I remark: "Take a leaf from the stove-peddler's book."

True, you've got your store, with its thousand and one counter attractions to the stove you're trying to sell. Here, too, you must do most of your selling. Your problem is to duplicate, as far as possible, the conditions so advantageous to the peddler.

Just let's talk stoves—nothing but stoves. You have sold hundreds of stoves. But you didn't sell them by going about the job as though you expected to sell a dozen.

Here comes a man stove-hunting. He wants a heater. You may have a dozen different heaters lined up on exhibition. This man is going to buy only one of them.

Why, then, should you show him each stove in turn, dilate upon the merits of all in equal degree, and in the end as much as say: "Here's our assortment, take your choice?" Will that sort of salesmanship sell stoves? It never sold any to me. Ten to one, your customer, unable, from the very indecision you yourself have so carefully cultivated, to make a choice, won't buy at all.

Show him your stock. That's business. But, while you're showing heaters, let him talk heaters. Draw out just what it is he wants—if he knows what he wants. When you know what he wants, take the best heater in the lot that comes nearest to filling his requirements, and nail your colors to that heater. If he doesn't know what he wants, make a selection for him and push that selection. Your pushing will bring decisive results one way or another—he'll either fall in line, or else develop decided opinions against your choice that will help you to make a better one.

In short, fling one of your heaters right into the centre of the salesmanship stage and keep all the others well in the background. In selecting the heater, be guided by the individual buyer's peculiar needs. Find out what he wants; give it to him as nearly as you can. Above all, don't try to sell him something that you're dead sure he doesn't want, for the simple reason that you're anxious to unload. If he buys, it will be through over-persuasion, and he'll shun you like a pestilence forever afterward.

When you give your man what he wants in quality, the only remaining question usually will be that of price. Occasionally, you'll miss fire through pinning your faith to the wrong stove. Occasionally — and this will happen oftener—you'll have ultimately to sell a cheaper stove of the same general type as the one you're pushing. But the stove you push will have, mentally, at least, the centre of the stage. Instead of giving a chorus by the whole stock, the programme will be a Style A heater solo, with the other members of the company supplying an inconspicuous accompaniment, their deficiencies merely serving to emphasize how splendidly the qualities of the bit of merchandise that figures in the limelight.

This stove talk applies to other things. It applies to everything you have to sell—to everything anyone has to sell.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin.—Advanced 1c.
Barb Wire.—Now $2.20.
Plain Twist.—$2.50.
Coiled Spring.—$2.20.

Toronto.

Zinc Sheets—Advance of 25c and 50c.
Old Materials — Advances noted in heavy brass and scrap zinc.

MONTREAL.

Nov. 4.—Barring an advance in tin of 1c there was no change in local prices this week. Canada plates and sheets are very firm due to the conditions in the primary markets, but there has been no advance in figures. It will be remembered that Canada plates were advanced a few weeks back. Copper is very firm in sympathy with New York, and it is much harder to get concessions for good sized lots than it was, while for future delivery holders are not anxious to quote. Spelter is very firm.

Trade all the way round is very good, and there is the usual bustle preparatory to the closing of navigation. Well assorted orders are going by the boats, while the arrival of imported coal proceeds merrily along. Users, except in the case of imported iron, are not buying very much ahead as there is no indication at present that supplies will be hard to obtain, or that the market is going to run away from them. There is a good tone all the way round, and a period of much greater stability generally is expected by first hands and jobbers.

The syndicate in London still control the situation in tin, and prices although fluctuating have again shown an upward tendency. It was thought in American circles that the coming closing down of the tin plate mills there would cause the syndicate to throw up the market, but apparently the consumption in America is not so important after all for there has yet been no avalanche, and the speculative buying in London goes on just as merrily. It is expected that the copper producers' statistics will show a large decrease in production and in stocks, and this will hearten the market. There is a much more confident feeling although outside New York there does not seem to be much of a rebound in sentiment as yet. Spelter maintains its strong position backed up by a well organized control and good buying. Lead is a little weaker again, and does not look so promising. There is more activity in the iron and steel situation in the States although business is spasmodic. Inquiries show that a large number of consumers are hesitating as to whether to buy just now or not. It is expected that the steel interest will show an improvement this month and that October will mark the lowest point in the depression for the year.

Pig Iron.—Extreme bustle marks the imported iron trade as the time for the better freights is now quickly passing away. Deliveries are being made as rapidly as possible, and warehouses are being put into shape for the winter's supply. It is evident that larger stocks will be carried this time, as last winter there was a shortage and users were seriously inconvenienced. The domestic furnaces are fairly well supplied with business. The market is firm, and we quote: No. 1, $18 to $18.50; No. 2, $17.50, at furnace; Middlesboro No. 3, $18; Summerlee, No. 1, $20.50; No. 2, $20; No. 3, $19.50.

There is a better tone in the States, and general confidence is expressed that conditions will show steady improvement from now on. Better business is reported although a lot of it has been attracted by concessions in prices. There is a greater demand for spot shipment which shows that stocks in consumers' hands are low. This is a healthy sign. Cleveland warrants are fluctuating and the market is not so bright as it was. Prices are pretty well held however.

Tin.—Owing to a continuance of the high figures in London local prices were advanced 1c and jobbing lots were quoted at 39, with concession hard to obtain unless for very big orders. Trade has been very good. Users have been holding off in the expectancy of a slide in figures, and the continued control of the market has upset their calculations. They have consequently been compelled to come in at the higher figures. It was anticipated in some quarters that the coming closing down of 76 tin plate mills in the States would cause a decline in London, but every sign of weakness in the market was met by renewed buying on the part of the bull operators with the result that figures got as high as ever, and the market closed strong each day. The tin situation continues a problem.

Copper.—Under good buying and a continuance of the better feeling in New York copper was very firm locally and prices on the whole were a shade stronger. Inquiries are improving, and there is a lot of business coming along when users have made up their mind that prices are really on the upward grade. It is expected that the producers' statistics will show such favorable figures with decreased production and decreased stocks that the market will go much higher. Producers and dealers are not pressing for business apparently expecting these higher values.

Spelter.—Spelter is unchanged, with very good trade doing. The market is very firm, and users are extending themselves somewhat as higher prices are feared. The syndicate continues to control the situation well in London while the buying is very evenly distributed.

Lead.—Lead is unchanged both for imported and domestic. Buying is more active and the situation is all the way round more lively than it was. The English market shows signs of weakness again, but after the recent strength exhibited this may be only temporary.

TORONTO.

Nov. 4.—The metal markets remain strong with a good demand in most lines. Copper is steady, the price being the highest in three years. The continued stability in copper is causing a general spread of confidence, and business is increasing.

There is a small increase reported in tin, with trade conditions exceptionally busy. The market closed strong. So heavy is the demand that some English firms are said to have enough orders booked ahead to keep them busy until July of next year. The increase in tin has been brought about entirely by manipulation in England.

It is announced that forty tin-plate mills have been closed during the past week in the United States, with a possibility of more closures being effected shortly.

The price of sheet zince has gone up 25c for 5 cwt. casks, and 50c for part casks.

Pig iron—There is no change in pig iron prices. Canadian No. 1 is $19.50; No. 2 f.o.b. furnace sellers at $19. Other quotations are: Middlesboro No. 3, $20; Summerlee No 2, $22.50; Cleveland No. 1, $20.50; Clarence No. 3, $20.75; Jarrow, $20.50 and Glengarnock $22.50.

Tin.—The tin market is very strong, and the local price has strengthened a little. Ton lots are bringing 39c, and the price for smaller bulk runs around 40c, although some higher quotations are made.

Plates and Sheets.—The demand for plates and sheets continues active. Rush orders are being received in such numbers that the jobbers cannot handle them. As a matter of fact, jobbers find it practically impossible to secure Canada plate at the present time. Orders placed with English manufacturers in June, for shipment the following month, are unfilled yet. Urgent messages asking for information as to the likelihood of orders being filled, often go unanswered. Dealers are becoming anxious, and seem inclined to blame the jobbers for the delay which thus ensues in the filling of orders for plates. The increase noted last week for sheets has been maintained, no change in prices having been effected this week.

Sheet Zinc.—There has been an increase in sheet zinc. The price quoted for 5-cwt. casks is $7.50 and for part casks $8.00, an increase of 25c and 50c. respectively.

Copper.—There is marked firmness in copper and orders are being freely

placed. The unsteadiness felt in the past seems to have disappeared, for the present at least, and buyers are acting without hesitation. Sales in the United States are large and this activity is reflected locally. The price remains the same but continued strength may bring about an increase.

Lead.—The price of domestic lead remains firm at $3.75 with an increase of 5c for imported lines. The condition of the market is good and trading is brisk locally.

Spelter.—Last week's prices prevail, the range being $6.15 to $6.25. The demand has attained to such proportions that it exceeds the supply and, although spelter has not increased, the price of sheet zinc has gone up as a result.

Old Materials.—The tendency is toward higher prices, several lines of old metals showing increases. Scrap zinc is quoted at 4c by some and heavy copper and wire have stiffened, 11¼ and 11½ cents now being asked. Heavy red brass is bringing from 10¼ to 10½c, an increase of nearly 1c. Heavy lead which brought 2¾c last week is now quoted as high as 3c. Other lines are firm, being quoted as follows: Light copper and bottoms, 9¾; heavy yellow brass, 8c; light brass, 6c; tea lead, 2½c; No. 1, wrought iron, $10; machinery cast, No. 1, $14.50; stove plate, $13; malleable, $8; miscellaneous steel, $6.

HARDWARE MARKETS

MONTREAL.

Nov. 4.—Barring a cut in wire lines the market does not present any marked change over last week. Business is coming along very steadily, and orders are well assorted. One thing noticed in connection with the trade is that the range of articles in demand is much larger, in a general sense, than it was some time back. Articles are being called for that were left severely alone, and thus it is apparent that merchants are getting more confident as to the trend of trade, and that they are already feeling a much better distributed consumptive demand.

Cutlery, silverware and general fancy lines are in good demand and some orders have been marked with the injunction to ship as quickly as possible, showing that merchants are anxious to get their stock in, so as to look it over, and make proper arrangements for display. Lumbermen's tools are also showing better strength. There is still a good movement to builders' hardware. Skates and hockey sticks are now in full swing. Snowshoes for lumbering purposes are in better call.

The usual fall lines are in good demand in a sorting up way. Snow-shovels are now moving well. General household supplies, especially enamelware, are prominent. The market generally has a firm tone, and there is satisfaction expressed all the way as to the trend of business.

Cutlery, Silverware and Fancy Goods.—There is a splendid movement to the various lines, and many of the orders are marked rush, evidently with the idea of getting the goods in nice and early, so that the stock can be assembled in good time. Although cutlery, silverware and glass are naturally the most prominent, fancy articles in brass and copper, such as inkstands, trays, etc., are showing a much improved call. Cheap watches and clocks are also showing a splendid demand. Razor, shaving and manicure sets are in stronger request. Of the old standbys, carvers in cases, table cutlery, berry spoons and pickle frames and bon-bon dishes are mostly prominent.

Seasonable Lines.—The colder weather has tended to quicken the flow of weather strip, snow shovels, sleigh heaters and cold blast lanterns. Heating and lighting supplies are in fair request. General lines, such as food choppers, bread mixers, sad irons, carpet sweepers, and ordinary kitchen utensils, including enamelware, are in steady request. Jobbers are satisfied with the business doing. The market generally is firm.

Sporting Goods.—Skates and hockey sticks are now prominent, and jobbers report a very promising call. The orders are well assorted, and betoken plenty of confidence of merchants in the consumptive call. Guns are quiet but there has been a strong stimulation in the ordering of ammunition. Snowshoes, sleds and toboggans are still on the quiet side. Air guns for the Christmas trade are showing better movement. Gymnastic supplies and revolvers for indoor shooting are in fair demand.

Builders' Hardware—The movement is still very good for the time of the year. Dealers' stocks are light, and as there is plenty of finishing to be done a continuance of the call is expected. We quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside), $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Bolts and Nuts—Good sized orders are going through. Supplies seem in fair shape. The market is unchanged, and we quote: Discount on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅜ and less, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Heavy Hardware—There is still a fair movement in bar iron and steel. Other lines are on the quiet side, althongh the boats are taking good assorted consignments. We quote: Chain coil, ¼, $5.25; ⅜, $3.80; ½, $3.50; ¼, $3.25; 1, $3.25; anchors, 4½c lb. up; merchant bar iron and mild steel, $1.90; steam gauges, $1.50 each up; injectors, $4 to $18 each.

Lumbermen's Supplies — There is a better movement in general lines, although it cannot be said that the call has reached its proper volume by any means. Boot calks are in good demand, also axes and axe handles. Saws and snowshoes are on the slow side.

Wire—A reduction has been made in barb wire, plain twist and coiled spring. Trade is reported fair. We now quote barb wire $2.20, plain twist $2.50, coiled spring (9) $2.20, (12) $2.35, staples, bright $2.60, galvanized $2.85.

TORONTO.

Nov. 4.—All reports show continued activity in practically every branch of the hardware trade. Orders for builders' hardware continue strong and the stove trade is at its height. Seasonable goods are in demand and there is now considerable activity in Christmas lines.

The announcement made by the United States Agricultural department that the hickory supply is thinning out is not regarded with any concern here. The hickory supply in Canada is quite adequate and, as one jobber stated, all goods imported from the United States, in which hickory is used, are already priced so high that an advance is not anticipated.

Galvanized hollowware has been advanced in England but so far there is no change in the price of these lines here. An increase is listed in conductor pipe and eavetrough.

The market remains firm in practically every line with a good brisk demand and every prospect of continued activity.

Seasonable Lines.—The volume of trade is showing a steady increase and all lines are now moving with more or less regularity. Weather strip, sleigh bells, blankets, ice scrapers, snowshovels, stall fixtures are selling well. Household lines are all busy. Kitchen utensils and cutlery are in demand.

Builders' Hardware.—The seasonable activity in builders' hardware continues unabated. With the present fair weather builders are taking fullest advantage of the opportunity presented to carry on operations. It is anticipated that the future will see building work carried on more or less actively all through the winter months. "Contractors will be able to work the year around," said one jobber, to-day. "Interior work can be done in the most severe weather and that will create a steady demand for hardware supplies." The present season has seen building operations prolonged in all sections of the province and in Toronto things are still as busy as at any time during the fall. Prices remain firm.

Heating and Lighting Goods.—Nothing could be brisker than the stove trade. Rush orders are being received with such regularity that the manufacturers cannot meet them to the entire satisfaction of the trade. Warehouses are being quickly depleted and the end of the month, when the demand slackens, is

bound to find unusually reduced stocks. "A prominent factor has been the West-ern trade," said a local jobber. "We could have disposed of all our stock to fill western orders this year. When you consider that the Ontario and eastern trade has been quite up to the mark, you will realize how heavy the season has been." There has been a corresponding demand for heating accessories, stove pipes, pots, pans, coal scuttles, sifters, etc. Prices have remained the same.

Sporting Goods.—Although the demand is still satisfactory, some jobbers report a slight falling off in guns and ammunition. This was to be expected as most of the deer hunters have now gone north. Increased activity in winter sporting goods is more than making up, however, and the demand for skates, hockey sticks, snowshoes, sleds and toboggans is reaching seasonable proportions.

Heavy Hardware.—There is a good demand for bar iron and steel. Rivets, bolts and nuts are moving. Prices are stationary.

Tinware.—A general advance in prices has been made for conductor pipe and eavetroughing, the new schedule of rates being announced as follows: Conductor pipe, per 100 feet, 2 inch, $3.30; 3 inch, $4; 4 inch, $5.28; 5 inch, $7.26; 6 inch, $8.80; O. G. Eavetrough Square Bead, per 100 feet, 8 inch, $2.90; 10 inch, $3.15; 12 inch, $3.68; 15 inch, $5.25. The extra 10 cents per 100 feet for round bead trough is maintained.

Christmas Goods.—There is now a steadily increasing demand for Xmas goods and prospects point to a lively season. Dealers have confidence in their holiday trade and are stocking in the best lines.

Wire.—There is not a great demand in these lines at present. Although word of several decreases in Montreal prices has been received, the price locally has not been changed, as yet. A decrease in price is not unexpected.

HARDWARE TRADE GOSSIP

Ontario.

Greenwood & Weldon, tinsmiths, Toronto, have assigned to E. R. C. Clarkson.

Fergus may grant Beatty Bros., manufacturers of agricultural implements, a loan of $25,000 for 15 years, without interest, and a fixed assessment of $5,000, exclusive of school taxes.

The office staff of the Banwell-Hoxie Wire Fence Co., Hamilton, presented a cabinet of silver as a wedding present to a former member of the staff, Miss Margaret Ethel Caldwell, now Mrs. A. H. Weir.

The Sutherland Fence Co., Sarnia, are building a new factory, 150 by 100 ft., capable of handling a large output of woven wire fence. They will employ about 50 men when the new works is completed.

The Canadian Tin Co. will take up the reported tin discoveries in the Ottawa Valley, particularly on Chat Island. Tests of the ore found are said to have given results of ten, twenty-five, sixty and sixty-three per cent. tin.

D. McNab, Orillia, Frank Childs, Mathieson, and D. J. Barker, stove manufacturer, Picton, spent Thanksgiving Day in Toronto, attending a gathering of Mystic Shriners. Capt. Milton Adams, Picton, another hardwareman, was also present as a candidate for initiation, getting his feet blistered by crossing the hot sands of the desert.

The hardware stores of W. M. Pringle and Geo. M. Rice, Whitby, were entered by burglars, and several boxes of razors and jack-knives were taken, and $5 secured from the till of Mr. Rice. Twenty boxes of jack-knives, three dozen razors and $1.35 in money constituted the loss of Mr. Pringle. From the yard of Harry Neskal, a quantity of scrap brass and rubber was also stolen.

Quebec.

A. Lemieux, of Henryville, Que., was a caller on the Montreal hardware trade this week.

A meeting of the creditors of the Allen Schofield Co., Montreal, hardware manufacturers, has been called for November 11.

Owing to family bereavement Robert Munro, managing director of the Canada Paint Co., Montreal, was unable to be present at the dinner of the Canadian Wholesale Hardware Association.

Z. E. Martin, president of Martin-Senour Co., returning from Denver, spent several days at the Montreal factory. He will visit Winnipeg shortly.

Wilfred Dery, city representative of Starke-Seybold, Montreal, was presented with a handsome cabinet of silver from the staff on the occasion of his marriage. H. B. Seybold made the presentation, and congratulations were general on all sides.

Walter B. Ramsay, of A. Ramsay & Son Co., Montreal, was married last week at the church of St. George the Martyr, Toronto, to Alberta, daughter of T. B. Greening. The bishop of Toronto, assisted by Canon Cayley, officiated. Mr. and Mrs. Ramsay afterwards left for a tour of the United States.

M. J. McLaughlin, of the United States Steel Products Export Co., Montreal, was married last week to Miss M. E. Pratt, of Montreal, at the Archbishop's Palace, Montreal, by Archbishop Bruchesi. There was a large atendance at the wedding, the staff being well represented. Mr. and Mrs. McLaughlin left for an extended trip to the Pacific coast. A silver mounted claret cup of rock crystal was presented by the staff.

Maritime Provinces.

The Merchants Bank are to erect a new building at St. John, N.B.

The Empress of Japan on her last trip from Vancouver carried a consignment of stoves ordered by a merchant in Yokohama from the Fawcett Manufacturing Co., Sackville, N. B.

A proposition is on foot to move the Whelpley Skate concern from Greenwich, King's County, to Moncton, N. B. The council of Moncton has fixed the taxes on the industry at $1.00 a year for ten years, and promises free water. Moncton men are subscribing stock.

Western Canada.

A. C. Welch & Co., painters, Saskatoon, have sold to R. M. Scratch.

The Gadsby Hardware Co. have started a retail business at Gadsby, Alta.

Ferris & Simons, hardware dealers, Rosebank, Man., have sold to T. Dennison.

Butchart & Graham, wholesale dealers, Macklin, Sask., have been succeeded by Graham Bros.

Arthur G. Clark, former hardwareman, Grandview, Man., is down with typhoid fever at Vancouver, B.C.

C. A. Farquharson, hardware and furniture dealer, High River, Alta., has opened a branch at Blackie.

G. M. Watson, Rossburn, Man., has recovered from an illness which incapacitated him for about a month.

Birkelands, Ltd., dealers in lumber, hardware and implements, Harris, Sask., have sold to Wilson and Conway.

Hunter & Newton have purchased the hardware and implement business of Mr. McGillivray, Mather, Man.

The Winnipeg Wire and Iron Works have registered a partnership between Chas. E. Hammersley and Geo. A. Pepper.

W. Bournass who was burned out in the recent fire at Victoria, B.C., will rebuild at once. He is planning a modern business block of three stories.

A pile of rubbish in the back part of W. C. Stearman's hardware store, 546 Granville street, Vancouver, led to a fire which did damage to the extent of $150. The loss is covered by insurance.

W. M. Roberts & Co., hardware, Zealandia, Sask., are offering a $450 piano for the candidate who receives the most votes from customers of the store. Votes are given with all purchases. Great attention is being attracted by this novel scheme.

Hardware Trade Conditions in the Mother Country

Output Still Increasing—Settlement of Labor Disputes Gives Confidence and Brings Orders—A Boom in Silver and Electroplate—Many New Tinplate Mills Being Built—Export Trade to Canada Continues to Expand.

(Special Correspondence to Hardware and Metal.)

Sheffield, Eng., October 12.—The prosperity of the steel, hardware and allied trades continues unabated, and on every hand there are evidences of still further good business being booked. Nearly all the serious labor disputes which threatened to paralyse big sections of trade have been settled, or are about to be settled. Many thousands of boilermakers have been locked out since September and it is now reported that a settlement is at hand. Certainly a few of the never-satisfied object to the proposed terms, which are still not publicly known, but it is believed that the majority will accept the concessions made by the masters, even though every point has not been conceded.

This brighter labor outlook has already helped the markets, and orders both for raw and semi-manufactured material which had been held back owing to lack of confidence, are now being placed. Manufacturers are confident there will be a big accession of orders in the course of the present month.

I have alluded in previous letters to the extremely active state of the armament departments of the big works. Since I wrote, further big orders have been received from the Admiralty, and others are about to be given out. There is now over two years' work in prospect.

Silver-Plate Trade Boom.

A very striking feature of Sheffield industries is that there is a boom in the silver and electro-plate industries. Precisely how this comes about I cannot say. Prophets long ago said that such a thing was impossible, but here we are in the midst of it. There is not one competent man in the trades unemployed, and manufacturers have difficulty in executing the orders.

Two or three years ago an incredibly big demand set in for very cheap electro-plate, and for a time it killed, or nearly killed the trade in the better qualities. The feature of the boom is that for all qualities there is an unprecedented demand. Extensions of works are being made and plant which was in excess of requirements has been brought into use. A big proportion of the output is for export.

New Master Cutler.

The title of master cutler was formerly given to one of the chief manufacturers of cutlery, but nowadays it is awarded to any prominent manufacturer in Sheffield and district whether he makes steel, armaments or any other of the staple products of the city. The master cutler just elected is Mr. George Senior, an alderman of the city and a past Lord Mayor. He is a rich man who has made his fortune entirely out of the Sheffield steel trade; he is one of the largest importers of Swedish iron.

The Tinplate Trade.

The tinplate trade continues to expand. In the South Wales district no fewer than 34 new tinplate mills are being erected and it is computed that these will provide employment for about a thousand more men. Those who left the industry when it was in a depressed state are now returning to it. There are 22,000 people employed in the trade, and many of the manufacturers have orders which will extend over the next twelve months.

Another development in the South Wales district is the proposed establishment of coal washeries, coke ovens, blast furnaces, an electric power station, steel works, and tinplate and galvanizing works. It is proposed to spend a million and a half on the projects.

Trade on the Upgrade.

The Board of Trade returns continue to show that trade is improving very considerably.

British exports during September totalled £36,964,261, an increase of £4,163,237 compared with September of last year. The nine months British exports reached £318,577,044, an increase of £41,239,730 compared with the corresponding nine months of last year, so that we are more than a month's trade ahead of 1909 already.

Exports of manufactures of the United Kingdom totalled £29,011,586, an increase of £3,540,201. Cotton shows the biggest improvement; iron and steel come second with an improvement of £531,363.

Trade in Canada moves steadily forward. The quantity of hardware sent to the Dominion last month was 1,868 tons, an increase of 405 tons compared with September 1909. On the nine months' trade the increase is 4,357 tons.

The value of cutlery sent to Canada was £9,779, an increase of nearly £1,000 over the total for September 1909. The nine months' trade was of the value of £83,165, nearly £20,000 more than a year ago, and nearly £50,000 more than two years ago.

The steel trade with the Dominion has increased to a much greater extent. The value last month of steel bars, angles, rods, etc., was £25,018, nearly £10,000 ahead of the £15,558 total of September, 1909, though not such a big improvement over the £21,689 total of September, 1908. The increase in the nine months was £94,000.

Pig lead and manufactures of pig lead totalled 1,161 tons compared with 484 tons in September, 1909.

Unwrought tin totalled 52 tons, practically the same as in September of last year when the weight was 51 tone. The September, 1908, total was 65 tons.

The quantity of tinned plates and sheets taken by Canada was 2,894 tons, compared with 1,778 tons in September, 1909, and 1,870 tons in September, 1908. On the nine months' trade there is a slight decrease from 19,909 tons in 1909 to 19,776 tons in the first three quarters of this year.

Galvanized sheets totalled 1,522 tons last month, compared with 1,505 tons in September, 1909, and 1,177 tons in September, 1908. The nine months' trade amounted to 16,629 tons, a big advance upon the total of 11,380 tons in the first three quarters of 1909, and a still bigger increase upon the 9,546 tons in the corresponding period of 1908.

The total of wire dropped to 204 tons from 492 tons a year ago, and 273 tons in September, 1908. The nine months' total is 2,575 tons, compared with 3,424 tons in the corresponding period of last year, and 1,777 tons in the corresponding period of 1908.

Manufactures of wire totalled 246 tons compared with 202 tons in September, 1909, and 95 tons in September, 1908. The nine months' total is 2,338 tons, compared with 1,900 tons in the first nine months of 1909.

The drop in the export of new rails to the Dominion was remarkable. The total for the month was only 26 tons, compared with 5,392 tons in September, 1909, and 1,876 tons in September, 1908. The total for the nine months is 3,049 tons, compared with 9,086 tons in the first nine months of last year, and 8,756 tons in the corresponding period of 1908.

The Dominion took 9,697 tons of pig iron in September this year, compared with 13,682 tons in September, 1909, and 6,758 tons in September, 1908. The nine months' total is 96,759 tons, compared with 69,281 tons in the first nine months of last year, and 28,774 tons in the corresponding period of 1908.

R. A.

TO TEST SILVER MARKING ACT.

A charge has been laid against the T. Eaton Co., Toronto, for an alleged infringement of the Gold and Silver Markings Act. It is claimed that under the act each piece of silver in a set must be marked with the exact weight of the silver contained in that piece, which is not done in some lines of cutlery. The case will probably serve as a test of the act, the Eaton Co. claiming that the provisions have been wrongly interpreted in this prosecution. Handlers of silver cutlery will watch the outcome of the case with interest.

News and Methods of Canadian Hardwaremen

Novel Window Displays Reported by Several Correspondents Indicate That Canadian Hardwaremen are Doing Enterprising Work in Window Advertising—Kent County Dealer Uses Metal Siding on His Store.

MARKET CHANGES AT HALIFAX.

Halifax, Nov. 1.—The retail hardware business in Halifax is brisk at present, but the wholesale trade is rather quiet. The conditions, however, are not unusual for the season of the year. On the whole collections are reported to be fairly good. The expectations by the jobbers that there would probably be a reduction in the cost of cotton goods has not been realized. On the contrary cotton twines are reported one cent per pound higher this week. Duck has also advanced about five per cent. during the week. Another advance of fifty cents per hundred pounds is quoted on ready mixed paints. Boiled oil is firm at $1.45 per gallon, and raw at $1.40. Turpentine is steady at $1.10. Sheet zinc is 7⅝ cents, and sheet lead is quoted at five cents. Wire nails are selling at $2.50, and cut at $2.70. There has been a fairly good demand for ammunition this season. The sale of guns, however, was not as great as usual.

Some of the retail dealers have their fall discount sales on at present, and they report that business has almost doubled.

NOVEL HUNTING WINDOW.

Newmarket, Nov. 1.—One of the best sporting windows seen here for some time was arranged last week by a clerk in a local hardware store. A hunting scene was depicted, with a camp fire in the centre, and a wigwam in the rear. The background was filled in with leaves and branches of trees, giving a natural setting to the whole. Guns, ammunition, hunting accessories, snowshoes and articles in general pertaining to the chase were advantageously displayed. A novel effect was secured by having a red-shaded light placed beneath the embers on the fire, sending forth a glow that resembled flames.

BEGINS HOLIDAY CAMPAIGN.

Guelph, Nov. 2.—The Bond Hardware Co. had two cleverly designed windows for Thanksgiving. The larger window showed a duck hunting scene, the hunter in front firing at some ducks seen in the background, the figures being lithographed in natural colors. In the immediate foreground appeared a selection of shells, revolvers, knives and other equipments of the hunter.

The other window is a forerunner of the Christmas season. A large five pointed star, reaching from top to bottom, forms the background. In the centre is an electric light, while radiating from this in a circle, are rows of fine cutlery, these being continued into the points of the star. Drapings of yellow and white bunting form the canopy, while in the foreground carving sets and other gifts in silver, cut glass and cutlery, reflect the glitter of the electric light turned on in the evening.

An early shopping campaign will be among the matters to be taken up by the Retail Merchants Association shortly. The annual banquet will be held on November 10, when some outside speakers will be brought here.

SPECIAL CUTLERY SALES

Prescott, Nov. 1.—W. F. MacPherson used a novel idea in a window display made during a special sale of cutlery last week. He had a lot of last season's carving sets which he wanted to clear out so he arranged the goods in the window and, following his regular habit, priced every article in plain figures. Then he prepared a display card, drawing attention to the special sale, and suspended it in the center of the window by cords running through screw eyes in the ceiling to the top of the door. Whenever a customer entered or left the store the card shot up to the ceiling, and the attention of passers-by was attracted to the window by the moving card. Some even came from across the road to see what the moving card meant. And that the window sold goods is evident from the fact that $150 worth of cutlery was sold as a result of the display.

RECORD SALE OF STOVES.

Toronto, Nov. 2.—George Mathewson, 734 Queen street east, reports that his business in stoves this fall has been beyond all doubt the best he has ever known. No past season begins to compare with the record that he has established to date this year. This is due to the fact that he has featured stoves more than in the past, and possibly secured a larger share of the stove trade than he had previously done. In addition to giving one side of his store to place the stock, this merchant had given a window display of heaters and cooking utensils. He had not, however, adopted to the fullest the methods advocated as valuable features of a progressive stove selling campaign, and had not advertised his stock; which goes to show what good results can be obtained when the merchant follows wide-awake precepts, even to a limited extent. Had the dealer in question extensively advertised, and featured his stock, his sales would almost certainly have increased in proportion.

DIRECT TO CONSUMER QUESTION.

Halifax, Nov. 1.—A local dealer has strong opinions against wholesale selling direct to consumers over the heads of the retailers.

He makes the claim that if wholesalers sell to one consumer let them sell all their goods in that way. On the other hand, "if the wholesaler deems that we are necessary in the distribution of part of his goods, then let him sell all his goods through us.

"It is not fair that a wholesaler should take away our best customers and leave us with the worst; if he would make it a hard and fast rule that he will sell only through the retail trade, he would find us a great deal more friendly to him, and a great deal more willing to get behind the goods he turns over to us.

"You will remember that in the address of E. F. B. Johnston before the Wholesale Grocers' Guild in Toronto last April he said: 'A well known and authoritative author, Eddy on Combinations, says:

> 'The right of a combination of dealers to advance their own interests by mutually agreeing to decline to deal with any manufacturer or wholesaler dealer who should sell direct to their customers, has been broadly upheld.'

"Therefore, according to the above, if any body of retailers have trouble over this unfairness they have a perfect right to combine to object to handle a particular wholesaler's or manufacturer's goods.

"I maintain the wholesasler should rigidly protect his best friend, the retailer," he added.

PRACTICING WHAT HE PREACHES.

Kent Bridge, Oct. 31.—A. Hubbell, the local hardwareman, is a strong advocate of metal siding and roofing, and believes this line of goods has a great future before it. Incidentally, he practices what he preaches. His store, which is a corner store, north of the bridge, is covered with metal siding and roofing, making it a very convincing object lesson to intending purchasers of these lines.

LIVE BEAR IN WINDOW.

Owen Sound, Oct. 29.—Creeper and Griffin, hardware merchants, Owen Sound, go one better than the ordinary hardware merchant for their sporting goods window, as J. Minion says, it makes the people remember they want ammunition.

One large show window is artistically decorated with the branches of maple trees, the floor covered with maple leaves and brush. In one corner of the window stands the dummy figure of a man with a gun, in the other corner of the window is a live bear tugging at the end of a chain. The other show window is arranged with the best assortment of guns, rifles, revolvers, daggers and ammunition seen in a long while.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Nov. 1. The situation in the west has improved and the output in general lines is large. This is particularly true with reference to heating goods, the demand being as strong still as at any time during the season. The sales are brisk in all heating lines, including furnaces, ranges, heaters, gas stoves and oil stoves. With the near approach of cold weather, the business has become almost entirely of the "rush" order and jobbers are kept busy meeting the demand. Household goods are moving briskly.

The holiday trade is showing marked improvement. Merchants are now stocking up for the Christmas season and large orders are being placed.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

Paints and Oils.

Linseed Oil.—There has been a slackening in the oil trade during the past week. The prices remain firm, raw being quoted at $1.15 and boiled, $1.17. With the falling off in demand, there seems no prospect of further advances in the market.

Turpentine.—There is less activity in turpentine and prices are stationary. The prevailing quotation is $1.10.

Putty and Glass.—There is a good demand in both lines, quotations remaining firm. Putty in barrels, $2.90; in cases, $3.15; in kegs, $3.40.

Petroleum and Gasoline.—Silver Star, in bbls., per gal., 16c; Sunlight, 18½c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme Lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

NEW TACK FACTORY.

The Morrisburg Tack Manufacturing Company, Morrisburg, Ont., which was organized in 1909 and had its plant erected this year, is now in operation with a capacity of 5,000 pounds daily. The plant is located adjacent to the Canadian Sheet Steel Corporation's works, where their raw material is obtained. In their announcement they state that their product will be made from 24 x 31 inch sheets of even gauge and cut with the grain. Tacks cut from scrap metal, they claim, are cut across the grain and the heads fly off when struck by the hammer.

CLOCKS IN HOLLY BOXES.

The Western Clock Manufacturing Company, LaSalle, Ill., announce that from now until Christmas all the "Iron Clad" alarm clocks supplied by them and by the jobbers who handle their goods, will be packed in special Christmas holly boxes without additional cost to retail customers.

The box is an attractive one which can be used to advantage in window displays, it bearing the familiar "Iron clad" battleship design as well as the Christmastide holly decorations.

An alarm clock is a very suitable holiday gift and a display of the "Ironclads" in their holly boxes, should help to make the hardware store more popular as a place to purchase sensible and useful holiday gifts.

NEW COMPANIES.

The Independent Glass Producers, Limited, capital $200,000; to manufacture glassware and druggists' sundries; incorporators, R. W. Eyre, W. D. Earngey, J. J. Hubbard, M. M. Malcolm and M. J. Ferris.

THE WHITE MOP WRINGER

Do you realize what this TRADE MARK means to you? You can safely loan the wringer that bears it to intelligent housekeepers who mop floors, oilcloths, or carpets, and in nearly every case a wringer loaned is a wringersold.

Much more thanthis, each one sold sells several more.

Your jobber should have them. If he does not, write to us.

What's in a Can of Paint?

TRUE, there is a great deal. There is lead, zinc, linseed oil and other ingredients, all of which must be of high quality if the paint is good paint.

But there's something more than these. There's that "something," call it what you will, that SELLS the paint. It is reputation plus service, the strongest combination in the world.

That's why, in every can of

SHERWIN-WILLIAMS PAINT

there is a profit to the dealer who handles it. There is nothing lacking. The demand is there, created by aggressive advertising. The goods are there. The house is back of the dealer. And the prestige of 40 years is back of the house. What more convincing argument do you want than this? Doesn't it prove something to you? If nothing else, it ought to induce you to write for our attractive agency proposition on SWP, the finest prepared paint seller, and the leader in Canada.

Stove Salesmen Should Know Their Goods

Advertising Should be Done in a Natural Way—A Mistake to Carry Only One Line in Stock—Be Able to Discuss Competitive Lines But Do Not "Knock" Them — Diplomacy Needed in Salesmanship.

(Written for Hardware and Metal by J. N. H.)

The purchasing of a much needed stove may be avoided during the spring and summer months, and the old one be made to answer the purpose of preparing—in a fashion—the family meals; but when once fall, with its chilly winds and biting frosts has come, the buying of a new stove becomes a real live issue and "pater familas" is daily and hourly confronted with the proposition that the limit is about reached, and if "pumpkin pies, apple sass" bread and biscuits are to be made "like mother made them," a new cook stove must be forthcoming immediately.

The conversation then naturally turns to the kind, the name and the style, and from whom the purchase shall be made. Right here is where the sensible, pointed advertising that Mr. Stove Dealer has been carrying on results in landing Mr. and Mrs. Purchaser in the store to look over the stock on display. There is no question about it, the right kind of advertising pays, and will bring results. But there is only one kind of right advertising for the stove dealer, and that's the kind that has the dealer's own personality sticking out all over it. Talk in ink about your stoves, just like you talk to your customers on politics, religion or anything else. Such advertising as that is read, and that's all advertising is for, when it is read it has done all it can and if it lands the prospective purchaser in your store, it is then up to you and your salesmen to do the rest. Will you measure up to the occasion, or will the customer be allowed to slip through their fingers, and go over the way, to your competitor?

Keep a Varied Stock.

In order to sell stoves you must have them, and have them when the customers want them. You must also have a variety, and should bear in mind that no one manufacturer makes all of the good stoves. All manufacturers have some good stoves, and just as surely all manufacturers have some stoves that are not as good as certain patterns and sizes of other manufacturers, that sell at about the same prices.

Some dealers are forced by some manufacturers to stock their line exclusively, but the dealer is very unfortunate who is placed in this position, and loses many sales on account of it.

I think a dealer should have one main line, and confine himself to that in so far as possible, but to sell all the stoves that he ought to, he must have them to fit the ideas and requirements of his customers, to a greater extent than those made by any one manufacturer will.

Stove manufacturers' ideas differ as to just the kinds and styles that will sell. There are no Parisian or New York styles in stoves, every manufacturer is a law to himself, to a great extent, in bringing out stove designs. Very often they have mistaken ideas in this regard, and are sure to have unless they consult the dealer, who in turn gets his ideas from rubbing up against the consumer.

Know Your Stoves.

A successful stove salesman must know all about the stoves that he is selling and there is no line of goods that it is so essentially necessary to know all about as stoves, and on account of the time and exertion required to gain a complete knowledge of his stoves, many salesmen never do master the mechanical construction or many special and valuable features of the stoves that he is attempting to sell, with the inevitable result that sales are frequently not made, and he wonders why.

He should not only know all about his own stoves, but he ought to have a pretty thorough knowledge of his competitors' lines. This information may gradually be attained by reading ad's, catalogues and examining the stoves when opportunities present themselves; but while it is very necessary to know as much as possible about other lines besides his own, the information thus acquired should be used with great discretion, and in no cases should he speak disparagingly to a customer of his competitors' stoves, or it may react, and cause him to lose a sale and perhaps a customer; for it is a fact that people as a rule are not favorably impressed with this kind of talk.

All stoves have what the manufacturers call talking points, some little features peculiar to their stoves. Don't make too much of these, for many of them are absolutely worthless and in many cases positively detrimental to the stove. Even should you succeed in landing your customer by a profuse dessertation on some of these special features it will not be long before they find out their worthlessness and your worth as a salesman will, in their eyes depreciate and will work to the injury of your business. You can fool people, but people don't like to be fooled, especially in buying such an article as a stove which may last a generation or more.

Let Customers Ask Questions.

Many stove salesmen talk too much, and will not give their customers a chance. They seem to get the idea that their customer only just happened to think that he wanted a stove, and that he at once came to the conclusion that he did not have the slightest idea of the make, kind or style that he wanted and must therefore appeal to the salesman to take pity on him and kindly sell him what he ought to have.

Nothing could be farther from the real facts. As formerly stated, in nine cases out of ten the purchase of a stove has been a live topic in the household for sometime, and the customer enters the store with some well defined ideas about the stove he or she wants.

Give them a chance to look over your line, a chance to express their preferences, and in most cases you will not be long in discovering the one that seems to meet their fancy, but take it easy, for it may only be a "gopher," and it is wise to conserve your ammunition until the critical moment, when the real game is in sight. Many sales are lost entirely because the salesman swoops down on the prospective customer like an eagle on its prey, with an incessant "yap yap" of interminable talk, giving the impression that he knows exactly what the customer wants. He will give the customer credit for knowing the kind of house he ought to have, or the kind of wife he should marry. He may even know all about managing railroads or financial or industrial establishments, but when it comes to the stove, that's different; I, Me, Mr. Salesman, am the great and only one who knows all about the kind of stove he ought to buy and if Mr. Customer will just line up against the wall and when I have indicated the stove and price, if he will merely pull his wad out and settle the bill.

There are two kinds of stove salesmen that are dead failures; one is the bubbling, babling incesant talker, and the other the clam. The latter doesn't know anything about the goods, and don't seem to care whether a sale is effected or not—there's the stove—the price is $50—take it or leave it—I don't care which.

OLD RATE RESTORED.

Some time ago the German syndicate of enamelware manufacturers announced that the charge for packing cases would be raised from 1s. to 2s. The British importers protested with such good effect that P. Winckler, Hon. secretary of the syndicate, now announces that for British home trade the price will remain at 1s. until the end of 1911 at least.

AN ADVANCE IS MADE.

It is announced that English manufacturers of galvanized hollowware have agreed upon a general advance of prices. No uniform scale of increase has been given out. One manufacturer has put on 10 per cent., and has notified his customers to that effect. It seems probable that the advance will range from 7½ to 10 per cent. The scale has not been given out, as the manufacturers who attended a recent meeting at Stourbridge pledged themselves to secrecy concerning the nature and extent of the increase made.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

Iver Johnson's Arms and Cycle Works

No. 33

CHEAP AT TWICE THE PRICE.

"Paint cheap at twice the present price." This is the line of talk advocated in the latest bulletin of the Paint Manufacturers' Association of the United States to the various travelers. No better or more convincing argument could be set forth to the consumer, especially when it is backed up by one or two little comparisons as to the relative values of paint and other commodities. We need only, this time, take the case of the property owner.

Presuming that the merchant has thoroughly convinced a probable customer that paint is the only thing he can use to preserve his house from deterioration, and to maintain its value in the eyes of a prospective buyer, in addition to maintaining its pleasant aspect to those who are dwelling therein, he has, maybe, to meet the argument that paint is dear, especially now that it has gone up in price.

How can he best do it? Ask the property owner how much he paid for his timber, telling him at the same time to contrast the difference between the cost of the tree on the stump, and the cost of the same tree manufactured into building lumber, and he will begin to think that after all this timber is worth preserving. And then draw attention to the fact that in preserving this valuable timber and conserving its value as a selling proposition, that the paint itself is but one-third the cost of the operation—that labor takes up the balance. Lumber has advanced approximately 85 per cent. during the time paint has advanced 35 per cent. Does it not strike a property owner that his timber should be well looked after?

Considering that paint not only preserves timber, but that it insures the owner getting back a fair return for his outlay, maybe making it a most profitable investment indeed, paint is undoubtedly cheap at the price, and if, when the dealer is tackled on the point, he emphasizes it, the customer will be convinced likewise. If the merchant, however, evades the point, and does not boldly take the question up, then he, by his half-hearted arguments, gives the impression that after all paint is too high.

The householder who shakes his or her head at the cost of a tin of varnish stain, should be told that compared with the advance in the cost of household commodities the increase is of little moment. Flour, bacon, eggs, lard, all these things show nearly double the in-

You can make more money and gain more reputation selling

ML PURE PAINTS

Because they are advertised, so your store gets the good of the advertising.

Because they cover better with two coats than the best of the other paints do with three.

Because they justify every claim you make for them when you talk to your most particular customer.

WROUGHT PIPE

Quality dominates M.R.M. Pipe. Every length is given a test of 500 lbs. hydraulic pressure to the square inch before it leaves our mill. This is a test the pipe will not meet with in actual use.

All Bundles Tagged M·R·M CO. with our Trade Mark

THE MONTREAL ROLLING MILLS CO.
MONTREAL

crease in percentage than paint, and yet paint, if bodily health is to be considered worth preserving, is just as essential.

The average consumer is open to conviction, and if tackled properly will not object to paying a certain price for a thing, even though he may be prejudiced because years ago paint was so much cheaper, or because he had been dealing with a merchant who had not the courage to raise his prices when the occasion demanded, and is now out of business.

Boldly take the view that even now the customer is getting a good article too cheaply, and that the trend is for paint to continue to advance rather than to fall back. Hammer on the point of quality, and that no man can expect to get quality for nothing. "Paint cheap at twice the present price" should be the slogan of the merchant, and if argued properly the customer will be convinced likewise.

PAINT AND OIL MARKETS

MONTREAL.

Nov. 4.—Barring a hardening in turpentine, although local prices are not as yet generally changed, the situation in the paint and oil markets remains very much the same as last week. Linseed oil fluctuates every now and then but this fluctuation does not mean any sign of a relief in the tension. All the other lines remain firm in sympathy.

Trade is very good. Sorting up orders are being booked all the way round, and the aggregate volume of trade is very good, if anything above the average. Outside painting is being pushed vigorously all over the country, and there are evidences that the work will be continued until the weather absolutely forbids. There is an evidence of heavier stocking up by some merchants evidently on the belief that paint and oil are billed for even higher prices, and they do not intend to be on the wrong side of the fence this time. There is no doubt that if the present movements in oil and raw materials continue liquid paints, varnish, etc., must go higher.

Turpentine.—Owing to the disturbances in the South, turpentine became very firm in tone, and this was reflected in the markets locally. Although prices generally were not changed, yet in some cases one to two cents were added especially for small jobbing lots. The demand is very good considering circumstances, and we quote $1.01 to $1.04.

Linseed Oil.—Linseed oil presents very little new features. There is still the same scarcity of seed, as no one has found any big stock hidden away, while the reluctance of holders of the oil to part grows more and more evident as time goes on. Buying is naturally very cautious, but considering all things it is stronger than many would think possible under the circumstances. The English market is very firm, and the fluctuations which occur are not due to any signs of weakness but rather to the tension of a very firm market. We quote: $1.08 to $1.10 for raw, and $1.11 to $1.13 for boiled.

White Lead.—The market is unchanged from last week. There is a very strong tone in evidence, and higher prices are anticipated. The demand is good, and heavier consignments are being taken as the winter freights approach. We quote: $6 to $6.50 according to brand.

Varnish.—There is a good demand for what is called package goods. Varnish in tins both large and small are very popular. The larger users such as the implement, carriage, and piano makers are buying well probably in anticipation of a further advance.

Putty.—The demand shows improvement as the close of navigation approaches. Putty is included amongst most assorted orders. The market is firm, and we quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Nov. 4.—Prices asked for linseed oil and turpentine remain firm and there seems to be no prospect of immediate change. The demand is falling off, orders being given only where the need is imperative. There is no particular desire evidenced by holders to dispose of their stock.

That linseed oil is bound to remain high in price is shown by the high price prevailing for flaxseed. As much as $2.75 has been paid for seed this year, while from $1 to $1.25 per bushel was regarded as a good price in Ontario a few years ago.

Linseed Oil.—Quotations on oil run from $1.10 to $1.12 for raw, and $1.13 to $1.15 for boiled. A further increase within a short period is not unexpected. In view of the high price, there is little demand, and trading is light.

Turpentine.—The price of turpentine has remained firm, despite outside fluctuations, and an increase in the south. Quotations run as high as $1.07, but the general price is $1.05, ranging from there to $1.01, the lowest figure quoted.

The boost in prices in the south is partially due to another storm, less violent in nature than the preceding one, along the Southern States' coasts. Stocks at Savannah and Jacksonville are light, indicating that present prices will be maintained. Private correspondence from these points goes to show that the American naval stores and the Standard Oil Co. have been buying up all that has been offered at a price that would make it cost within a few cents of $1 per gallon in carload lots laid down in Toronto.

EVERLASTIC

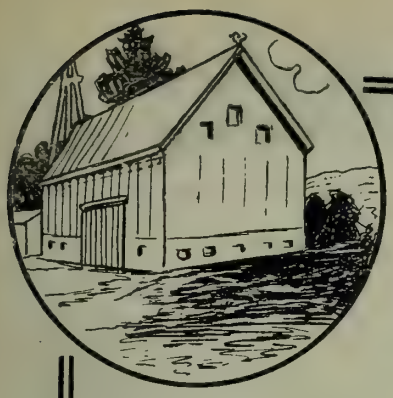
REGISTERED

Quick Drying Floor Varnish

is a Brandram-Henderson specialty. It will do justice alike to soft wood floors unpainted, painted or stained, or to the very finest hardwood flooring. Note these qualities:

It dries hard and really comes mighty near being "everlasting."

It is tough and "elastic," and does not easily scratch or mar. It dries dust-free in about eight hours, has a fine lustre and can be walked on next day after application.



EVERLASTIC is one of three splendid Household Varnishes which should be stocked together, the other two being Dependon Light Hard Oil Finish and Gold Medal Inside and Outside Varnish.

These three Varnish Specialties are put up in extremely handsome lithographed cans,—and we furnish you with an attractive hanger in colors.

Write to-day for prices.

Canadian Oil Companies, Limited

Toronto Montreal St. John Winnipeg Calgary

White Lead.—Pure white lead is still quoted at $5.90 to $6, with "Government standard" at $5.65. The predicted advance has not yet materialized, but it is still promised. Jobbers would not be surprised at an advance within the next month. Trading is brisk.

Castor Oil.—There is a steady demand, prices remaining firm.

Varnishes and Japans. — The new prices set last week have been maintained with no falling off in sales. Large users are buying freely and the demand for household purposes is brisk.

Putty.—No changes are recorded in putty prices. Trading is steady and satisfactory. Bulk in barrels is quoted at $2.20 and $2.25; in 100 lb. drums, $2.45; bladders in barrels bring $2.70 and in 100 lb. irons, $2.80; 25 lb. loose, $2.25; cased, $2.60.

Rosin.—The slight decline in rosin of the past two weeks has been replaced by a greater firmness and the market is now steady, prices being high. "T" rosin is quoted at $3.25 per hundred pounds.

Petroleum.—The petroleum market is steady and prices firm. Canadian prime white coal oil sells at 13c, American water white, 14c, Pratt's Astral, 17c.

Window Glass.—The glass season is at its height and business is brisk. Orders are coming fast, all being of the "rush" variety, due to the rapid approach of the close of the building season. No changes are quoted in prices.

CANADIANS WIN PRIZES.

The Sherwin-Williams Company's 30th annual convention held in Chicago October 24 to 27 inclusive was attended by about 300 officials of the company, heads of departments, district and sales managers and traveling representatives.

The main convention room on the sixth floor of the Auditorium Hotel was beautifully decorated with palms and flags with the Company's familiar "Cover the Earth" and "Brighten Up" signs in evidence. As a background to the speakers' platform was a panel finished attractively, and having such mottoes in gilt, as "Development—accomplished more by attempting more," "A brain to contrive, a tongue to persuade and a hand to execute," etc. The first of these two mottoes was the key-note of the convention. On the ninth floor the large dining-room was reserved especially for the Sherwin-Williams' delegates, where they met three times a day, and enjoyed their food and songs together.

Addressess were delivered on Monday by President W. H. Cottingham, H. A. Sherwin, chairman of the board, W. P. Fenn, vice president and treasurer, and A. D. Joyce, general manager of sales and distribution, these being followed by addresses by the managers of the various departments.

On Tuesday morning the large Chicago plant of the company, embracing a paint and varnish factory, extensive offices, a dry color works and a new white lead department were inspected, while a smoking concert was held on Tuesday evening.

On Monday and up until noon on Thursday, the convention was given over to district meetings, each district having a separate room to discuss the problems peculiar to it. On Thursday afternoon President Walter H. Cottingham gave an illustrated lecture on the Sherwin-Williams facilities, from the mines to the finished paint product on the house, also showing the various mechanical and social features of the company's plants. He concluded the afternoon with a very inspiring talk on the requisites for success in business, and especially for success in the Sherwin-Williams Co.

The convention was brought to a close on Thursday night with a banquet. An orchestra furnished the music for the company songs and all made merry. The speakers of the evening were: W. H. Cottingham, toastmaster; H. A. Sherwin; Rev. Wm. O. Waters; A. D. Joyce; J. W. Garson; W. D. Peyton; Walter D. Moody; Charles Folds.

C. C. Ballantyne, managing director of the Canadian business of the company, was presented with a handsome trophy, "The Runners," for winning the top notch district manager's honors, and W. S. Fallis, Winnipeg sales manager, also won a handsome trophy for winning the sales managers' top notch prize.

The representatives from the Toronto district who attended the Sherwin-Williams Paint Co. convention at Chicago, won this year, fo the first time, the trophy annually offered by the company for the highest percentage of sales. The party consisted of J. W. Benson, manager, and the following salesmen: C. A. Thomas, Berlin, J. J. Harkness, London, J. McMartin, Barrie; A. E. Cowley, London; and R. E. Stinson, Lindsay.

PAINT CHEAPER TO-DAY.

Referring to the fact that paint in comparison with other things is cheaper to-day than ten years ago, The Paint, Oil and Drug Review says:

Ten years ago a carpenter received $1.75 a day, and paid $1.50 for a gallon of the ready mixed paints, which left him 25c over what he received for his day's wage. To-day a carpenter receives $3.60 for his day's wage, and after paying $2.50 for a gallon of paint, has $1.10 left over.

Not only does the purchasing power from the point of the laborer make ready mixed paint seem relatively cheaper, but the cost of chickens, cereals, eggs, butter, beef and potatoes all show a similar comparison. Now is the time for you to put your paint business in the class of profitable merchandise. Grasp the opportunity, you will never regret it.

Decorators' Pure White Enamel

We are telling you about this Enamel, just so that you will know where to procure a high grade white, for high grade work, when you want it. Many Canadian dealers are paying exorbitant prices for an imported Enamel, because they do not know that right here in Canada is to be found an Enamel that outclasses any of the imported goods.

This is the sign—

If any dealer wants to see just what Ramsay's No. 98 is like, he can have a sample for the asking of it. A sample is all that is necessary to prove that Decorators' Enamel need not be imported into this country at high prices.

Would you like to have a sample?

STAR HACK SAW BLADES

Apparently no one questions the superiority of Star Hack Saw Blades and at our present figures there is absolutely no room to question the price.

They are equally good in hand frames or power machines. When used in a machine the feed should be adjusted to suit the stock being cut. The softer the stock the lighter the feed. Such treatment will prevent clogging of the teeth. Open your eyes wide and look at this list of prices:

6	7	8	9	10	11	12	inch
30	32	34	38	42	46	52	cents per dozen.

Notwithstanding the great reduction in prices, the quality of Star Blades has been improved.

What's in a Name?

It depends on the name, some names do not typify much, others do. A bright Chicago publication, writing on this subject recently, put it this way: "What name, for instance, Bill Jones or Royal? If you answer 'Royal' then we tell you millions. A certain corporation offered the Royal Baking Powder Company $12,000,000 for the use of that name as applied to baking powder, and the offer was refused."

The manufacturer who attempts to belittle the name of a competitor because the name of his rival has become a recognized power in the trade, places himself in the category of the ordinary everyday vilifier who would not hesitate to slander his neighbor whose fine reputation he envies.

The name

BISSELL'S

as applied to a carpet sweeper means something. It is at once the synonym of all that's best in carpet sweeper mechanism. It typifies the world's leadership in a distinct product. It stands for that sound policy in the conduct of business that recognizes the right of the jobber and retailer to a fair profit in the sale of an article, while at the same time properly considering the consumer.

The name

BISSELL'S

typifies the only famous carpet sweeper in the world, the only carpet sweeper ever sold under a sincere, carefully devised and rigidly enforced policy of Price Maintenance, that absolutely guarantees and secures a good margin of profit to every dealer handling it.

that cannot be copied

No other machine has a tub so ribbed that the full thickness and strength of stave is secured at top and bottom.

No other machine is or can be constructed like it.

There is really an immense difference between the

New Century

and other kinds.

CUMMER-DOWSWELL, Limited, Hamilton, Ont.

THE MAPLE LEAF
"IMPROVED RACER"

CROSSCUT SAW

This saw is different in its construction to other crosscut saws, being made with the slanting gullets, which discharge the saw-dust more freely and allows every tooth to cut fresh timber. It is a perfectly true tapered saw, being ground 4 gauges thinner on back than tooth. This allows saw to run free and easy with very little set.

The trade-mark "MAPLE LEAF" is a guarantee of quality, and every saw is thoroughly tested and examined before leaving our factory.

These Papers are now telling the Store Owners in Your Town:

"Put a 'Galt' Metal Ceiling in your Store before the Christmas rush."

Contract Record	**The Presbyterian**
Canadian Collier's	**Canadian Grocer**
Christian Guardian	**Dry Goods Review**
Canadian Magazine	**Canadian Druggist**

This helps you no matter what line of Ceiling you are selling.

First: By educating the Dealers, Church Trustees and Hotel Proprietors in the *artistic* and *practical* advantages of Metal over wood and plaster.

Second: By telling these people in plain English the difference between "Galt" and other Metal Ceilings, explaining our exclusive features—*Machine-cut Beads, Lead-and-Steel-die* embossing and *classic designs*, etc.

Send us your Ceiling orders and the names of your prospects for a personal letter.

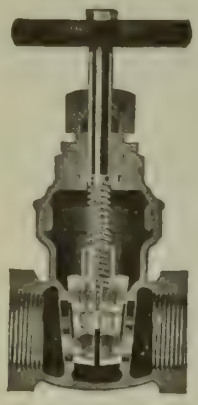
The Galt Art Metal Co., Ltd. - Galt, Ont.

Galt "Classik" Ceilings

Get the local agency for "Safelock" Wire Fence

You will find "Safelock" the best selling line of wire fence you ever handled, because you can prove by actual demonstration that it really is the strongest fence made.

Look at this little cut---note how the stay wires interlock where they wrap the strand wire. You simply cannot make a "Safelock" stay slip in any direction. And, as the strand wires are not kinked at the lock, every wire retains its full strength.



Better write us to-day about getting an exclusive "Safelock" agency for your locality.

The Owen Sound Wire Fence Co., Ltd., Owen Sound, Ont.

A Boon to the Housewife

Any device that will save the housewife's toil is in big demand, and you'll find the "**MAPLE LEAF**" **CLOTHES DRIER** the best seller you've ever handled for this reason. Clothes are dried independent of weather, easily adjusted, quickly filled and emptied. Packs away in small compass. Hangs in hottest part of the room next to ceiling. This drier is the very last word in up-to-date home "labour-savers" and positively sells at sight. Send for prices and terms and send to-day.

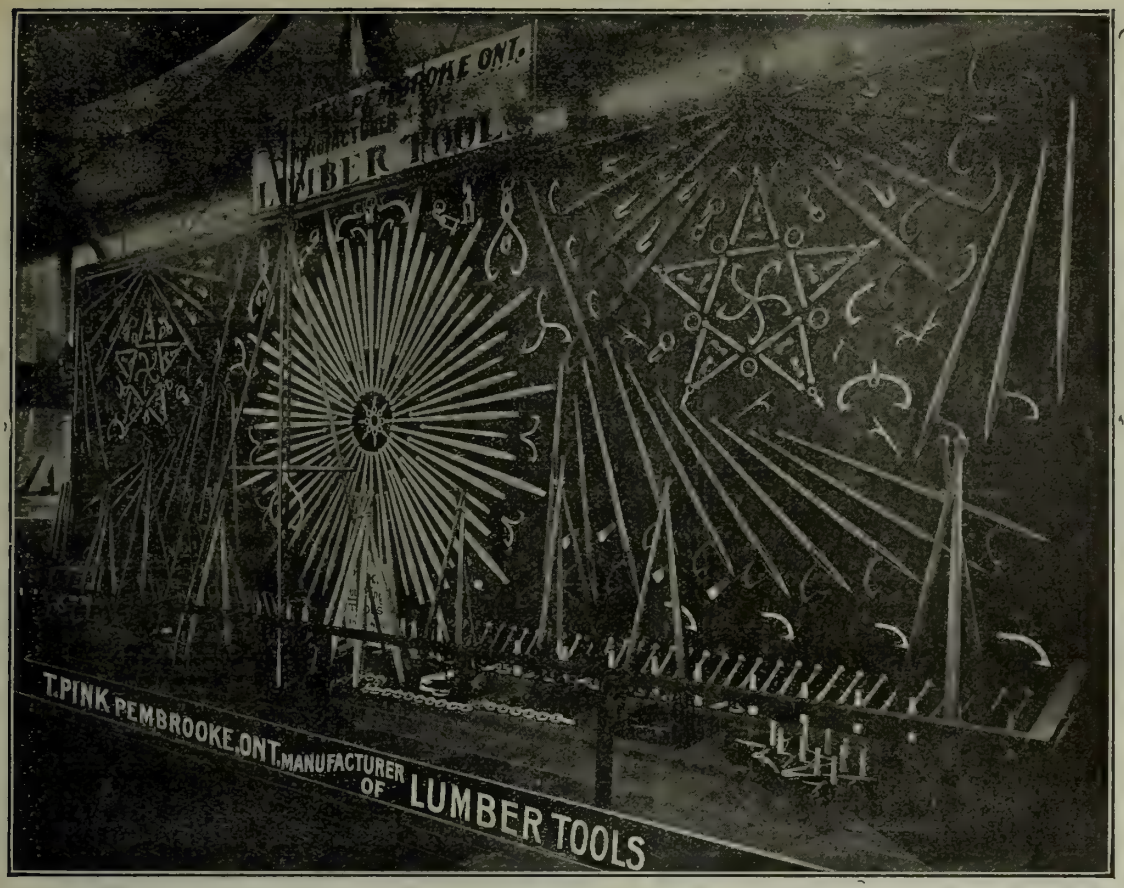
RONALD MacMASTER, Vancouver, B.C.

THE "FAVORITE" CHURN

is a good one every way you look at it. The barrel is of thoroughly seasoned hardwood, with trunnions balance bolted on. Stand is angle steel, very light, perfectly rigid and very strong. Has a most convenient hand and foot drive, and roller bearings for easy running. It easily BEATS ALL OTHER CHURNS in Canada as a seller. In fact, more "Favorites" are sold than all others combined. It's the churn that will pay you best. 8 sizes, to churn one-half to 30 gallons of cream.

David Maxwell & Sons, St. Mary's, Ont.

You Can Handle More Business



No matter how large your present volume of trade may be, it is likely that you are looking for more. Here's a hint which, if you act on it, will certainly increase your volume of trade and your net profits. Start now to sell the McFarlane & Douglas line of

METAL CEILINGS AND WALLS

This line pays big profits to men who get out and hustle for business. And it is easy to sell—so full of selling points. It appeals to people on the ground of Health, Economy, Beauty and Protection from Fire. Our catalogue will give you an idea of the extensiveness of our range and the beauty of our designs. Write for a copy.

"IMPERIAL" ANTI-FREEZING WINDMILL

FORCE PUMP

Fig. 18

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary. Always fitted with 1¼ flanges unless other size is specified.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Amatite ROOFING

It has a rough surface of *real mineral matter* on the weather side. It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a coat of paint.

To paint Amatite would be a waste of time and trouble.

Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof*.

No paint is good enough to make a durable roof; a thick layer of pitch, faced with a real mineral surface, is far better—*and that means Amatite.*

A Free Sample will be sent on request to nearest office.

Ordinary Straight Trimmers

Why Sell Clauss Shears?

We can't give you all the reasons in a short talk like this! But here are just a few:

They cut from heel to point — They work easily and smoothly
They do not cramp the hand — They are perfectly nickel-plated
The screw does not come loose

Clauss goods are the most complete line of cutlery in the world. Our catalogue will convince you. Send for it to-day.

CHRISTMAS GIFTS
for Men and Boys
"YANKEE" TOOLS

make sensible and very acceptable gifts for anyone who ever uses tools of any kind. They make a happy change from the neck-tie and suspender habit. They last for years, and the giver is remembered every time they are used.

We are advertising them as Christmas Gifts in the "Saturday Evening Post," "Popular Mechanics," "American Carpenter and Builder," "Electrician and Mechanic," and other magazines of this class, directing readers to you for the tools. This is sure to create a larger demand. Stock them now and be ready to hand them out when the trade comes. Get your jobber onto the job. The Nos. 60, 15, 100, 65, 44 and 35 make especialiy good sellers. Display them in your window as new ideas for Christmas and you will be sure to increase your holiday trade.

IDEAL Carriage Heaters

The Ideal No. 1

The Petty No. 2

Did it ever occur to you why you never see an advertisement for Nails, Bar Iron, and such like? The reasons are many:

In the first place, every buyer knows that an up-to-date hardware store cannot be run successfully without such staples; another good reason is that if an advertisement costs anything it would be hard to get this cost out of such unprofitable goods, and, if a hardware dealer depended on such lines to pay his expenses, there would be more failures than there are to-day.

Successful merchants are always looking for something that will satisfy their customers and also pay them well for handling them.

Did you ever try to sell a **Carriage Heater?** If not, send us a sample order, and you will then see how easy it is, and the person who buys it will wonder why they ever did without it, as it certainly fills a long-felt want.

Petty Coal is manufactured from best material all through, burns to a clear white ash, no waste or incombustible matter remains, it will not go out when most needed, it burns without smoke, odor or flame.

Ideal Heaters and Petty Coal Are Absolutely Guaranteed.

LEWIS BROS., Limited

DISSTON
No. 5 HANDY SAW CLAMP

This No. 5 Handy Saw Clamp has been designed with the view of making it light, strong, durable and so compact that it will take up the least possible space in a tool-chest.

The material is grey iron. The arches are re-inforced to give requisite strength where needed.

The eccentric lever for tightening permits of quick and positive action.

There being three points of pressure on the jaw, proper contact with the blade is obtained along the entire length of the jaws, which insures the holding of the saw-blade firmly and rigidly in position.

Fastened to bench by screws
Length over all, 14¾ inches
Filing length of jaw, 13 inches
Weight of clamp, 3¾ lbs.

We also make the No. 6 Handy Saw Clamp, which is of the same pattern, with the addition of screw-lugs for fastening to the bench. These lugs fold snugly to body of clamp, thus taking up small space in tool-chest.

No. 232

No. 231

VERY HANDY

These little pocket tools are very ready sellers and surely will prove attractive to your customers. They are handsomely finished in nickel plate and are very serviceable.

No. 231—Has three oil tempered tool-steel blades and a reamer contained in the hollow handle.

No. 232—On this style the single blade is somewhat larger and telescopes into the handle.

Our 272-page catalogue is free to dealers.

"Nine Lives"

The "Barnet" Refrigerator

All dealers who are interested in a high-class refrigerator should look into the merits of the "Barnet." A "Barnet" Refrigerator will stand a test which we believe no other made will stand, and is fully guaranteed by the makers to give perfect satisfaction, and do all we claim for it.

The "Barnet" is of the syphon system, and the very perfect circulation and ventilation of cold, dry air, puts it in a class by itself. We believe no other refrigerator made will stand such a test as a "Barnet" may be put to. It is always Dry, Pure and Sweet. No odor or taint. Read what Dr. Bruce Smith, of Toronto, Inspector of Hospitals for Ontario, has to say about it:

The Report of Experts

ON THE

"BARNET" REFRIGERATOR

INSPECTOR OF HOSPITALS AND CHARITIES,
PARLIAMENT BUILDINGS, TORONTO.

Having for some time been impressed with the great desirability of having a refrigerator, which, on account of proper ventilation and at the same time economical in the use of ice, I might be able to commend, I willingly consented to act with Mr. S. A. Armstrong, Assistant Provincial Secretary of Ontario, for the purpose of judging the merits of the "Barnet" Refrigerator.

We were first shown the empty refrigerators at the National Exhibition, Toronto, and allowed to designate any of our selection for the test. One was chosen and, after having been supplied with ice, the compartments were well filled with a quantity of food supplies, including milk (not pasteurized), fish, meat, onions, butter, cheese, apples, tomatoes, celery, oranges, lemons, bananas, matches and salt. The refrigerator was then locked and sealed, so that no one could open the door. The seal was broken 96 hours afterwards and the contents were found in a surprising condition. The milk was as sweet as when purchased from the vendor four days before and entirely free from any taint. The onions and other vegetables and fruit had not imparted the slightest odor to anything. The salt and matches were as dry as when placed in the refrigerator.

A more rigid test of ventilation could not be asked for, and the conditions in which the food supplies were found quite justify the statement that the "Barnet" Refrigerator is constructed on a hygienic system peculiarly its own.

R. W. BRUCE SMITH.

I desire to corroborate the above statement, having been present and noted the conditions mentioned.

S. A. ARMSTRONG.

We have many other reports similar to this, and all by very responsible parties.

The "Barnet" Refrigerator is beautifully finished in Birch, Ash or Oak. Lining of Snow White Baked Enamel, always clean and sanitary. Write us for catalogue and prices. We make any special size to order, also Cold Storages, any size.

The Barnet Manufacturing Company, Limited

RENFREW - ONTARIO

5000 REVOLUTIONS PER MINUTE

ON HEAVY WOODWORKING MACHINES

It requires the very best kind of Antifriction metal to withstand such speed any length of time. "Genuine" Babbitt won't do it, and no other metal can touch Magnolia for such severe service, as well as its special adaptability for the heaviest pressures, such as Rolling Mills, Rock Crushers, etc.

Chicago, Ill., April 8th, 1910.

Gent'emen—Enclosed find 40 cents for which please send me one of your Engineer Pocket Books. I have used Magnolia for nine years on heavy duty high speed machinery, running 3,000 to 5,000 revolutions per minute. Some of these machines have run for four years. Respectfully yours,

FRANK BERANEK, 1900 Fisk Street.

SPECIAL OFFER

PRACTICAL ENGINEER POCKET BOCKS

Containing 680 pages treating on over 2000 Mechanical and Engineering subjects brought up to date. We offer this valuable reference work at the very low price of 40 cents postage prepaid.

Let us know if you want copy.

Monarch
MALLEABLE
The "Stay Satisfactory" Range

A Perfect Range Would Be Built With Malleable Iron

By using Malleable Iron in preference to cast iron in building MONARCH Ranges, we have obtained two advantages. First:—The toughness of the metal permits a construction that gives a better service to the user. Second:—The same feature prevents breakage in shipping and in use. Malleable iron is unbreakable and can be worked cold under the hammer—that's how we can make such a firm construction.

The Malleable Iron frames on the MONARCH are jointed to the steel body with rivets or malleable lugs. This connection is solid and permanent. If we used cast iron it would be necessary to make the joints with stove bolts and caulk them with stove putty, which at best makes only a temporary connection. With the constant expansion and contraction of the iron, the stove putty loosens and falls out, thereby creating air leaks into the flues, which lessens the efficiency of the range.

The MONARCH oven is held in L-shaped Malleable Iron frames. With this riveted construction the joints of the oven to the steel body are practically air-tight and so rigid that they cannot open up, even after years of service. It is impossible for "air leaks" through joints like these.

The top frame being of Malleable Iron, is drawn down into the top of the steel body under pressure and riveted into place. There is no stove putty used in this joint—it is tight without it.

By making the plates and covers of Malleable Iron they will not crack or break, even when made of less thickness than those of cast iron. Nor will they warp with even three times the service that would ordinarily ruin cast iron.

All doors and door frames are of Malleable Iron. We use Malleable Iron in the MONARCH Range only where it will increase its actual value to the dealer and to the user of the Range.

How We Are Specialists

Instead of making all varieties of cook stoves, cast and steel ranges of different patterns, heating stoves and furnaces, our entire organization and equipment is employed wholly in making MONARCH Malleable Ranges.

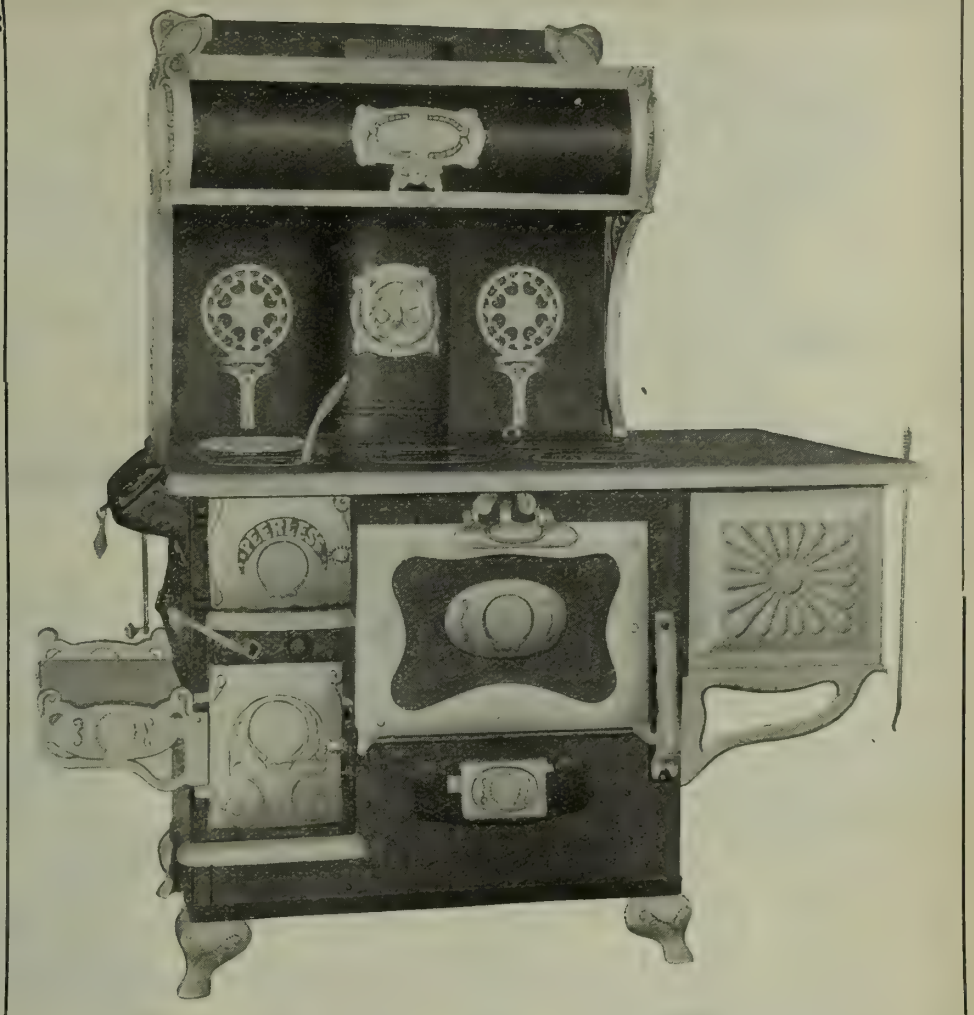
There is but one quality, and as the operations in making all sizes of MONARCH Ranges are identical, every workman becomes an expert in the line of work he performs. By this specializing we can give you the MONARCH Range at practically the same price that you pay for a cast iron range that might be classed as a first-quality-article in its line.

A proper retail price can be maintained on MONARCH Ranges, for our specializing is to your advantage when you show how the range is made and why Malleable Iron is used.

"Our Plan"

We offer you an assistance in selling MONARCH Ranges by working directly with your customers. Not by simply mailing a few disconnected circular letters to a promiscuous list, but by a good application of salesmanship on parties who have given some indications of being in the market for a range, thus making sales you otherwise would not get. We originated this plan of assistance several years ago. It has been copied by other manufacturers, but never successfully, for it can apply only to MONARCH Ranges—a line of one quality throughout—from which our selling arguments are taken.

We have plenty of evidence to support every claim set forth here and we ask any dealer who will concede that there is a possibility for his trade in ranges to be improved, to write us for our catalogue, prices and full information regarding "OUR PLAN" of assistance.
MONARCH Ranges are now delivered from warehouse stock at Winnipeg with prices quoted F.O.B. that point.



MALLEABLE IRON RANGE CO.

Beaver Dam, Wisconsin

This is For You, Mr. Wide-awake Dealer!

Are you handling a line of Stoves that is bringing you returns?

If not, just get busy and sell

THE "PEERLESS"

BURNISHED STEEL RANGE

The "Peerless" is a model cooking and fuel-saving range—points that will strongly appeal to the housewife. It is built of high-grade steel and iron castings, and trimmed with our own new process of nickel, giving it a beautiful and brilliant finish. You save your customers half their coal bills when you recommend and sell them the "Peerless" Range fitted with our Hot Blast Fire Box. Increase your sales by handling this line.

Write us for particulars.

The Charles Fawcett Manufacturing Co., Ltd.

SACKVILLE, N.B.

IF YOU DO NOT WANT A LARGE HEATER YOU WILL WANT THE

"ÆSTHETIC"

¶ In many cases the regular size Base Burners will be found too large to heat the house. Under such circumstances you can safely rely on the "Æsthetic." The pot holes are directly over the fire, and they will accommodate two pots or one wash boiler. It has a large ash pan with hearth plate that drops out of the way. The oven does perfect work, has swing doors.

"ÆSTHETIC"

An ideal stove for small families. Burns coal or wood equally well.

Ridging No. 872 is a Good Seller.
It's Galvanized Steel at a "Wood-Price."

An energetic hardware dealer can sell a good many lengths of Ridging No. 872 in a season. Very few will choose to erect an ordinary wood ridge when the advantages of No. 872 are explained to them. For one thing it is much more ornamental than wood. And because it is made of galvanized steel, it is also several times as durable as wood. No. 872 is easy to erect. It is made on special machinery, in ten-foot lengths, and is absolutely straight. The lengths fit together accurately. No wood filler is required. And you can sell No. 872 at practically the same price as an ordinary wood ridge. How many lengths are you going to sell during the remainder of the year? There's a good margin of profit for you in each sale you make.

Why Not Have a "Holiday Goods Opening Day?"

If Plans Are Well Laid Now the Holiday Campaign Can be Made to Start Off With a Rush by Having an "Opening Day" Early in December—Suggestions Which Will Work Into Special Holiday Sales—Establish a Toy Department and Win the Children's Favor—Mechanical Window Displays.

Hardware merchants everywhere are preparing to make this year's holiday trade a fitting finale to one of the best year's ever experienced, both in volume of business and margin of profit. With the exception of a few isolated spots the year has been a good one and the prospects are favorable to a big holiday trade to wind up the year's business.

But upon what is done right now depends whether the merchant experiences a profitable holiday trade. If his plans are well laid, and a loyal staff is ready to carry them out, the progressive merchant will gather in the cream of the trade, while if things are let go now and the business is gone after in a happy-go-lucky manner, the result will be more of the nature of skimmed milk.

Thought must be given to selling as well as to buying the goods. It is essential that the stock be well chosen and that the selections be varied enough to appeal to every member of the family and to every age of people. Jobbers and manufacturers are widening their lines of holiday goods and the merchant who studies the buying capacity of his customers can, with the exercise of good judgement, easily select an attractive stock. This purchasing is already done, however, by the far-seeing merchants and plans for disposing of the stock are now receiving consideration.

To get holiday buyers to the store is the main consideration and hardware merchants must adopt special plans if they are to succeed. Therefore, regular stock must be relegated to the background, while seasonable toys, sporting goods and household specialties are displayed in an attractive manner. The windows and the store advertising must be suggestive of the holiday gift spirit and emphasis must be put upon the fact that for sensible and useful gifts the hardware store is the proper place to do Christmas shopping and everything must be marked in plain figures in order to enable buyers to figure out for themselves how each article fits in with the amount they are able to spend for gifts to the relatives and friends on their list.

Have an Opening Day.

But, as said before, with all the novel plans of advertising, of window display and arrangement of goods, etc., the big problem is to attract the crowd and to do this something out of the ordinary must be done.

Why not select a date, say the first Saturday in December, for an opening day for holiday goods?

Decorate the store, dress the windows, put all the holiday goods on display and advertise the "opening" throughout the district.

Draw the crowds—not so much to sell goods as to let them know what you have. In fact, the announcement might be made that no holiday goods will be sold on that day although orders will be taken for future delivery.

The children should be appealed to as child is the father of the family at Christmas time. One window should especially appeal to the young folks and play should be made upon the fact that the young boy or girl will appreciate a pair of skates or a hockey stick far more than a pair of mittens or a handkerchief.

Distribute handbills to the children at the schools and announce that a souvenir will be given every child who leaves his or her address at the store on "opening day." Then at the back of the store have an address book on a table. As each child signs the roll hand out a tin whistle or pea shooter to the boys and a small doll or looking glass to the girls.

Suppose ten dollars is spent on this stunt won't it be well worth while to have won the friendship of the little ones at the opening of the holiday season, especially if you follow the matter up by mailing a card to each child whose address you have thanking him or her for visting the store, and asking them to come again.

Impress upon the young mind that the hardware store is "Santa Claus' headquarters" and it will be one of the best ads. you can obtain. They will talk about it incessantly and the older folks will be sure to think of your store when they want to buy something for the children.

As a suggestion for a single column ad. announcing an "opening day," the following is given:

HOLIDAY GIFTS
OPENING DAY.

The large stock of hardware and toys purchased by us for the Christmas trade will be on display for the first time in our store on
SATURDAY, DECEMBER 3.
You are invited to inspect them—not necessary to buy—we merely wish to impress upon you that for practical and useful gifts the place to buy is at
WHITE'S HARDWARE STORE
Bring the children along and let them see "Toyland." Santa Claus will be there in person.
SUITABLE GIFTS FOR ALL.
Our large stock will enable you to select a sensible gift for any friend or member of your family. In toys, sporting goods, tools, house furnishing, cutlery, silverware, cut glass, shaving supplies, etc., we have a complete stock in a variety of prices suitable for every purse.
No trouble to show goods.
WHITE'S HARDWARE STORE
123 Main Street.

Such an ad would, of course, be strengthened by the offer of "a gift for every child" or the naming of a special bargain. These are details, however, which are subject to the arrangements worked out by the merchant who adopts the plan of opening his holiday trade with a rush before other dealers have their holiday goods on display.

Decorate the Store.

"The holiday spirit" that has so much to do with loosening of the pocket strings around Christmas time must be catered to if it is to be coined into collateral acceptable at the bank. And from the time of the "opening" sale of holiday goods until the "closing" on Christmas eve the store should have a festive look.

Evergreen should be secured and strung up with hanging bells and paper bells and rosettes, one string running down the centre of the store, while others branch off to the sides and gather into a cluster in the center. The background of the window should also be trimmed with evergreen or holly upon cheesecloth or cotton, while the lights should be shaded in such a manner that the light will be evenly diffused over the goods and not be a blur in the eyes of customers to detract from the goods on display.

The decorations should not stop, however, with the evergreens and festoons. Every silent salesman, showcase or table in the front of the store should be brightened up, and all goods displayed on bright and clean paper or cheese cloth, the cutlery sets, pocket knives, razors and shaving sets being arranged so as to attract the eyes of all visitors to the store. A supply of holly boxes and wrapping paper might also be secured to do up parcels in or a holly sticker on gummed paper secured from the local printer, on it being printed some such words as:

"To....., ..., from .....
"The White Hardware Store wishes all its customers a very Merry Christmass."

Just inside the door a large sign might also be set up so that all customers on leaving the store will be met with the parting wish of a "Merry Christmas."

A "Toyland" Department.

Many hardware stores have a stove display room upstairs which is not utilized to any great extent in December. Here, therefore, is an opportunity for the establishment of a toy department for the children, a staff of girls being engaged to make sales under the management of one of the regular staff.

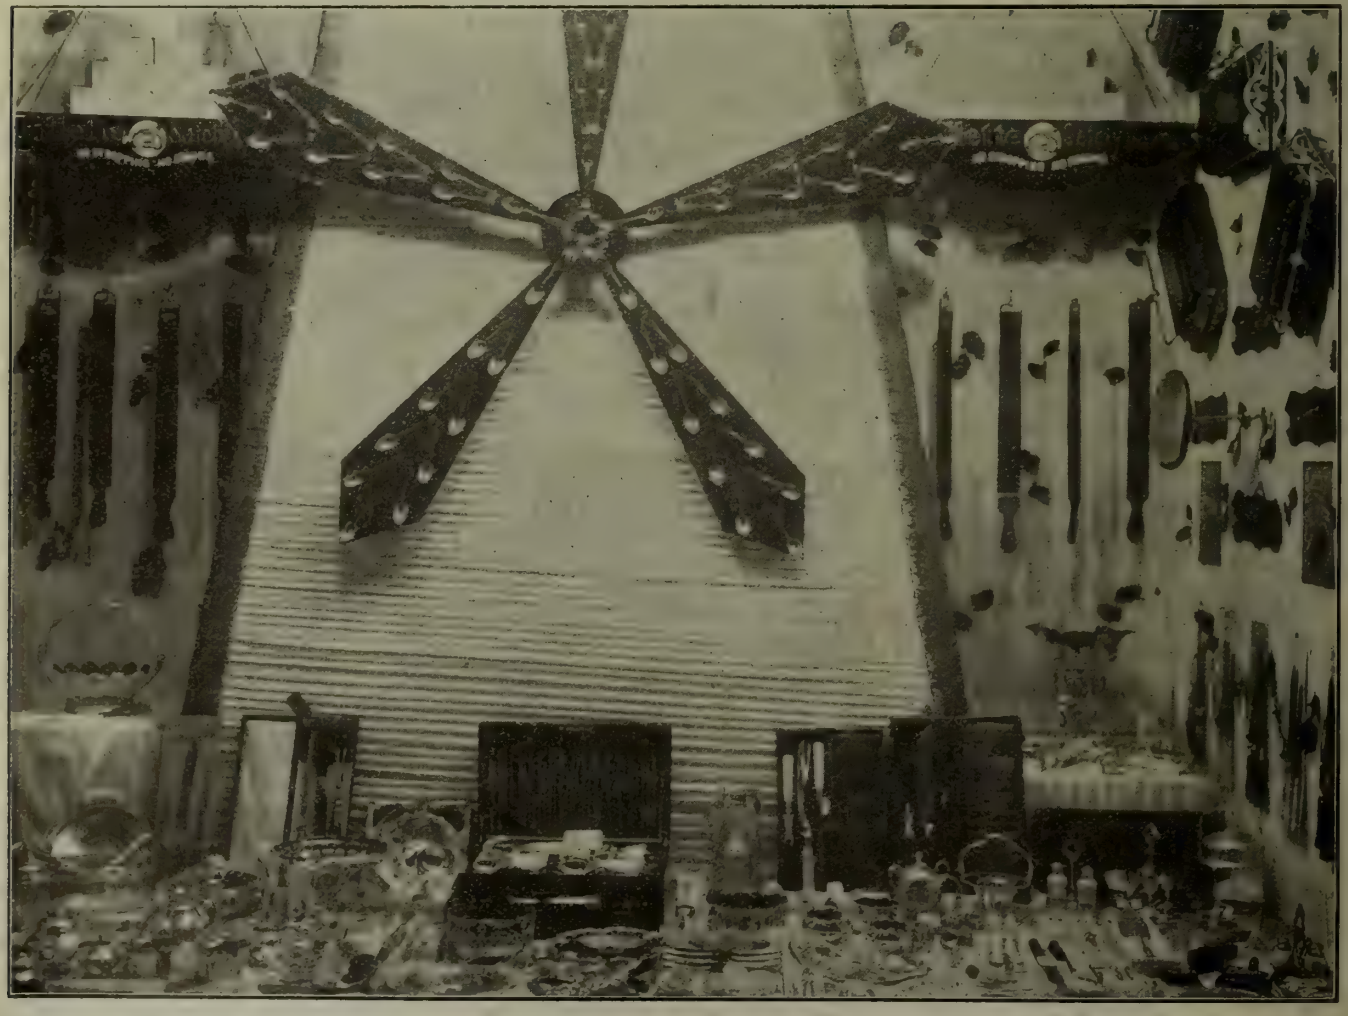
No other class of goods sell as well by being shown and price marked as hardware and toys, so if a few tables are secured and the goods arranged according to price, all 10 cent articles on one table, 25 cent goods on another, etc., the clerks will be kept busy making sales of articles picked out by customers.

For such a department as this, of course, some special advertising stunt is

necessary, the plan adopted by the Eaton Company in Toronto the last two or three years being one of the best. An "opening day" is decided upon, and announcement is made that "Santa Claus" will arrive by train at a certain hour on Saturday morning. When the hour arrives the patron saint of the younger generation descends from the train dressed in the familiar garb, wearing a flowing beard, and carrying a pack on his back. He is met by the merchant and led to a cutter, followed by the crowd of big and little children, to whom he distributes small bags of candies and nuts, with an occasional toy to a small baby in arms, this distribution being continued along the route of the drive from the depot to the store. Arrived at the store he leads the way to "Toyland," where he holds and informal reception, shaking the hands of all the children who wish to make sure that "Santa Claus" really lives.

An opening event of this nature can be put on with little effort by any hardwareman with little expense, and it will certainly draw a crowd and make the toy department known as few other plans can do. If an additional feature is desired, a phonograph can be secured, and a program of songs and funny stories rendered.

Another way to interest the children is to have some kind of a contest. A western store offered a prize for the best drawing of Santa Claus sent in each day, and accompanied by a four-line verse bringing in the name of the store and that of Santa Claus. The prizes were toys of a certain value, and the drawings were to be deposited in a box placed to receive them in the toy department. Prizes for essays on various subjects connected with the season, voting contests for the most popular teacher in town, or for the most popular girl or boy, have also been used, a ballot to be given with each five-cent purchase, and the votes to be cast in the toy department.



Mechanical Window Displays.

"First impressions are best," is an old adage which applies to hardware stores as to anything else, and as the first thing seen about a store is the window, plans should be prepared to ensure that from December 1 to 24, there will not be an hour during which the window will not give a pleasing impression. If a window trim is to be changed have the new display planned in advance, with all the articles at hand, so that time will not be lost in assembling the goods.

Anything that moves gives life to a display, and catches the eye of passers-by, consequently if a mechanical device can be worked into a window trim, it is reasonably sure to be a good feature, providing the moving objects show articles for sale and the machinery is subservient to the goods on sale.

D. Bolster, with Peart Brothers' Hardware Company, Regina, utilized a mechanical windmill in one of his holiday trims a year ago, the picture showing the wheel revolving on the side of a tower, at the base of which is a display of cutlery, silverware and cut glass, with small price tickets on each article. On the sides were Gillette safety razors, on shelves, Bissell's carpet sweepers, shaving strops, and carving sets on cards suspended on the walls. The windmill was driven by a fan motor having a four foot pulley to reduce the speed from 1,700 R.P.M. to 22 R.P.M., to give the spoons shown on the blades of the wheel a proper display. The tower of the windmill, however, occupied too much valuable space. White bunting folded neatly over pink paper gave a neat color effect to the entire window.

Fred C. Hill, with Watts & Bates, St. Catharines, Ontario, did not have as large a window to work upon, and rather failed to take advantage of the display

Mechanical Windmill Window Display, Arranged for Peart Bros., Regina, Sask., Last Christmas by Donald Bolster.

space and the wall and background. The general scheme of his mechanical attraction is excellent, however, and very well carried out, the buildings being in keeping with the size of the window. A larger variety of goods could have been shown though in the space at the base of the window. Instead of showing case goods and flatware exclusively, the window would have looked much better if some cut glass and plated ware were also shown.

The scene is typical of winter. In one corner was a small four-roomed house, designed and constructed by Mr. Hall, and alongside is an artificial river with an old mill on the opposite bank. The river was made of galvanized iron, four feet long, four inches deep, and twelve inches wide, the banks being stones covered with snow. A bridge spanned the stream, the path leading from the house past a shed to the mill, the latter being operated by a water wheel, fed by a hose attached to a tap in the cellar. Islands dotted the river, and at the lower end were falls, with rocky and wooded banks. The house and mill were lighted by electricity at night, while the snow effect was secured by the use of cotton batten and powdered mica.

The background was of white curtains decorated with red bells and evergreens, while on the side was a display of carpet sweepers and air rifles, carving sets, table cutlery, pen knives, shaving goods, etc., were shown in the foreground.

Some stores, of course, find obstacles in the way of arranging a mechanical display. The window may be small and unsuited for arranging an elaborate display, or the merchant and clerks may lack the mechanical ingenuity required to put together a moving scene. In this case, the most that can be said is that a display of some kind must be made incorporating some of the ideas illustrated in the pictures shown in Hardware & Metal from time to time.

Winter Scene With Waterwheel in Operation. Assembled by Fred C. Hill, last Christmas for Watts & Bate, St. Catharines, Ont.

PIONEER HARDWAREMAN DEAD.

Philip Corbin, President of the American Hardware Corporation, comprising P. & F. Corbin, of which he was founder, Russell & Erwin Manufacturing Company, Corbin Screw Corporation, Corbin Motor Vehicle Corporation and the Corbin Cabinet Lock Co., all of New Britain, Conn., died at his home in New Britain, Conn., on Thursday, November 3, aged 86 years and 8 days.

In many respects Mr. Corbin's life was a notable one and of interest to hardwaremen in all parts of the world. Born in 1824, Mr. Corbin began work in 1844 in the New Britain factory of Matteson, Russell & Co., predecessors of the Russell & Erwin Manufacturing Company, later working for North & Stanley lock manufacturers. Before he was 21 years old he was an expert lockmaker with 19 employees working on contracts he had undertaken. In 1849 with F. Corbin, a younger brother, Mr. Corbin became members of the firm of Doen, Corbin & Co., operating a brass foundry, the firm becoming P. & F. Corbin in 1851.

In 1851, American manufacture was in its infancy, and nearly all the hardware was imported. Mr. Corbin avoided domestic competition by confining his product to articles made abroad, and as they were better made than the imported goods he found a ready market. It was at this time that he formed his policy of making goods of a superior quality and a complete assortment in any line he adopted. He was thus able to meet all demands in any field he entered.

In 1854 a joint stock company was formed and in 1858 Andrew Corbin joined his brothers. In 1882 the Corbin Cabinet Lock Company was organized as a separate concern and in 1902 the American Hardware Corporation was formed to unite the various Corbin interests, he retaining the presidency to the time of his death.

Mr. Corbin's business career is unique in that it covered a period of sixty-six years of active life. Sixty-one years were spent in the management and development of a single enterprise engaged in the manufacture of hardware. The capital invested has grown from nine hundred dollars to ten million dollars, and the number of persons employed from three only to ten thousand.

NEW MANUFACTURERS' AGENCY.

A new firm has recently opened business in the city of Montreal under the name of Dingman & McCombe, and are located at 35 St. Nicholas street. Mr. Dingman is well known in the hardware trade, having been employed for several years as buyer for Moore & Brown, Saulte Ste. Marie, one of the largest hardware firms in Northern Ontario. He also successfully compiled catalogues for Frothingham & Workman, and Caverhill, Learmont & Co., Montreal. Mr. McCombe's experience has been in financial lines, he having been employed seven or eight years by the Bank of Montreal. This new firm are representing the Trimont Mfg. Co., manufacturers of Trimont Pipe Wrenches & Pipe Cutters; The Parker Wire Works Co., Worcester, Mass., manufacturers of kitchen wire goods; The Luther Grinder Mfg. Co., Milwaukee, manufacturers of the Luther Grinders, fitted with carborundum wheels; these are adapted for household use and for the use of mechanics. They represent also the John Watson Mfg. Co., Ayr, Ontario, manufacturers of warehouse trucks; Fellow Bros., Cradley Heath, manufacturers of chains and anchors; Jos. Tomey & Sons, Birmingham, manufacturers of the "Eureka" gauge glasses. They have within the last month been appointed agents for Jevons & Co., Liverpool, England, tinplates, metals and Swedish iron, known for sixty years past in the tinplate and metal trade in this country; also for Boentgen & Sabin, Solingen, Germany, manufacturers of the "Bonsa" cutlery. The firm has been very successful so far with the lines they are handling. Both members are young men, and are well known in military circles, being officers in the 3rd Regiment Victoria Rifles of Canada.

Profits to be Made in Toy Department

Some of the Lines to be Included in the Stock—Line Must be Pushed to Clear the Stock Before the Season Passes — Use Window and Also Display on Tables Near the Front of Store.

"A hardware man must always be ready to adopt new lines, if he wants to keep up with his competitors," said a Galt hardware merchant to a Hardware & Metal representative this week.

There is much truth in the remark. The advance of the times brings a constant succession of new necessities and new articles to meet them. The wide awake hardware dealer recognizes the fact that the scope of his trade is constantly widening and is ready to adopt new lines or departments as expediency suggests. The possibilities of the Xmas trade are realized to a limited degree only by a great number of hardwaremen. Many, otherwise progressive, dealers are willing to run their business through the holiday season along the old lines with the same old stock in trade, their chief reason being a lack of belief in innovations.

It is a reasonable assumption that the hardware merchant is entitled to a full share of the holiday trade and, to help secure this, there are a number of new but perfectly legitimate lines in which he may embark with every prospect of profit. Cutlery, carvers, cut glass, brassware are now more or less commonly found in all hardware stores but many merchants are neglecting the opportunity to draw a large trade by installing a Xmas toy department.

Suggestions as to Toys.

There is a wide variety of toys that would not be out of place in a hardware store. Metal toys such as trains, fire engines, express wagons and banks are much in demand. These goods are "best sellers" because they possess durability and most parents are willing to pay a better price for goods that will last. Among other articles that could be included in the toy department are lead soldiers, metal dolls' beds, dolls' enamelware dishes, iron animals, toy pistols, metal furniture for miniature houses, tin watches, knives, sets of parlor croquet and ten pins and magic lanterns.

How to Handle Department.

The merchant who decides to start a toy department must be sure to push the goods to the utmost, because it would not prove a profitable undertaking if a large stock had to be carried over until the next Xmas season. He must therefore let people know he is handling toys by making his exhibit as conspicuous as possible and by advertising.

The firsts esential move is find room for a table or tables to be devoted exclusively to toys and kindred Xmas lines. To do this a quantity of other stock would have to be relegated to the back ground but, by a judicious rearrangement, such goods as are not in demand at the time of year could be temporarily displaced. In this connection, might be cited the prominence given to Xmas lines by the P. Hymmen Co., Berlin. Mr. Hymmen intends about the last of November to clear out the centre space of his wide store and use it for a Christmas department, in which toys will be featured. He strengthens this department by suitable window displays and by advertising.

Give Window Displays.

An effective method of acquainting the public with the fact that the store is running a Xmas department is by making up an attractive window of toys and possibly sporting goods. In arranging this display, the window dresser should make it a point not only to show some of the most attractive goods but to drive home a few of the strongest "talking argnments." For instance, above the iron goods might be placed a placard reading:

TOYS THAT WILL LAST.

Why buy presents for your children that break the first day? These toys will give pleasure every day in the year because **they can't be broken.**

This argument is certain to impress toy hunters, as it gives a sensible reason why iron goods are worth purchasing. Above the space devoted to dolls' houses and dishes, something to this effect might be placarded:

DO A THING WELL.

You are getting a doll for your little girl. Why not make her joy complete by buying a supply of these enamelware dolls' dishes? They will outlast a generation of dolls.

Here again the argument of durability is driven home and is as certain to prove effective as in the first instance. The sporting goods section of the window, if the two lines are combined in one display, should contain seasonable articles such as skates, hockey sticks, pads and pucks, snowshoes, skiis, and staple lines such as boxing gloves and fencing foils. A card, reading somewhat as follows, would be effective.

FOR MANLY BOYS.

No present is more fitting than a pair of skates, a hockey stick, boxing gloves, fencing foils or any of our long line of sporting goods. A hearty boy craves these things.

The goods should be advertised as well. People generally would be inclined to look elsewhere for toys, unless it was brought to their attention that at Brown's hardware store the very best goods were obtainable. Printers' ink is the medium to use in spreading the information. Christmas advertising, if rendered effective, will bring the best of results.

A Trade Magnet.

The toy trade as a holiday branch of business has one great advantage. It attracts people to the store. Children insist that their parents take them through all stores where such goods are sold. If the exhibit is a pleasing one, the little tots will remain just as long as they possibly can and in the meantime the accompanying parent will be looking around. People who otherwise would not have entered the store are thus brought into contact with the stock. While the children eagerly inspect the toys, the parents are practically certain to look at other lines of goods. They may have no intention of buying at the outset but, if the stock carried is up-to-date and well displayed, it should not be difficult to interest them in some line and perhaps effect a sale. The toy department is a magnet that draws a constant succession of visitors from whom a certain percentage of trade can be counted upon, outside of the profit to be made in the toy department itself.

Toys That are in Demands.

Among the toys called for this season are all varieties of tin mechanical goods and the more substantial "friction" toys. The automobile in all its latest phases is much in vogue—touring cars, runabouts, limousines, many of them equipped with chauffeurs and all capable of more or less lengthy tours, some by process of winding up, others by friction. Tin post office banks are a new line that will be in demand.

HARDWARE ADVERTISING.

The Advertising Cyclopedia Co., New York, have recently published a 128 page book in cloth, bound cover, entitled "Hardware Advertising," by William Borsodi, editor of The Advertising Advocate, the price being $2.

The book is unusual in its style, being a collection of phrases and paragraphs extracted from thousands of advertisements of hardware stores in all parts of Canada and the United States, the idea being to group the "talks" on different classes of advertising together, and assist the ad.-writer to express his ideas in language both descriptive and attractive. The book does not pretend to originality—in fact its whole aim is to assist the writer of ads. to apply to his own needs "copy" which has been successfully used by other merchants in his own line, but in other towns and cities. The book can be obtained through the Technical Book department of The MacLean Publishing Company, 143 University avenue, Toronto.

A by-law to loan $30,000 to the Monarch Knitting Company, Dunnville, to erect a factory 50 x 130 feet, four stories high, has been carried at St. Thomas.

Suggestions for Fall Window Displays

Description of How to Put To gether Attractive Displays of Shaving, Sporting and Heatin g Goods—The Selling Power of the Window Neglected by Too Many Retailers.

Written for H & M. by W. J. Illsey.

Much has been said; more can be said, on the facts that promptness, punctuality, courtesy and knowledge of your particular business must belong to every successful clerk. But my present aim is to show the average hardware salesman one way in which he can make more money for himself as well as his employer.

How to dress windows is a feature overlooked to a shameful degree in most hardware stores. Either the proprietor is lax in having the windows tastefully and frequently dressed, or the clerk who should look after the work is not the man for the place. Let me describe a few good windows which any clerk can put in and which never fail to pay big results.

A Shaving Supply Window.

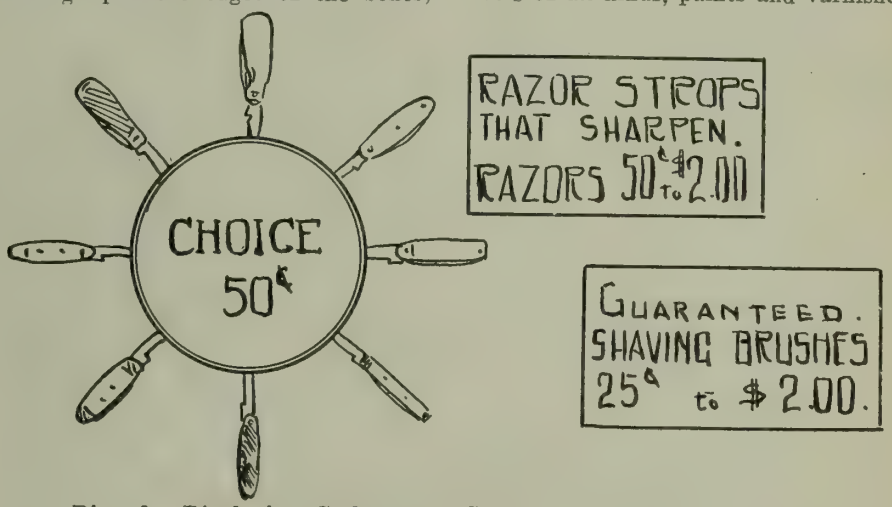
Use a bottom covering of green baize or felt (fairly bright green) and if a background must also be had use white cheese cloth tucked in neat folds and tacked tight to window frame or hung on brass rods. On this background pin or in some way fasten show cards (which any jobbing house is glad to supply for the asking) and hang on or almost against this so as not to confuse too much, a nice assortment of razor strops. Sun and light cannot hurt them. On the bottom build up two at least, or three, if possible, shelves about 8 inches high each. This also to be covered with the green baize. On this and the flat front surface arrange in the most artistic manner you possess shaving brushes, razor hones, razors (safety and hollow ground) shaving soap, pocket and dressing combs, nail clippers, hair clippers, extra safety razor blades and whatever other lines you may handle which correspond with the above mentioned. Mirrors of any kind go well to make up background for the shelves. Have price cards giving prices, such as shown in the accompanying sketch, and so on through the principal items shown. Right against the glass and on a level with the line of vision of passers-by hang two or three rings of pocket knives like the one illustrated. These can be made of cedar or pine and covered with black velvet. A white card should bear the price as shown and be tacked in centre. Make each ring up of different priced goods. You will soon find results in better sales in all lines shown.

A Sporting Goods Window.

Use a background of white cheese cloth pleated and tacked as neatly as you know how. Use a plentiful supply of flags to make this bright. Use nails about 2½ inches long to hang at various places on your background shot guns, placing them in attractive positions. Close to the window also stand guns or rifles so that the people outside can have a good look at the style and make.

You can get from your jobber some beautifully colored hangers and cards advertising various ammunitions and guns and rifles. Use these for interspersing among the flags and guns. Now you have your background. On the bottom at the back of window place at various locations boxes, such as loaded shells come packed in, and cover these and the whole bottom with fresh cheesecloth laid loosely over the whole. Now along the front and close to the glass place the many small items that go with hunting supplies, shell extractors, cleaning rods, duck and goose calls, revolvers, hunting knives and axes, gun oil and grease, etc.

Back of this row place a few hunting caps, game bags, gun cases, small rifles (resting upon the edges of the boxes) rifle and revolver cartridges, etc. On the boxes pyramidal piles set loaded shells of the various makes in stock and intersperse an occasional opened box throughout the entire ground lay out. Use price cards to tell prices of any special gun or rifle, the price of loaded shells, of hunting caps or coats and have one large card 22 x 28 or 18 x 28 inches in size announcing that "We carry full lines of highest quality sporting goods. Come in and look over the goods," or some such phrasing. This one never fails to bring business.



A Stove Window.

If you are displaying heaters (and the description will deal with such or may include with little variance cook stoves or ranges) use a bottom of cheap oil-cloth or Japanese matting. Tack it securely in place to prevent its pulling when the stoves are placed. Aim to have just enough heaters to fill the window without crowding and be sure every one is polished to perfection. The white background of cheesecloth is again used. And in fact for most hardware windows will be found the easiest and most satisfactory material. On this (after the heaters have been placed) hang coal hods, ash sifters, stove boards, coal and ash shovels furnace brushes, small tea kettles, etc. In front and close to the glass place some lines of smaller cooking utensils such as are often used on heaters for doing light cooking. Place a price card (large enough to be easily read) on each heater and have one large card announcing that you have a fine assortment of reliable heaters and that the prices will please.

If stoves are sold on the second floor of your store or elsewhere place in small letters, "Stove Dept. Second Floor." Your customers will then know just where to go and can from the window often pick out the exact stove wanted.

These window displays are all good trade bringers and pay well for time spent on them. Other lines to display in the fall are buck saws and axes. Tools of all kinds, paints and varnishes, washing day supplies such as washing machines, wringers, tubs, boilers, etc., and do not forget that wedding gift articles should be shown often.

Try some one or all of the above window displays and you will be more than pleased with results.

Ring for Displaying Cutlery and Sample Display Cards.

NOW USING SAFETY RAZORS.

President D. Cinnamon, Lindsay and executive member R. H. Blackmore, St. Thomas, surprised the other members of the executive committee of the Retail Hardware Association by attending the executive meeting on Thanksgiving Day minus the Van Dyke beards worn by them for many years. The reasons given for the change were the rejuvenating influence of association work, and the popularity of safety razors. About half the executive officers wear moustaches, but there isn't a beard left now.

Electrical Supplies for the Christmas Trade

Articles Both Novel and Useful are at the Command of the Merchant—The Lines Combine Well With the General Display —The Demand for Utility Lines—How One Merchant Pushes Flat Irons and Washing Machines.

In the various articles which come under the category of electrical supplies the retail merchant can find many a line which will not only prove a quick seller, but will co-operate in his general scheme of display for the Christmas trade. There is probably no department which has such an advantage in this way as that of lighting fixtures, because the dealer can use some of the lines to illuminate his store, and thus display the goods in actual working form, at the same time he is selling them. Although so far as gas and oil lighting articles are concerned there is very little novelty to be secured from them, with electrical supplies the case is different. From time to time most ingenious contrivances are produced, which will not only attract a strong demand because they are novelties, and therefore in great request at this time of the year, but are most useful articles.

Apart from novelties pure and simple, such as flash lamps, cigar lighters, electrical watch stands, electrical candles, the illuminated clock, and the miniature lamps which displace the ordinary Christmas candle, and lighten up the Christmas tree with safety, and which can also be attractively grouped among the table decorations, there are the electrical utility articles.

Here we have lines which are coming more and more into use, and to which the hardwaremen should pay particular attention. For no one who has electrical power in the house will in the long run fail to utilize that power for economizing labor, and preventing dust and dirt. For instance, the electrical iron is becoming more and more used, and is an exceedingly good line to push. Probably no more acceptable present could be given than an article of this description, and then going further you have the sewing machine motor, foot warmer, electrical heating pad, liquid heater, chafing dish, coffee perculator, tea pot, etc. The electrical home is not by any means a visionary idea and naturally as the various electrical utility articles become perfected in their working they are more and more in demand. It is certain that no more acceptable present than an electrical gift of the nature of the ones we have described could be obtained.

As we have said, above all there is the happy combination between the merchant's general scheme of display and his lighting department. It is of an importance that cannot be overlooked. Display is everything at this time of the year. A merchant who makes a success of his Christmas goods must attract the holiad ycrowd. He must have his store looking bright and cheerful. He must show his goods so that the people can see what he is carrying, and he must be in good time with his display. Then again, we come to the great toy element. There are a number of little electrical toys which will please the children more than anything else, because they have this advantage over clockwork, that they do not get out of repair so quickly, and are much more durable in every way. Little electrical windmills, trains with stations and all necessary adjuncts, steamships and various other articles of this description, are enough to claim the undivided attention of all the children in the district. And it must not be forgotten that children are the great source of trade at this time, not only directly, but indirectly. A merchant who goes thoroughly into the question of displaying electrical supplies will find the attempt worth making. It does not necessarily mean a very heavy stock, and yet he has at his command a source of profit, and a very great help to his powers of display.

How to Push Flat Irons.

The procedure adopted by one merchant in selling electrical domestic appliances is well worth studying, as it contains some good pointers. His first attempt was with electrical flat irons. Circular letters were sent out, explaining in full the merits of ironing by electricity, and inviting readerss to come in and inspect the articles, and see what they could do. This meant practical demonstrations at the store, but it brought in a lot of people who, if they did not buy an iron, at least became familiarized with the store, and probably saw something else they liked, and maybe purchased. Next a few sample irons were sent out free of charge, on the understanding that if they were kept longer than a month, they must be retained. None came back, while many people came in and said they had seen the iron in So-and-So's house, and wanted a similar one.

Then again, the electrical washing machine is an article that every woman should have in her house, as it saves time, produces good results, and solves the help problem. The most satisfactory way to start a demand for this line is to display one in the window, and if possible have a working model attached. Also give practical demonstrations. Let probable users see the article in working order, or give them a chance to try it out for themselves. In electrical articles, as in everything else, it is necessary to let the public know that the store is carrying such lines. The more enthusiastically a merchant pushes his lines, the quicker his community catch that enthusiasm and believe in the merits of the article.

In connection with the using of electrical utilities, an adaptor has been brought out which will be found very useful in making power connection. This adaptor is a device whereby a lead may be taken for an iron, fan, warmer, etc., from any lampholder without disturbing the lighting arrangement. It consists of a harp of brass, with a second holder for an additional lamp, or other electrically maintained attachment. When it is desired to bring the adaptor into use, the lamp is transferred from the fixed to the other carrier, and the whole fitting placed in the fixed carrier. This leaves the original light undisturbed, while giving an additional wired point to take a standard bayonet plug adaptor. The appliance is specially useful in connection with electric irons, particularly when in use during the day. In this case the lamp in the adaptor may be used as a spot-light to indicate that the current is on the iron, or it may be removed entirely from the fitting, thus saving the slight extra current used by the lamp.

The Demand Ever Growing.

There is one great advantage in handling electrical supplies and commodities, and that is that the demand is an ever growing one. The using of the power is becoming part and parcel of our everyday life, and as different inventions and ideas are brought forward, so the agent becomes more indispensable. For instance, the up-to-date doctors' room looks like an electrical testing laboratory. Among his equipment will be found induction coils of various sizes, vibrator motors, motor drills, motor generators, static machines, storage batteries, condensers, lamps of various descriptions, cauterizers, and other heating apparatus. Electrical therapy is coming more and more into use for treating chronic ailments, and the results thus far obtained are such as to cause the greatest hopes for the future of this kind of treatment to be entertained. Electric heat can be more readily and conevniently employed for medical purposes than any other form of heat, because it can be kept under perfect constrol, and can be employed without loss of time. Electric heat is also of great convenience for sterilizing thermometers, needles, dentists' instruments, and so on.

Not only in this direction, but in trades such as the bakery and confectionery ones, electrical machines are getting popular. Thus the merchant who commences to handle electrical supplies need have no fear that the field will become restricted. If he secures for himself the reputation of being the electrical house of the district, there is no possibility of a stagnation in the demand. Until a better power than electricity is discovered, the demand will always be active for various lines, and the merchant who handles supplies in a small way now may be handling them in a fashion at some future date that he would think impossible at the present moment.

Hardware and Metal Subscribers' Letter Box

Any Question on Trade Subjects Will be Answered by the Editor in This Department. Do You Want Any Address, Any Special Line of Goods, Anything Relating to the Hardware Trade? If Inquiry is of a Nature that the Correspondent Does Not Desire Publicity, He Can Use Initials or Nom de Plume.

Belting Trade Cut Up.

M. C., Langham, Sask., writes complaining that the trade in belting is badly cut up by the competition of implement agents who are said to be able to buy belting from some manufacturers at lower prices than hardware merchants are quoted.

Editor's Note.—Inquiry among belting manufacturers indicates that there is considerable truth in the complaint made. J. L. Goodhue & Company, Danville, Que., state that their trade with wholesale houses has fallen off owing to the unfair competition of manufacturers who sell to anyone at wholesale prices without protecting the retail trade in any way. Although the demand for belting cannot be increased by low prices belting is being sold in Western Canada at from 20 to 25 per cent. lower than in the United States. Cutting of prices in belting is usually followed by a lowering of quality and the implement men are said to be selling low grade belting, farmers and threshermen being governed more by price than quality, thus making it hard for hardwaremen who handle high grades of belting to compete.

Walter Sadler, of Sadler & Haworth, Montreal, interviewed on the question, said that so far as their firm was concerned they were protecting the hardware trade to the full extent of their powers. "We have an agent in the West, and he sells directly to the retail merchant, but we have no implement agent on our books. To give the hardware trade the best prices, we have gone past the jobber, and are dealing with the retail trade direct. It was to our interests that the price should be maintained, and we mean to do it to the best of our power, as we are looking to the future and it would not pay us to indulge in price cutting.

"Last year," continued Mr. Sadler, "our agent told us that severe price cutting was going on and asked us what we were going to do in the matter. We told him on no account to depart from our regular prices. In my opinion it will be found that this cutting is nothing more than the selling of a cheap line of belt which is worth the price asked for and no more, and that buyers know they are getting a cheap article. You may take it that we are not responsible for the price cutting, and we should very much like to see the whole thing thoroughly sifted."

Other belting manufacturers state that they protect the hardware trade to the extent of ten per cent., but admit that the trade is being cut up to the injury of the hardware merchant. The wholesale agent for one belting company is said to also handle farm implements so that his sub-agents are supplied with belting. The Massey-Harris and International Harvester Companys do not handle belting for sale to farmers, according to the manufacturers who supply them with belting.

In connection with this class of trade one manufacturer states that about fifteen years ago he offered his agency to a hardware merchant at Calgary but the retailer would not take the line up. The Great West Saddlery Company, were more enterprising, however, and their turnover in belting now amounts to a very large sum annually, the belting trade also bringing them a good trade in other lines of factory supplies. Here is a case where the hardware merchants have only themselves to blame if they have let the belting trade of that district go past them.

Retailers in the west are invited to send their views on the condition of the belting trade in the west and what steps should be taken to hold the line for the hardware trade. As manufacturing in the west increases belting will become a more important line than it has been in the past.

Openings in West.

H. A. Assinda, Handsworth, Birmingham, England, writes: "Being a subscriber to your paper I have read several interesting articles on commerce in Canada. Could you furnish me with particulars of one or two new districts where it would be possible to open a hardware store.

Editor's Note.—The information bureau of the C. P. R., states that there are openings at present for hardware stores at Cowley, Alberta; Candahar, Sask.; and Jansen, Sask. Other openings can be found by getting in touch with the Canadian Northern and Grand Trunk Pacific Railways. New towns are constantly springing up and any list issued would have to be revised every month. A personal view of the ground would be many times better than any amount of correspondence.

Linseed Oil Substitute.

J. S. Lockie, Newton, Ont., asks for the name of the makers of "Linoil."

Editor's Note.—The Canadian Oil Companies, Strachan avenue, Toronto, "Linoil" is a substitute for linseed oil recommended by the makers for use in paints on interior or exterior surfaces with the exception of whites, for which a special substitute is made.

Soapstone Tanks.

Macnab Bros., Orillia, ask for names of makers of soapstone tanks.

Editor's Note.—Write Phoenix Soapstone Co., New York, Alberene Soapstone Co., Alberene, Va., or National Soapstone Co., 385 1st Ave., New York.

Galvanized Cistern Tanks.

Burnett Bros., Newmarket, asks for name of makers of light galvanized steel cistern tanks.

Editor's Note.—Ontario Wind Engine and Pump Co., Toronto.

British Spelter.

Brand's Pure Spelter Co., Glasgow, Scotland, asks for information as to purities of spelter largely used in Canada.

Editor's Note.—There is a little demand for 99.5 per cent. purity, but the great bulk used is in the lower purities ranging from 99 per cent. to 99.5 per cent. Most of the imports are from the United States or Silesia.

Gas Lamps.

J. J. Hewitt, Medicine Hat, Alta., asks for the address of a manufacturer of portable gas lamps, also lamps on wooden stands, mission style.

Editor's Note.—The James Morrison Brass Manufacturing Company, 93-97 Adelaide street west, Toronto.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Sheffield Made Tools.—Spear & Jackson, Aetna Works, Sheffield, Eng., have made great improvements in their new catalogue now being issued to the trade. Not only is it more comprehensive in character, but it is in loose leaf form, thus enabling the catalogue to be maintained up to date by the addition of any pages or alteration of pages that the firm may issue from time to time. The catalogue is also supplied with blank sheets to be used as a memo for price changes, etc., so that the merchant has a complete reference book at his hand. The catalogue is simply indexed, and the various tools being placed under the trades for which they are used, makes reference very easy. All the lines of the firm are given, including the new high speed steel (Double Mermaid) which will harden in air blast or water, tool sets and complete ranges of saws, chisels, etc. The book has naturally a very strong cover, and is well printed. No merchant should be without such a good reference book. It can be obtained on application from the Canadian agent of Spear & Jackson—James A. Henderson, Metals & Hardware, 234 Board of Trade Building, Montreal.

PUBLISHED EVERY SATURDAY.

IS IT SAFE TO BOOK?

There has been much talk, among retailers more than amongst consumers, about the high price of paints and there are many who are hesitating about booking orders of paint, lead, oil and turpentine for future delivery. Are they wise in doing so?

A study of the market indicates that better judgment would dictate the placing of the usual booking orders even at present prices with a reasonable certainty that a good profit will be made on the investment. When paint manufacturers withdraw their travelers in order to avoid having them decline to protect customers against an advance on orders placed now for future shipment, as some paint manufacturers have done, it ought to be a good tip for retailers to buy.

Linseed oil is climbing higher and unless there is a record crop of flax harvested in the Argentine Republic, of which accurate news cannot be obtained before February, the shortage of seed in the United States will result in a further call upon stocks in Canada and Great Britain and prices will have to be jumped upward again. Receipts of flaxseed are very light at Duluth and Winnipeg and it is evident that farmers and speculators are holding for even higher prices.

With linseed oil as a chief constituent in white lead and ready-mixed paint, it is evident that grinders and paint manufacturers will have to secure higher prices for the stocks they manufacture during the coming winter for use next summer than they obtained for the stocks made up for the past season in which cheaper oil was used. Though retailers may be able to sell substitutes to painters who are careless of their reputations and demand a cheaper article in order to secure competitive contracts, manufacturers cannot take chances with their reputations and must use the best materials.

White lead has not advanced in proportion to the increased cost of raw materials and it along with both oil and ready-mixed paints seem to be slated for advanced prices for next season.

But with all these increases paint is cheaper to-day at a retail price of $2.50 per gallon, than it was ten years ago at $1.50 per gallon, in comparison with the relative prices of other commodities. A Chicago paint manufacturer has issued a poster to be placarded throughout the country, a dozen articles being selected for comparison. For instance ten years ago 7 1-7 bushels of oats at 21 cents equalled in value the retail price of a gallon of ready mixed paint at $1.50. To-day the same quantity of oats at 38 cents would cost $2.71, so the farmer will save 21 cents by exchanging 7 1-7 bushels of oats for a gallon of paint at $2.50 at present prices. And the same illustration can be applied to other grains, to meats, and to mechanics' wages.

If the merchant handling paint will do a little figuring along this line he will stop talking high prices and will rather refer to the cheapness of paint in comparison with other articles.

And by the same token he will hesitate no longer, if he has not already done so, to advance his retail price of paints to a point where he will be making a fair profit on his goods as well as getting prices established on a proper basis for next season.

DO NOT WAIT FOR TRADE.

The store trade is considered by many dealers as a line that will look after itself. People will only buy stoves, they argue, when they find that they really need them and no amount of advertising will induce them to buy before that time. In answer to this, it is possible to adduce a score of cases where dealers have featured the stove trade and the mail order houses strivbranch with the result that their business has increased literally by leaps and bounds. With furnaces and gas ranges entering so largely into the heating trade and rhe mail order houses striving by every means to deflect a portion of the business their way, the stove dealer to-day is in a position where he must bestir himself if he desires to keep up with his competitors.

At the same time, the local dealer is, in many respects, advantageously placed. By the adoption of progressive measures, he can effectually put his business beyond the danger of loss; it is only by torpidity, and failure to live up to opportunities that the dealer is liable to find the opposition taking his trade away. By keeping his stock up to the mark, displaying it effectively and continuously, by advertising wisely, the merchant lays the foundation of a sure trade. But let him pay no attention to stoves and fail to have his stock well kept and attractive and the one sure thing is that opposition dealers and the mail order houses will take all his customers away from him in time.

The mail order house is a dangerous rival in some respects. It is thoroughly up-to-date in its methods. The catalogues sent out are attractively illustrated and full of effective, snappy reading matter. The goods advertised on the pages of the mail order booklets look like real bargains. The dealer can counteract this by inaugurating an effective campaign of his own, the ideas and material for which can readily be obtained. He has in addition advantages over the mail order house which, if exerted, will enable him to reduce opposition from that source to a minimum.

THE METAL SITUATION.

All the way around a very good tone is being shown not only in the primary markets, but in the local ones as well, and it looks as if conditions were working towards a really staple improvement. The only weak point is the situation in tin and the fact that there may be an avalanche in London at any moment. For some weeks now the bull operators have been in supreme control and have held prices up against all the hammerings of the bear party. From time to time prophecies have been made that the position taken up by the syndicate was untenable and would have to be withdrawn, but this has not come about yet. Tin is so purely speculative that it is extremely difficult to anticipate the market even a day ahead.

Apart from tin, however, and it is not certain that if this metal suffered a rapid decline that it would disastrously affect the other metals, there is a very strong feeling of assurance all the way around, and it is a feeling based not upon speculation, but upon a real steady improvement in consumptive buying. As an evidence of the strength of copper we have only to point out that the publication of the Producers' Statistics, although they showed that copper production had not been restricted, but was almost equal to the record month of August, did not cause a sagging in prices.

It must be confessed that it is very disappointing to find the copper producers have not kept up to their promises regarding their restriction of production in October, but before we condemn them it would be well to wait for

the figures for this month. Owing to the fact that exports have been very large, and that legitimate consumption was stimulated by the producers' statement that they were going to reduce their production, statistics were more favorable than they would otherwise have been.

Spelter has maintained a steady gait and under a strong consumptive demand not only in the primary market, but all over Canada likewise, shows very great stability and without any undue inflation of prices. With the development of galvanizing, etc., the call for spelter is largely developing, and it is on this account, and owing to the fact that producers are strong enough to restrict consumption whenever necessary, that Spelter is in such a favorable position. Lead is about the weakest of all the metals, but the primary markets are in a fairly strong position. Taking things all in all it must be admitted that metals are in a much more favorable position than some weeks back.

GIVE CLERKS A CHANCE.

In planning the holiday selling campaign the merchant should divide responsibility as much as possible by giving the various members of his staff certain definite work to do.

The window trimming and ad. writing must be looked after by the merchant or an assistant as this work is of a special character much the same as bookkeeping and buying.

But in salesmanship also should there be specialization. In a store with three clerks, for instance, it will pay to place responsibility on one clerk to make a particular effort to push cutlery, silverware, shaving goods, etc., leaving the other two to specialize upon sporting goods, toys, sleds, etc., and stoves, housefurnishings, brass goods, etc.

A customer will visit the store to buy a snow shovel and the other clerks being busy the cutlery salesman will wait upon him. After the sale is made it will be his special business to try and interest the customer in one of the lines in his charge, so knowing the customer he will say:

"What are you going to give your mother for a Christmas present?"

The customer may reply that he hasn't decided yet, so the salesman can ask how her supply of silverware is, suggesting that a certain dish, a carving set, or a dozen knives, forks or spoons might be very acceptable, requesting the customer to see him again before buying anything. In many cases the customer will either ask to have something set aside or will retain later to make the purchase, the sale being a direct result of the "salesmanship" inspired by the placing of responsibility on the clerk and the promise of recognition if he is successful in his efforts.

The matter will work out very similarly in the other departments of the store and the net result should be a 25 or 50 per cent. increase in the total sales.

Encourage the clerks by giving them a chance to develop their salesmanship qualities.

Straight Talks on Hardware Salesmanship

TALK No. 2 BY VICTOR LAURISTON

On December 27, 1909 (the 26th was a Sunday, you know) a Toronto paper facetiously remarked: "It's just 363 more shopping and other days till Christmas."

That was a joke with a lot of truth back of it, and a lot of real, business gumption in its system.

Now the 363 more days have wiggled down to forty-two more days. Then Christmas will be here. But it's not quite that far to the beginning of the Christmas rush.

What are you doing to anticipate the rush?

You like that rush. It's nerve-racking while it lasts, but it means business—and you're behind the counter to transact business—and the more of it you transact, the better you'll like it.

Yet, at the same time, if there's any way of digging a wider channel of time through which the tide of Christmas trade may flow more easily, you're not averse to getting out your business shovel and your mental pick and your financial nitro-glycerine.

If you're to ease up on the Christmas rush, now is the time to do your thinking, your planning and, for that matter, your—doing. You can't do these things when December arrives, and the busy season has actually got you in its grip.

How would it be to give your Christmas advertising an earlier send-off?

You calculate, we'll say, that the Christmas season lasts three weeks. You say, accordingly, "My Christmas advertising must last also three weeks." But, really, you must push a while through the advertising columns before the tide of Christmas trade starts moving. So that, if you calculate on a Christmas season of three weeks' duration, with business doing all the time, you should start pushing a few days ahead of three weeks.

If this holds good, isn't it equally logical that, with an advertising start a couple of weeks ahead of the regular time, you'll start the business tide moving correspondingly ahead? You stand a good chance of spreading the aggregate buying over four weeks, instead of three. That means one of two things—either the same aggregate buying with less daily wear and tear, or more aggregate buying with the same daily wear and tear. You'd welcome either.

Simultaneously with your advertising talks, commence talking Christmas through your window displays. Don't just talk Christmas goods; but also talk reasons why people should buy their Christmas goods early. Tell them that when the stores aren't jammed full of people they'll have a better chance to look around; that when the clerks aren't harassed to death they'll get better service; that before the stock is depleted is the time to secure the best choice of goods. When you talk such things as these—things to the customer's own advantage—you won't need to weep over the overworked clerk, and appeal to the customer's humanity.

Then you have your steady customers. You know them. They're probably down on a carefully compiled mailing list. Get up a neat little circular letter and talk Christmas to these people through the mails. Tell them why they should buy early. Tell them also some nice, appropriate things to buy for him, for her, for them, for the relatives, and for the people-in-law. Start these steady customers of yours to think Christmas early; and, ten to one, they'll do their Christmas buying early, not merely because it's a matter of humanity, but because it's a matter of business as well.

Prepare Now for the Rush of Holiday Trade.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin.—2c advance.
Turpentine.—2c advance.

MONTREAL.

Nov. 11.—A 2c advance in tin marks the local metal situation this week. The bull operators in London withstanding the lack of legitimate consumption and the absence of inquiries on American account have been maintaining the squeeze which is now getting to record lengths for tin manipulation. It was only natural that local figures should show corresponding stiffness with primary figures. There is not apparently a lot of tin being held, and merchants are holding well to prices. Copper is unchanged, although it would not be a surprise to the market if prices went up in a short time. There is a very confident feeling as to the future, despite the fact that producers' statistics showed that production has not been checked. Spelter is very firm but no changes are made. Lead looks to be improving again. There is no let up in the tension on Canada plates, and users are anxious as to their winter requirements. Imported iron is very brisk as is only natural at this time. Prices all the way round are firm, and look in many directions to be stiffening. Trade is very good and promises to continue so as stocks in users hands are on the short side.

Pig Iron.—Delivery is being hastened in pig iron as open water is now nearly at an end, and this makes a great deal of difference to buyers in Montreal. Warehouses are being stocked, and everything made shipshape for the winter. It is likely that there will be a strong run on store iron as although users have bought well it is doubtful whether they have by any means covered themselves enough. Domestic furnaces are showing a fair amount of new business, and plants are well covered for some months. The better feeling noted last week in the U. S. iron and steel markets continues. The inquiry has improved, and although heavy buying is slack lighter orders are coming in steadily. There is a stiffening of prices in the South. Stocks are slowly being reduced. The improvement in Wall Street has also helped matters.

Tin.—An advance of 2c marks the tin situation locally. This was not unexpected especially as the bull party in London has maintained control. Buying is good despite the recent advances, for when stocks are low users cannot wait. A lot of consumers are now sorry that they waited so long as they have. Jobbing prices are now at 40c with slight concessions for good round lots. These stiff prices come at an unfortunate time as consumers using water freightage generally stock ahead around now, and it cannot be said that prices are favorable to them. The continued control in London has naturally made the open market very slow, and there is very little buying on consumption account. American orders are also quiet. It is just as impossible to get a line on the immediate future of tin as it was at any stage of the game. The only thing is that those who want the metal badly have to pay through the nose to get it.

Copper.—Copper is unchanged this week but is very firm in sympathy with New York and higher prices are anticipated. There is a very good inquiry, and buying has improved. Naturally with the advance there is a keener watch on the market, and a rise of another point should bring in a lot of new business. It speaks well for the strength of copper that the producers' statistics showing that production had not decreased in October after all did not induce a slump in prices. The recent improvement was based on the general belief that the producers had instituted a rigid restriction of production, and in fact promises were made by them to this effect. But they have not lived up to their protestations at least not yet? Perhaps it will be apparent during November. Export deliveries were very good for October, while the consumption was better. At any rate copper withstood the shock extremely well. London being speculative fell away a little.

Spelter.—Spelter is unchanged but very firm. The threatened advance has not come, however. Trade is good and there is quite a large amount of stocking up being done. The English market is firm and showing great strength. St. Louis is also gradually advancing.

Lead.—Lead both imported and domestic is unchanged under a fair demand. The English market is fluctuating, but on the whole strength is maintained, and the outlook is more promising than for some time past.

TORONTO.

Nov. 11.—The metal market continues strong in practically every line. Tin shows a tendency toward stronger prices, due to the manipulation on the London market where the syndicate still effectually controls the situation.

The copper market is still satisfactory and it is confidently expected that it will remain so. It is reported that many important agencies are well sold up to the end of the year. The producers have not carried out their promise to limit the output but as the consumption has gone up, the necessity for a limitation of operations seems to have been to some extent obviated.

Flurries on the primary markets in many lines as a result of the United States election returns have not been reflected locally and are not regarded as likely to have any effect.

Pig Iron.—There has been more movement in pig iron. Practically all steamers with consignments of this line have now arrived and the stock is being rapidly taken up. Quotations are: Canadian No. 1, $19.50; No. 2, f.o.b. furnace sellers, $19; Middlesboro, No. 3, $20; Summerlee, No. 2, $22.50; Cleveland, No. 1, $20.50; Clarence, No. 3, $20.75; Jarrow, $20.50; Glengarnock, $22.50.

Tin.—The market locally has shown signs of increased strength, although no change has been made in quotations as yet. Ton lots sell at 39c and for smaller bulk 40c and 41c is obtainable. It is impossible to say what the next week will bring forth but there is a strengthening tendency. The demand here continues strong but is confined mostly to small lots, the dealers seeming willing to live from hand to mouth while present quotations rule. The level is still maintained on the primary markets.

Plates and Sheets.—Canada plates are coming forward more freely now but the greatest rush seems over. Enquiries are less frequently received; although the demand is still strong. Many orders are being received for next year both for Canada plates and galvanized sheets, the dealers being determined to escape the consequences of any shortage such as was experienced this year. No hope is held forth for lower prices next year.

Copper.—The copper trade is still showing firmness, though one firm reports a lack of big inquiries. From other sources, however, reports are received that indicate no loss of activity. The production continues as large as ever but fears that the market will be overloaded are not now entertained as the consumption is increasing at a rapid rate. No changes are recorded locally.

Lead.—Domestic lead is quoted at $3.75 and imported lines at $3.80. The market continues strong with a heavy demand.

Spelter.—The demand for spelter is as strong as ever and advices are to the effect that the supply is not proving adequate. This condition has not resulted in any price changes, local quotations ranging from $6.15 to $6.25. That the present high level will be maintained is a safe prediction from present indications.

Old Materials.—The approaching close of the open season is making it more difficult to obtain supplies of old metal and prices are fluctuating slightly. Scrap zinc, which was quoted last week at 4c is to-day figured at 3 8-10c. Heavy copper and wire remain at 11¼c and 11½c; heavy red brass 10¾ to 10½c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c. Machinery cast iron No. 1 is firm at $14.50 but some firms quote the following increases: No. 1 wrought iron $10 to $11; malleable $8 to $10 for No. 1; miscellaneous steel, $6 to $7. The increase in these lines, however, is not as yet general. Stove plate is quoted at $13.

HARDWARE MARKETS

MONTREAL.

Nov. 11.—Trade is showing the nearing approach of the Christmas demand, as goods which can be classified as holiday lines are becoming very prominent. Cutlery, silverware and fancy articles in brass, gun metal, leather, etc., are in active demand, and the range of ordering has greatly widened. As time goes on it is more and more evident that the hardware trade is bent on securing a good proportion of the holiday demand, and there is no other trade in a better position to do so.

The demand for general household lines maintains very regular strength and orders are well assorted, and show careful but confident buying. Enamelware is prominent, and the ordering is well distributed over the many grades and classes. Utility articles such as bread makers, meat choppers and cake mixers show steady movement, while seasonable lines such as weather strip, snow shovels, sleigh heaters are in satisfactory call in a sorting up way. Skates and hockey sticks are prominent. Lumbermens' supplies are now showing up well especially boot calks. Snowshoes are fair. Builders' hardware, and other staples such as bolts and nuts, nails, bar iron and steel keep up a steady flow and business all the way round may be described as being very satisfactory. Prices are undisturbed, and the tone of the market is very firm.

Cutlery, Silverware and Fancy Goods.—These lines form a large proportion of the goods now being shipped, and quite a festive element is being introduced. Cutlery, scissors, silver and plated ware of all kinds, glass, china, metal and leather lines are among the goods in request. Shaving sets, razors, manicure sets, watches and clocks, are also prominent. There is a good tone all the way round.

Seasonable Lines.—Sorting up orders in weather strips, sleigh bells, heaters, snow shovels, stable fixtures are steady. A good consumptive demand has been experienced, and dealers are not overburdened with stocks. The cold weather has quickened the sale of stoves, ranges, and heating accessories. Coal hods, pokers, and sifters are moving well. Oil heaters and cookers are showing stimulation.

Sporting Goods.—Skates and hockey sticks are now very strong lines and jobbers' stocks are showing that strong inroads are being made upon them. Snowshoes, toboggans, and sleds are in better request. Guns have fallen off but there is a strong call still for ammunition. Air guns, boxing gloves, Indian clubs and other gymnastic lines are showing improvement.

Builders' Hardware.—Despite the approach of severe weather the call for builders' hardware maintains its strength, especially locally. The demand is of a well assorted character. We quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside), $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Bolts and Nuts.—Good strength is shown in bolts and nuts, the demand being evenly distributed. Buying is being stimulated by the nearing end of open water. We quote: Discount on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Heavy Hardware.—There is a steady call for bar iron and steel. Other lines are now on the quiet side. We quote: Chain coil, ¼, $5.25; ⅜, $3.80; ½, $3.50; ¾, $3.25; 1, $3.25; anchors, 4½c lb. up; merchant bar iron and mild steel, $1.90; steam gauges, $1.50 each up; injectors, $4 to $18 each.

Wire.—Wire lines are on the quiet side generally. The reduction last week is expected to quicken things somewhat. We quote: Barb wire $2.20, plain twist $2.50, coiled spring (9) $2.20, (12) $2.35, staples, bright $2.60, galvanized $2.85.

TORONTO.

Nov. 11.—There is a good all around demand in the hardware trade, the outstanding feature being the activity in Christmas goods. All holiday lines are now moving, with a strong trend toward the better grades and a marked increase in the demand for the newer lines.

Seasonable goods are selling briskly, the orders being for the most part of the sorting-up variety. Builders' hardware continues exceptionally active, for which the prolonged mild weather is the primary cause.

The jobbing houses without exception report such general activity that they are hard pressed at the present time in handling the great volumes of trade. There are no price changes listed, the expected decline in some lines of wire not having materialized.

Seasonable Lines.—Winter goods are moving rapidly and there is a consistent demand for all varieties. Among the goods mostly called for are sleigh bells, snowshovels, weather strips, blankets, girths, lanterns, sleigh bells and sleigh heaters. Household goods are selling with a little better than the usual regularity, there being a consistent demand for kitchen utensils and enamelware of all kinds.

Builders' Hardware.—The mildness of weather conditions has kept up the demand for builders' hardware beyond all expectations. Sorting-up orders are still received from all sections, the city trade being exceptionally keen. It is quite apparent that dealers had not anticipated so steady a demand and in many cases had not stocked up as fully as the trade has since warranted, making necessary a series of additional orders. The jobbers expect the call for builders' hardware to subside within the next week or so.

Heating and Lighting Goods.—A temporary slackening is reported in the stove trade, due to the mild weather. When the arrival of the first really cold weather is delayed, the trade is spread out over a longer period, the demand reaching its climax in the days immediately following the cold snap. Stove manufacturers and dealers say they would like to see the present rainy weather continue for another week at least, as it would give them a chance to catch up on their orders before the final rush comes along. Prices remain firm in all stove lines. The demand for heating accessories, pipes, plates and sheets, pots and pans, hods, scuttles and lifters, continues brisk.

Sporting Goods. — The transition period has been reached in regard to sporting goods. Demand for summer and fall lines has been reduced to the minimum and winter sporting goods are not yet moving as briskly as they would if the weather were more seasonable. Still skates and hockey supplies are selling fairly well and there is some demand for guns and ammunition.

Heavy Hardware. — Bar iron and steel are still in demand. Bolts and nuts are being shipped freely with a good supply on hand to meet the demand. There are no changes in the price schedule. The discounts on carriage bolts are quoted: ⅝ and smaller, 70; machine bolts, ⅝ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—Holiday lines are rapidly assuming heaviest proportions. There is a consistent demand for cutlery, knives, carving sets, chafing dishes, brass goods, china, metal toys, metal clocks and copper goods. Razors and shaving accessories are selling well. Cut glass goods will figure prominently in holiday displays this year. Most orders are for immediate delivery, showing that the dealers are anxious to have the goods on hand for display as early as possible.

Wire.—The expected decline in several lines of wire has not yet been effected. In view of the slackness in demand at present, no action may be taken in this regard.

U. S. METAL TRADE.

New York, November 9.—The Iron Age says: An election result with so few surprises as are found in Tuesday's returns could not have an important effect upon business. The campaign saw no placing of orders for iron and steel contingent upon the election outcome, in the way that has often been done. Leaders in the trade are now simply waiting for events, with no definite expectation of anything beyond what has already been indicated concerning rail purchases. In making up orders at this time for 1911 the railroads are only making the usual provision for early rollings to insure spring deliveries.

HARDWARE TRADE GOSSIP

Ontario.

Joseph D. Kegle, L'Original, tinsmith and plumber, has assigned.

E. W. McClung, hardware merchant, Elk Lake, has assigned to W. J. Henderson.

A by-law granting exemptions to the Penberthy Injector Company has been carried at Windsor, Ont.

The Bond Hardware Co., Guelph, employees, have organized a hockey club and will enter the Guelph city league. Officers elected were: Hon. Pres.— W. G. Howell; President.— H. E. Black; Sec.-Treas.— C. Chubb; Committee.— B. Farrow, H. B. Mercer, G. Dawson and H. Mahoney.

A new stove company is to be started in Guelph. The property of the Grundy Stove Co. has been been purchased by James Fowler, of Toronto, who will commence operations as soon as an extra piece of property is secured, application for which has been made to the city council. The city holds the property in question and will undoubtedly turn it over to the company.

Last Saturday evening, Miss Jean Macdougall, head book-keeper and auditor of Ingram & Davey, St. Thomas, was called to the office and presented by the employers and staff with a cabinet of pearl handled knives and forks, as a slight token of appreciation, on her approaching marriage to George Rawlinson, Detroit. Expressions of regret and good wishes were extended to her by her fellow employees.

Mr. Willis Mitchell, of Jas. Cartland & Sons, Birmingham, England, who has been making a business tour of Canada with his son, recently met with a serious accident, a fall from the slippery steps of a railway car resulting in a badly dislocated shoulder. This has caused some delay in his calling upon many of his customers from whom he has received the greatest sympathy, but he intends completing his journey during the next three or four weeks before leaving for England.

Quebec.

The Danville Asbestos & Granite Co., Danville, Que., has obtained a charter.

Western Canada.

W. R. Huxley, Edmonton tinsmith, has sold out.

The Warnken Hardware Co., Winnipeg, have incorporated.

Jos. Bradley has started a hardware business at Amulet, Sask.

J. M. Sutherland has started a hardware business at Birch Hills, Sask.

T. H. Pollon, Dauphin, Man., hardware, has moved into his new block.

James A. Anderson has started a hardware business at Drinkwater, Sask.

Spragg and Hubbs, hardware, North Battleford, Sask., have suffered loss by fire.

Morris & Taylor, hardware dealers, Castor, Alta., have sold to the Williston Trading Co.

Gilmour & Plumridge, hardware and wall paper dealers, Winnipeg, have dissolved partnership.

The Nelson Hardware Co., Nelson, B.C., has paid $26,000 for the Ashdown hardware block on Baker street, that city.

H. J. Fumerton, dealer in hardware and furniture, Reston, Man., is discontinuing business there and is starting at Jarrow, Alta.

In a recent fire in Yorkton, Robt. Lee lost $1,600 in tools, paints, oils and vehicles. On the stock, insurance to the extent of $800 was carried.

J. H. Ashdown, wholesale hardware merchant, Winnipeg, has donated $25,000 to the fund being raised to construct a new Y.M.C.A. building at Winnipeg.

Carl Steven, general manager of Felten and Guilleaume, Germany, one of the greatest cable and wire manufacturers of Europe, is touring the west accompanied by W. F. B. Henry, of Watson Jack & Co., Montreal.

Charles Hunter, of Hunter-Kendrick Co., Phoenix, B.C., with J. R. Saunders is planning the opening of a branch of their hardware business in Merritt, B.C. They have purchased a lot in that town and will put up a new building. Mr. Saunders is manager of the firm's store in Greenwood.

Maritime.

The contract for builders' hardware required for the new Y.M.C.A. building, Halifax, has been awarded to Stairs, Son and Morrow.

The Cummings Brass, Iron and Wire Co. have been incorporated by F. J. Cummings, Toronto. Thos. Cummings, W. J. Cummings, H. R. White and W. M. Sharpe, of Winnipeg. The capital is $50,000.

United States.

The Duff Manufacturing Company, Pittsburg, Pa., manufacturers of lever and screw jacks, have purchased the business of William Forgie, Washington, Pa., manufacturer of oil well jacks.

PAINT MANUFACTURER DIES SUDDENLY.

General regret will be felt among the trade at the death, after a short illness of John M. H. Robertson, of the James Robertson Co., manufacturers of paints, metals and plumbing goods, Montreal. Mr. Robertson was only 42 years of age. All his business life he has been associated with the firm of which his father was the founder. On the death of the latter some years ago Mr. John Robertson assumed the presidency of the company, and under his control the business was extended considerably, branches being conducted in Toronto, Winnipeg, Vancouver and St. John, N.B. with an affiliated business at Baltimore, Maryland. Deceased leaves a widow and three children, and three brothers, James A., Alex. A. and Chas. M. Robertson all of whom are associated with the business.

The funeral was held on Wednesday at Mount Royal cemetery, Montreal, and was attended by the staff, members of the masonic order, and friends. The funeral was conducted at the house of the deceased, by Rev. M. A. Campbell, pastor of the First Presbyterian church, whilst Rev. Dr. Charters, masonic chaplain, officiated at the grave, and paid a tribute to the memory of the deceased. The chief mourners were the three brothers.

The late Mr. Robertson was a man of retiring characteristics, but was highly regarded in business circles of the city. He was a member of St. Gabriel's church, and for some years acted in the capacity of trustee.

CATALOGUES.

Competion for Children.—The Ontario Lamp & Lantern Company, Hamilton, who recently announced a competition for children, in circulars to be enclosed in shipments of Ontario Lantern Footwarmers, announce that a great deal of interest is being manifested in the contest. Many dealers, however, have written for a supply of the the leaflets without ordering a supply of the footwarmers. The competition is confined to dealers buying these goods.

PUSH SCREEN PAINT NOW.

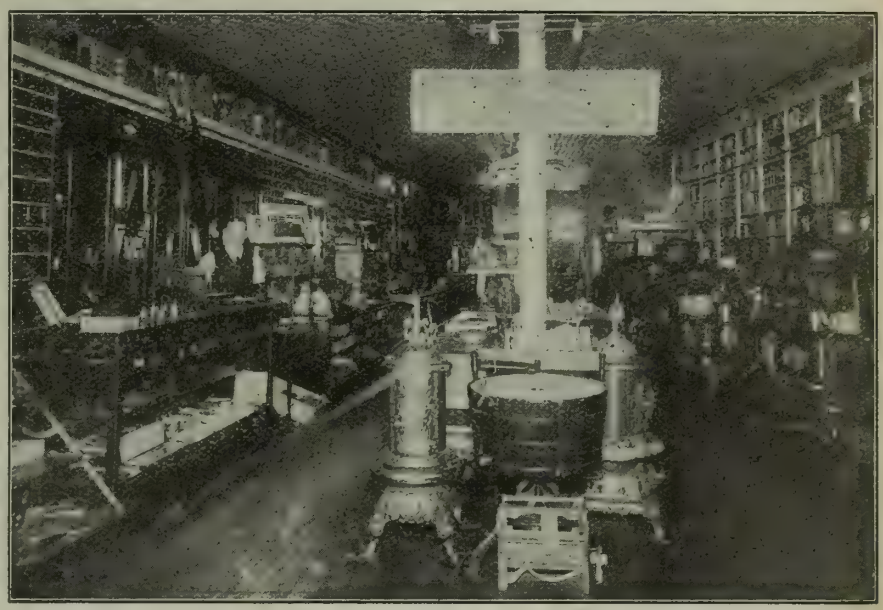
Thrifty housewives are taking down the fly screens for the winter. These should be given a good coat of special screen paint before storing them away. The ordinary wire screening is so flimsy that once rusting starts it is but a short time before the screen is ruined, especially when stored in a damp cellar. Get up a suitable window display of screen paint and call attention to the necessity of painting screens before storing them. By painting screens every Fall the cheapest screening will last indefinitely. Talk screen paint over the counter. Like all paint and varnish specialties, screen paint pays a good profit.

PRIZE WINDOW COMPETITIONS

From present indications there will be a larger number of contestants in the window display competitions now being conducted by Hardware and Metal than in any previous contest. Although the month of November is yet young, another photo of a spotring goods display was received this week and many others are heard from which, if good photos can be obtained, will be forwarded for entry in either the "fall goods" or "sporting" window competition. Photos must be forwarded not later than Dec. 1 and the two $5 cash prizes offered are open to hardwaremen or clerks in towns under 5,000 population and towns and cities of a larger size.

Then next month the Christmas window competition will be conducted under similar conditions.

News and Methods of Canadian Hardwaremen



St. John, N. B., Firm Occupy Fine New Store — Library Voting Contest at Newmarket a Good Trade Bringer — Waterloo and Preston Firms Establish Electrical Departments — Bracebridge Merchant Uses Simple Mechanical Device in Window.

NOVEL VOTING CONTEST.

Newmarket, Nov. 8.—G. A. Binns, has rearranged the interior of the store he erected here a year ago, and with a new hot water heating system now has a very complete store. The new arrangement has made it possible for him to devote a good space to stoves and ranges, in which line he has had the best year in his experience, there having been over 100 new houses erected here during the past year. This has also meant a big increase in the volume of trade done in the builders' hardware and mechanics' tools departments.

Mr. Binns has also catered to the automobile trade, and being on the main road from Toronto to Lake Simcoe, has made his store popular with autoists by carrying a supply of spark plugs, batteries, tires, etc. His trade in benzine has been particularly large, drivers of motor cars preferring to secure supplies from stores equipped with Bowser tanks. Mr. Binns expects to operate a car himself next year, using it to develop his trade amongst the farmers of his district.

An effective display which sold over a dozen of "Perfection" oil heaters, and several open coal grates, was arranged by Charles Byford, clerk for G. A. Binns, a week ago. The window represented a library, and the stoves helped to illustrate how cosy a room could be made by using an oil heater or fire grate. The bookcase, valued at $150, is being offered as a prize in a voting contest. One merchant in each line of business gives a vote for each ten cent purchase until March 1 next, and the Sunday school, public school, lodge or other public institution, securing the largest number of votes gets the library free. The contest is exciting a great deal of interesst locally, and will be a means of increasing the trade of the merchants interested in the competition.

Rearranged Interior of G. A. Binns' Store at Newmarket.

"Library Contest" Window Display Th at Sold Several Heaters.

FINE NEW STORE.

St. John, Nov. 9.—A handsome and commodious addition to the retail and wholesale hardware establishment of W. H. Thorne & Co. is now nearing completion, and will be opened for business about November 15. As stated some time ago, this firm purchased a large five-story brick building on King street, at right angles to their stores on Market square, and connected with the latter by passages at the rear. For some time workmen have been engaged in remodelling the structure to suit the requirements of the new owners, and the store fixtures are now being installed.

The ground floor is fitted with white painted steel walls and ceiling, and modern electric light fixtures. One side of the salesroom (which is 50 feet long by 40 feet wide) is occupied by a glass fronted wall showcase, and the other side is fitted with a wall case for about half the length, and with shelves for the remaining portion. Nine large silent salesmen showcases occupy places on the floor at the sides and centre. All these cases are made of solid walnut, and are very handsome. In them will be displayed silverware, cut glass and fancy goods, the entire floor being devoted to this branch of the trade.

The two large show windows at the front are fitted with mahogany panels at the rear and sides, and afford an excellent opportunity to display goods in an attractive manner, the fittings being in accord with the high class of goods to be shown. At the rear, in a balcony, is the desk for the cash carrier system, and alongside an electric passenger elevator.

The second floor will be devoted to a retail salesroom for phonographs, with

stands for records, etc., brass goods, such as fire screens, scuttles, etc., and andirons, and during the holiday season a portion of it will be used for toys, of which the firm secured a supply during one of the members' recent visit to the continent. This latter departure is somewhat of an experiment, as they have never heretofore gone after the toy trade. On this floor will also be shown a line of tiles, and later mantles may be added to the stock.

The layout of the three upper floors has not been definitely decided, but they will be used for warehouse purposes mainly. A new feature will be a machinists' room, where repair work can be carried on. A member of the firm pointed out that in a large establishment such as theirs, there is an almost constant demand for the services of a practical machinist. He would make repairs to the cash system or other matters about the stores, and also any minor repairs that might be desired by customers. He could also do such work as sharpen skates, knives, etc. In the basement, a concrete floor has been put down, and the toilet rooms and dressing rooms will be located there, as well as the furnace for heating, there being a division between the two.

Before the purchase of the new addition the firm had 87,400 square feet of space for their wholesale and retail business, so that they now occupy 99,400 square feet, which they claim is the largest hardware establishment in the maritime provinces.

NEW EXPLOSIVE FACTORY.

Wallaceburg, Nov. 8.—The Dominion Carlite Explosive Co., Ltd., capitalized at $100,000, has been formed to manufacture "Carlite" a new explosive said to have a greater power than dynamite or nitroglycerine, and at the same time to be much safer. Plans are now being prepared for the erection of a factory here. The company was organized by Harvey P. Bostaph, of Windsor, and J. M. Hess of Wallaceburg, the former being manager. Other shareholders are Count von Oberstorf, of Berlin, Germany; Reinold de Toll, London, Eng.; D. A. Gordon and H. Weese, of Wallaceburg. The first named gentlemen are interested in foreign factories where Carlite is manufactured. The capital stock may shortly be increased to $1,000,000.

ESTABLISHES ELECTRICAL DEPARTMENT.

Waterloo, Oct. 11. — The arrival of Niagara power induced the Conrad Bros. to go into electric motors as a side line. Most of the local industries are finding it necessary to replace their motors, and there is a wide field for trade as a result. The enterprise of Conrad Bros. has been rewarded by a number of sales already. Another new feature adopted by this firm is the sale and installation of electric and gas lighting fixtures. They have added a competent electrician to their staff, and, although the department is only a couple of weeks old, have already secured several contracts, and have prospects of a good trade.

A window display in M. Wiechel & Son's has attracted much favorable comment. It represents a hunting scene, the back and side of the window being lined with bark, with square holes cut to represent windows. The floor is strewn with leaves, and in the centre is a camp fire, with a small kettle suspended over the embers in the regulation way. Seated beside the fire is a very good representation of a colored gentleman, cleaning a rifle. In one corner is a bunk, on which another colored gentleman is reclining. In another corner a dog is tied. Around the walls a number of articles pertaining to the chase, are placed.

A RECORD HEATING TRADE.

Galt, Oct. 11.—Building has been brisk in Galt this year, and there has been as a result a good demand for builders' hardware, but the feature of the trade has been the stove and furnace business. Allan & Mackenzie report that the demand for furnaces has been entirely out of proportion to the records of past years. Right from the first of the year they have been kept busy installing furnaces, and at the present time, despite the lateness of the season, have a number of contracts still to fill. In some cases it has been found necessary to temporarily instal heaters in houses until the furnaces can be put in. The same firm have been pushing the sale of gas ranges and heaters, and at the present time both store windows are devoted to a display of these lines.

Browne & Tait have had a good stove trade. They have featured the heating lines in their store, and this, assisted by the advertissing of the manufacturers, has brought ready sales. Between Saturday last and Tuesday afternoon, no less than twelve stoves were sold. Mail order competition has not been in evidence in Galt.

Allan & Mackenzie are carrying English crockery and other lines somewhat out of the ordinary, with best results.

Hammill & Moore have been successful in an attempt to improve their coal oil output. The competion from traveling peddlers was so keen that this enterprising young firm decided to adopt new methods in coping with them. By paying close attention to this line, meeting the price of the oil trader, and featuring coal oil in every way, they have jumped their sales to 125 gallons a week. This firm are already displaying iron toys and other Xmas lines.

NEW BRASS GOODS FACTORY.

Windsor, Nov. 8.—By the granting of the customary exceptions, Windsor has secured the Canadian branch of the Winkley Company, an American concern. A separate company, known as the Winkley Company of Canada, Ltd., has been incorporated, with a capital of $100,000. The concern will manufacture brass goods. Temporary quarters have been secured in Windsor, with the intention of starting manufacturing operations at once. If the necessary by-law is carried in January, a $15,000 factory will be erected.

MOVING BARREL IN WINDOW.

Bracebridge, Nov. 8. — Kirk Bros., grocers, used a novel mechanical device to attract attention to their Thanksgiving Day window display. A large barrel, decorated with apples, was hung to an electric attachment, which caused the barrel to swing like the pendulum of a clock. The idea might be worked into a cutlery window, by decorating a barrel or keg with tableware.

EXTENSIVE HOLIDAY CAMPAIGN.

Berlin, Oct. 11.—The P. Hymmen Co., hardware and plumbing, have already planned an extensive Christmas campaign. Not only are they displaying prominently the best lines of brass goods, cutlery, carvers, etc., but a table placed in the centre of the store has been given up to toys and Xmas goods for children. Mr. Hymmen states that he has already laid in a complete stock of toys, mostly of the iron variety, and about the last week in November will remove all goods from the centre of the store, and devote that space entirely to Xmas lines.

He is planning an extensive advertising campaign to begin at the same time, his method being to advertise in the local papers twice a week, taking large space. In addition, he will issue a circular giving full particulars of his holiday stock, provided that he can find the time to prepare it. Last year was Mr. Hymmen's first experience with toys as a Xmas feature, and he is convinced that it is a line well worth attention.

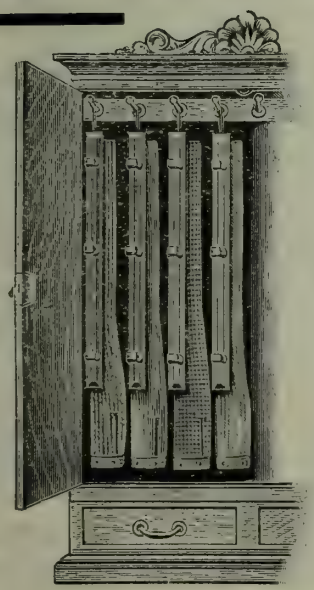
J. Fennell & Son are carrying out their Saturday sale campaign, and are meeting with success. They advertise a list of low prices on practically all lines of hardware goods for the one day only, and draw a large amount of business on that date. That Fennell & Son believe in doing a thing well is evidenced by the space in the local papers that they use in advertising these Saturday sales.

W. Knell & Co., hardware dealers, tinsmiths and plumbers, have completed the erection of a workshop at the rear of their new store. It is large and roomy, with wide windows, making the space within unusually light. Mr. Knell states that he is contemplating a further addition next year which would more than double his workshop accommodation.

L. Snyder, formerly head salesman with G. E. Potter, hardware merchant of this city, is now with W. Knell & Co. He was succeeded by Oscar Klinck, formerly with George A. Richardson, Guelph.

Stephens

Transparent Liquid Wood Filler



Is a Filler for Practical Men

Won't crack or peel.
Need not be sand-papered.
Fills the pores of the wood and gives a coat equal to Hard Oil Finish.
Can be used on any close grained wood.
A popular, well-known filler, which we guarantee to be all we claim for it.
The most uniformly reliable filler made.
In quart, half-gallon and gallon cans.
Price---very low, considering the excellence of this filler.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Nov. 10.—Just now the ordering is heavy in a wide range of hardware supplies. This is caused by the sudden downward movement of the thermometer, and the fall of snow which both tend to stimulate sporting and winter supplies. Skates, hockey sticks, sleigh bells, robes, lanterns, and all kinds of heating stoves are receiving special attention.

The approach of Xmas, also, has increased the trade among wholesalers, and everyone anticipates an excellent season.

Tin plate and all tinware is very firm in price, resulting from a shortage of production on the English market.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Canada Plates—Half polish, 6 and 7-inch, $3.40; 8-inch, $3.65; full polish, 6 and 7-inch, $4.15; 8-inch, $4.40.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾-oz., $4.80; Queen's Head, 23, $4; 24. $4.20; 26, $4.60; 28, $4.80.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9½c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 5 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—6-in., $6.69; 7-in., $9.31.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 30; japanned ware, 35.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

U. S. METAL MARKETS.

Announcement is made that rail prices will be quoted hereafter by the pound instead of the gross ton—an innovation that has been long considered. The familiar $28 quotation for a 2,240-pound ton of Bessemer rails is replaced by 1.25 cents per pound, which is the identical rate of the past nine years. Open-hearth rails, heretofore $30 a gross ton, are now 1.34 cents per pound. Extras for lots less than 500 tons and 20 tons, respectively, correspond to the $2 and $4 heretofore charged, making the price for Bessemer rails 1.34 cents in less than 500-ton lots and 1.43 cents in less than 20-ton lots.

October has the distinction of bringing out a larger business in foundry iron than any month of the year, with average prices lower than for any other month. The buying has been well distributed, both as to sections and classes of foundry product. The leading radiator interests have taken 50,000 to 60,000 tons on this movement. Steel-making pig iron is weaker.

GOOD AND BAD PUTTY.

One would think that putty, at its best simply whiting (a very cheap article), and linseed oil, would be nothing but pure and good, yet our own experience does not support this view. Our own windows are a sight. We bought the putty for pure putty. Of course, we saw it was not when we opened the can. It had a coarse look, it felt coarse, and was ropey and sticky, smelling vile. Why did we use it? Had to. Job had to be done right then. Now, all that putty (so-called) must be gouged out and new putty put in its place. What a job! I shall mix the putty that goes in. With best floated gilders' whiting and raw oil I will mix it up and knead it up, and roll it out and pound it, and then let it lay for two days. Then I will knead it some more, pound it a little more, then use it, if ready, and if not will place it in a clean can and put a lid on the can to keep the air and dirt away. That will be PUTTY.

Maybe it is not so simple a thing, after all, this putty. If it cost ten cents a pound instead of three, it would be more appreciated. It is so common that we lose respect for it. To make good putty there is only one kind of whiting to use, and that the best. Then it must be dry or it will make poor putty. If the best whiting, as we may say, has been improperly or carelessly prepared by the maker, then there will be trouble on account of free lime in it. Some samples of whiting have been found to contain pieces of flint, and that won't do. So you see how careful the putty maker must be in order not to make poor putty when he aims to make good.—American Paint and Oil Dealer.

THE WHITE MOP WRINGER

Do you realize what this TRADE MARK means to you? You can safely loan the wringer that bears it to intelligent housekeepers who mop floors, oilcloths, or carpets, and in nearly every case a wringer loaned is a wringer sold.

Much more than this, each one sold sells several more.

Your jobber should have them. If he does not, write to us.

Little Stories of Paint Selling Success

This attractive little pamphlet will interest every merchant who sells paints and varnishes. It tells in their own words the stories of how and why these dealers have had far more than the average success with their paint and varnish departments.

One merchant tells how he overcame the objections to increased prices and increased his sales at the same time.

Another tells how the S-W Decorative Department was instrumental in helping him keep two painters busy all summer. He gets $2.75 a gallon for SWP and is doing four times his last year's business.

One dealer tells why he considers the Sherwin-Williams Agency a "Privilege."

The pamphlet contains illustrations of the stores where these successes have been worked out, and of the men who created them.

The book, while small, is a mine of valuable, practical pointers on successful paint selling. You ought to have this information. Write for it now. It's free. Ask for the F323.

ENVELOPE FRUSTUM OF SQUARE PYRAMID.

Let G H K I be the elevation of the article, C A E D the plan of the larger end and L M O N the plan of the smaller end. Produce the hip lines C L, A M, etc., in the plan to the center P. Construct a diagonal section on the line A P as follows: erect the perpendicular P F, making it equal to the straight height of the article, as shown by K R of the elevation. Likewise, erect the perpendicular M B of the same length. Draw F B and A B. Then P A B F is the diagonal section upon the line P A. Produce A B indefinitely in the direction of X, and also produce P F until it meets A B extending in the point X. Then X is the apex of a right cone and X A the side of the same, the base of which, if drawn, would circumscribe the plan C A E D; therefore, from any convenient center, as X of Fig. 150, with X A as radius, describe the arc Z Y J W V, and from the same center, with the radius X B, draw the arc B F S T U, both indefinitely. Draw Z X, cutting the smaller arc at point B. Make the chord Z Y equal in length to one side, C D of the plan, and Y J to the other side, D E of the plan, and so on, until the four sides of the base have been set off. Draw Y X, J X, etc., cutting the arc B U in the points F, S, etc. Then draw the chords B F F S, etc., thus completing the pattern.—E. R. Probert in American Artizan.

Envelope of the frustum of a square pyramid.

MEETING PEDDLERS' COMPETITION.

Familiarity with the roads immediately surrounding the town and a knowledge of the financial condition of those who live in the surrounding country admirably qualify the enterprising dealer to make a drive for more stove business, says the Metal Worker, in arguing that it is a good plan to drive through a country with the delivery wagon which has been freshened up with paint ready for the fall trade and with a picture of a stove on each side on the curtains.

Preparations for such a trip include the provision of circulars of different kinds of stoves which are carried in stock, and which are likely to be needed by the people in a farming community. These circulars should be left with the people visited and who want time to consider making a purchase.

The personal visit to the house naturally will bring the stove dealer into the kitchen to see the condition of the cooking apparatus already there. If it needs replacing he can in many instances make a sale on the spot if he has come properly prepared.

Do What Range Peddler Has Done.

A pair of horses hitched to the delivery wagon can easily pull the man and one of his cheaper help as well as a good heating stove of some type, either a square parlor heater or an oak stove, and also one of the best class of ranges which he is offering to the trade. If he finds a cook stove in such a dilapidated condition that it will not serve through another winter, it will frequently be a simple matter to secure permission to disconnect the old stove and set the new stove up in its place. In many instances this will be exactly what the steel range peddler has been doing in different parts of the country to make inroads on the trade which should belong to the local stove dealer.

If the stove is found in a reasonably good condition, but only needing repairs, it is a first-class opportunity to get a list of the parts needed and come away with the order for the castings, which can be called for on their arrival at his store. Many dealers make it a point to get such orders and send a postal card to the buyer when the repairs have arrived.

The personal visit affords the opportunity to inquire what condition the parlor stove is in and whether or not it is qualified to keep the warm temperature in the sitting room. If the stove is small for the work and it has no attachment for heating the chamber immediately above, it is good opportunity to explain what can be accomplished with the modern parlor heater by running a pipe from the top of the stove to a register in the floor of the room above, or, in other cases, the stove-pipe radiator or drum can be placed in the room above and the smoke pipe taken from the top of it to an opening in the chimney on the second floor.

NEW ELECTRIC OVEN.

A Toronto man has invented a new electric oven, which has stood a rigid test. Heretofore electric cookers have been impractical owing to the heavy cost of operation, but this one was proved to be very economic in its consumption of the "white coal." It works somewhat on the principle of the fireless cooker. The food is placed in the receptacle, the power is turned on, and the oven does the rest. The cooker is automatic in its construction, and the food cannot possibly be burned, no matter how long it is left in the oven.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE—By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

ERRORS AVOIDED, LABOR SAVED Using the Shouperior Autographic Register. Three copies issued at one writing. 1st, Invoice; 2nd, Delivery Ticket; 3rd, Charge Sheet, perforated for filing. No handling of carbons. High grade printing and neat invoices. Make full inquiry. Autographic Register Co., 191-193-195 Dorchester St. E., Montreal. (tf)

EVERY retail merchant should write for a copy of our finely illustrated catalogue of rebuilt typewriters. It shows the best typewriter bargains ever offered in Canada. Moreover, it contains facts on retail advertising intensely interesting to retail merchants. It is free. The Monarch Typewriter Co., Ltd., 98 King St. West, Toronto; also Montreal, Hamilton, London, Ottawa.

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

GET THE BUSINESS; INCREASE SALES—Use Multigraph Typewritten Letters. Three thousand per hour produced on Multigraph. The Multigraph does every form of printing. Saves 25 p.c. to 75 p.c. of printing bills. Multigraph Office Forms, Letterheads, Circular Letters. Write us. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

HARDWARE MEN EVERYWHERE find it most convenient and economical to remit money by DOMINION EXPRESS MONEY ORDERS, or Foreign Draft Absolutely safe—payable anywhere—no loss or delay—owest rates. Always remit by Dominion Express Money Orders. Agents all over Canada. Agencies in all Canadian Pacific Railway Stations.

IF you have been afflicted with one of those Fountain Pens that won't write when you want it to, or leaks when you don't want it to, give it to one of your poor relations and buy a Moore Non-Leakable Fountain Pen and you will be happy. Consult your stationer. W. J. Gage & Company, Toronto, Sole Agents for Canada.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

PROBABLY the most talked about machine in Canada is the Hainer Book-keeping Machine. It combines in one machine the cash and credit register, time recorder and account register. Representatives wanted everywhere. Write for our proposition. Book-keeping Machines, Limited, 424 Spadina Ave., Toronto. (tf)

SCOTCH PLAID STATIONERY is the latest creation for business and society correspondence. Paper and envelopes present a finished linen surface, most agreeable to the pen touch. Leading stationers have it. Write for samples. The Copp, Clark Co., Ltd., Toronto. (tf)

Contents include Diagrams and Patterns Epitome of Mensuration, Tables, Rules and Recipes Price $1.00, postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Avenue Toronto.

No. 34

QUALITY COUNTS.

Last week reference was made to the fact that paint had not increased in price to the extent that other products had, and that even at present figures paint would be cheap at double the price. In supporting this one very strong point was hardly touched upon, and that was the question of quality. Despite the advances in raw materials, and the increased cost of production there has been no falling off in quality. In fact the reverse has been the case. The quality has improved.

The chemical side of paint making has been so studied by the laboratories maintained by every paint maker of repute, and machinery has been so improved, that the product is now turned out absolutely perfect in constituent proportions and thoroughly mixed. Nothing has been left undone to make the ready mixed paint of to-day as perfect as human ingenuity can evolve, while only the best, so far as raw materials go, is used. Thus all the way round the utmost attention, regardless of cost, has been given to the quality of paint and naturally to-day it is a very much better product than it was a few years back.

Leaving out the question of the increased cost of raw materials and production this minute attention to the improvement of the quality is well worth the extra cents now charged on a gallon. Quality is absolutely essential in paint, It is the one thing which makes the product of any use to the purchaser. Poor quality paint is not worth the cost of applying, for it must be remembered that the labor is the same whether the paint be good or bad. As this is two-thirds of the cost of the whole job the absurdity of using inferior paint is apparent. Poor quality paint means that the job has to be done over two or three times during the period that good quality paint will last, and at the same time it can never look as well or last as well. Paint should act as a preservative as well as beautifyer. If it fails to do either it is so much waste of money.

The assurance that the quality of paint in reputable lines has never been higher than it is to-day should calm all talk as to paint being too high in price, and do away with any doubts that the merchant may have as to whether his customers will be content to pay the present prices without feeling that they are being rushed, or that they will try some other maker.

The average customer is very reasonable. He is likewise open to conviction, and when he ventures to say that the paint charges of the merchant are too high the latter has only to bring forward the points we have enlarged

YOUR store can safely sell one brand of paint and be sure your fussiest customer will come back and tell you he is satisfied. These paints come in tins labelled

M-L PURE PAINTS

Two coats equal three of other paints. Yet your profit is just as satisfying. The paint is more so---that's why. Suppose you write us and ask us for proof.

THE MONTREAL ROLLING MILLS CO.
MONTREAL

upon to convince the customer. There is little difference between quality and lack of quality so far as price is concerned, but there is a very wide gulf so far as the powers of performing the purpose for which the paint was bought is concerned. It is quality that counts in the using of paints, and the higher the quality the better the insurance that the customer is carrying on his property.

Quality must be preached first and last. If all a merchants' customers do not realize this then he must educate them. It may make his selling campaign harder, but while doing so he is making his progress solid, and he will in time gather in all those who have been bitten in other quarters by the alluring cry of cheap paint. Poor quality paint only sells once. A dealer wants to keep old customers as well as make new ones.

PAINT AND OIL MARKETS

MONTREAL.

November 11.—Turpentine, as we anticipated last week, has generally firmed up one to two cents, and the market for the present is in a very firm position. The primary markets are very bullish, and some holders are anticipating a further advance in the near future. Linseed is still about the same. The tension is not relieved in the slightest, and holders are reluctant to part. All the markets of the world are feeling the pinch.

The consumptive demand continues very good for the time of the year. Oil and colors are selling well, while the demand for ready mixed paints although falling off so far as out of door paints are concerned is extremely good for household lines. Putty is in strong demand, while varnish consumers especially the large ones, are buying well, and looking ahead confidently for future needs. White lead is firm but unchanged.

Turpentine.—The bullish condition in the primary markets referred to last week have resulted in prices locally being advanced from 1 to 2 cents. The demand is very good, and users are apparently looking ahead a little owing to a belief that the market is likely to go up another point or two if not more. We now quote: $1.02 to $1.05.

Linseed Oil.—There is very little change in conditions. Holders display no more desire to sell linseed than they did, rather is it that they are holding on more tenaciously to what they have. There is a general scarcity all over the world, and the situation is unprecedented in the history of linseed oil. Prices have been somewhat rigid, and no change is announced over last week, although all holders are not alike in the regulating of their price changes from day to day. We quote $1.08 to $1.10 for raw and $1.11 to $1.13 for boiled.

White Lead.—White lead in sympathy with linseed oil is very firm, but prices generally are unchanged. The demand has increased as the open water nears its end, and some very satisfactory consignments have been shipped. Buyers are feeling fairly confident that prices will not go back on them and that they are purchasing at a favorable time. We quote $6 to $6.50, according to brand.

Colors.—Golden ochres, chrome yellows, orange and venetian reds are showing satisfactory shipments under firm marketing conditions. Wood stains and art enamels for manufacturing and household purposes are showing active call.

Putty.—Putty is in very active demand. The market is firm in sympathy with general conditions. We quote: 100-lb drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Toronto, Nov. 11.—The paint and oil market remains practically unchanged. Trade is good, considering the lateness of the season and the high prices charged for linseed oil and turpentine. There is no prospect of relief in either of these lines and the demand is nominal. Some sorting-up orders are received but the trade generally is buying only where it is absolutely necessary. The approaching close of navigation helps to some extent in stimulating trade.

Some slight changes have been made in a number of lines but none of importance. Putty in 100 lb. drums is quoted at $2.50 which is 5c better than the last quotation. In lower grades of rosin there is a slight decline but the present quotations are not regarded as permanent. The finer grades are showing an upward tendency. Gasoline is easier.

Linseed Oil.—There is no change in linseed oil. The supply is light with no present prospects of improvement. The prevailing quotation is $1.10 for raw and $1.13 for boiled but $1.12 and $1.15 respectively is asked for single barrels.

Turpentine.—Reports from Savannah this week are to the effect that nearly all the turpentine brought forward during the past ten days has been taken up to fill export orders and it is claimed that some vessels are expected shortly which will clean the market up pretty well. What is known as the "scrape" crop, about the last for the year, is now coming forward and, after the present month, receipts will probably be smaller. Advices from Savannah gives out no hope yet of lower values in the future. Locally no decrease is anticipated. It costs 97c at present to lay turpentine down in Toronto and, under the circumstances, the prevailing price, $1.05, is bound to remain firm.

Wood Turpentine.—Wood turpentine will be available in Toronto in a few days at 80c per gallon or 85c in tin cans.

White Lead.—Trading in white lead is active with prices firm. The pure

Benjamin Moore & Co.
LIMITED
WEST TORONTO
NEW YORK - - CLEVELAND - - CHICAGO

variety is quoted at $5.90 to $6, with "Government standard" at $5.65. There is still some talk of a future advance but nothing definiite can be predicted.

Varnishes and Japans.—The market shows no change though the demand has fallen off a little perhaps. Prices are firm.

Putty.—The demand for putty is brisk and prices are perhaps a trifle stiffer. Standard putty is quoted at $2.20, bulk in casks; in 100 lb. drums, $2.50; in 25 lb. drums, $2.60; bladder in barrels, $2.70. Quotations for pure putty are: bulk in casks, $2.50; in 100 lb. drums, $2.80; in 25 lb. drums, $2.90; bladder in barrels, $3.00.

Rosin.—At this season the demand for rosin runs to the lower grades and there have been slightly easier quotations. One grade previously listed at $7.05 per 280 lbs. was to-day offered in one case for $7. It is not impossible that a further decline will take place but it will not be sufficient to affect the market in any respect. The finer grades of rosin are becoming scarcer as the season advances and prices for these brands are becoming firmer. "G" rosin is quoted at $3.25 per hundred lbs.

Petroleum.—The market is steady and prices remain practically the same. Canadian prime white coal oil is quoted at 13c, American water white at 14½c, which is ½c firmer, Pratt's Astral at 17c.

Gasolene.—Motor gasolene is quoted at 17½c a gallon in barrel lots, which is somewhat easier. B. M. and P. Naptha is quoted at 16c a gallon in barrel lots. The demand has fallen off somewhat with the close of the launch season but the motor industry keeps trade quite brisk.

PUSHING WOOD TURPENTINE

The prices now asked for turpentine have resulted in the exploiting of substitutes, and the wood turpentine men are now to the front. Parties concerned in this enterprise held a meeting at Jacksonville, Florida, recently, to discuss matters pertaining to the industry. It was estimated that the plants represented at this meeting are capable of producing over 5,000 barrels of this class of turpentine per month.

Among the objects of the meeting was to launch an educational campaign, and to demonstrate to the consumers the qualities of steam distilled turpentine, which complies with the United States standard. Several carloads of this turpentine have reached Toronto within the past three months, and are being tested by various varnish makers. Several samples sent to the Inland Revenue department for analyses indicate that it has good qualities for painting purposes.

There are two processes known in the southern states by which wood spirit turpentine is produced. One is by having the wood that is filled with gum broken up by machinery. It is then put into a retort and steam is forced through it. By this means the gum is extracted and the turpentine produced. The other process is by putting the wood in larger bulk into steel retorts and heating it. The volatile products are driven off through a condenser and pumped into the refinery where the tar and turpentine are separated in copper stills and refined. This process has been in use now for more than ten years in the state of Florida and a spirit of turpentine is thereby produced that is claimed by a Toronto importer to be about the same chemically as the turpentine produced from gum, the one drawback being the odor.

It is expected that some of this turpentine will be offered in Toronto in a few days at 80c per gallon or in tin cans at 85c. It is understood that at least three varnish manufacturers in Toronto are using it to a considerable extent. The only objection found is the odor, which passes away to a certain degree in the heating process.

NOVEL PAINT MOVING TRUCK.

A new auto power wagon recently made by the Grabowsky Power Wagon Company, for Berry Brothers, varnish manufacturers, Detroit and Walkerville, is a replica of the now famous toy wagon introduced by this firm many years ago, and which has brought joy to the hearts of youngsters in every quarter of the globe.

The body of the auto truck is constructed of handsome quartered oak, well finished with Berry Brothers' Varnish, and has a capacity of two tons. The lettering on the truck and its general characteristics are in exact imitation of its small prototype, and the

Berry Brothers New Truck.

truck excites much comment, especially from the young folk, who instantly recognize the giant cousin of their toy wagon.

An interesting item in connection with Berry Brothers' toy wagon is the shipping of a load of Varnish overland, packed in toy wagons from Berry Brothers' factory to their New York warehouse at 262 Pearl street. The vehicle transporting this unique load is one of the new Grabowsky auto trucks and the trip with its heavy load will be practical exhibition of the good qualities of the Grabowsky power wagon.

Upon request, Messrs. Berry Brothers, Limited, Detroit, Mich., will send a card printed in colors showing their auto truck illustrated above.

JAP-A-LAC

A HIGH GRADE

VARNISH AND STAIN COMBINED

ADVANCE IN PRICE

To the Trade:-

Owing to the continued high prices prevailing on all raw materials entering into the manufacture of varnishes of all kinds, we have found it absolutely necessary, in order to maintain the high standard of quality that has always characterized JAP-A-LAC, to increase the list prices as follows, effective on and after November 1, 1910:

GOLD.			ALUMINUM.	
	1 gal. cans (Imp. Measure), each	$3.50		
	½ gal. cans " " "	1.95		
	Quart cans " " "	1.10		
Size No. 3	Pint cans " " "	.60	Size No. 3	.60
Size No. 2	½ pint cans " " "	.35	Size No. 2	.35
Size No. 1	¼ pint cans " " "	.25	Size No. 1	.25
$1.10	JAP-A-LAC Model Floor Sets, each	$3.25		
.60				
.35				

No change in the list price on Graining Tools, Graining Color and Crack and Crevice Filler.

All orders received after November 1st will be billed on a basis of the $3.50 list which is effective November 1st. Spring dating will be given all stock orders billed at the $3.50 list.

In view of the fact that our advertising plans include the use of large space in the leading magazines, in which the new prices will be prominently displayed and that our promotion work in the interest of the dealer will be better than ever, we urgently suggest that you send us your orders for direct shipment promptly, or, if you are buying through a jobber, send your orders to him.

We believe the dealer will welcome this advance in price, as it guarantees to him two things: the knowledge that the high quality of JAP-A-LAC will be maintained; and the establishment of a list price on which he will make considerably more profit than heretofore.

Your earnest co-operation is solicited in the way of making prominent displays of our goods, judiciously distributing our advertising matter and using our signs and window display material to acquaint the public with the fact that you carry JAP-A-LAC in stock.

The public is thoroughly acquainted with the fact that raw materials have materially advanced, and understand perfectly that goods of high quality are worth the retail prices asked.

Every dealer should secure the new prices on all goods he has in stock. This means a large profit to the dealer who talks quality and new prices. Upon request we shall be glad to send you small stickers for relabeling your stock on hand, also attractive shelf price list, showing the prices now in effect.

The Glidden Varnish Company

Cleveland, Ohio - - - - Toronto, Ont.

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co, Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapco"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

A Study in NEW CENTURY WASHER CONSTRUCTION

Inside view of the tub that does not warp.

No other machine has or can have a **Rust-proof Steel Ring** sprung into a groove inside of tub, preventing warping and leaking.

No other machine has or can have a rod right up through the tub, giving absolute rigidity,

These are ***Exclusive Features*** that cannot be copied.

No other machine has a tub so ribbed that the full thickness and strength of stave is secured at top and bottom.

No other machine is or can be constructed like it.

There is really an immense difference between the ***New Century*** and other kinds.

THE MAPLE LEAF
"IMPROVED RACER"

CROSSCUT SAW

This saw is different in its construction to other crosscut saws, being made with the slanting gullets, which discharge the saw-dust more freely and allows every tooth to cut fresh timber. It is a perfectly true tapered saw, being ground 4 gauges thinner on back than tooth. This allows saw to run free and easy with very little set.

The trade-mark "MAPLE LEAF" is a guarantee of quality, and every saw is thoroughly tested and examined before leaving our factory.

Send for Catalogue containing complete description.

Stanley Tools

Stanley Concealed Ratchet Bit Braces.

Note Particularly.—The Cam Ring which governs the ratchet is in line with the Bit,—a great advantage in working.

The Ratchet mechanism is completely **protected**, so that it is always free from dirt, grit and moisture, and retains oil for a long time.

In the Clutch mechanism, **five teeth** are in engagement when working as a Ratchet, as against **one tooth** in other forms of Ratchet Braces.

They are highly nickeled and have Cocobolo Ball-bearing heads and Cocobolo handles.

These Braces, together with many other varieties of Ratchet and Sleeve Braces, are now being made at our CANADIAN WORKS.

STANDARD THE WORLD OVER

EVERY TOOL GUARANTEED

Maxwell's Latest

is the "Champion High Speed Washer." This machine differs from the famous "Puritan" only in the driving mechanism. The

Champion High-Speed Washer

is run, as the illustration shows, by a lever. This lever also starts the balance wheel, which revolves four times for every stroke. The great momentum of this balance wheel helps to turn the dolly block and makes the "Champion" run very smoothly and easily.

It is sure to be a splendid seller.

David Maxwell & Sons : : St. Mary's, Ont.

"IMPERIAL" ANTI-FREEZING WINDMILL
FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary. Always fitted with 1¼ flanges unless other size is specified.

CONGO
NEVER LEAK ROOFING
The GUARANTEED ROOFING

Congo on Maryland Terra Cotta Company's Buildings—Baltimore, Maryland

We don't suppose you care a rap what Congo is made of—what interests you is *how long it is going to wear.* What it is made of interests us because we give with every roll a *Surety Bond Guarantee,* the like of which no other manufacturer has offered.

Herewith are a few of the features that make it possible for us to guarantee Congo 2 or 3 ply for *10 years.*

It never gets hard or brittle. It never breaks or peels off. It is giving as perfect satisfaction in Europe, India and Australia, where we ship thousands of rolls, as in America.

Congo doesn't run, rot, buckle up or shrink.

The caps, nails and cement which we furnish free, are the best money can buy.

We don't use the old *tin caps* for Congo, but *galvanized caps* which never rust.

You can satisfy yourself as to its lightness, pliability and wonderful waterproof qualities by a little investigation. As to its wearing properties—we guarantee them. Can any reasonable man ask more? Further information on request.

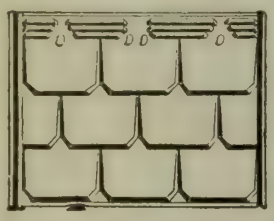
make sensible and very acceptable gifts for anyone who ever uses tools of any kind. They make a happy change from the necktie and suspender habit. They last for years, and the giver is remembered every time they are used.



We are advertising them as Christmas Gifts in the "Saturday Evening Post," "Popular Mechanics," "American Carpenter and Builder," "Electrician and Mechanic," and other magazines of this class, directing readers to you for the tools. This is sure to create a larger demand. Stock them now and be ready to hand them out when the trade comes. Get your jobber onto the job. The Nos. 60, 15, 100, 65, 44 and 35 make especially good sellers. Display them in your window as new ideas for Christmas and you will be sure to increase your holiday trade.

Sell Clark Heaters and Coal

Here's the "BIG HIT" Assortment

2 Leader Heaters
2 No. 5B Heaters
2 No. 7D Heaters

6 Dozen Clark Fuel Brickettes (Best Grade)

Some of these heaters you can sell as low as $1.20 and make a good profit.

The Proposition to Dealers is Mighty Interesting

Its a proposition that means ready sales and liberal profits.

Everyone who drives or owns a carriage, wagon, sleigh, automobile—any kind of vehicle—needs them. Everybody traveling in cold weather needs them. The need is known—the demand is positive—It's for the dealer to supply the product and pocket the profits.

Clark Heaters and Clark Coal sell wherever displayed. The wonderful compactness, the unique principe of heat distribution, the neat appearance, the low price—all are factors that make Clark Heaters the unchallenged leaders.

Our guarantee goes with each, and the guarantee protects the dealer and the consumer.

And the coal is just such another proposition. To **prove conclusively** that it's better than other fuel, we give a guarantee, **with each brickette,** that it will give 25 per cent more heat than any other heater fuel made.

DEALERS——ACT NOW

The season is on. Send for the "Big Hit" assortment and add more dollars to your profit. Send to your jobber. Put a heater just inside your store—where customers can **feel** the goodness of it. "Warm them up" to the necessity of buying from **you.** We'll help.

TOO HARD?

ONE of our Representatives, on a visit to the works at Philadelphia, brought a Disston Hand Saw with the report that the customer claimed it was so hard the teeth would not stand setting, and broke out. It seemingly bore evidence of hardness, judging by the number of teeth broken out.

The saw was handed to our superintendent, who examined it, and in order to give the representative a practical demonstration as to whether the blade was too hard or not, took him into the factory, placed the saw under the shear and cut off the tooth-edge as shown in the illustration herewith. Had the blade been too hard, the shearing would have caused the tooth-edge to crack or break in small pieces; but on the other hand, as will be noticed, the entire tooth-edge was cut off in one very narrow strip or coil, thus showing positively the blade was not too hard, for this is a very severe test of well-tempered steel.

In making saws we claim that should a saw be too hard it would be discovered in the factory under our operation of setting; and further, if the teeth can be set by the method pursued at the factory, there is no reason why a mechanic cannot reset them when necessary, provided he goes about the work intelligently.

To quote from our booklet—"We set our saws on a stake or anvil, with one or more blows of a light hammer. A highly tempered saw takes three or four blows, as it is apt break by attempting to set it with only one blow. This is a severe test, and no tooth ought to break afterwards in setting, nor will it if the mechanic adopts the proper method. The saw that is easily set and filed is easily made dull. We have frequent complaints about hard saws, but they are not as hard as we would make them if we dared; and we shall never be able to introduce a harder saw until the mechanic is educated to the correct method of setting it. As a rule saws are given more set than is necessary, and if proper attention was paid to keeping points of the teeth well sharpened, any Disston saw, on account of the special manner in which it is ground, would run with very little set, and there would be fewer broken ones. The principal point is that too many try to get part of the set out of the body of the plate, when the whole of the set should be on the point of the tooth. Setting below the root of the tooth distorts and strains the saw-plate. This may cause a full-tempered crucible steel blade to crack, and eventually break at this spot; but it is always an injury even if it does not crack or break."

To repeat, it is very desirable on the part of mechanics, who use saws, to have them of a high temper, and yet they fail to take proper care of a hard saw. A saw of this kind is apt to be worked until the teeth are worn down very low, and then instead of re-filing the teeth to the proper length and shape, they attempt to re-set these short teeth, with the consequence that breakage takes place, and the blade is condemned as being too hard.

It cannot be too strongly emphasized, even though well known and understood, that no matter how well a tool may be made, nor how high the quality, it will render but poor service if not kept in good condition; further, a saw properly set and sharpened—in other words, maintained at its highest point of efficiency—means the obtaining of better and greater results in less time and with the least possible effort.

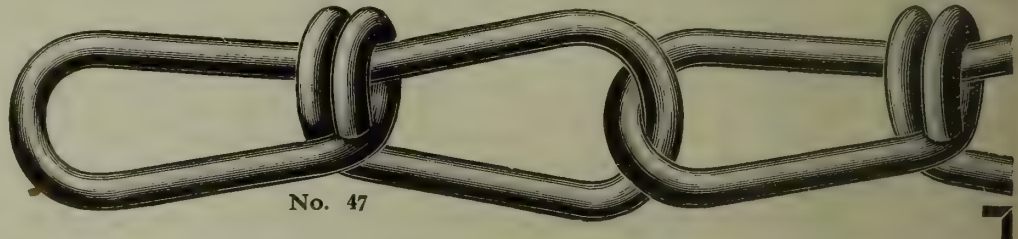
Important Announcement

Some months ago we purchased the entire plant of the Peterborough Shovel and Tool Company, Limited. The manufacturing facilities of the plant have since been greatly improved by the addition of much new machinery which enables us to produce better work in larger quantities. We state only the plain truth when we say that we are now making the highest possible grade of shovel or tool manufactured.

Arrangements have been perfected whereby our customers may receive prompt shipments from points convenient to their places of business without being called upon to bear the usual burden of "warehouse" expense. All goods manufactured by us and bearing our trade mark are unreservedly guaranteed to be as represented.



We feel sure that the liberal and fair policy we propose to maintain toward our customers will be appreciated by them, and we ask the confidence of a trial order, fully believing it will lead to continued business and friendly relations.

GREENFIELD, MASS., U.S.A.

THE MAPLE LEAF
"IMPROVED RACER"

CROSSCUT SAW

This saw is different in its construction to other crosscut saws, being made with the slanting gullets, which discharge the saw-dust more freely and allows every tooth to cut fresh timber. It is a perfectly true tapered saw, being ground 4 gauges thinner on back than tooth. This allows saw to run free and easy with very little set.

The trade-mark "MAPLE LEAF" is a guarantee of quality, and every saw is thoroughly tested and examined before leaving our factory.

WHY?

BECAUSE

THEY have been adopted by roofers and contractors as an article of unique merit that effects a two-thirds saving in labor.

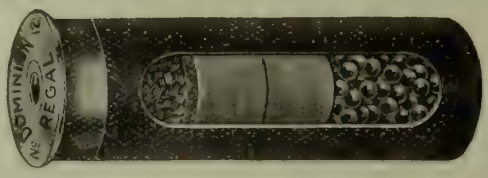
THEY are pressed from one solid piece of drawn wire, with heads carefully rounded and planished, so as to afford a solid compact without injuring the frailest roof covering.

THEY make a much superior watertight finished roof, and will outwear any other roof fastener.

THEY are indestructible and particularly adapted to our climate, where sleet, snow and frost have demonstrated the unsuitability of other makes.

THEY have received the approval of the most conservative purchasers and are stocked by leading wholesale and retail hardware dealers.

THEY are in a class by themselves, so why not protect your customers' interests by starting now? It's never too late.



THEY sell themselves, after being properly introduced, with their unique features.

Window Competition at Peterboro Convention

Arrangements Completed With Peterboro' Retailers for the Use of Their Windows During Retail Hardware Association Convention Next February—57th Regimental Band Secured for Two Nights—Arrangements for Hardware Exhibition Nearly Completed—Only Two Spaces Left.

After consultation with the hardware and stove merchants of Peterboro' who are members of the Association, the Ontario Retail Hardware and Stove Dealers Association have decided to have five window dressing competitions during their sixth annual convention to be held at Peterboro', February 21 to 24, 1911. Five cash prizes of $10 each will be offered and any hardware or stove merchant (or clerk in a store) belonging to the Association can enter the competition. No entry fee will be charged and any goods required for the displays can be taken from the stocks in the store where the window is trimmed.

The first competition for the best general hardware window will close on Tuesday night, February 21, and the Peterboro' window trimmers will show what they can do in this contest. If any outside hardwaremen desire to compete, however, windows will be placed at their disposal, each of the local stores having two windows. The prize will be $10 in cash.

On Wednesday there will be two competitions and two $10 prizes for the best "stoves and kitchen goods," and "paint and brush windows." There are four hardware stores, two carrying stoves, and five stove stores, and all these windows are available for use in the competition.

On Thursday there will likewise be two competitions, prizes of $10 each being offered for the best tool window and the best cutlery and sporting goods windows.

The details are not complete, but it is suggested that displays must be put in order between 6 a.m. and 9 a.m. each morning in order to allow visiting hardwaremen to watch the methods used in putting the display together.

The Social Evening.

The celebrated band of the 57th Regiment, Peterboro', under the leadership of Rupert Gliddon, has been engaged to play in the Exhibition hall on Tuesday and Wednesday evenings and a special program will be put on both eveings. Mr. Gliddon will also provide an orchestra for the "social evening" on Thursday night, when Harry Bennett, a widely known entertainer, will tell what he knows and sing some songs about the hardware trade. Some men in the trade with talent as songsters, etc., will also help to make the evening interesting, while after and during the program a buffet lunch will be served.

Arrangements for Exhibition.

During the past fortnight the Queen City Oil Company, Toronto, Pratt & Lambert, Bridgebury, Canada Cycle & Motor Co., Toronto and the Peterboro' Canoe Co., Peterboro', have secured space for exhibits, and Adam Hall, stove manufacturer, Peterboro', will probably round off the Peterboro' exhibit with a display of his lumbermen's stoves. This will make seven exhibits of Peterboro' goods. Only two spaces now remain unallotted.

The rules laid down for the exhibition are as follows:

Character of Exhibits.—The management reserve the right to decline or prohibit any exhibit which, in its opinion, is not in keeping with the character of the exhibition. This reservation concerns persons, things, conduct, printed matter, souvenirs, etc.

Space.—The hall will be divided into spaces having 12 feet frontage and 10 feet depth, as shown on floor plan, but the right is reserved to make any changes which may seem desirable. No space shall be sublet without consent of management. Aisle space must not be used for exhibit purposes.

Hours of Exhibition.—Exhibits must be in place by 10 p.m. February 20. Exhibition Hall will be open from 9 a.m. to 12 noon, daily. Also from 4.30 to 5.30 p.m. on Wednesday and Thursday, and from 7.30 to 10.30 p.m. on Tuesday and Wednesday evenings. All cleaning and moving of exhibits must be done before 9 a.m. All exhibits must remain in position until 1 p.m. February 24

Booths and Decorations.—Booths will be uniformly constructed of framework walled in with white bunting to a height at back of six feet, a sign of 18 inches high being placed above this. Side walls will be 36 inches from floor to railing. Prices of booths will include framework, bunting and signs. Booths are left open in front. Exhibitors must provide any shelving, tables or chairs required. Nails, etc., must not be driven into walls or floor. No part of exhibit must exceed eight feet in height. Booths will be ready for occupation Saturday, February 18. Signs, bunting, etc., are to remain the property of the Association.

Lights.—The Armories are well lighted by windows on sides and arc lamps overhead. Extra lights for decorating booths or power for operating mechanical devices can be obtained at reasonable charge from local contractors. Armories will be equipped with 110 volt alternating current.

Watchmen.—The management will provide watchmen and no other persons will be permitted to enter or remain in the exhibit hall after closing hour. A staff of helpers will be provided at opening and closing of exhibition for the free use of exhibitors.

Insurance.—The Retail Hardware Association shall not be responsible for the safety of exhibits against robbery, fire, accidents, or any other destructive cause. If insurance is desired, it must be placed by the exhibitor. No gasoline will, under any circumstances, be allowed in the building.

Badges and admission.—Badge holders will be admitted free to the Exhibition Hall at all times and hardware manufacturers, jobbers, travelers, retailers, or clerks can obtain badges at the Secretary's office at the west end of the Armories. The public will be admitted to the Exhibition hall on Wednesday night on payment of a nominal admission fee of ten cents. Band concerts are to be given in the Exhibition Hall on Tuesday and Wednesday evenings.

Convention Meetings.—A hall at the west end of the Armories is to be used for Convention meetings, except Wednesday night, when the Question Box discussion is to be held, and Thursday night, when exhibitors, etc., are to be invited to join the retailers in a social evening in the Collegiate Institute building adjoining the Armories. Convention meetings are to be held daily from 1.30 to 4.30 p.m. Manufacturers, travelers, etc., are also invited to attend the Tuesday afternoon session and take part in a discussion on "Methods of Salesmanship," conducted by a committee of travelers.

Souvenirs.—Exhibitors are requested to eliminate the distribution of souvenirs as far as possible. The aim should be to hand out **selling pointers** rather than **souvenirs** and to encourage retailers to visit the exhibition hall **to learn something** rather than gather souvenirs.

Shipment of Goods.—Exhibitors can bill goods to the traveler or retailers representing them in Peterboro', or to Ray Best, of the Best Hardware & Stove Company, who will be Superintendent of Exhibits. Peterboro' is a customs port of entry for exhibits imported in bond from the United States. Packing cases can be stored at Armories.

Railway Certificates.—Exhibitors can save money themselves and assist their retail customers to do likewise by instructing their salesman to **ask for Convention Certificates** when buying **one-way tickets** to Peterboro'. If three hundred Certificates are presented **all Certificate holders will receive return tickets free.** As 340 Certificates were presented at the London Convention and this year's exhibition will be twice as large, the **single fare rate is assured** if the exhibitors and travelers assist as requested.

Convention Headquarters.—Oriental Hotel, rates $2 and (with bath) $2.50 per day. Other hotels include the National, Snowden, White and about a dozen other smaller houses.

Use Extra Advertising Space in Holiday Season

At This Season the Public are Looking For Suggestions and the Ads in Local Newspapers are Read More Closely Than at any Other Time of the Year—Use Cuts and See That the Matter is Arranged Attractiveily.

The holiday season is not a time for the hardware merchant to hide his light under a bushel. He must take liberal space in his local papers and also supplement this with booklets and circulars, as well as conducting the livest window dressing campaign of the year.

Probably at no time in the year are newspaper ads. more closely watched by all classes of people than during the month before Christmas and anything which has to do with gift giving is certain to be read if set in attractive form. While the regular space can be used to advantage because of the extra interest in advertising the wise merchant will arrange for increasing his space if not doubling it.

To attract attention special cuts will be helpful and the local publisher and the firms supplying special lines of goods will be only too willing to assist a merchant who is willing to advertise to make his announcements attractive and likely to excite interest. A cut of Santa Claus coming down a chimney or carrying a load of gifts to be found in hardware stores is particularly useful at the commencement of an ad. of holiday goods while scattered through the space, and in such positions that they will balance properly illustrations should be given of some of the most important articles such as cutlery, silverware and cut glass, shaving goods, toy guns, skates, sleds, tool sets, alarm clocks, carpet sweepers, sad irons, brass and nickel table ware, roast pans, lamps, oil heaters, etc. Care must be taken, of course, not to use illustrations out of proportion to the size of the advertisement. A 4-inch cut in a two or three column holiday ad. is decidedly out of place unless it be a special illustration for use with the introductory matter.

Every item advertised should be made to stand out by itself by the use of cut off rules and prices should be quoted on every article on which a figure can be given. The reader of the ad. should be assisted in his effort to select an article to fit the amount he feels he can spend on a gift for his mother or his best girl as the case may be, and if the hardware merchant quotes prices he has a distinct advantage over the jeweler or dry goods man who neglects to do so in his ads.

The unit system of dividing a large ad. into a number of smaller units is an excellent system to follow. Emerson & Fisher, St. John, who have won first prize in Hardware and Metal's ad. contests on three occasions, adopt the plan of using a full page space dividing it up into spaces 2 columns wide and from two to four inches deep, with some smaller spaces of half this size, each space featuring one line and some thought given to place the cuts and divided spaces in a harmonious arrangement.

DeWitt Bros., Napinka, Man., also adopted a similar style. Only four cuts were used and these were placed in opposite corners. A strong heading was used followed by an introductory paragraph calculated to excite interest. And then the various classes of goods were grouped together into divisions of various sizes, the ad. being cleverly broken up in such a way that every item stood out by itself. It was set in a country printing office where the facilities are not nearly so great as in the larger towns and cities, and consequently other merchants should not have much difficulty in having an equally attractive ad. set-up—providing they make up their mind regarding what they want and then see that the printer carries out his part.

The Dunn Hardware Company's ad. is a strong one. The heading is catchy and the thought elaborated upon that "we have done the selecting for you" is likely to appeal to many. The goods are tersely described and prices are quoted, each class being ruled off. It might have been hard to work it in but if the carvers and coffee pots were emphasized as gifts "for the home," the scissors and sweepers as "gifts for mother," the razors and brushes as, "gifts for father or brother," and the skates and pocket knives as "gifts for young folks" the ad. would have contained a suggestive feature which it does not now possess. It occupied ten inches four columns wide.

H. H. Otton & Son, Barrie, used a thirteen inch two column space to fair advantage, although a few small cuts would have livened it up considerably. The heading is significant and the introductory paragraph is suggestive. But the printer failed to take advantage of his opportunity to display the body matter. Neither the names of the goods or the prices are brought out strongly enough. The style used in the Dunn advertisement is far more attractive. The ad. was the means of selling a large amount of goods, however.

W. A. May's nine inch, three column ad. is too crowded and the cuts are not balanced. All the display is crowded to the top and even the signature at the bottom is weak. While several lines are price marked a few more figures would have been better. "What 25 cents will do in the Toy Department," is a good line of talk.

H. D. Moss also crowds too much into his ten inch, two column space but the printer made the most of it and the ad. looks very well. As becomes a "stove store" ad., all the lines featured are stoves or cooking and table utensils.

Bridge Bros.' thirteen inch three column ad. has been well arranged by the ad. writer but the printer could have set it up more effectively. The ornament below "Santa Claus arrives" is out of place in an ad. besides throwing the line up too high. The "Opening of Toyland" cut is good but the following paragraph could have been made more "appealing." It would have been better, too, if it had not run clear across the ad. The cuts balance fairly well, but the matter in the centre column is merely thrown together by the printer with practically no effort at display.

Retailers should insist that the printer take as much interest in making the ads. attractive as the advertiser. The printer has, or should have, the experience and if he merely sets up "copy" as it comes to him he is neglecting the interests of his customer, just as a hardwareman would be neglectful if he made no effort to deliver his goods promptly and in good order.

PRIZES FOR HOLIDAY ADS.

Two prizes of $5 each are offered for the best newspaper advertisement about Christmas goods, such as cutlery, silverware, sporting goods, lamps, stoves, carpet sweepers, household goods, or other holiday lines. One prize is open to hardware merchants or clerks in places over 5,000 population, and the other to competitors in smaller places.

Forward one or more clippings from your local paper to the editor of Hardware & Metal, with the name of the writer of the advertisement, and the name of the paper it was clipped from. With the ad. send a copy of any booklet issued, and a description of any special selling plans or display features used during the holiday season.

The awards will be made by experts, and will be announced, with reproductions of the prize ad., and windows, shortly after the close of the contest. All entries should be mailed not later than December 31.

A farmer in Texas has decided to experiment with the use of electric light for stimulating vegetable growth. He has arranged to procure power from a neighboring plant by which he will supply a network of tungsten lamps, placed 150 feet apart all over the fields. These will be illuminated all night, and it is expected that they will increase the growth of the crops.

A Few Ideal CHRISTMAS GIFTS

There are 5 more buying days before Xmas—you have several gifts to purchase—you cannot make up your mind what to select and so you are reading this, trusting the suggestions will be opportune.

When making our selection for this season of the year we took great care to obtain a variety that would appeal to ladies and men of all tastes, and we feel convinced that a visit to our store within the next few days will be the means of satisfying that indecision, and incidentally the cheering of the recipient who receives your gift.

Case Carvers
In attractive boxes—stag and bone handles, sterling silver mounted, from
$4.00 to $12.00

Crockery and Lamps in Hardware Stores

It Pays to Make Room in Store For New Lines—Strict Attention Must be Given—How Lamp Trade Can be Stimulated and Made Very Profitable.

Lines that are coming in and old lines that, in a sense, are going out, are well worth careful attention. There are in the hardware business a variety of articles constantly coming on the market which are more or less new, and early exploitation of these lines means a good profit to the merchant. Likewise, there are certain goods which have been ousted from public use to some degree by newer ideas and inventions, but which are still used though to a less extent than formerly. By the exercise of a little ingenuity, it is always possible to revive interest in these goods and stimulate the trade. Unless some effort is made dealers will find they are likely to carry stocks for a long time, as the demand is not great when no effort is made to quicken business.

Under the heading "new lines" might be classed, chinaware and crockery. It is true that quite a number of hardware merchants have handled china for some years, but to the trade generally, it is a distinctly novel department. That it can be made to pay is proven by the experience of men who have taken it up. They have found, probably without exception, that there is a profit in handling the goods. Furthermore, they have found that carrying china and crockery draws new trade to the store and means increase of business in all branches. People who come to purchase articles of crockery, gradually get into the habit of buying hardware there as well.

"A novelty line pays, not only in itself, but in drawing new people to the store," said the manager of a western Ontario store, who had tried several specialties and been successful in all of them." We embrace every opportunity to take up a new line and to get into it first."

Pays to Make Room.

One objection raised to the introduction of crockery lines into the hardware store is the lack of space. "I can hardly find room for my regular stock let alone give space to dishes and fancy china," is the complaint often voiced. This objection holds good in a great many cases. Dealers who have only a small store are seriously handicapped and would be wise perhaps to abstain from taking up special lines until they can get into more commodious quarters. This they should do without delay. It is not advisable to attempt to do a hardware business in quarters intended for a tailor, a small novelty merchant or someone to whom space is not a necessity.

In most hardware stores, however, it would be possible to find room for a crockery display. "It pays to make room," said a Toronto man, who has handled the line with profit for some years. "My store is only average in size, as you see, and I have only one window. But I have, without handicapping my trade in the regular lines, made room for a liberal display of chinaware and crockery." To effect this, it would be necessary in practically all cases to carefully study the problem of space economy. Wall space can generally be found for a china case or two. Room should be found for a table as near the front of the store as possible, but it should not be put where it would be in the way of customers. It is equally important to keep a line of such ware continuously in the windows.

Display is Necessary.

To make the crockery department a success, it must be kept right before the eyes of the public. It must be mentioned in advertising and must be conspicuously displayed in the store. Otherwise people will remain ignorant of the fact that the store carries such goods. The knowledge must be, figuratively speaking, pounded into them by force of continual display.

A merchant who had space available on the floor above his store might use it for a crockery department. In such a case, however, it would be necessary to have the fact very prominently featured by cards and placards in the store and windows. If possible, a display of some of the more attractive lines at the windows of the upper storey could be made effective. A large sign board, announcing the new department would be a great help.

It would be folly to go into the line and not push it to the utmost. Customers could not be expected to discover the new goods for themselves. They might deal at the store for months, perhaps years, and not notice. It is essential, therefore, that full publicity be given to the line for some time at the start. After a connection has once been established, the department will not need more attention than the rest of the stock.

It might be added that several dealers have been so successful in dealing in crockery and chinaware that they are now importing most of their stock direct and doing a business that would astonish more cautious hardware men who hesitate to engage "in pastures new." Furthermore, they report that the department has made a place for itself without hurting their regular trade in any respect.

Push the Lamp Trade.

Among articles which are sold less than formerly, owing to the introduction of newer ideas, is the oil lamp. The time when lamps were the sole means of lighting a great majority of houses, is not so long ago. The introduction of gas and electric lighting has of late years done away with the lamp to a great extent, particularly in cities and towns. Just as the lamp replaced the candle, it is in turn being pushed to the background by more modern methods. There is still a good trade to be done in lamps, however, if the merchant, takes advantage of the opportunity in the right way. In nearly all farmhouses the lamp is still used and will be for some time to come. City households need them for emergency purposes, for carrying to the cellar or up into the attic, or for use in bedrooms where the lighting fixtures are not advantageously placed. The lamp is still a necessity more or less and a ready sale can be effected if the hardware man goes at it in the right way.

Lighting Goods Shown in S. W. McClung's Store at Trenton, Ont.

A prominent display of lamps, particularly in the fall when the days begin to shorten, will prove useful. Many firms, with a good country trade make it a point to arrange a lamp window every autumn, displaying not only a variety of hand lamps, but the very best and most handsome hanging lamps available. A very attractive display can be made. If at the same time, bargains in all lamp goods are advertised, a thriving trade will be done.

Distributed Facts to Customers.

One western Ontario merchant, who has specialized on lamps for some time,

adopted as a trade expedient one season, the circulating of a two-page leaflet, dealing with the need for lamps and the excellence of his stock for all purposes. The constant need, even in houses where the lighting facilities are supposed to be complete, was pointed out; good use being made of an incident which had occured in that place a few weeks before. An accident at the electric lighting plant had thrown a good part of the town into darkness one evening and many families had been without either lamps or candles. These little printed "talks" were handed to every customer who entered the store and the merchant as a direct result, did a splendid business.

The candle, though it is a long time since it was used for actual lighting purposes, is coming back into favor, chiefly for its aesthetic worth. The lamp can be made to have an equal value for decorative purposes in the home. Many firms do a large business in parlor and hanging lamps.

The accompanying illustration shows the interior of the store of S. W. McClung, Trenton, Ont. Mr. McClung is one who adequately features the lamp trade and who reaps a good profit from so doing. Not only has he a line of his best hanging lamps suspended from the ceiling, but prominent position in the centre of the store is given to parlor lamps. In this connection one criticism might be voiced. The ceiling is used for display purposes rather more than it should be. Had the lamps only been placed there, the effect would have been better.

The store is in many respects a model one. It is long and fairly roomy, the stock is neatly arranged and well displayed. The whole effect is pleasing and it is quite apparent that the systematic arrangement of goods makes it convenient not only for the customers but for the merchant and his staff as well.

Feature Tool Boxes for the Christmas Trade

A Line That Should be Well Pushed by the Merchant—There is Such a Range of Sets on The Market That All Pockets Can Be Accommodated—The Boxes Fit in Well With the General Display—How to Show Them to the Best Advantage—Getting After Christmas Trade Generally.

"What is the best kind of present that I can give," is the query that is made all the way around at Christmas time, and it is up to the hardware merchant who is catering to the trade to reply to this query, and in such a way that he secures a satisfactory response. From time to time we have been suggesting various lines which the merchant can put forward, and on the present occasion we would deal with one which is hard to beat, not only from the point of utility, but from the point of acceptability. We mean tool sets.

There has been a great improvement in tool sets within recent years. At one time these sets were looked upon as a kind of child's play box, and were composed of a simple deal box, with a saw that would cut nothing else but butter, and a plane which only approached the real thing in that it had the general appearance of one, and one or two other articles of the same kind. These "tools" could be safely given to a child with the knowledge that unless he swallowed them no harm could happen to him. But the idea grew that this tool box could be improved, and that by substituting good lines for the cheap ones, what was a plaything could be transformed into an indispensable home adjunct to the elder person.

Everybody finds a use for a tool, from the schoolboy, who is endeavoring to fashion a boat or build a cage for a pet, to the head of the family, who is trying to rectify a breakage caused by the younger members. Carpenters' tools are therefore indispensable, even more so as labor gets more expensive and it is necessary to do things at home one's self, which at one time would have been left in the hands of a paid mechanic. But it is one thing to desire the tools, and quite another thing to know the most useful ones to buy, and the kind which will do the work which is desired. Buying tools in a haphazard fashion often means that a collection is made which is not entirely satisfactory. To get the most suitable ones, and do away with the buying of tools which may be only wanted once, and then not again for some considerable time, the idea of the tool box has been developed and brought into great utility by the tool makers, until now we have sets of tools which to use the old expression, "supply a long felt want," and which in the case of a customer wishing to give some one a set of tools without having the trouble of selecting them, gives him absolutely the best opportunity of following out his wishes. To the average schoolboy there could not be a more acceptable present than a tool chest. It gives him a chance not only of assembling something, but of tinkering away to his heart's content, and keeps him out of mischief, unless in the absence of the heads of the family he attempts to improve the dining table. And so on, from the boy upwards.

A Wide Range.

And these boxes have a range which will suit all pockets. Even the lowest-priced set is not a toy. It is a really dependable line. The number of tools may be limited, but they are ones with which good work can be done, while as the price increases, so there is a growing collection of tools which will cover all uses. All makers are not quite alike in their tool sets. Some do not believe in including hammers and saws, because nearly everyone has such articles in their house. Others make their sets absolutely complete by including these fundamental articles. But no matter whose make of tool set is bought, the utmost attention is paid to the quality and the selection.

Merchants should make a strong point of these tool boxes. They should display them well. They should be used in window displays, set up on the counters, or if they are particularly large ones, screwed to the wall. They should not be placed entirely out of reach of the customer. A chance should be afforded of examining them close at hand, and testing the quality of the steel. Even in these days tool sets are somewhat of a

Window Display at Belleville Showing Cards of Child's Tool Sets.

novelty. Many people do not quite realize what acceptable presents they make. They should be brought to their notice. These tool sets work in well with any design that the merchant may display. They act as a good centre around which single tools may be placed and the better sets in their well polished boxes show up well. The merchant must make a prominence of these lines. There is no use having tool sets and placing them underneath the counters or at the back of the store. They must be so displayed that the man who is thinking about tools will have his attention directed at the very commencement to these sets. Then again they should be featured in the local advertising while a good many makers help the merchant by furnishing printed matter relating to them with the dealer's name added for distribution in the district.

Make Up Some Sets.

Apart from these sets the merchant himself can make up a few sets. He may not go quite so far as to provide them with wood boxes but he can provide them with cardboard ones, and he can in this way make up a few little sets which will capture the eyes of those who do not want a larger set. If he so desires he can improve upon this and make up more elaborate sets. He can even assemble up a housewife's set, and include a few light tools, such as small screw driver and hammer, pliers, pincers, and a few boxes of tacks, small screws, small wire nails, etc. He can make a specialty of this woman's set, because after all there are some women who can drive a tack. The selling of these tool boxes need not interfere with the merchant's sale of individual lines. He must not think that if he makes a strong display of tool sets that they will stop demand for his separate tools. The buyer of a single tool is not in the same category with one who wants a set, and while the carpenter or experienced tool user will buy just the one article the customer who wants to set himself up will buy a box.

Developing the Trade.

Referring to the development of the Christmas trade the "Philadelphia-Made Hardware" says that tool chests are splendid trade catchers. Special cases of tools for men are certain to make the eyes of the recipient glisten at Christmas. Put it down as a cardinal principle that at Christmas time people are "looking." Thousands upon thousands of people are upon the streets with no definite objective point in view—no definite article that they want to buy. They merely have in their mind some person or persons for whom they want to buy a gift—and they are looking for that gift. Catalogues of holiday gifts or folders, giving a partial list of goods are sure to give returns. Make parallel lists, in a folder, of gifts which you have in stock and which are suitable for certain classes. For instance, have a column of gifts headed "Gifts for a Man" another "Gifts for a Woman," another "Gifts for the Boy," another "Gifts for the Girl." Send these out to all the people on your books and they will unquestionably more than pay for themselves if the subject is well presented.

Now as to the Store: Remember, again, that people are looking. Have something in your window that moves and that will catch the eye. Once attract the eye and you will have many a person stop to look at the lines of goods that you have in the window.

Smaller Tool Set.

Spear & Jackson's Large Sized Tool Case.

If it is not something so elaborate as a great mechanical toy—such as a train of cars, with tunnels, etc.—let it be a handsome revolving stand filled with cutlery. There is infinite opportunity here for the exercise of ingenuity.

Fill your windows with seasonable goods, with the prices well displayed—and you will find that the people will come inside. And when they come inside let them find a store that looks like a holiday store. Clear your regular lines of hardware out of the way as much as you can and give up the aisles to Christmas display.

Put little articles—articles of small cost—up to the front, and work back to your more expensive exhibits. A good many people are "scared" if they step into a store and see a costly article facing them—it's beyond the reach of their purse, perhaps. They are apt to think that everything in the store is too expensive for them, and to turn

North Bros., Yankee Tool Set.

And remember this—that every time you get a person into your store, every time you make a sale of a good article, you are doing something more than just making a profit—you have advertised your store. That is, if the goods are right. This is one of the values of the Christmas trade. The multitude is out shopping, and if you get a large part of the multitude into your store, you familiarize future possible customers with your store. Bear in mind too, as one sound reason why you should get every dollar's worth of the Christmas trade that you can—that it is (generally speaking) a cash business. Unlike so many transactions in staple hardware, you don't have to put it on the books and wait indefinitely for your money.

Hardware dealers are learning that the tendency to buy good stuff at Christmas is strengthening every year and that every year there is greater stability in the Christmas trade—and therefore there is greater reason every year why the hardware dealer should go after the Christmas trade.

TRAVELERS AVOID BRITISH COLUMBIA.

A. M. Cross, western sales representative of the Gillette Safety Razor Company, has returned from a trip to Calgary and Edmonton, and reports trade this year to have far exceeded any previous season, orders for both razor sets and blades having been phenomenally large, particularly in the larger jobbing centres. There is no hesitancy in the west about paying the price for a good article. "There will be very little slack time in our factory this winter," said Mr. Cross, "we will be able to handle all orders for Christmas trade, but our booked business for regular trade is so heavy that I will be off the road for a couple months."

Mr. Cross reports that British Columbia merchants are being made to suffer considerably as a result of the tax imposed on outside corporations doing business in the Pacific province. Dozens of travelers I know only went as far as Calgary and then turned back. The dealers in British Columbia would have liked to have done business with them but the travelers kept off the ground. One large firm wrote to their former customers to the effect that they would be pleased to supply them with goods but under the new law they could only make shipments where cash was paid in advance. The Gillette Safety Razor Company have paid the tax under protest but delay in receiving papers prevented Mr. Cross from using them this season.

Hardware and Metal Subscribers' Letter Box

Any Question on Trade Subjects Will be Answered by the Editor in This Department. Do You Want Any Address, Any Special Line of Goods, Anything Relating to the Hardware Trade? If Inquiry is of a Nature that the Correspondent Does Not Desire Publicity, He Can Use Initials or Nom de Plume.

The Price of Pitch.

In Hardware and Metal of Nov. 5 an Ontario subscriber asked where he could buy pitch in quantities and at what price. One of the largest dealers in Ontario was asked for the price and the quotation in small quantities was given, with the information that a closer price would be quoted in ton lots. The price to retailers was distinctly asked for and quoted.

Alex. McArthur & Co., Montreal, who handle pitch in large quantities in connection with their building and roofing paper trade, being distillers of coal tar, etc., and who, by the way, secured the order from the enquirer, wrote, pointing out that their name should also have been quoted in answer to the enquiry.

A Toronto jobbing house also write, taking exception to Hardware and Metal quoting the wholesale price, saying that the price Hardware and Metal quoted is the same that they, as jobbers, buy at. This seems unfortunate for the jobber, but the question appears to be, "Is he buying right?" rather than, "Was our quotation wrong?"

Hardware and Metal is occasionally criticized for quoting certain lines of articles too high by retailers and too low by jobbers. Our aim is to quote the average price at which retailers can buy in small quantities, leaving it to larger buyers to secure closer quotations on purchases of greater size.

We invite criticism of the prices quoted. A constant change is going on and while it is not our aim to cause the jobbers to lose money or business, it is our duty to supply our retail subscribers with correct information, and this, with the help of our friends in the jobbing and retail branches of the trade, we will endeavor to do.—Editor.

Wants to Locate in Business.

J. Lamontagne, Ottawa, asks for the name of a town within 50 to 200 miles of Ottawa, where a plumbing business is required, either as a business of itself or in connection with a hardware store.

Glazing a Window.

Smith & Schaefer, Bolton, Ont., write: "What would be the proper price to charge for a 30x40 glass, glazed. One of my best customers feels very much hurt at the price I charged him, and I am anxious to know what would be the charge made by other retailers or members of the Retail Hardware Association. A card from some of them would be acceptable.

Editor's Note.—To glaze a window 30x40 inches, with double diamond glass, Toronto hardwaremen would charge about $1.75 if the sash were brought to the store, and from 25c to 50c extra if a man had to go out to do it.

Crematory Closets.

A western Ontario subscriber asks for the address of a crematory closet manufacturer. He wants a closet in which the solids can be consumed by fire, rather than covered with sand or soil.

Editor's Note.—The Beach Foundry Co., Winchester, Ont., are manufacturers of crematory closets of the type described.

Stove Repairs.

McKillop & Ferguson, West Lorne, ask where they can secure repairs for the Progress stove, formerly made by Grundy Bros.

Editor's Note.—From Jones Bros., Bracondale, Toronto.

Scrap Paper.

W. W. Shaw, Windsor, N.S., asks for the names of buyers of scrap paper, etc., in car lots.

Editor's Note.—E. Pullan, 490 Adelaide Street West, Toronto; J. McGoldrick, St. John, N.B.; C. Brister & Son Halifax; Wm. McFalridge, Halifax, and Train Smith, Federal Street, Boston, Mass.

Chicken Coops.

McKillop & Ferguson, West Lorne, ask where they can purchase wire chicken coops for showing purposes.

Editor's Note.—Model Incubator Co., River Street, Toronto; Canada Wire Goods Co., Hamilton, and Andrews Wire Mfg. Co., Watford, Ont.

New Glass Company.

Arthur J. Dunn asks for address of the Independent Glass Producers, Limited.

Editor's Note.—The company is but newly incorporated. The head office will be in Toronto.

HANDLING CEMENT TOOLS.

A profitable line is developing in connection with the general use of cement and that is cement tools. In all parts of the country farmers are using cement in the construction of silos, barns, corn cribs, stable floors, fence posts, watering troughs and creameries. Nor are farmers always in position to hire mechanics for any odd jobs requiring mechanical skill. In most farming sections the farmer must of necessity be his own mechanic, his own carpenter, and his own mason. The down-to-date farmer must be a well trained "jack-at-all-trades" in the better sense of the word, for opportunities innumerable present themselves, both summer and winter, to exercise his skill along many mechanical lines. The skill which most of them have thus acquired will stand them in good stead in any concrete construction to be done about the home and on the farm. Among the tools wanted are "radius tools," intended for laying out circles, and for finishing curves. "Step corner tools" are made with square, rounded and beveled edges, in order to produce a corresponding effect on curbing, carriage blocks, etc. Another set of special tools are "edgers." On some of these both ends are rounded, one edge being turned down one inch and one-half inch, respectively. All these tools have a three-eighths inch radius and are used to give curbing a rounded edge in place of a square edge. "Jointers" are used to mark off granitoid work, sidewalks in particular, into certain sized blocks, both for appearance and especially to prevent cracks from showing, for it often happens that sidewalks will settle, in which case the crack will be where the joints are, and will thus be prevented from showing across the main walk. These jointers are either rounded at both ends or at one end only, the other end being cut off square, so as to permit the workman to finish the joint close to the wall. Again stable floors, driveways, sidewalks on sloping and hilly ground, require special tools. These are the "hand groovers," the "bush hammer," "indentation," "driveway," "dot," and "ribbon" rollers, all of which do admirably the work for which they are intended. Some of these are made with detachable handles, so as to occupy as little room as possible in the workman's tool box. While the tools just named create a surface to prevent slipping, the "hand corrugating tool," having ten grooves, one-eighth inch in depth, answers the same purpose. Gutter-forming tools are the special finishing tools required to get the right shape and, especially, the proper smoothness which should characterize the work in gutters in cellars and stable floors, to carry water to the sewer; also in sidewalk construction, where the downspout stops at the wall line, and a gutter is necessary across the walk. Those mentioned are but a few of the long list of cement workers' tools already on the market. New ones are being added constantly, as there is a strong tendency from plain architectural outlines and designs in exterior construction of dwellings to those more elaborate and costly. The far-sighted hardware merchant, whether located in city or country, should at least investigate the merits of cement workers' tools, and think seriously of the question of stocking them for the spring.

The British Empire Bridge Company, backed by Vickers Sons and Maxim Co., one of the largest steel working firms in Great Britain, are said to be likely to obtain control of the Dominion Bridge Co., and secure the contract for erecting the new Quebec bridge.

TAKE PRECAUTION AGAINST FIRE

At no time of the year is there greater danger of fire in retail stores than during the Christmas season, when the staff is working overtime, lights are burning late at night and packing and wrapping paper is scattered around.

Fire is always an unwelcome visitor but never can it be more unwelcome than during the holiday season when stocks are heaviest and opportunities for a profitable trade are the greatest. Care must be taken, therefore, to have store kept clear of waste paper and other inflammable materials, the merchant himself, or one of the most responsible men on his staff, making a daily inspection of the store, say about supper time, to see that everything is cleaned up and the lighting system and heating apparatus are running properly.

Some fire equipment should also be provided, say a tank with buckets of water on each floor. Tinware manufacturers supply these and many hardware stores have equipped their stores and warehouses with them. Right here, too, is an opportunity for hardwaremen to pick up some business by canvassing merchants in other lines for orders for from one to half a dozen of these tanks with buckets, pointing out that their installation will mean a reduction in their insurance rates. Where gas or oil lamps are used particular care must be taken to prevent store decorations from catching fire, and where electricity is used the wiring should be inspected at least once a month to see that the insulation is perfect and the system in good order. In windows where special lights and decorations are used special precautions should be taken and the decorations be made as fire proof as possible. Heat as well as flame may cause fires.

A feeling of security is worth having and it can be had by the exercise of proper care and the following out of a system planned out before the holiday rush commences.

LAYING PLANS EARLY.

It pays to plan out beforehand the methods to be adopted during a certain season. If a merchant sits down and figures out just what he intends to do to push the sale of goods seasonable at that period of the year, he will be able to go ahead with definite plans and his methods of conducting the business will not be characterized by the haphazard measures so often seen. He should in the first place gain some idea of the stock that he has to offer and form an estimate of the probable volume of trade and the chances of enlarging it. The next step would be to plan a suitable display of goods, not only in the windows but in the store as well. Suggestions might be asked from the clerks as to the best plan for bringing the seasonable lines to the front in the store.

A definite advertising campaign should be planned early. The man who does not think of what he intends to say in his ad. until the moment he sits down to write it, and who writes one ad. without regard to what he has used before or what he may use in the future, is not at all likely to get best results from his work. The wisest plan is to settle at the outset just what you intend to say to the public in each issue during the season. The ideas thus formed may have to be altered as circumstances arise but continuity of purpose is necessary in advertising as in everything else and will bring the results.

Careful preparation is required for successful accomplishment of purpose in all phases of life. Particularly necessary is it to the retail merchant who has to face keen competition and must adopt his business methods to existing conditions. The day has passed when a store can be handled in an off-hand, take-things-easy way. Too many merchants are not fully alive to the fact and are not, as a result, working along progressives lines.

THE RETAILER STOOD PAT.

In a store in Eastern Ontario last week a farmer dropped in to get a bottle filled with raw oil. The bottle measured 1¼ pints and the retailer asked him 22 cents for the oil, but the farmer said he could buy it around the corner for 15 cents.

Did the retailer meet the cut? No, he said: Alright, Mr. Smith, go around and buy from him if you are sure that the oil is not adulterated. But give me a chance on any other business you have. I cannot sell the oil at that price but I have no objections to you buying elsewhere if I can't meet the price. And to show you that my price is fair I might say that raw oil has advanced from 70 cents to $1.10 per gallon this year and at 22 cents for 1¼ pints I am asking at the rate of $1.40 per gallon, and when you consider that I have to pay freight, cartage, wages, etc., besides loss in leakage, etc., my price is a fair one. But if you can buy pure oil at 15 cents equalling about 96 cents per gallon I would advise you to buy just as I would buy wheat from you if you offered to sell at 96 cents and the market price was $1.40."

"What's the price of this axe head?" queried the farmer, "I paid a dollar for one here last winter and it was no good, wouldn't keep an edge at all?"

"Why didn't you bring it back, then," replied the retailer, "I'd have given you another for it. But if you need a new one now I'll let you have that for 60 cents to make up for the loss on the other one."

The farmer took the axe head and went around the corner to buy his raw oil. He felt that he had saved money on both purchases and instead of feeling sore on the retailer for being high-priced in his oil he felt that he had been fairly dealt with, and when he wanted some more hardware he'd give the retailer who was so frank and fair first chance for his trade.

The incident is quoted to drive home the point that if diplomacy is used a merchant can hold his customers' trade every time. And the price cutter, instead of winning favor as a result of his low prices was put down as "Mr. Easy Mark," in the customer's mind.

A LACK OF JUDGMENT.

When a merchant admits he cannot compete with a mail order house, he makes a very foolish statement. Not very long ago a merchant was heard to say, in a bitter, grumbling tone, with two or three customers in the store, that he didn't understand how it should be, but he could not sell as cheaply as ————'s, naming a large departmental store in his city.

Who will deny that such a statement was a strong advertising talk for the big store? As a matter of fact, he was selling the bulk of his goods as cheaply as the departmental store. But he had just noticed in an advertisement that the price of a particular article was cut by his competitor, causing him to give vent to his injured feelings, and leading his customers to believe he was overcharging them.

This is an example of lack of judgment. He might have said that the department store was cutting prices in a few cases, but that this was one of its methods to attract trade; that it made big profits on the goods sold through

getting people into the store; that it demanded cash in every case; that it does not give the personal attention supplied by the retail dealer, etc.

That was left unsaid, and the very thing that shouldn't have been said was said. It diminished that dealer's selling power.

Judgment is a necessary attribute in the retailer's business.

IMPORTANCE OF WINDOW DISPLAYS.

Many hardware merchants do not appear to realize the full value of window displays. They are too often content to have a few staple lines placed in the window with but indifferent attention to arrangement and effect. So long as some fairly seasonable lines of hardware are included, they think that everything necessary has been done.

It should be realized that an effective window is a splendid advertisement. It impels people to stop and look. If they see something there that they want, it is just a step to the door and their resolution has no time to cool. On the other hand, newspaper and circular advertising —though undoubtedly effective—reaches people in their own homes. It is generally a case of waiting until next day to put into effect a resolution reached to buy some article that has been advertised thus. The window, then, has this one great advantage; it presents its arguments at close range. It has another advantage, in the fact that the goods themselves are shown and the argument is likely, therefore, to be more convincing.

Hardware dealers have such an infinite variety of goods in their stock that the arrangement of effective windows should not be a matter of much difficulty. Not only can frequent changes be arranged but each display can be made up exclusively of one line or one branch of the trade. One week builders' hardware might be utilized. A display of paints could follow, then a showing of cutlery and so on. Variety, which is the spice of life, is the secret of success in keeping up interest in the window displays of one particular store. No line of goods should be neglected.

It has been found a wise plan to draw up a schedule allotting to the window display of each week a certain number of goods, thus making sure that every salable article will be featured at some time or other.

A DECREASE IN CEMENT.

A substantial cut has been made in the price of cement by Canadian companies. The price decrease has led to talk in the daily newspapers of a "rate cutting war" between the Canadian Cement Co. and the independent dealers. As a matter of fact there are several reasons to which the change in price can be attributed.

First and foremost, perhaps, is the keen competition between the interests merged in the Canadian Cement Co. and the other cement concerns. Then, there has been of late a saving in the cost of production, due to the adoption of economic measures, and this undoubtedly has had something to do with the price reduction. The fact that the end of the present season is in sight, may have been a contributing factor.

The reduction was first made by independent companies who, observing that a change in the market was pending, promptly took the first step, and reduced the price. The move became general, and there has been a reduction in all sections. In Toronto 5 cents a barrel was cut off, and the selling price is now $1.55 in large lots. In other places 10 cents was taken off, and report has it that in a few places the decrease was 15 cents.

Straight Talks on Hardware Salesmanship

TALK No. 3 BY VICTOR LAURISTON

He dropped in upon me just now loaded down with catalogues. Why he brought the catalogues is a mystery, for he reeled off their contents without ever consulting the originals.

He was trying to sell me a typewriter. "Just-let-me-show-you-our-proposition," he cried, all in one word; he said it so fast; and he went ahead at a speed that would have taken the flying fingers of a court reporter. My slow mental faculties found the speed too many for me. If he had stopped midway for breath, I would have told him I didn't buy the typewriters—that the boss looked after that. I would have told him a lot of other things, too. I would have—but what's the use talking. I couldn't, couldn't, couldn't slip in a word edgewise.

Typewriters aren't hardware, you say? No—though here and there a hardwareman does a sight worse than take a typewriter sub-agency. But there's a world of talking done in the hardware business, and in its first cousin, the implement business.

Next time you are out upon the road, pull up your horse a minute before you turn into that farm-lane, and ask yourself the question: "Wouldn't it pay me better to let the other fellow to the deal do ninety per cent. of the talking?"

It isn't talk that sells goods. True, talk sells some goods, to some people. But you can talk all day—all week, if you like— to the great majority of people, and at the end of it all they'll just chirrup that they're not buying just now—would you kindly call again some time when they're sure to be out. They don't speak those last few words, but their disinterested tone tells you, if you've the perception of a bat, that that's just what they mean.

For talking isn't salesmanship—that is, mere talking. There's got to be something back of it, and something in front of it, too. The thing in front is a receptive listener.

One of the best salesmen I know is a quiet, unobtrusive fellow who drops into a farm-house, sits by the fireside, interjects half a dozen words now and then into the farmer's conversation about crops, and—well, before he or anyone else knows it, Mr. Farmer has bought a stove, or a buggy, or a piano. And the fun of it is that nobody else seems quite so surprised about it as the quiet, unobtrusive man himself, who hasn't spoken as many words from start to finish as I've taken to tell you about him.

While the farmer's been discussing crops, the quiet man's been listening. More than that, he's been mentally reaching out, testing the sound-waves, getting his wireless apparatus into touch with the farmer's. And when his C.Q.D., or whatever the wireless people call it, goes across the intervening space, the farmer shoots back an instant response: "Piano?—let's see

Let the other fellow do some talking.

what it's like," and in a minute or two there's nothing to do but pocket the first instalment and the accompanying lien notes and move on to the next victim of wireless wiles.

The quiet man's practicing conservation —conservation of conversation. He lets Mr. Farmer do the talking, and he lets Mr. Farmer think, too, that Mr. Farmer's been doing the thinking. The only thing Mr. Roadman does is the selling—and he can go over the country in the trail of other Roadmen with the gift of gab, and sell more stuff in one trip than they could sell in three of four. And he sells it so that it will stick, just because he makes the farmer want to buy it—which is the best (in fact, the only) way to sell.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin—Advance of 2c.
Domestic Lead—Advance of 10c.

Toronto.

Tin—1c advance.
Advances predicted in putty and turpentine.
Cement—Decrease of 5c to 10c a bbl.

MONTREAL.

November 18.—Another 2c advance marked the local tin situation this week. The London market is naturally keeping things very tight here, while there is not a great amount of spot tin. This, combined with the extra trade consequent upon the closing days of navigation, gave an exceedingly firm tone to the market. Buyers of good round lots found it hard to obtain concessions. Domestic lead was advanced 10c, and it is certainly worthy of note that domestic is now within 5c of imported. As a rule, the home product is kept at about 10c to 15c below, unless there is any unusual market condition existing. All the other metals are firm. Copper, while not showing any further advance, has not gone back at all. Spelter is exceedingly strong, while imported lead, reflecting primary market conditions, is firm in tone.

Trade all the way round is very good, and there is practically no stock in hand excepting in the case of users of imported iron. Here the winter freights play such an important part that stock has to be carried, although despite the warnings of last year, it is anticipated that requirements have by no means been covered even over the first three months of the winter season.

The chief feature of the primary markets is the continuance of the control of tin in London. Another big jump marked the week, and it does not look now as if the bull operators were going to let the price drop before the coming Banca sale. A tremendous amount of buying has occurred, but very little of it has apparently been for legitimate consumptive purposes. The American users are keeping off the market, and speculators are quite in command. Copper has been undergoing some flurries, and London fell away under the influence of Wall Street, but regained confidence again. Unlike when the recent improvement first started, the metal is now supported by the speculative interests, rather than by the legitimate buyers. Still the market seems fairly strong and able to maintain the recent improvement. Spelter and lead in the primary markets have been keeping up their strength. Spelter looks billed for a continuance of the healthy movement, but lead is not so happy, and the increasing quantity of metal on the markets seems to foreshadow a falling off. Cleveland warrants show very little change. The metal situation in the States is about the same, with new business light, and premiums withdrawn for future delivery.

Pig Iron—There is increasing bustle in the imported pig iron market, as within another week the port will be closed. Warehouses are well loaded up, and large users are carrying good stocks. The opinion is, however, that there has not been enough buying ahead, and that the proceedings of last year will be repeated, when all the available pig iron was scooped up and winter freights paid long before the river was open again. Only those who have to pay the difference in freightage or ex-store prices know what this means. The domestic siuation is the same, with furnaces showing plenty of business in hand. The situation in the States remains practically unchanged, except that prices for the first quarter of the new year are on the same basis as for prompt delivery, whereas until lately premiums were asked and obtained for forward delivery. This looks as though producers had given up the hope of expecting any great improvement until the spring. Structural steel contracts are light, and there is small prospect for important orders from the railroads in the near future. Hope has been given up that after the elections there would be a flurry in new business.

Tin—With another advance of 2c, the jobbing price of tin is now at 42c. Even for large lots the price is not greatly shaded. Spot tin is on the light side, and the demand, despite the figures asked, is good, owing to buyers having been purchasing heavily to save freightage and to the metal generally being wanted. There is very little extra tin knocking around these days. There is very little alteration in the primary markets. The syndicate in London have maintained their hold upon the markets, and another strong burst of buying marked the week.

Copper—Still at 14c for jobbing lots, with fair concessions for fair-sized orders, copper has been moving out very satisfactorily, and buying has been well distributed. Inquiries have again fallen off, consequent upon the slackening up of the recent improvement spurt, but the ground gained then has not been lost. The speculative market has been somewhat controlled by Wall Street, and London has been fluctuating, but on the whole there has been a better tone. There is an absence of news regarding the producers' attempt to restrict production, and it looks now as if we were as far off as ever from restriction. But it will have to come.

Spelter—Spelter is very firm, but shows no change. Buying is good, and inquiries show that there is a lot of business coming along. London prices keep up to the high level. Holders are asking premiums for January and March, and decline to quote this side of the year. The galvanized sheet trade are buying much spelter. St. Louis is firm and showing a tendency to advance.

Lead—Domestic lead has been advanced 10c, and is now within 5c of import, which is somewhat unusual. There is good trade going, and inquiries are coming in fairly freely. The English market is, on the whole, steady, but conditions are not so favorable to the maintenance of prices as there is much more metal offering than was the case a few weeks back.

TORONTO.

Toronto, Nov. 18.—The tone of the metal market is strong locally, despite some uneasiness felt on the score of tin. The manipulations on the primary tin market at London, which have caused first a sudden decline and then a distinct rise in price during the past week, have created a little apprehension. The price here has firmed up some, as a result. Fullest confidence is now displayed in the copper market, and the price remains stationary, with no prospect of an immediate slump.

The market looks good for next year, as large orders are being booked up for 1911. The outlook is most encouraging in practically all lines.

Pig Iron—The demand for pig iron is active and large orders are being freely placed, mostly for prompt delivery. Prices are unchanged locally: Canadian No. 1, $19.50; No. 2, f.o.b furnace sellers, $19; Middlesboro, No. 3, $20; Summerlee. No. 2, $22.50; Cleveland, No. 1, $20.50; Clarence, No. 3, $20.75; Jarrow, $20.50; Glengarnock, $22.50.

Tin—The primary market has experienced sharp and sudden changes during the past week. On Friday, Nov. 11, the price declined sharply. On Tuesday an advance of £1 was recorded, and on Wednesday a further increase of £2 was made. The bull element maintains control, despite the concerted efforts of the bears, and the high price is likely to be kept up. The result has been a firming up on the local market. Most jobbers are quoting 40c and 41c, with concessions for ton lots. Orders received are mostly for small lots just at present.

Plates and Sheets—There is a good demand still and the supply is plentiful, making the market much more satisfactory than for some time back. There is a tendency toward firmer prices in some lines, several jobbers quoting as high as $2.90 for ordinary 52 sheets. The price of tinned iron sheets has gone up 2s on the London market, but this advance has not affected local prices as yet. Orders are being placed freely for next year.

Copper—The utmost optimism is expressed here with regard to copper. No curtailment has been effected in the production, but all reports are to the effect that the consumption is right up, if not a little in excess of it, so that no fears

need be felt on that score. With increasing confidence prices show a tendency to become more firm. The prevailing quotation locally is 13½c, although one jobber asks ¼c higher.

Lead—The demand for lead is good and prices remain firm. Domestic is quoted here at $3.75, and imported at $3.80, although one quotation of $3.85 and $3.90, respectively, has been heard this week.

Spelter—The spelter market is showing a strong tone. Although the output is good, the consumption is at least equal to it. Local quotations range from $6.15 to $6.25, no change having taken place for some weeks.

Old Materials—Prices are firm in all lines of scrap metal. The supply is still good. Scrap zinc is firmer, being quoted now at 4c. Other quotations are:—Heavy copper and wire, 11¼c to 11½c; heavy red brass, 10¼c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $10 to $11; malleable, No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $13.

Cement—An increase of from 5c to 10c per barrel is quoted.

HARDWARE MARKETS

MONTREAL HARDWARE MARKETS.

Nov. 18. — Trade has been moving along very briskly, and some satisfactory loads have been sent by the boats. In fact the business shipped recently seems to be heavier than for some years past. Except in the case of the Christmas goods, the demand has been of a purely sorting up character, but is well distributed, and although dealers are buying cautiously, they are buying steadily, and with a good deal of confidence. Skates and hockey sticks are prominent, likewise snow shovels, weather strips, sleigh bells, sleigh heaters, lanterns, are moving in a sorting up way. There is a good demand for general kitchen lines and for utility goods. Lumbermen's supplies are now very strongly in request and boot calks, axes, axe handles and cross cut saws, as well as snowshoes, are prominent.

Christmas lines are naturally the most prominent, and carvers in cases, fish knives and forks, dessert knives and forks, general lines of silver and plated ware, shaving sets, razors, manicure sets, are moving well. These lines are being pushed strongly by the travelers, and merchants are buying very confidently. Tool boxes and single tools are also showing a good movement. Heating lines have been accelerated by the recent cold weather.

All the way round there is a good tone. Prices are firm, and although booking is not very evident as yet for next spring, although poultry netting and fencing are being taken, there is plenty of evidence that there will be a big swing after the commencement of the new year.

Cutlery, Silverware and Fancy Goods.—Christmas lines are moving out in good strength, and sorting up orders have been received from dealers who have looked over their stocks, and found them not quite so complete as they expected after the first ordering. Cutlery, table ware, scissors, nut crackers, brass and copper lines are in strong request. Shaving sets, razors, manicure sets, cut glass, tea kettles, clocks and watches are prominent.

Seasonable Lines — Weather strip, sleigh bells, snow shovels, and other lines are moving steadily in a sorting up way. Dealers report a good consumptive call. There is a slight stimulation in enamelware, while bread mixers, meat choppers, and general kitchen utilities are in good request. Steady booking is being done in stoves and ranges, and there is a good call for oil and spirit heaters.

Sporting Goods.—There is a good demand for skates and hockey sticks, while the movement in snowshoes, sleds and toboggans has been quickened by the colder weather and the fall of snow. Air guns for the Christmas trade are being booked well, while gymnastic lines are in steady demand. Ammunition after a very fine season is showing signs of falling off.

Builders' Hardware.—The demand has somewhat fallen off, although the volume going through is still very good for the time of the year. The market is unchanged, and we quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside), $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Bolts and Nuts.—Orders are of fair strength at unchanged prices. Nails and machinists' tools are in fair demand. We quote: Discount on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Heavy Hardware.—The boats have been taking good lots of heavy hardware. The demand will now probably commence to slow up. We quote:—Chain coil, ¼ $5.25; ⅜, $3.80; ½, $3.50; ⅝, $3.25; 1, $3.25; anchors, 4½c lb. up; merchant bar iron and mild steel, $1.90; steam gauges, $1.50 each up; injectors, $4 to $18 each.

Wire.—Booking is being done in fencing wire and staples. There is a moderate inquiry for other lines. The market is unchanged, and we quote: Barb wire, $2.20, plain twist $2.50, coiled spring (9) $2.20, (12) $2.35, staples, bright $2.60, galvanized $2.85.

TORONTO.

Toronto, Nov. 18.—The hardware market is strong and activity is reported in all lines. The year now drawing to a close has been in some respects a record-breaker, one jobber going so far as to declare it to have been the best his house has ever experienced in point of output. Whether this optimistic estimate would be upheld if a close scrutiny were made into the volume of trade done in all sections is a question. There can be no doubt, however, that at the present time things are going with a rush. Jobbing houses are so busy that it is found a difficult matter to keep up with the trade.

No changes are reported in price lists but it is more than likely that a week's time will see a few increases. The price of galvanized barbed and plain wire in the United States has advanced $1 a ton and there is every possibility of the change being reflected in local prices. It is hinted that an increase will be made next year in some heating lines.

Seasonable Goods.—There is a firm demand for seasonable goods. Winter lines are being taken up rapidly and dealers in all sections are losing no more time in stocking up in sleigh bells, sleigh heaters, weather strip, snowshovels, sleigh bells, lanterns, blankets, etc. The call for stall accessories has fallen off now. In household goods, there is a brisk movement. Pots, pans, enamelware of all descriptions, cooking and kitchen utensils are being bought consistently, evidencing a good demand for such goods at this season.

Builders' Hardware.—There has not been any noticeable falling off in builders' hardware, despite the more severe weather of the past week. The call from the cities remains firm and a little business is still being done in the rural sections. Glass, sash weights and kindred lines are much in demand. It has been found hard to get barn door hinges this season and the demand still exceeds the available supply. Door hangers are moving well but stall fixtures are not in much demand.

Heating and Lighting Goods.—The demand for stoves and heating goods is appreciably slackening, but the manufacturers have not yet caught up with their orders. In a couple of weeks probably they will get abreast of the demand and after that no difficulty will be experienced in handling the trade. Prices remain firm, but it is more than probable that an advance will be made in stoves next year. At the present time all materials used in the manufacture of stoves are dearer than when the prevailing prices were set. Nickelware is more expensive, plates have advanced and there has been pretty general increase in the metal market. In addition, labor is dearer. Not only are the men paid more but it is extremely hard to get them, owing largely to the

demand for skilled men in the United States where the growth of the automobile industry has created a greater need for men and a higher scale of wages. It would not be surprising, then, if a raise in the price of stoves were made next spring.

Sporting Goods.—The demand for skates and hockey goods is now brisk. This constitutes the bulk of the sporting goods sale at present as guns, ammunition and all fall lines are practically at a stand still now. The skate trade is proving particularly brisk.

Heavy Hardware.—The demand is not as good in the heavy lines. Bolts, nuts and rivets are being sold still and bar iron and steel are moving as well as could be expected. No changes in price are listed here. The discounts on carriage bolts are quoted: ⅝ and smaller, 70; machine bolts, ⅝ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—The greatest demand is for Christmas lines of all kinds. Cutlery is one of the biggest sellers, the trade extending to all lines. Jobbers report that, owing to the big demand, cutlery stocks are rather lower than they like to see at this period of the year. Cut glass and brass goods figure prominently in the trade. Metal toys, tin toys, clocks, razors and chafing dishes, are selling briskly and it becomes daily more apparent that the trade is going more into holiday goods this year than in any past season.

Wire.—Locally the situation remains the same, with prices stationary. The advance of $1 a ton made in the United States on galvanized barbed and plain wire may lead to advances in the matter here shortly.

HARDWARE TRADE GOSSIP

Ontario.

W. M. Cameron, former hardware merchant at Fort William, has bought a farm in Carpenter.

T. Aquin, hardware dealer, Montreal, has assigned, and a meeting of the creditors will be held on Nov. 19.

W. W. Schweitzer has sold his hardware business at Emo to C. R. Langstaff, who will take charge shortly.

Spring Bros., Elmvale, have disposed of their hardware business to Charles Snider, of Tiny Tp. The transfer takes place on February 1.

Harry Gibson, of the Bailes Hardware Co., Cobalt, has returned to that town with his bride, nee Miss V. N. Terwilleger, after a honeymoon trip to Buffalo. They were given a hearty reception by friends.

David Courville, hardware merchant, Alexandra, is the successful tenderer for the heating by steam of the Sacred Heart church. The system must be in running order by the third week in December.

A young man in McGregor's hardware store, Caledonia, was giving a high kicking exhibition, when he slipped and fell through a glass show case, doing considerable damage, and cutting his hand seriously. The moral is obvious.

Robert C. Muir, southern manager of the Glidden Varnish Co., who has had headquarters in Atlanta for the past five years, has been apointed general manager of the company's business in Canada, with headquarters in Toronto.

A new factory to manufacture carpet sweepers, vacuum cleaners, clothes washers and other household articles is to be started in Guelph by W. W. Hesson and W. E. Rothwell, both of Toronto. Thirty hands will be employed at the outset.

E. Fielding, commission merchant, left on Monday for Jacksonville to attend a convention of the producers of turpentine in the state of Florida. He intends to try to impress upon the convention the importance of doing something to prevent the imposition on the public of adulterated goods in this district.

The Taylor-Forbes Company was the first Guelph factory to use Niagara electric power, which was turned on in the woodworking shop at 5.30 Tuesday. J. M. Taylor turned on the power in the presence of Manager Heeg of the civic Light and Heat Department, and the superintendents of the different departments of the Taylor-Forbes Company.

Quebec.

The annual meeting of the Canada Car Co., Montreal, was held this week. The past year's business amounted to $8,500,000. N. Curry was reelected president, and W. W. Butler vice-president.

On the demand of Alfred Prudhomme et Fils, Theo Aquin, hardware merchant, Montreal, has made a judicial assignment of his estate for the benefit of his creditors. The liabilities amount to about $12,000.

Between three and four thousand dollars' damage, partially covered by insurance, was caused by a fire which broke out in the Bedford Stove Co.'s works, Bedford, Que., after the works had been shut down for the day.

A new varnish company has started in business in Montreal, under the name of the Holland Varnish Company, at the head of which is Norman Holland, who was, until recently, connected with the Dougall Varnish Compny. A comprehensive factory has been built, and arrangements are nearing completion for the commencement of manufacturing.

A large tract of land, some 15 acres on the Lachine canal bank, Montreal, with railway facilities, has been bought by the Steel and Radiation Company, a merger company with headquarters in Toronto. The site was purchased for the purpose of erecting a manufacturing plant, and it is expected that the new industry wil give employment to about 500 men.

A keen contest for the presidency of the Dominion Commercial Travellers' Association is expected in Montreal, owing to the nomination of both Bevans Giles, present vice-president, and Charles Gurd, an old time officer of the association. For the vice-presidency A. J. Brown and E. Duckett are nominated. For the five positions left vacant by the retirement of N. Picard, H. M. Levine, L. Decelles, A. J. Brown and J. T. McBride from the directorate, there are fifteen candidates: Geo. W. Prescott, M. W. Hackett, L. L. Bernard, Robert Wall, H. M. Levine, John O'Donnell, Geo. L. Bert W. C. Murray, John T. McBride, Eugene Poitvin, Charles L. Martin, Wm. J. Irving, C. C. Laprierre, C. M. Cameron, J. Fred Featherstone, and G. L. Burritt.

C. T. A. NOMINATIONS.

Toronto, Nov. 17.—Nominations were made at the meeting of the Commercial Travelers' Association of Canada for Saturday. These nominations were :

President, G. Gemmell, Jas. H. Lumbers ; First Vice-President, S. M. Sterling ; Second Vice-President, James G. Cane, John H. Wildfong ; Treasurer, E. Fielding, William Meen.

For directors the nominees were as follows : Toronto Board—J. W. Charles, Alexander Cook, John Everett, R. G. Hector; George W. Moore, D. H. Mackay, Joseph Pease, A. C. Rogers, W. H. Scott, C. J. Tuthill, W. E. D. Tighe, William Williams, A. Whitling, Joseph Zammers, nine to be elected.

Hamilton Board—E. J. Fenwick, 1st Vice-President ; John Stoneman, 2nd Vice-President.

Directors of Hamilton Board—W. H. Dean, W. W. Godard, A. F. Hatch, F. W. Jarvis, S. Male, W. P. Malone, George Matheson, D. C. McKeown, George M. McGregor, Charles C. Smye, P. A. Sommervillo, H. G. Wright, E. O. Zimmerman (six to be elected).

Berlin Board—Fred Doering, W. J. Moody, E. Marrin (two to be elected).

Kingston Board—W. H. Graham, W. S. R. Murch, (elected by acclamation).

Guelph Board—Adam Taylor, Vice-President ; Alex Thomson, (elected by acclamation).

Brantford Board—J. S. Hamilton, D. J. Waterous (elected by acclamation).

Montreal Board—William Cauldwell, Vice-President ; H. Williamson and J. H. Gallagher, directors (one to be elected).

Winnipeg Board—H. Miller, Vice-President ; A. C. Merrett (elected by acclamation).

Vancouver Board—Frederick Buscombe, Robert Stewart, directors, (elected by acclamation).

Ottawa Board.—J. H. Lawrie (elected by acclamation).

Brockville Board—M. Moore (elected by acclamation).

Scrutineers of the ballot elected—H. Clearihue, Robert Keyes, Walter Madill.

The result of the ballot will be made known at the annual meeting of the association to be held in St. George's Hall on Dec. 29.

Beware of Advertising Your Own Weaknesses

So Warns Writer Who Calls Attention to Disorderly Windows and Dirty Store Interiors— How Such Conditions Diminish Selling Power—Why Every Dealer is a Believer in Advertising—The Question is 'How to Make It Advantageous.'

By Henry Johnson, Jr.

Whether you like it or not; whether you "believe in it," or not; whether you know it or not, you are advertising every day you keep your doors open. Which being the case it behooves you to study advertising and study it well. And, in view of the primary importance of the subject, it is deplorable that it receives so little intelligent, unbiased consideration. For mind you, I said you advertise, but I did not say you advertise to your advantage. Many advertise their own weaknesses, bringing their faults into prominence with very unfortunate, very costly emphasis.

Brush Those Cobwebs Away.

Now why should you have the assurance, the "nerve," so to say, to pass up the subject of advertising with a careless word or two, as you so often do, clearing the decks with the one pet, sweeping assertion to which frequent repetition may have leant a meretricious authenticity? Why, bless your heart! you would not consider the installation of an elevator in such a spirit, putting your inexperienced, half-tried, hap-hazard judgment against that of those who have studied elevators for a lifetime. No: nor would you undertake the purchase of a single barrel truck in such a frame of mind. So, therefore, let us brush the cobwebs away and approach this weightiest business problem with something akin to the careful consideration and suspended judgment to which it is entitled.

Since, then, you advertise whether you want to advertise or not, let us seek to discover how you may advertise to your advantage. And let us begin with the beginning, fixing firmly in our minds the cardinal principles that, as we must advertise, we will (1) advertise honestly; and we will (2) advertise to our own advantage. This means that we must KNOW our goods thoroughly —not superficially—and that we must see to it that conditions in and about our stores are such that we can tell the naked and unvarnished truth to our OWN ADVANTAGE. This is somewhat of an undertaking when you come to consider it.

Covers a Wide Area.

To begin with, let us understand each other. Advertising is not the use of printers' ink, though printers' ink is a wonderful agent for the dissemination of knowledge, advertising and other. Advertising is vastly broader than this. Advertising embraces all business promotion. Notice that: ALL business promotion. This means that everything done about your store is advertising, positive or negative: for you or against you. That is my interpretation of advertising.

So we better begin with your windows, since the windows are your introduction to your trade. I do not think there is any single advertising medium that equals the power of your window to do or undo. To realize what this amounts to, suppose you step outside and look inwards through your windows to-day, just after you have read this column; trying to picture to yourself what would be your own impression of yourself as a merchant if you were a stranger going into your store and "sizing up" the store through that single medium. The experiment may open your eyes. For, as in things spiritual, most troubles are hidden within where they are not readily seen; so also in the grocery store most difficulties, handicaps to success and various drawbacks may be found in blindness to our surroundings; carelessness of those familiar details attention to which would spell SUCCESS.

Excuses Now Obsolete.

Let your reform in advertising begin at your windows. Clean up! Better a clean empty window than a display allowed to become dusty and fly specked therein. Continue the process clear back to the rear door and then up and down stairs, searching into every nook and cranny. The time is forever gone when any excuse will cover a dirty, disorderly store; for too many have clearly demonstrated that not only is order and cleanliness possible and practicable; not only does it pay "indirectly" as advertising; but it also pays directly in dollars and cents. In a certain city is the home of a large food company. It is not a rhetorical twist to say that you might invert your dinner plate on any portion of the floor of that factory and then eat the food with less liability to get dirt or disease into your system than in the average cheap restaurant; that is simply a statement of solid fact.

One accustomed to old-style methods would question whether such exceeding cleanliness could pay. The fact is well established, however, that the business of this company is highly profitable, and that a great proportion of the profit is directly traceable to its exemplary cleanliness. Disorder and dirt mean waste and waste is expensive. Order is conservation of time and goods; hence order is true economy and adds to the profit account.

Get First Hand Knowledge.

As you proceed with your investigation of "inside conditions" in your store, you will be surprised to find odds and ends of stock piled away, or thrown into odd places—that is, if you go about this yourself with a view to knowing about it first hand. If you leave it to others to do, without careful supervision, you will not learn so much, nor will you know about all that is found. At best, stock left around loosely is idle stock; idle capital; wasted energy. At worst, it is spoilage and therefore indubitable loss.

Value of a Pleased Customer.

Admitting this much then, have I proved my contention—at least so far as I have gone? You admit that customers are influenced by your tidy store. Then is a tidy store good advertising? You will admit that one pleased customer is a good advertisement for you—the best advertisement, we will say. Why? Is it not because she tells her friends that you keep a tidy, attractive store? If you sell her something new, something she has not yet tried, which pleases her, have you not advertised to her and to her neighbors that you are up-to-date? Is it a good thing to have her feel that way about your business and store? To ask the question is to answer it. Very well, then: If it is good for you to influence her and thus influence her neighbors how can you say that you do not believe in advertising? What is advertising, as it is commonly understood, in its more restricted sense? Is it not simply your own indirect telling of these things about your goods and your store to a large circle of readers in much the same way that your pleased customer tells her friends?

And if this is so, is it not then good for you to tell your story broadcast through the medium of printers' ink?

HARDWAREMEN PLAY HOCKEY.

The Montreal hardware hockey league is in full swing once more, and judging from the annual meeting last week the successes of last year will more than be repeated. All the clubs are again represented, namely: Thos Robertson & Co.; Lewis Bros.; Frothingham & Workman; Starke-Seybold; Caverhill, Learmont & Co.; and the Canadian Fairbanks Co. It was resolved that the winners of last year will have to go a very long way to repeat their performance. The election of officers resulted as follows: Hon. presidents—Geo. Caverhill, Geo. C. Davis, H. J. Fuller, H. G. Lewis, Wm Starke, James Reid Wilson. President — Herbert Seybold. Vice-presidents—Geo. Chaffee, Lewis Bros.; Thomas Robertson, Thos. Robertson Co.; Frank Newman, Caverhill, Learmont Co.; Joint secretaries — Jack Marnell, Canadian Fairbanks Co.; R. F. Warren, Frothingham & Workman. Treasurer — P. Boland, Frothingham & Workman. Executive committee—Harry Massey, Caverhill, Learmont Co.; E. Montgomery, Starke, Seybold; W. F. Fairfield, Frothingham &Workman; E. B. Ryan, Lewis Bros.; Geo. Thompson, Thos. Robertson Co.; R. Desourdy, Canadian Fairbanks

News and Methods of Canadian Hardwaremen

St. John Firm Kept a Hunting Scene in Their Window for Two Months Because it Sold Goods—Unique Tool Window at Peterboro—Shortage in Stoves Reported From Stratford.

WINDOW KEPT IN TWO MONTHS.

St. John, Nov. 16.—"There's a window that has paid for itself fifty times over," said the chief clerk in one of the local hardware stores to a representative of Hardware and Metal. He referred to a display of hunting goods that seemed to include everything that a sportsman could ask for, in the way of guns, ammunition, knives, baskets, decoys, fishing rods and tackle, as well as a large stuffed bird and a big moose head.

"That window has attracted more attention than any window we ever put in," he continued. "People passing by stop constantly to look at the goods and our sales of hunting supplies have been larger than in any other year. As a rule, we change our windows about once a week, but in this case we have kept that window in for more than two months. Of course, it is enclosed at the rear and practically dustproof, and it seemed so comprehensive and there was such a steady demand for the goods that we have allowed it to remain. Now that the season is about over, however, we will take it out."

A number of changes and improvements have recently been made in the interior of the retail hardware store of T. McAvity & Sons. Three large silent salesmen showcases have been put in to replace the old-fashioned counters and flat showcases formerly used. These are utilized for displaying table cutlery of all kinds, pocket knives, razors, scissors, etc., and sterling silver and plated goods. Another new feature is a shallow wall case, electric lighted, in which are displayed on specially made fixtures —steel squares, hammers of every description and braces. These goods were formerly kept in drawers, out of sight, but now a customer can see at a glance the different sizes and styles and make a selection with less trouble to the clerk and more satisfaction to himself. The wall case in which guns and rifles are shown has recently been fitted with electric lights, which shows it off to much better advantage.

Just at the present time, all the local hardware dealers are pushing the sale of oil heaters. These handy little stoves that can be carried about the house from one room to another, are suggested to householders at this time as convenient and desirable, quickly heating a room, where a big fire is not needed.

One of the local dealers last week had a very interesting display of draughtsmen's and carpenters' tools. It was arranged on the three sides of a tall revolving pyramid, worked by an electric motor, and created a lot of attention. The pyramid was covered with black felt, and the smaller implements of the craft were neatly fastened on. Around the floor of the window the larger implements were shown in an attractive manner.

UNIQUE TOOL WINDOW.

Peterboro, Nov. 15.—The Kingan Hardware Company have an odd looking window this week in the form of an axe and saw display. In their large window they have a lumbering scene, the floor being of straw to resemble grass and the background branches of pine trees. The centre is a display of axe heads on a platform in pyramid form, axes in handles, cant hooks and large saws being neatly arranged on either side. At one end was a sawhorse with a log half sawn through, with a bucksaw sticking in the wood, and at the other end was a display of lumbermen's saws arranged on a step ladder.

In a second window boy's scout knives and hatchets were featured, a very good trade having been transacted in this line by this firm.

The Kingan Company report a very satisfactory fall trade with excellent prospects for an increase in the holiday business to be done next month.

A SHORTAGE IN STOVES.

Stratford, Nov. 17.—The feature of the hardware trade here has been the demand for stoves. Most dealers report that there has been activity not only in ranges and furnaces but equally in heaters. In the past ten days the trade has reached its highest point and the demand has been such that, in some cases at least, the dealers were unable to keep up with it. J. R. Myers Co. found business so brisk that the manufacturers could not keep them supplied and they had to replenish their stock by stoves from dealers in other places. G. T. Ward & Son report six sales in two days and equal satisfaction is expressed by other local merchants.

The building season here was an average one and the demand for builders' hardware fairly good. Most of the trade was more satisfactory than in past seasons, a tendency being shown to secure uniform and high grade equipment.

An automatic display in the window of the Myers Hardware Co. has attracted some attention. The figure of a woman was shown behind an ironing board. By electric attachment the figure was kept in motion, showing the advantage of the asbestos sad iron.

AN ERA OF PROSPERITY.

Preston, Oct. 11.—The unprecedented era of prosperity now being felt in Preston, has brought a rush of business to the hardware and plumbing trades. Forty-eight new residences were erected during the year, and this meant not only a heavy demand for builders' hardware, but much plumbing work. The two local firms, Bernhardt & Gies, and H. Mickus, have been hardly able to cope with the business. Despite the lateness of the season, there is still a great deal to be done. Bernhardt & Gies employed seven men at the first of the year, and now have eighteen on their staff. This has been caused partly by the firm doing contracts out of town. At present they are installing a steam heating plant for J. D. Pennington, Dundas.

This year Bernhardt & Gies took up electrical work, employing a qualified man. They are now doing well in that department, and are working up a good trade.

H. Mickus is rebuilding his store. A new front has been put in, consisting of green tile for the first storey, and red brick faced with stone above. When completed the store will be large, commodious and handsome. He also has installed an electrical department.

SHOULD PAY WAGES OFTENER.

St. Thomas, Ont., Nov. 17.—One of the great problems which merchants of this city, particularly grocers, have to wrestle with, is the monthly payment system which governs railway employes. So large a proportion of St. Thomas' population is made up of people concerned in one way or another with railway work that the place is commonly known as the "Railway City." It is of little use for a merchant to press for payment at any other time than around the monthly pay day. The banks keep open during the evenings on these occasions, and the pay cheques are quickly turned into currency and applied on merchants' accounts, after which the railway man's wife is often in a state of chronic financial distress. As in the case of a business with small capital, the advantage of cash buying, or the purchase of goods in large quantities is likely to be lost.

With these disadvantages in mind, an important resolution was included in a number of demands framed on Monday night at a union meeting of railway men, held in Engineers' Hall here. Among reforms which the allied unions will seek to secure from the Dominion Government is a change to bi-monthly payment of wages. The resolution is worded, "so as to allow the employes to pay cash for their goods, and do away altogether with the credit system."

MANY FURNACES INSTALLED.

Hespeler, Oct. 14.—The fall trade in hardware has been quite satisfactory. The stove trade has been prominent, second hand stoves being disposed of in large numbers. Local dealers believe that this is due to the numbers of furnaces being installed now. People are likely, after buying a furnace, to secure a second hand stove, if it is found that an auxiliary source of heat is required.

The exceptionally high quality of

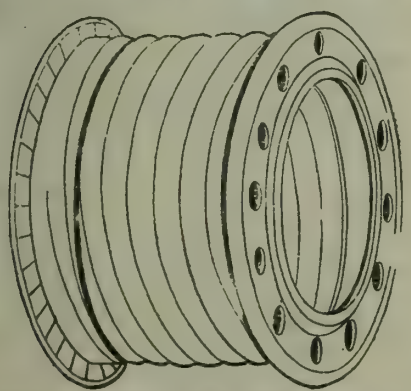
Stephens

HOUSE PAINT makes it the most acceptable of all paints to the user.

Stephen's Paint represents all that is best in paint making---a paint with a reputation. For many years in high favor with representative painters because found dependable under all conditions.

We use only the best oil and pigments, scientifically prepared, and all our work is guaranteed.

Our facilities for making paint are second to none.



We carry a large stock, and can give you the quickest service. Send along an order and see.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Nov. 17. — There is no change reported in the prices on any of the lines quoted.

Canada plate, tinware and tinplate are reported very strong, and advances may be made very soon. At the time of writing, orders are exceedingly heavy for all heating goods, including stoves, ranges, furnaces, and oil heaters. The volume of stove trade is much in excess to any previous year, and it is noticed that the demand runs in a line of high class goods. Builders' hardware supplies are not moving, and attention is directed to holiday and winter sporting goods. Skates, sleigh-bells, curling stones, are noticeably in demand.

The retail trade in the country has been very active during the past few weeks, and they have been sending in good sorting orders lately. Indications are that the trade this winter will be in excess of previous years.

Collections are only fair, and efforts are being made at the present time to stimulate the same.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅝ and smaller, 65; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9¼c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 5 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—6-in., $6.69; 7-in., $9.31.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 30; japanned ware, 35.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

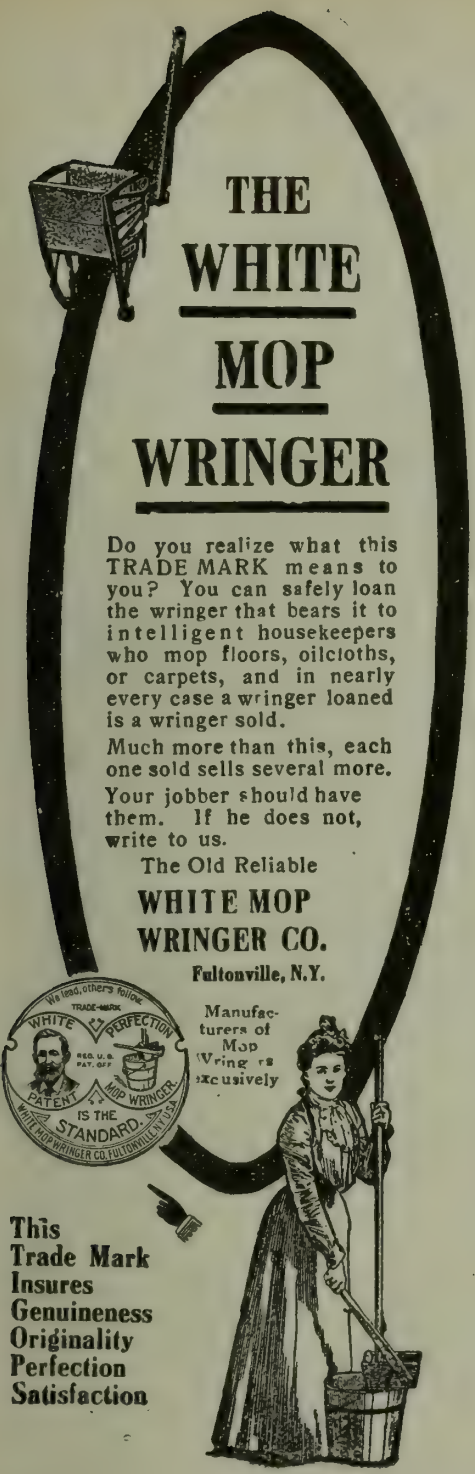
Paints and Oils

The general paint and oil trade has become slacker, as the rural ordering is greatly diminished. Jobbers have begun the work on spring ordering, and within a week or so the trade is expected to become more active. Interior finishing is carried on extensively in the larger centres of the country, and the vast amount of building that has been done during the season will, no doubt, tend to lengthen out the finishing trade during the winter. There is no change in the prices of some lines reported stiff.

Putty and Glass—There has not been much weakening in the demand for putty and glass. The trade will undoubtedly continue until the New Year, at least, when a weakening may be expected. Jobbers have been taxed to fill orders for glass during the past few weeks. Putty in barrels $2.90, cases $3.15, kegs, $3.40.

Linseed Oil.—The mills are holding out strongly on the linseed oil market, and there is no sign of weakness anywhere. When asked of the possibility of a rise, a local jobber stated to-day that with the present prices on seed and a good demand for oil, notwithstanding the high prices that prevail, it would not be surprising to see a further advance of at least three cents. Raw oil is $1.15, boiled $1.18.

Turpentine.—The market is still firm at $1.10. For the past few weeks the demand has been very good, and indications are that the present prices will be maintained. The demand on small crop in the centres of production has been very heavy, and it would seem before the next crop is harvested that a very strong market must continue.



Varnishes. — The varnish trade has been remarkably brisk, and the demand for all kinds of finishing supplies has been very heavy. There are still some buildings to be finished up in the inside, and jobbers anticipate a splendid trade all year.

White Lead. — This stuff has been slack recently, but with the new Spring ordering a better trade is expected. The prices still continue $5.75 to $6.25, according to the brand.

John C. Mears, Arcola, Sask., is disposing of his hardware and furniture stock to engage in brick manufacturing.

Armstrong & Turnbull, Fillmore, Sask., have dissolved partnership. W. J. Armstrong will carry on the tinsmithing, and J. F. Turnbull the hardware business.

THE WHITE MOP WRINGER

Do you realize what this TRADE MARK means to you? You can safely loan the wringer that bears it to intelligent housekeepers who mop floors, oilcloths, or carpets, and in nearly every case a wringer loaned is a wringer sold.

Much more than this, each one sold sells several more.

Your jobber should have them. If he does not, write to us.

TALKS ON PAINT SELLING

No. 1

With the growth of competition comes increased difficulty in familiarizing the public with any special product.

This is nowhere more true than in the sale of paint or varnish.

There are in Canada and the United States over 1350 paint manufacturers and 675 varnish makers. You are a dealer, but how many of these can you name from memory? How many do you think the average man on the street can name?

Yet practically every man, woman and child of intelligent years is familiar with the Sherwin-Williams trade-mark and knows what it stands for.

As judged by modern standards, this acquaintance of the public with the S-W trade-mark is a commercial asset beyond value. It is the sign of conspicuous success and is the result of 40 years of careful and honest production, progressive selling methods and public confidence, backed up by sincere and hearty co-operation with the merchants.

If the agency for the sale of S-W Paints and Varnishes is still available in your town, better find out at once how you can secure it and obtain the right to hang this trade-mark in your store.

Mail Order Competition in Stove Trade

Dealer Has Every Advantage in His Favor and if Mail Order Houses are Able to Sell Cheap Stoves in His District it is Because of Neglect in Going After the Trade in a Progressive Manner.

From some sections the complaint is heard that mail order competition is proving a serious factor in the stove and heating trade. Investigation into conditions in a number of places in Ontario leads to the conclusion that the mail order business is to be feared only if the local merchants are lacking in enterprise or are antiquated in their methods. Brisk attention to the trade on the part of the local dealers will effectually dispose of opposition from without.

The mail order houses are selling at a disadvantage in many essential respects. They sell at a low figure but in almost all cases, it is a low grade stove that they offer. If the local dealer talks quality to prospective customers he can make his argument much more effective than the low price, talk of the mail order catalogues, because most people are sensible enough to realize that in buying a stove they are buying something which they will have to use for perhaps a score of years. The folly of a "penny wise, pound foolish" policy in buying a stove is one that can be demonstrated without any difficulty. Local patriotism is another factor that inclines the trade toward the home dealers; most people will undoubtedly give their patronage to a man they know if they are convinced that the terms offered are as good as can be obtained elsewhere. The fact that the merchant will send the stove to the residence of the purchaser and set it up, while the mail order stove is carted at the expense of the buyer and uncrated and put up by himself, is one that weighs heavily. Finally, and as a last resort, the merchant can offer to sell the same variety of stove as the mail order house, at the same price, plus cartage charges.

With all these factors weighing in their favor, stove dealers who find outside competition cutting into their trade. have themselves to blame.

Why Trade is Lost.

Many stores, where stoves are sold, afford effective demonstrations of how not to conduct a business. The stoves are at the back of the store and probably only half discernible to the customers standing in the front. They are crowded in, perhaps dusty and lacking in polish, and covered with cooking utensils and like articles. They are there to be sold, if you ask for them. The dealer never questions you as to the likelihood of your needing a new stove, nor does he go to the pains of displaying his stock to stimulate latent trade possibilities and outbid competitors in arousing interest. Yet he is surprised when the mail order house takes his trade away from him.

A Hardware and Metal representative visited a hardware store in Western Ontario recently where the workshop in the rear was heated by an old and delapidated stove that had quite evidently seen hard usuage and extra long service. This rusty old article was quite apparent from the store. How could that merchant convince a customer that he should discard his old stove and invest in a new one. when he himself openly put up with a heater in the last stages of usefulness?

To sell stoves it is necessary to go to the public. The mail order houses do this with their profusely illustrated circulars. They get trade often because their stock looks so incomparably superior to the lines carried by local dealers. Let the local merchant take a lesson from the opposition and conduct a campaign along similar lines himself and the mail order business in that community will literally melt away.

Send Out Circulars.

It is not an expensive undertaking to send out circulars. As a matter of fact, several large stove manufacturers supply such circulars to their agents free of charge. These booklets are so arranged that the dealer can feature his own name more prominently than that of the manufacturer and, consequently, are quite as effective as literature prepared by the dealer himself with a view solely to local trade.

Strange to say, there is much apathy shown by dealers in availing themselves of this offer to gratuitously advertise their goods. A large number seemingly do not care "to bother about it." They prefer to act on the belief that everything comes to him who waits, including stove customers.

Ousted All Opposition.

A striking instance to the opposite can be cited, however. An agent of this same manufacturing concern in an eastern town was so convinced that advertising pays that the publicity department of the firm could hardly keep him supplied with literature. He sent out a few hundred circulars and asked for more. The firm supplied him with enamel signs to be placed in points of vantage throughout the district. He kept asking for more until they questioned his judgment and then he bought some at his own expense. Not content with the advertising placed in the local paper by the manufacturers, he inserted an ad. of his own and had it placed next that of the makers.

This insatiate advocate of publicity has practically cornered the stove trade of his town and district. Not only has he "frozen out" mail order business but competing merchants are getting less and less of the trade.

Keep a Close Watch.

Dealers in stoves and heating goods should keep a close watch on the trade. A Berlin merchant found this policy a wise one during the past week. He heard of a party who was contemplating buying from a mail order house and made it a point to see him. The man had been attracted by an artistic illustration of a cheap grade stove and had just about made up his mind to buy. The dealer gave him a talk on quality, hinted at the trouble he would have in putting the stove up, played on his sense of loyalty to home industries and finally sold him a better grade of stove.

Another instance can be cited from Water'oo where a party had bought a stove on mail order and had been disappointed in it. A Waterloo dealer heard of the case, saw the man and found that the stove was not giving satisfaction through a defect. It was returned and the dealer sold one of his own stoves to replace it.

Make the Stock Attractive.

The stoves illustrated in catalogues look very striking and attractive; make the stock in your store look equally so. Keep the stoves brightly burnished and in good condition. Display them at the front of the store and have at least one window display of heating goods. In this manner only can a full share of the trade be secured.

To combat mail order buying the stove man needs to adopt progressive methods and to keep close watch on his district. If he is alive to the possibilities of the trade and his own advantagious position, he will not find outside competition a dangerous factor. If, on the other hand, he neglects his opportunities the mail order houses will inevitably undermine his stove connection.

STOVE TRADE BRISK.

Peterboro, Nov. 13.—F. R. J. Macpherson & Co., say that the demand for ranges this year has been greater than ever in their history. Already they have sold over 50 Supreme steel ranges and this is as much as they sold last year. They expect the sales this season to total to 75 or 80 ranges, not counting cheaper lines of stoves and heaters.

The Best Stove & Hardware Company, also report an excellent season, October being the banner month in their history.

In both cases most of the sales were made to mechanics in the city rather than farmers from the surrounding country. And in most cases cash was paid in full, very few orders being on time payments. This indicates a good state of affairs in this city.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

No. 35

A WELL POSTED STAFF.

It is essential that the clerks should be as well posted in all branches of the paint department as the merchant himself. A customer who sees a salesman running round the store to find someone who will tell him if such and such a color is kept in stock, or can be obtained from the makers; to solve a doubt as to the price of a tin; to answer some other little question asked by the purchaser regarding the best brush or the right way of applying paint, is apt to lose confidence in the store as the best place to buy paints. The thought flashes through his mind that a very great paint business cannot be done in this place, or else the clerk would be in possession of this essential information. He becomes somewhat regretful over the buying of the paint, and he is in just that state of mind that if anything goes wrong with the painting he at once lays the blame on the quality of the paint rather than upon his poor brush work. There are so many ways in which good quality paint can be spoiled that a merchant cannot afford to leave the slightest loophole for misgivings on the part of the purchaser.

If the dealer were always certain that any complaint would be brought back to him directly so that he could investigate the trouble and see where the fault lies there would be less need of establishing the utmost confidence at first. But complaints are seldom made to him. The customer does not want to go to the trouble of calling upon the merchant. He finds it easier to condemn the paint to all his friends, and describe the merchant as a robber. It is therefore wise for the merchant to make himself as secure as he can by establishing as much confidence as it is possible to do while the sale is being made so that not only is the chance of a poor brush work rendered more remote, but the customer feels, on surveying a poor job, that after all it may not be the fault of the paint.

The value of a salesman taking a keen interest in the purchase of a customer and endeavoring to post the buyer up in all the pointers that make painting successful cannot be overestimated. If the clerk likes to take the trouble he can find out very easily if the purchaser knows anything about painting, without causing umbrage to be taken. If the purchaser is a novice then for the sake of the paint the clerk should proceed to give him a few pointers. Apart from the safeguarding of the paint this interest is appreciated by the customer. He feels that the salesman is going out of his way to give satisfaction, and that it would be only fair to give regular custom where so much trouble is taken. Cases have been known where a salesman has sold a

THE MONTREAL ROLLING MILLS CO.

MONTREAL

customer a brush knowing that it was not suited for the job, and yet because the customer asked for it handed it out just like a slot machine. The customer probably went home, found out that he had bought the wrong brush, and blamed the store. When a salesman sees that the wrong brush is being bought he should point out that a mistake was being made. He should do it, however, in such a way that the customer is pleased at being told so.

Paint selling to be successful requires a familiarity with the product, its composition, and method of manufacture, and also a knowledge of the best color to suit any peculiar circumstances that might attend the painting. The knowledge of the best kind of brush to use, and sound advice as to applying paint to its best advantage are selling points that the merchant should see are possessed by all the clerks. The confidence produced by dealing with a store that shows a strong familiarity all the way round with paints and the correct way of using them, is of the utmost value to a merchant.

PAINT AND OIL MARKETS

MONTREAL.

November 18.—There is very little change to the paint and oil markets this week. A meeting of the white lead grinders was held, but nothing was decided as to prices and proceedings were adjourned for a week. Common grades of putty was advanced for ordinary lots, but good quality stuff was not affected. Turpentine and linseed are still very bullish, but the market is unchanged. Some linseed holders have withdrawn from the market so far as they can, and are only selling under pressure.

Trade generally has been very good, and there has been a little flurry to get shipments by the last boats. Painting in the open has been continued right along, and the fall trade has shown itself to be exceptionally good. Stocks generally are in fair condition, and specialties for indoor work are feeling a good movement. Varnish in bulk is selling well.

Turpentine.—Turpentine is about the same. The recent advances have not checked the demand, and there is a fair trade doing with some stocking up in anticipation of further advances. Reports from the turpentine area point to a continuance of the bullish feeling. We quote $1.02 to $1.05.

Linseed Oil.—There is very little change in the linseed oil situation. Many holders are right out of the market, and will only sell to oblige a good customer. The tension is very keen and naturally with the high prices there is very cautious buying. But linseed has to be used, and even as it is the demand is quite heavy enough for the market as present situated. We continue to quote $1.08 to $1.10 for raw and $1.11 to $1.13 for boiled.

White Lead.—An advance was generally expected by the trade, but at a meeting of grinders this week nothing was decided and the matter was left over until next week. There has been a little flurry in trade owing to the nearing close of navigation, and some good round lots have gone out. The market is very firm as is only natural, and we quote $6 to $6.50 according to brand.

Varnishes.—There is a good demand for varnish, the larger users buying with some degree of confidence. Small tins for household use are also in fair demand. Golden ochres, orange and venetian reds are in fair demand at firm prices.

Putty.—The market is very firm for putty as is only natural. Cheaper grades have been advanced 25c, with concessions for carload lots, but the purer quality has not been altered, and we quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Toronto, Nov. 18. — That turpentine will advance in price in the near future is the prediction made by local jobbers. An advance in the price made in the south is given as the reason for the impending change. It is also certain that putty will become dearer next week, owing to the freight rates going up.

In other respects the paint and oil market remains unchanged. While the demand in some lines is not very brisk, the trade is satisfactory, and some hopes are held out for an improvement. Dealers have been holding back their orders for linseed oil and turpentine, the reason being the higher price asked. Some jobbers think that those who have been thus holding off in the hope of better prices, will soon be forced to stock up. Others are not inclined to take this view, imputing the slackness in the demand of late to the use of substitutes.

Linseed Oil.—There are no hopes entertained now of a betterment of the supply, and prices are holding firm. The demand is only moderate. Quotations this week remain stationary at $1.10 for raw and $1.13 for boiled. Raw in single barrels brings $1.12, and boiled in like quantity, $1.15. The tendency is for firmer prices, but no immediate changes are predicted.

Turpentine.—A further advance has been made in the south—the base of supply—and it is now costing more than 97 cents to lay turpentine down in Toronto. The local quotation remains at $1.05, but jobbers predict an advance before long of 1 cent, possibly more. This will undoubtedly result unless the primary market shows an easier tendency. Trading is not brisk, although in some quarters a quickening in demand is expected. It is felt by some jobbers that the long slackness in the demand has been due to dealers putting in orders for just sufficient to keep them going until better prices are declared. Basing their opinion on this assumption, they anticipate bigger orders now that the hope of lower quotations has practically

GOLD MEDAL

Inside and Outside Varnish

is a highly popular Brandram-Henderson specialty.

It is used for:

Front doors and outer vestibules.

Porches and galleries.

Bathroom woodwork.

It is smooth-flowing and easily applied, gives a handsome, durable finish, and resists the effects of variable temperature and moisture. It never fails to please.

The Hand of Time

Is either building up or it is tearing down your business. There is no standing still—you are going ahead or you are going backward.

"*The Hand of Time*" is the great detective in the paint business. If the paint you are selling is not made right, of the right materials, "*the hand of time*" will reveal the fact. If the sun fades it—if the wind checks it—if the hot, dry weather makes it chalk off—"*the hand of time*" will put the penalty on you, and you will lose business—the customers will not come back.

But if you are selling

Martin-Senour Paint

100% Pure

"*The hand of time*" will help you. It will show your customer the splendid quality of the paint you sell and your customers will tell their friends about you and your long-lasting paint.

Start "*the hand of time*" to working for you—get the Agency for Martin-Senour paints and your business will grow better as time goes on.

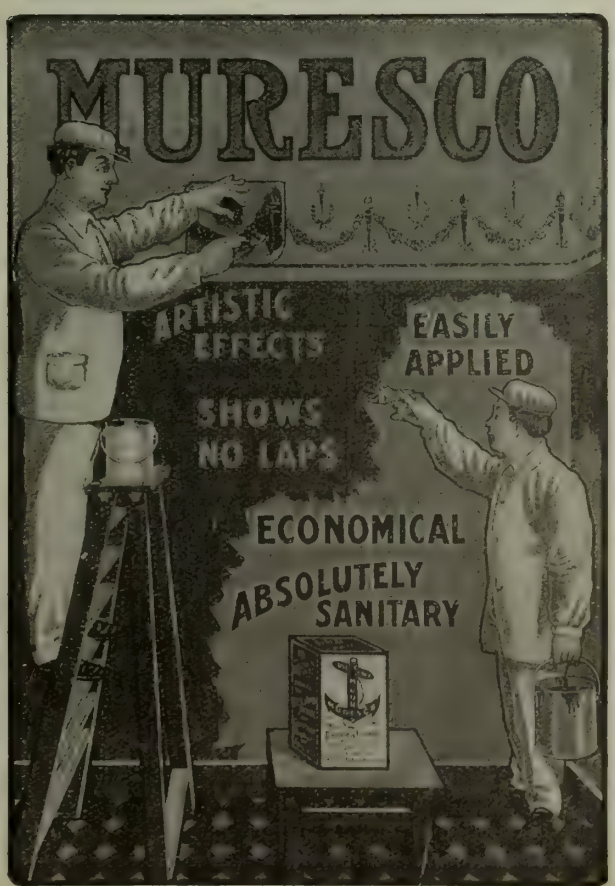
Cater for the Critical Decorator

The painter who knows what a good WALL FINISH is, as well as the inexperienced consumer, are both loud in their praises of



MURESCO

THE BEST WALL FINISH

Exhaustive experiments have proved that, pound for pound.

Benjamin Moore & Co.

LIMITED

MURESCO

not only makes more material, but works more easily, covers better, goes farther, and produces more uniform, clear and beautiful effects than any other WALL FINISH in use.

"Muresco" will establish a foundation for the sale of your other lines, and yields a generous profit.

See to your stocks. There's no line "quite as good."

Send for color card and prices.

West Toronto

New York Chicago

Cleveland

vanished. Others believe, however, that the use of substitutes accounts for the small demand for turpentine.

Wood Turpentine.—More is coming on the local market. The prevailing quotation is 80c per gallon, or 85c in tin cans.

White Lead.—There is an active demand for white lead. Quotations range from $5.90 to $6, "Government Standard" remaining at $5.65. Little is heard locally now of the promised advance, and it seems to have been indefinitely postponed.

Putty.—An increase in putty is generally expected next week. The great bulk of the putty supply comes from Montreal, and the advance in freight rates is bound to affect the prices of putty. Standard putty is quoted at $2.20, bulk in casks; in 100 lb. drums, $2.50; in 25 lb. drums, $2.60; bladder in barrels, $2.70. Quotations for pure putty are: bulk in casks, $2.50; in 100 lb. drums, $2.80; in 25 lb. drums, $2.90; bladder in barrels, $3.00.

Rosin.—The rosin market shows no change this week. The demand is good and the price has not changed. "G" rosin is quoted at $3.25 per hundred lbs.

Petroleum. — No price changes have been made in petroleum lines. Canadian prime white coal oil sells at 13c, American water white at 14½c, Pratt's Astral at 17c.

THE PAINT DEPARTMENT.

Writing in Iron-Age Hardware, "L. R. G." says: For the paint department to be a real success it is necessary for the proprietor or manager of the store to consider it more than simply an unimportant side line, which can be banished into some dark corner in an out-of-the-way place, and only given casual attention. If you are going to have a paint department, have a real department, and see that some one individual is responsible for it and has the opportunity to give it attention, study its needs and develop it as it can be developed. If you have not a paint department in your store now, or if you have an unsuccessful or indifferent paint department, it is high time for you to think the situation over pretty seriously. The first consideration for a success in this particular line is to see that the quality of the goods that you handle is right. Don't make price the first consideration, but decide above all to have the very best quality that you can buy, and this decision will help you start your department on the right basis. You will find that the largest and strongest manufacturers in the country are the concerns that are manufacturing the best paints, and while they may charge you a little bit more for their products, the fact that they have grown and developed to the size that they are, proves their theory of putting forward quality first is the right one to work on. When you sell a good product to a customer it means that it is going to give him satisfaction, and he will come back to you again and again for further purchases of the same goods.

If you are already handling a line of paint and varnish products that are not up to the highest standard, make plans at once to clear out the line and replace it as soon as you can with the best that you can find on the market. If your stock is the best, be sure that you fix your retail price so as to allow yourself a fair margin. There is absolutely no reason for selling good prepared paint at too close a price. You are entitled to a fair profit on this line as well as on any other. In retailing a good paint at practically cost, you simply bring it into unfair competition with lower grades, as the customers infer because it is about the same price it is about the same quality. Ask a price to allow you the fair margin of profit to which you are entitled, and then go out after business vigorously, and you will have no reason to regret your policy.

Once you have decided to have a paint department, be sure and give it a proper prominence in your store. Don't shove it away in a corner, but clear a space in your shelving well up to the front, and allow sufficient room to take in the stock that you are carrying. The high grade prepared paints and the various shelf lines of paint and varnish specialties that go with them, as put up by the leading manufacturers to-day, present a very attractive stock, and there is no need to have them hidden away in the back of your store. Of course, you can carry on successfully a paint department and not have your paint stock very much in evidence, but you can be more successful if you give it a fair show and get it up to the front where people can see it and where it will attract their attention.

I know a good many hardware stores where they handle paints, or are supposed to handle them, but you couldn't discover it without the aid of a detective. These hardwaremen ought to either make up their minds to get into the paint business seriously, or else cut it out altogether. Put up the show cards, panel racks and various display cards that are furnished you by the manufacturer, in places where they are easily accessible to the possible customer, and during the painting season in the early fall, and in the spring, trim an attractive paint window every two or three weeks.

Then make your store an attractive paints shop where the housewife can come and buy her varnish stain, her family paint, her floor paint, her aluminum paint, stovepipe enamel, or a dozen and one other little paint specialties that are very profitable to the dealer, and in the total go to make up a very nice year's business. A little of your newspaper advertising devoted to the fact that you make a speciality in taking care of the housewife's paint and varnish needs will help along, and the right kind of a reception when she comes will clinch the business.

STAR HACK SAW BLADES

Apparently no one questions the superiority of Star Hack Saw Blades and at our present figures there is absolutely no room to question the price.

They are equally good in hand frames or power machines. When used in a machine the feed should be adjusted to suit the stock being cut. The softer the stock the lighter the feed. Such treatment will prevent clogging of the teeth. Open your eyes wide and look at this list of prices:

6	7	8	9	10	11	12	inch
30	32	34	38	42	46	52	cents per dozen.

Notwithstanding the great reduction in prices, the quality of Star Blades has been improved.

"Brantford" "Roofing"

Is made in three styles—ASPHALT, RUBBER and CRYSTAL. There is a good margin of profit on each.

Instead of buying three different styles of roofing from three different manufacturers, and opening three separate accounts, you can buy three different styles from us, and open one account—a more satisfactory arrangement for you.

The Brantford Line is complete. With Brantford Asphalt, Rubber and Crystal you can supply every high-grade roofing requirement.

Brantford Asphalt has the popular silicia sand finish. Brantford Rubber is a smooth-surface roofing of exceptional quality. Both Brantford Asphalt and Rubber are made in three weights. Compare our No. 3 weight with three ply roofings and see how much thicker ours is.

Brantford Crystal comes in heavy weight only. It has a real mineral surface of rock crystals. It requires no painting.

Each of our three styles has a pure wool felt foundation, and a 99 per cent. pure Asphalt saturation. We believe they are the highest-grade ready roofngs on the market. They will build business for you. And there's a good margin of profit for you in each roll. Write us to send you samples and prices immediately.

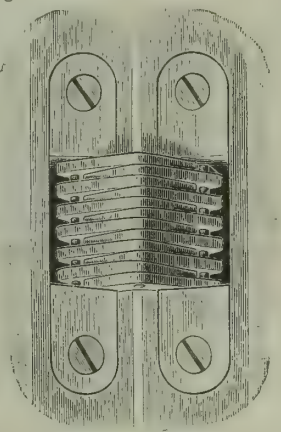
Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto

PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.



COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years. The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge

Invisible Hinge as it appears when door is open.

No. 101, suitable for wood ½" to ¾" thick (furniture work.) Will carry a door 3' x 18".
No. 102, same as above, but has square corners.
No. 104, wood must be ¾". Will carry a door 5' x 2' x ⅞.
No. 108, wood must be 7". Will carry a door 6' x 30" x 1⅜.
No. 112, wood must be 1⅛" to 1½". Will carry a door 6' x 2' 6" x 1½".
No. 116, wood must be 1⅝" to 2½".

STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

Niagara Falls, Ont.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

Merrick-Anderson Co., Winnipeg, Agents for Manitoba, Saskatchewan and Alberta. Geo. D. Horsman, 838 Granville St., Vancouver, Agent for British Columbia.

"IMPERIAL" ANTI-FREEZING WINDMILL
FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary Always fitted with 1¼ flanges unless other size is specified.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Amatite ROOFING

It has a rough surface of *real mineral matter* on the weather side. It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a coat of paint.

To paint Amatite would be a waste of time and trouble. Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof*.

No paint is good enough to make a durable roof; a thick layer of pitch, faced with a real mineral surface, is far better—*and that means Amatite.*

Further information will be sent on request to nearest office.

Dealers Have Almost Doubled Their Sales of Ross Sporting Rifles

Illustrated Catalogue upon request

A Rifle must make good or sales will stop.

No other new article is more generally or intelligently discussed than a new rifle.

The Ross Sporting Rifle has met the keenest criticism, stood every test, and made good.

Dealers everywhere appreciate the advantage of handling a rifle that can be procured quickly, that can be depended upon in every emergency, that gives general satisfaction and is in ever increasing demand. That is the Ross Rifle.

$25.00 and upwards.

make sensible and very acceptable gifts for anyone who ever uses tools of any kind. They make a happy change from the necktie and suspender habit. They last for years, and the giver is remembered every time they are used.

We are advertising them as Christmas Gifts in the "Saturday Evening Post," "Popular Mechanics," "American Carpenter and Builder," "Electrician and Mechanic," and other magazines of this class, directing readers to you for the tools. This is sure to create a larger demand. Stock them now and be ready to hand them out when the trade comes. Get your jobber onto the job. The Nos. 60, 15, 100, 65, 44 and 35 make especially good sellers. Display them in your window as new ideas for Christmas and you will be sure to increase your holiday trade.

DISSTON FILES and RASPS Have a Reputation.

They are dependable goods —Will stand up under severe usage— Have proven their worth for many years.

ALL SHAPES and ALL SIZES

FOR all TRADES, machinists, carpenters, sawyers, millers, etc.

Used When Best Results are Desired

Take Notice—

Since January 1st, 1910, our sales of Disston's Files and Rasps have increased 70% over the whole of 1909. To the average Canadian Hardware Dealer no further argument is necessary—to others we make the statement that there are no better Files made. You can buy Disston's Files from us for as low a price as you pay for inferior brands elsewhere. Most dealers are doing this, which accounts for the large increase in our sales of Disston Files and Rasps.

We will accept orders at present prices for immediate shipment up to the 1st of May next.

For Present Profits and Future Trade

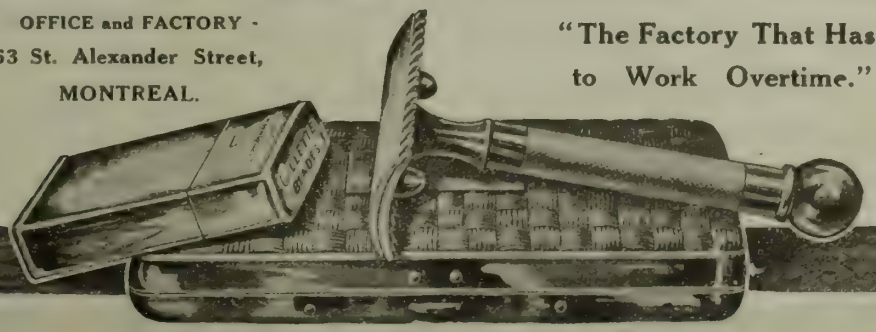
Push the GILLETTE for Christmas

The GILLETTE is *the* Christmas specialty nowadays.

As a Christmas present it has *so many advantages!* It is exactly suited to the hardest member of the family to buy for, the man—exactly suited to the average purse—downright handsome—attractive to the one who is hunting a Christmas present, and to the man who receives it. It is useful every day in the year—a time and money saver. It is a present that satisfies, and more. It goes beyond a man's expectations.

Add to this the fact that the GILLETTE Safety Razor is the best advertised five-dollar specialty on the market to-day—an article that is known everywhere as the best of its kind—an article whose price is protected—and you have a *real seller,* a specialty behind which it will pay you to put lots of steam for the sake of the *immediate profits.*

Add again the fact that each man who receives a GILLETTE will not only be pleased with it, but whether he ever entered your store before or not, *he will come to you regularly for new blades.* Then you have a Christmas specialty which it will pay you to push for the sake of *future trade* in all your lines, as well as present GILLETTE profits.



Over a quarter of a million in net profits is coming to GILLETTE retailers this Christmas season. Your share will depend on the amount of push you put behind the GILLETTE.

Is your GILLETTE stock complete? If not, order quick, or you will be too late for Christmas trade.

The Gillette Safety Razor Co. of Canada, Limited

OFFICE and FACTORY -
63 St. Alexander Street,
MONTREAL.

"The Factory That Has to Work Overtime."

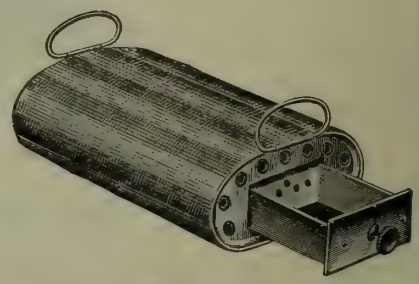
Why handle cheaply made cast end heaters?

Why, when you can buy heaters with no castings in their construction at all—heaters made so they won't bend or break—heaters that please your customers and help you sell more goods

Satisfied Customers are your best asset

You make that kind of customers when you sell them the celebrated

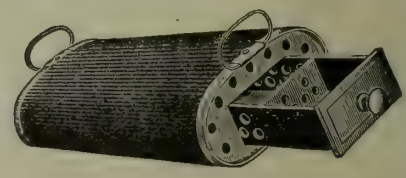
CLARK HEATERS



and they cost you no more than the heaters of inferior quality with cast ends.

Furthermore, Clark heaters are the only heaters that are now being advertised to your customers. They are the only heaters that have ever been advertised to users in Canada, and every advertisement asks the reader to go to his dealer for the heater.

Do not be misled. The heaters that sell best in Canada and every other country where heaters are used, are the Clark Heaters—they are made better, please better and offer as good or better profit. Almost every jobbing house of note in Canada handles the Clark Heaters—They must be best and we know you will find them so.



Insist on Clark Heaters. It pays.

Some Good Sellers from the Clark Line

No. 5B Clark Heater

No. 5B Heater is light and handy, yet very enduring and sightly. Is 12 inches long and weighs 4 pounds. Heats quickly, furnishing a mild and comfortable temperature. This heater is used quite extensively by farmers, mail carriers and milkmen. Covered with fine Brussels carpet.

No. 3D Clark Heater

Our No. 3D Heater is one of the most popular sellers, being very strong and durable. It is 14 inches long and weighs 7 pounds. Has fine asbestos lining and is covered with Brussels carpet; has braid binding. Easily cleaned by brushing. Ends are of triple strength white metal.

No. 7D, showing side and end ventilators.

No. 7D Clark Heater

No. 7D Heater, a well known and popular style, having flat, slanting top, and having ventilators in both ends and at the side with which it can be made to throw out as much or as little heat as may be desired. Is 14 inches long, and weighs 9 pounds. Has cold drawn steel ends, heavily nickel plated and is covered with superior Brussels carpet.

CHICAGO FLEXIBLE SHAFT CO., 250 Ontario Street, CHICAGO

Help Your Customer Solve the Christmas Gift Problem

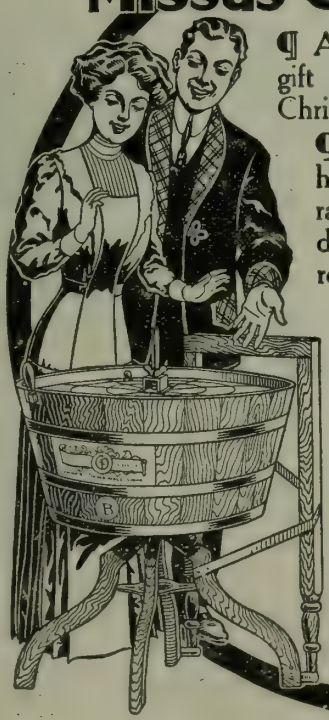
By Suggesting a Cummer-Dowswell Wash-day Labor Saver

A gift that will last all the year

There are more costly gifts, but none that will afford a woman more satisfaction

There is nothing more acceptable

Below is a sample of advertising now running in newspapers and magazines from coast to coast. Are you getting your share of the benefit of it? Combined with a little featuring on your part it will bring big results.



Hand Washing Machines

Power Washing Machines

including the Famous New Century

Both Hand and Power

"De right ting for de Missus Christmas Gift"

¶ A woman appreciates a sensible gift from her husband or son at Christmas.

¶ Something that will relieve her of the back-breaking and nerve-racking worries of ordinary household duties — something that shows her you really care—

A New Century Washer

for instance. It sweetens a woman's disposition. It enables her to get cheaper help and keep them longer. It saves the clothes and thoroughly cleanses them, because it forces the water through the fabrics. It prevents disease entering your home from public laundries.

¶ Write for "Aunt Salina's Wash Day Philosophy."

A lot of good advertising stuff can be had for the asking

The "Barnet" Refrigerator

All dealers who are interested in a high-class refrigerator should look into the merits of the "Barnet." A "Barnet" Refrigerator will stand a test which we believe no other made will stand, and is fully guaranteed by the makers to give perfect satisfaction, and do all we claim for it.

The "Barnet" is of the syphon system, and the very perfect circulation and ventilation of cold, dry air, puts it in a class by itself. We believe no other refrigerator made will stand such a test as a "Barnet" may be put to. It is always Dry, Pure and Sweet. No odor or taint. Read what Dr. Bruce Smith, of Toronto, Inspector of Hospitals for Ontario, has to say about it:

The Report of Experts

ON THE

"BARNET" REFRIGERATOR

INSPECTOR OF HOSPITALS AND CHARITIES,
PARLIAMENT BUILDINGS, TORONTO.

Having for some time been impressed with the great desirability of having a refrigerator, which, on account of proper ventilation and at the same time economical in the use of ice, I might be able to commend, I willingly consented to act with Mr. S. A. Armstrong, Assistant Provincial Secretary of Ontario, for the purpose of judging the merits of the "Barnet" Refrigerator.

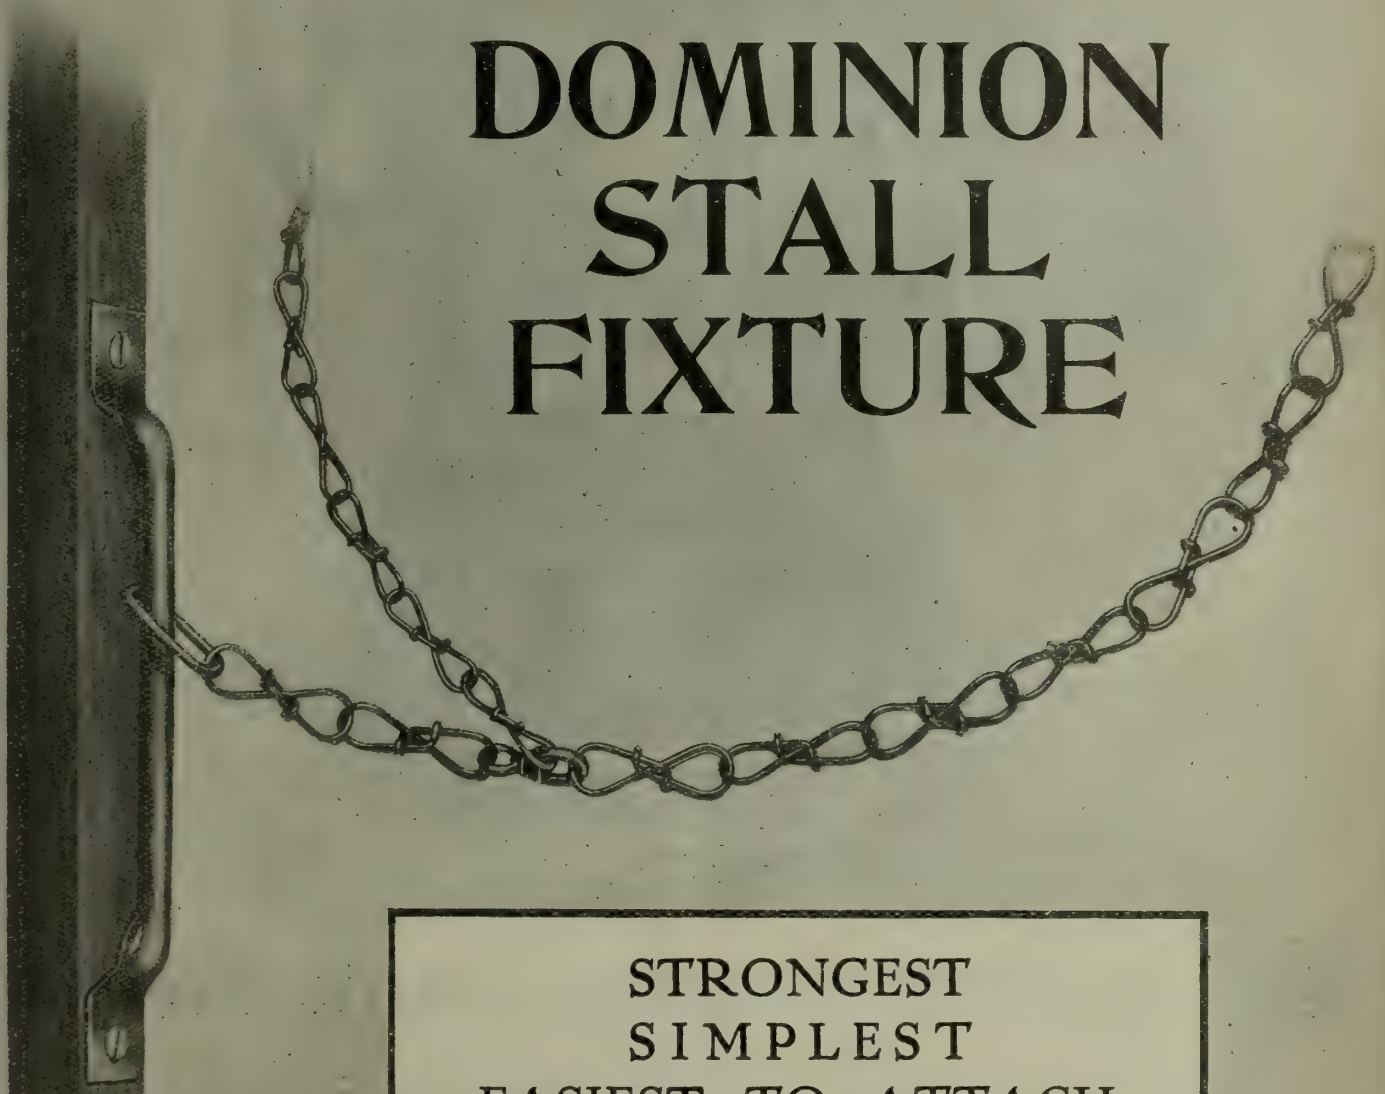
We were first shown the empty refrigerators at the National Exhibition, Toronto, and allowed to designate any of our selection for the test. One was chosen and, after having been supplied with ice, the compartments were well filled with a quantity of food supplies, including milk (not pasteurized), fish, meat, onions, butter, cheese, apples, tomatoes, celery, oranges, lemons, bananas, matches and salt. The refrigerator was then locked and sealed, so that no one could open the door. The seal was broken 96 hours afterwards and the contents were found in a surprising condition. The milk was as sweet as when purchased from the vendor four days before and entirely free from any taint. The onions and other vegetables and fruit had not imparted the slightest odor to anything. The salt and matches were as dry as when placed in the refrigerator.

A more rigid test of ventilation could not be asked for, and the conditions in which the food supplies were found quite justify the statement that the "Barnet" Refrigerator is constructed on a hygienic system peculiarly its own.

R. W. BRUCE SMITH.

I desire to corroborate the above statement, having been present and noted the conditions mentioned.

S. A. ARMSTRONG.



We have many other reports similar to this, and all by very responsible parties.

The "Barnet" Refrigerator is beautifully finished in Birch, Ash or Oak. Lining of Snow White Baked Enamel, always clean and sanitary. Write us for catalogue and prices. We make any special size to order, also Cold Storages, any size.

Ceilings and Walls

It means Dollars and Cents to you

Tell your fellow-merchants of the money-saving, sanitary and durable features of "Metallic." It reduces the insurance, cuts out the ordinary plaster ceiling repair bills, and adds greatly to the appearance of a store. "Metallic" lends readily to any style of decoration desired, and, furthermore, lasts a lifetime. The first cost is all the cost there is to "Metallic" Ceilings and Walls.

If you haven't a Ceiling and Wall illustrated catalogue, write for one to-day. Send us the names of your prospects. We will assist you by mailing them full information and illustrated booklet—"Interior Decoration in Metal." Send measurements of store for complete estimate of cost.

Manufacturers of "Eastlake" Metallic Shingles—Metallic Sidings – Cornices—Lath—Skylights—Ventilators—Finials—Conductor Pipe—Eavetrough – Fireproof Windows and Doors, etc.

The Metallic Roofing Co. Limited

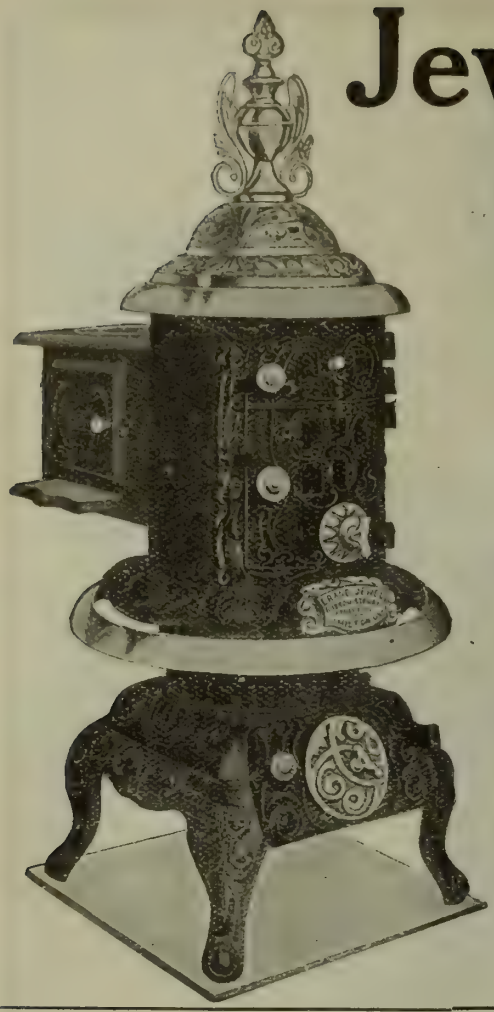
The ART BANNER

This is an entirely new cast iron range, and the design is the height of stove architecture, and this combined with smooth castings, perfect mounting and finishing, place it in a class superior to any on the market.

In building this range every detail has been taken into consideration, so as to make it the best.

THE FIRE BOX is proportioned to the work which is required to make it an economical and perfect cooking and baking range.

THE GRATE—Exceptionally heavy and removable.



THE RESERVOIR—Is larger than is usually supplied in a range of this size.

THE RESERVOIR DAMPER—An entirely new one.

REMOVABLE NICKELED BANDS—All nickeled parts are removable.

THE DOWN DRAFT FURNACE COMPANY, LIMITED

GALT - ONTARIO - CANADA

Jewel Stoves and Ranges

Grand Jewel Heaters

Made in three sizes Nos. 13, 15 and 17. No. 15 only made WITH OVEN. All sizes supplied with Feed Pots. Nickel Plated side wings can be supplied with each size at a small additional cost. These stoves are fitted with top swinging cover and have Pot Hole. They are nicely nickeled and are excellent heaters.

Size of oven on No. 15—10x12x8 inches. The great variety of both cooking and heating stoves that we manufacture enables us to satisfy all demands.

Write for catalogue and prices.

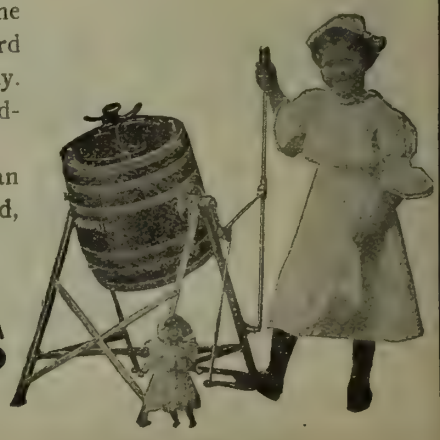
EVERY TOOL GUARANTEED

With Maxwell Washing Machines and Churns

You Can Suit Everybody



There is such a variety in the MAXWELL line of Washing Machines that no matter what may be a woman's likes or prejudices, you can show her—and sell her—just the machine she wants.

The "PURITAN" works with the turning of a balance-wheel—the "CHAMPION" with the to-and-fro motion of a lever—the "PURITAN MOTOR WASHER" with power from the kitchen water tap. All are of the dolly-block type.

Then there's the "BLUE BELLE," in which you turn the tub in one direction, while the rubbing board inside revolves the opposite way. Each of these machines is the leader in its own type.

The "FAVORITE" Churn needs but little recommendation to Canadian hardwaremen. Its sales, greater than those of all competitors combined, prove its merit.

"We will never be buried with the unknown dead---we ADVERTISE. There's the whole thing in a nutshell ---we ADVERTISE; and, therefore, we CANNOT be unknown."

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Fittings, Toronto Central Post Office," will be received at this office until 4.00 P.M., on Monday, December 12, 1910, for the work mentioned.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the office of Mr. Thos. A. Hastings, Clerk of Works, Postal Station "F," Toronto.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, November 18, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

ONE-THIRD CASH, balance arranged, will buy one of best businesses in British Columbia. Stock $35,000 goodwill $1000. Corner location, busiest street. Owner has made stake and intends retiring. Excellent chance to locate in coast city with big future. For particulars write, W. W., HARDWARE AND METAL, Toronto (46)

FOR SALE—$13,500 will buy a good hardware and furniture business on the Goose Lake line C.N. R., Saskatchewan, including stock, store and warehouse on corner lot. Residence and lot. Stock carried $8,000 Terms half cash, balance arranged. Do not answer unless you mean business. Address reply to Box 1050, HARDWARE AND METAL, Toronto. (49)

ARTICLES FOR SALE

FOR SALE—One set tinsmith's tools and machines. S. B. McCLUNG & CO., Trenton, Ont. (47tf)

COMMISSION LINES WANTED

WANTED by responsible, energetic firm about to open an agency in Calgary, lines on commission, or will buy outright if necessary. Address Room 37, Herald Block, Calgary, Alberta. (55)

POSITIONS WANTED

EXPERIENCED hardware clerk wants position. A1 references. Apply Box 1052, HARDWARE AND METAL, Toronto. (48)

HARDWARE MAN, 4 years' experience managing retail business, desires position in Toronto or town on G and Trunk east. References. Box 1047, HARDWARE AND METAL, Toronto. (48)

SITUATIONS VACANT

WANTED—Good hardware clerk. Apply, stating age, experience and salary, to The Geo. Taylor Hardware Co., Cobalt, Ont. (49)

WANTED—Hardware clerk. Must be good salesman. State experience, present salary and references in first letter. Will treat confidential. F. E. HENDERSHOT, Mount Forest, Ont. (48)

WANTED—Hardware clerk. Young man with some knowledge of hardware. Must be temperate and not afraid of work. Good chances for advancement. Western New Ontario. Give full information about self. Apply Box 1051, HARDWARE AND METAL, Toronto. (48)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

A BOOK-KEEPING STAFF IN ITSELF—DOING the work with machine-precision and accuracy, the National Cash Register. Write for demonstration literature. The National Cash Register Co., 285 Yonge St., Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson-Crain, Ltd., Toronto and Ottawa. (tf)

MISCELLANEOUS

A BOON to every Hardwareman. A perfectly reliable fountain pen is to be found in the Beaumel "Rival" Pen. Easy to fill, non-leakable, and writes with exceptional smoothness. Gold nibs of thicknesses to suit every style of handwriting. Guaranteed in every respect. Sold by all stationers. A. R. MacDougall & Co., Canadian Agents, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited. Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE—By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 259½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

ERRORS AVOIDED, LABOR SAVED—Using the Shouperior Autographic Register. Three copies issued at one writing. 1st, Invoice; 2nd, Delivery Ticket; 3rd, Charge Sheet, perforated for filing. No handling of carbons. High grade printing and neat invoices. Make full inquiry. Autographic Register Co., 191-193-195 Dorchester St. E., Montreal. (tf)

EVERY retail merchant should write for a copy of our finely illustrated catalogue of rebuilt typewriters. It shows the best typewriter bargains ever offered in Canada. Moreover, it contains facts on retail advertising intensely interesting to retail merchants. It is free. The Monarch Typewriter Co., Ltd., 98 King St. West, Toronto; also Montreal, Hamilton, London, Ottawa.

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

GET THE BUSINESS; INCREASE SALES—Use Multigraph Typewritten Letters. Three thousand per hour produced on Multigraph. The Multigraph does every form of printing. Saves 25 p.c. to 75 p.c. of printing bills. Multigraph Office Forms, Letterheads, Circular Letters. Write us. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

IF you have been afflicted with one of those Fountain Pens that won't write when you want it to, or leaks when you don't want it to, give it to one of your poor relations and buy a Moore Non-Leakable Fountain Pen and you will be happy. Consult your stationer. W. J. Gage & Company, Toronto, Sole Agents for Canada.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices. Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

SCOTCH PLAID STATIONERY is the latest creation for business and society correspondence. Paper and envelopes present a finished linen surface, most agreeable to the pen touch. Leading stationers have it. Write for samples. The Copp, Clark Co., Ltd., Toronto. (tf)

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

THE METAL REQUIRED in a modern concrete building. Special facilities enable us to produce at minimum cost Concrete Reinforcements, Fenestra Steel Sash, Automatic Fire Shutters and Steelcrete Metal Lath. Complete stock; quick delivery. Before deciding write for catalogue and prices. Expanded Metal and Fireproofing Co., Ltd., Fraser Ave., Toronto.

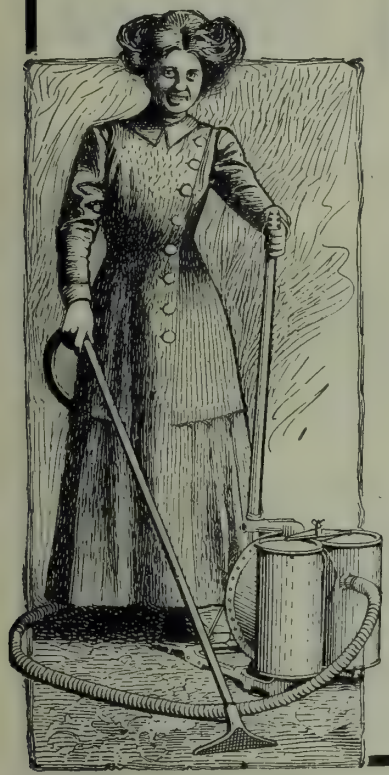
WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

PARTNER WANTED

PARTNER WANTED—With $3,000 cash, in hardware business. Have an up-to-date and well assorted stock of hardware and do all plumbing work in good live town of 900 population. Apply immediately to Box 1049, HARDWARE AND METAL, Toronto. (51)

PERIODICAL DEPT.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading, BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.



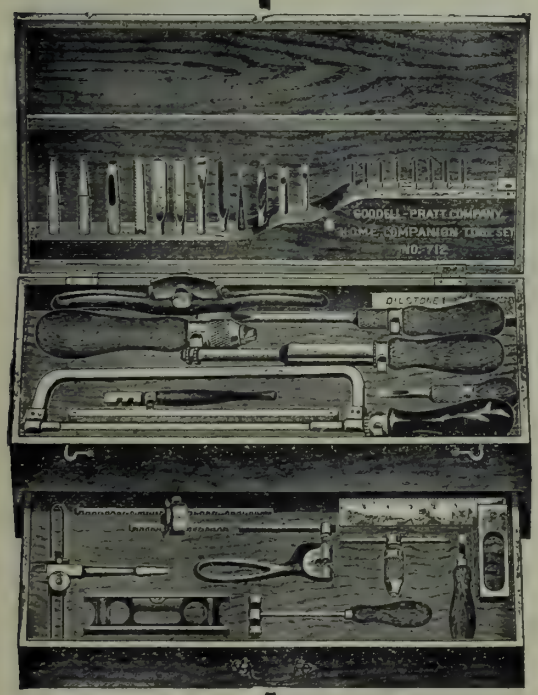
TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS AND PAPER HANGERS—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paper hanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS—Forty subjects of the greatest interest and value to hardware merchants are discussed, including Rules and Regulations for the Store, Good Buying, Stock Taking, Collecting Accounts, Changing a Credit into a Cash Business, Starting in Business, Profit Figuring System. Price $1.00, postpaid. The MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

TINSMITHS' HELPER AND PATTERN BOOK, by H. K. Vosburgh.—A useful handbook for tinners and sheet metal workers. It treats of simpler problems in pattern cutting occurring daily in shops. Contents include Diagrams and Patterns Epitome of Mensuration, Tables, Rules and Recipes Price $1.00, postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Avenue, Toronto.

Suggest this for a Xmas Gift



Every fairly-well-to-do householder in your locality is a "red hot" prospect for this

"Automatic" Hand-Power Vacuum Cleaner

and now is the right time to suggest to every householder that this labor-saving machine would be the best of Christmas Gifts for his wife. This "Automatic" is the one thoroughly practical hand power machine. It is easier to pump, easier to carry, easier to empty and has far more powerful suction than any other hand-power machine on account of our exclusive double tank system. Slip joints used on all connections, making them instantly detachable and interchangeable. It is the most durable machine, made entirely of malleable iron and steel, and the only hand-power machine that "Blows" as well as "Sucks." Guaranteed for one year against all defects of manufacture. Will last a lifetime with ordinary wear and tear.

Attractive Displays Can be Made of Holiday Goods

Evolution has Changed the Class of Trade Done in Hardware Stores During the Christmas Season—Some Profitable Gift Lines to Handle — Buying Should be Done Early—The Interior Should be Decorated as Well as the Window — Examples of Holiday Windows and Advertisements.

The Christmas season is the harvest time for merchants generally and every season more of the holiday grist comes to the hardware mill to be ground into profits.

The time was when the hardware merchant kept a motley stock of chains, axes, iron pots, tin pails and kitchen ware. The shutters were drawn tight every night in the fear that some bold, bad man might run off with the store while the merchant and the town policeman were sleeping. The shop was musty and dirty and the few women who visited the store didn't stay long. The trade of the men was catered to by the maintenance of a gossip society around the box stove which supplied the heat during the winter, but the women were not on the invited list of guests. The stock was piled indiscriminately around the store and little attempt was made at display beyond the hanging of pails, lanterns, and lamps from the ceiling. The store ad. in the local paper told readers that "Everything in Hardware" was kept and tinsmithing was done by the advertiser. No prices were quoted, because the other hardwareman down street might find out what the first dealer sold his goods at. The window showed sleigh bells in the summer time and garden rakes in the winter. And visitors to the store were given what they asked for, no effort being made to add to the sales as a result of inquiries fired across the counter. To go out and canvass for trade was, of course, unthought of.

The hardwareman of those good old days never thought that amongst his hammers and saws and his pots and pans that he had many articles which he could sell at Christmas time if he but made the effort.

What Evolution Has Done.

Time brought about many changes, however, and some hardware merchants brighter than the rest left down the shutters at night, put skates and cutlery into the window, changed his ad. at least once a month and as a result, made quite an increase in his sales.

The trade papers helped in the evolution and the younger generation of hardwaremen, seeing no reason why the jewelry and fancy goods stores should have all the rich holiday trade, have fought

Window Display Awarded First Prize in Hardware and Metal's 1909 Competition Open to Dealers in Small Towns.

for their own until to-day the hardware merchants are amongst the most progressive merchants pushing Christmas trade and the variety of useful and practical gifts sold in hardware stores is unequalled anywhere. Jewelry and book stores, as a rule, sell luxuries which it will cause no hardship to do without while the gifts secured in hardware stores are, with few exceptions both lasting and useful.

Here and there, of course, a hardwareman is found who makes no effort to push holiday trade but he is the exception rather than the rule at the present time.

Gift Goods are Profitable.

Most lines of goods sold during the holiday season carry a good margin of profit and some should carry as much as 100 per cent. on account of the special nature of the goods. Buyers of gifts do not want cheap goods—what they are looking for is something appropriate which they can select with as little trouble as possible. It is evident, therefore, that the store system and methods are even more important than the price and the merchant who follows Tiffany's example and makes quality his talking point will secure better results than the more cautious retailer who buys a line of cheap goods and does not use the same enterprise in bringing his stock to the attention of possible customers.

Some Profitable Lines.

Chinaware, cut glass, silverware, crockery, cutlery, art metal goods, copper and brass goods, leather novelties, smoking sets, toilet sets, graphophones, cameras, skates, shaving outfits, lamps, etc., are among the lines that the hardware dealer can handle profitably in the holiday season.

In every town there are scores of people who want to go to the nearest city to do their holiday trading. The nearer

The Window That Won First Prize in Hardware and Metal's 1909 Christmas Window Competition Open to Large City Stores.

the city the more people who will go there to trade. Some of this trade—perhaps not all—can be kept at home if the hardware dealers will join with other merchants of the town in offering attractive lines of holiday goods.

They must make their stores attractive, advertise the goods they have to sell, decorate their show windows the best they know how, have plenty of price tickets so that customers can note the prices of goods without having to ask, be polite and attentive and mark liberal profits on all your goods.

With careful buying and right selling methods the hardware dealer should make December business the greatest of any month in the year.

Most merchants have already bought the lines they intend featuring during the coming month, but there are some classes of stock which will have to be supplemented with new goods to make them attractive, so it will be wise at this time to go carefully over the advertisements in the trade newspapers and place orders for such articles as appear to be likely to win favor with holiday shoppers. Orders placed now can be filled in time for display during the closing fortnight of the Christmas campaign, whereas last minute orders sent after Dec. 10 are likely to find jobbers' and manufacturers' stocks so depleted and their staffs so busy that the goods cannot be secured in time for delivery before the holiday rush.

Windows Should Reflect Interior.

To give class and distinction to their display of holiday goods during the next four weeks is the problem confronting every hardware window trimmer in Canada, and to assist by showing what others have done in previous years Hardware and Metal has reproduced in this and recent issues, illustrations of a number of window displays arranged by hardware trimmers a year ago. These suggest various forms of arrangement and present different modes of assembling the articles on display in ways which have been found effective in different localities.

The merchant located in a store on a leading thoroughfare in a large city has a greater opportunity for securing returns than his fellow hardwareman in the small town where the sidewalks are crowded only on market and holidays. His large plate glass and built in window, and the better system of lighting also enable him to show his goods to better advantage than the trimmer is able to do who has a small old fashioned window separated from the store only by a wire screen or curtain. The window trimmer must make the most of the material at his disposal, however, and if a small window and poor lighting handicap him he should endeavor to put life into the display by using some mechanical device to attract the notice and excite the interest of passers-by.

The window should reflect the interior of the store. All the stock cannot be put into the window but the window display can be made representative of the stock and this is what it should be. In small places it may be found hard to change the window every week but this should be done if at all possible, especially during the month of December. This can be done by having one man make the window his definite work and plan a number of displays in advance or by assigning the duty to various members of the staff in turn. A prize being offered for the display that sells the largest quantity of goods. However it is accomplished make it a point to change the window display weekly.

The value of the window display is more than half lost if they are not lighted at night or merely indifferently lighted. During the last two or three weeks before Christmas the fathers and mothers of the younger generation do their gift buying and the evening is the only available time for them to go shopping together. Light the window well, therefore, as a well lighted store window is as welcome a sight on a dark winter night as a log fire in a fire place to a weary traveler in zero weather.

Prize Winning Window Displays.

A year ago Hardware and Metal offered prizes for the best displays of holiday goods in Canadian hardware stores and, as is being done again this year, the prizes were divided into two sections, one open to hardwaremen in cities and the other to competitors in smaller towns and villages. Window trimmers are urged to arrange to photograph their displays and enter them in this year's competition.

Roy C. Gilmour's display arranged for J. A. Flett, Vancouver, last December, was the prize winner in the competition open to city contestants and Peter McNaughton's display, arranged for George W. Ecclestone, Bracebridge, took first money in the towns and villages competition. Both displays are reproduced this week and it will be seen that in the Vancouver window purple and white cheesecloth was used in an effective background scheme, the bottom being tucked and sprinkled with crushed glass. The display was confined solely to cutlery, brass and silverware. The Bracebridge display also shows an effective draping scheme in which white cheesecloth is used in such a way that the light in the store is not interfered with. The goods shown comprise a varied line of cutlery and silver, brass and nickelware with the addition of a line of handsome electric lamps. A plate glass shelf is also used very effectively. In both displays price tickets were attached to every article.

Advertising Holiday Goods.

In this connection we would suggest that in every ad. an effort be made to suggest suitable gifts for all ages and both sexes. For instance, under a heading "For the Men," the following lines might be listed and prices quoted thereon: Basket balls, boxing gloves, fishing tackle, fishing baskets, game traps, guns, gun cases, game bags, hockey goods, hunting clothes, match safes, military brushes, pocket knives, punching bags, razors, revolvers, rifles, safety razors, sweaters, shaving outfits, smoking sets, skis, snow shoes, skates, tool cabinets and sets, thermos bottles. Under "For the Boys:" Air guns, automobile carts, bicycles, baseballs and gloves, cameras, express wagons, fishing tackle, fishing baskets, footballs, guns, hockey goods, pocket knives, punching bags, razors, safety razors, silver spoons, scroll saws, shaving outfits, skates, skis, snow shoes, toboggans, tool chests and sets, velocipedes, work benches. "For the Girls:" Automobile carts, chafing dishes, candlesticks, cameras, leather goods, manicure sets, metal goods novelties, snow shoes, skis, skates, sleds, sewing sets, toilet sets, toboggans. "For the Women:" Cut glass, candlesticks, chafing dishes, five o'clock teas, graphophones, leather novelties, manicure sets, skates, toilet sets, and "For the Household:" Art metal goods, aluminum ware, alcohol stoves, bird cages, bread makers, baking dishes, coffee percolators, candelabra, carpet sweepers, carving sets, cake mixers, chafing dishes, enameled ware, five o'clock tea, family scales, fern dishes, flour bins, fire place goods, food choppers, fruit knives, graphophones, glass and ornamental candlesticks, gas hot plates, heating stoves, ice cream freezers, jardinieres (metal and crockery), kitchen ranges, kitchen cabinets, knives and forks, kitchen ware, lamps (electric, gas and oil), meat choppers, nickel plated tea and coffee pots, nut crackers and picks, oil heaters, plated ware, refrigerators, silverware, spoons, steam cookers, table cutlery, thermometers, umbrella stands, urns, washing machines, and vacuum cleaners.

VACUUM CLEANERS AS GIFTS.

Amongst the many practical gifts which hardwaremen feature this season is that of vacuum cleaners. Introduced on the Canadian market only about a year ago, they have won remarkable popularity, and as a labor saver and a health saving, sanitary device, they can hardly be excelled. What better and more practical gift, therefore, could a man give his wife, or a number of sons and daughters give their mother, than a hand or electric power vacuum cleaner?

The featuring of the line during the Christmas season will have a twofold effect. In the first place, several cleaners ought to be sold as a result of a suggestive advertisement or reading notice in the local paper drawing attention to the practical nature of such a gift, rather than buying a lot of useless stuff which will be soon destroyed and forgotten. And in the second place, an invitation to visit the store and have one of the staff demonstrate the cleaner will give the merchant a list of names whom he can follow up with a personal canvass during the dull winter months.

How to Make the Most of the Skate Trade

Striking Window Displays are Required to Draw Trade to the Store—Clerks Should Know Their Stock and be Able to Explain Differences in Skate Grades—Form Skating Clubs to Stimulate Interest in the Sport.

The Canadian climate lends itself so admirably to winter sports that Canadians have perhaps more chance than people of any other country to enjoy healthy and exhilarating outdoor fun. Consequently, the skate trade here has attained to such proportions that it becomes a very important factor in business at the present stage of the year. The hardwareman who aims to improve his trade and build up a wider business will find it well worth his time to consider the question of how to make the most of the skate trade.

At the outset, it should be understood that opposition is becoming keener. Time was when the hardware dealer and the sporting goods man had the field to themselves. That time has passed. The departmental and general stores, the repair man and the boot and shoe merchant are all making a bold bid for a share of the skate trade. "If hardwaremen generally do not wake up," declared a jobber the other day, "they will soon find the other fellows have taken the trade right away from them. I regret to say it, for skates are essentially a hardware line and the dealers should not allow others to take away the trade from them." He cited numerous instances to show the aggressive methods adopted by newcomers in the skate trade, all of which demonstrated the need for increased activity and attention on the part of the hardware merchant.

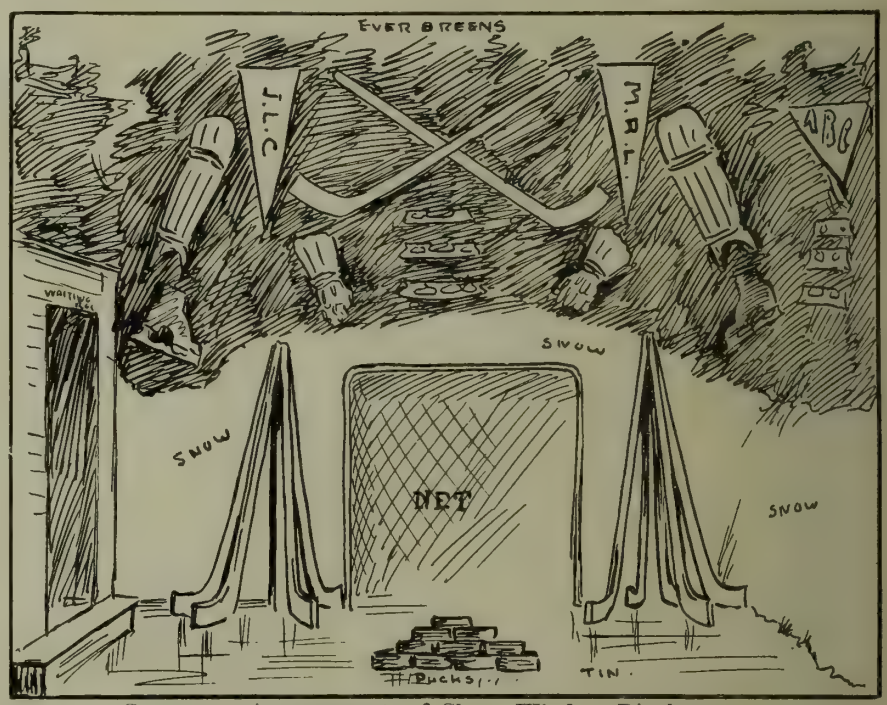
Get Your Stock Early.

It pays to lay your stock in quite early in the season. That early buying has become the rule is demonstrated by the fact that one Toronto supply house is already cleared right out. Another firm is receiving repeat orders from the west where the long winter season means an earlier market. By having the goods on hand before the selling season begins, the merchant is able to plan his campaign ahead of time, and is not likely to be caught unprepared, if Jack Frost arrives on the scene before his wont. The first touch of real sharp weather turns public attention to skates and the dealer who has his stock ready will get a start on his competitors. If possible, the first skate display should precede the frost, rather than follow it.

Some Effective Windows.

The first point to be considered is, how to draw attention to your stock. A striking window display is certainly one of the most effective measures that could be devised. The importance of this feature is realized by most merchants and considerable ingenuity is often expended in arranging original windows.

For a display of skates exclusively, perhaps the most effective way is to build a pyramid-shaped platform, covering the whole space at the base and tapering up to a point at the back of the window. A covering of fleecy cotton is then applied and the skates arranged on the three sides. The goods show to advantage displayed against the background of white, particularly at night when the lights are on. This style of window necessitates a great deal of care to prevent fire and involves considerable work, as the material should be changed once a week.



A display of foreign and odd varieties of skates is sure to prove effective. Place on view the kind of skates used by different nationalities, such as the Dutch, which are very long in the blade and have the front curled up after the manner of the skates which a past generation used. A sailing skate which is of exceptional size and provided with a wooden top on which the boot is strapped and a few varieties that have long since been discarded, would make the collection of sufficient interest to attract attention from every passer-by. This idea is recognized as a valuable one and jobbing houses at the present time are in receipt daily of requests from merchants in all parts for fancy skates to be utilized in this way.

Plan a Hockey Window.

More effective than either, however, would be a hockey window. There are infinite possibilities in this connection, although in most cases a great deal of work and some expense, perhaps, would be involved.

One idea worth considering is the arrangement of a miniature outdoor rink. On the flooring place a sheet of bright pipe tin and around the back and side edges place a wide border of fleecy cotton or asbestos cement to represent snow. The "realism" of the scene would be heightened if the tin were streaked with light blue paint, flecked with white, to heighten the resemblance to real ice. At the outer side of the window, bark could be constructed to represent the front of a waiting room, with a door cut in, a narrow platform in front and steps leading down to the ice surface. At the back of the window the material used to represent snow should be piled up quite high and the background filled in with evergreen to add to the "natural" effect and give a touch of color.

On the back edge of the ice surface, miniature hockey posts and nets should be placed. Two piles of hockey sticks could then be stacked in vertical position on each side of the nets, a stock of pucks being arranged immediately in front.

Suggested Arrangement of Skate Window Display.

The evergreen background could be used for a liberal display of all kinds of hockey goods—skates, boots, pads, gloves and sticks. If the town boasts a college, a neat touch of color can be added by displaying the college colors and a variety of banners. The same can be done, however, with the colors of local hockey and skating clubs.

Do Not Neglect to Advertise.

The importance of the skate trade warrants liberal advertisements. Many merchants get out booklets which they scatter broadcast throughout their district. It is surprising how elaborately

some of these skate circulars are gotten up and it is hardly less surprising, according to reports from supply houses, what a volume of trade these dealers handle each year. Some hardware merchants, who have only modest sized stores, make a specialty of skates and dispose of exceptionally large stocks. They manage this by putting much time and devoting great energy to pushing the sales.

How to Sell Skates.

But there is another side to the problem. After trade has been attracted to the store, how can the most be made of it? In too many stores no attention is paid to learning necessary facts about the stock. The merchant should see to it that his clerks understand the different points about skates and are able to advise and explain to customers why one kind of skate is better than another. Salesmen should be in a position to explain the advantages of lightness, strength, the qualities required in a skate for speed, the best way of having skates ground, etc. Too many clerks know only the prices of the different skates and cannot explain why one should be cheaper than another. If a customer asks to see skates, they show them the stock and name prices. The customer may ask wherein the difference lies between a $2 and a $3 pair. The salesman can only explain that it is a better quality skate. It is not a convincing argument and the chances are all in favor of the customer deciding on the cheaper variety. If the clerk were able to explain just why the $3 skate was worth that much he would convince the buyer that it would be worth his while to take that grade. As it is, the store loses a larger sale and the purchaser may become dissatisfied with the pair that he took.

Look After the Youngsters.

It is always wise to make a bid for the trade of the boys and girls. In the first place, they require a new pair of skates every few years until they reach their full growth and, if they are satisfied with their first purchase, the chances are that they will always buy from the same store. The writer recalls a case where a merchant offered a boy's hockey stick with every purchase of a pair of skates costing over a certain amount. The result was a large sale and the same store has done a rushing business every season since.

It is a good plan for merchants to offer prizes for fancy skating. This not only stimulates interest in the sport but necessitates the use of participants of the best skates available.

It is surprising what a live clerk, who takes an interest in sport, can do in the way of bringing trade to the store of his employer. A case is recalled where a young hardware clerk in a small Ontario city was actively interested in all branches of sport. Practically every athletic club organized found him on the list of officers and the natural result was that the sporting goods trade of the town was confined almost exclusively to that of one store. He was literally worth his weight in gold to his employer.

A BRITISH COLUMBIA DISPLAY.

N. G. Spiece, of T. J. Trapp & Company, New Westminster, B.C., arranged the holiday window shown in the accompanying illustration, the window being eight by four feet in size. A background of white flannel was used with an arch of cheese cloth having a border of purple sateen. The side wall and base were treated in the same manner. Stars and rings carrying cutlery duly priced, were suspended from the ceiling by wire along with clusters of razor strops. On the top of the arch were the words "Merry Christmas," while on the pillars shelves were hung to carry teapots, trimmed with table cutlery. A pyramid of shelves in the centre was used for a very attractive display of case cutlery, flat and hollowware, each article shown carrying a price ticket. Trays and smaller articles were displayed at the base of the pyramid.

A British Columbia Holiday Window Trim.

Mechanical Window Display Made by Dakin Bros., Digby, N.S.

A MECHANICAL WINDOW DISPLAY

Fritz Dakin, of Dakin Bros., Digby, N.S., makes it a point to arrange a mechanical display in his holiday window each season and last season his attraction was a series of revolving shelves on which rested small articles suitable for gift purposes. A small motor and belt provided power for the device, the arms and standards of which were of wood and the shafts of quarter inch iron pipe, with bearings of blank nuts. At the end of the arms, from one side to the other rods were placed to keep the arms apart and steady. The shelves were 26 inches long of three-eighths wood and

the hangers of tin, tinsel being used for trimming the shelves. White crepe paper was used for the background, bottom and ceiling of window, while the shields, star and maple leaf were cut out of photo board. On the bottom of the window carving sets in cases, safety razor sets, shears, skates, etc., were arranged.

In a companion window was a display of nickel trays, enamelware, tea sets, kettles, tea and coffee pots, baking dishes, carpet sweepers, lanterns, lamps, and other articles which would interest the womenfolk. On a shield in the centre was the inscription: "Buy useful gifts at Dakin Bros."

Demand for Art Brass Goods and Fancy Lines

Merchants Are Ordering Silverware, Cut Glass, Brass and Other Fancy Lines in much wider Range, and of Better Quality —A Few of the Articles in Demand—Catering to a Higher Class Trade—The Value of a Christmas Setting—The experiences of a Merchant in Pushing Holiday Lines—The necessity of pricing Articles.

"There has been a wide development in the demand from the hardware trade in all lines of silverware, plated ware, cut glass, brass, copper, leather and china fancy goods." This is the general report from the numerous jobbers and agents handling these lines. All inquiries show that the idea upon which we have been hammering so long that merchants should make a special feature of Christmas goods is being taken up with great enthusiasm. Men who adopted the plan in previous years are more enthusiastic than ever this year, while those who are now making the venture for the first time are buying confidently. Undoubtedly the coming holiday season will mark an advance in the Christmas catering on the part of the hardware trade that will have a big effect upon the whole purchasing of the country. The more thoroughly the hardware stores take up holiday lines, the more window displays that are made from the Atlantic to the Pacific, the more quickly will the people realize that the hardware store is the best medium for Christmas presents, and that no industry is in such a favorable position to offer a variety of goods that cannot fail to please the most exacting customer.

Lines Being Ordered.

Inquiries show likewise that lines ordered, and being ordered, by the trade are greatly widening in variety. Now the requirements are not confined to lower grade silverware, a few pieces of cut glass, and a brass inkstand or two. Some magnificent examples of high grade silverware, Sheffield plate, and good quality china have been shown to the writer preparatory to being shipped to hardware stores; while in brass, copper and leather goods where some two years ago the range could be counted on the fingers on the hand it would now require a good many hands to total up the number. Taking but a cursory note of the articles which will be shown by hardwaremen generally, this Christmas, we have Sheffield plate, both in the antique and the modern; and general silverware such as sandwich trays, vegetable dishes, chafing dishes, percolators, serving trays, 5 o'clock tea sets, chocolate and coffee sets and the more common lines that need not be instanced.

Then in the brass ware we have gas logs, fire screens, fenders, fire sets hearth stands, cake stands, brass covered wood boxes, brass coal hods, umbrella stands, kettles on stands with spirit lamps, chafing dishes, hot water plates, serving trays, bird cages and percolators. This shows the class of brass work going out, and added to this there are the small fancy lines, such as inkstands, ash trays, and other little nicknacks, both useful and ornamental, known to all.

To show how trade can be worked up in this line the experience of J. R. Myers, Stratford, might be quoted. Mr. Myers, after ordering a stock of art brass goods such as has been referred to, made it a point to put a fine display of the goods in his window. Then he sent a circular letter to a selected list of young ladies to whom he thought the goods would appeal, pointing out the utility of the articles for entertaining purposes and referring to the fact that brass goods are exceedingly popular amongst the well-to-do people at present. The results from the circular and window display were very pleasing and Mr. Myers has had a large turnover in these goods since taking the line up.

Rapid advances have been made in the ordering of china likewise. At one time cheap lines of vases, decorated cups, figures, etc., were alone ordered, now we get the gilt perforated china. German steins, ware manufactured by leading English and Continental houses, jardiniers, oval and square dishes, sugar basins, cups, saucers and plates.

Not a Cheap Trade Only.

Thus no matter in which direction one looks there is this distinct broadening in the buying, and at the same time the quality is improving. "It is not a cheap trade that the hardwaremen are now catering for" said one shipper recently. "I can tell by the ordering that every year big strides are being made, and that the public are getting accustomed to see in the hardware store, as fine a selection of silverware and fancy articles as they ever saw in the general run of jewelers' windows." And this is the point that merchants must drive home. They must show by their windows and the general comprehensive character of their stocks that they are not only after the small buyer, but the large one as well; that they can show an elaborate tea or coffee service as well as the nickel plated pickle frame. "Something for all pockets" should be the cry, and if the merchant is judicious in his buying he can cater to this general trade without overburdening his resources or carrying a stock that will have to be carried over at a heavy loss. The public are wont to be extravagant at Christmas time, and the customer, who in the ordinary course of events will draw a long face at a good priced carpet sweeper will not hesitate at a high quality piece of silverware, or cut glass if the article is shown to him or her in an attractive setting and pushed with all the selling force that a merchant can command.

The Christmas Setting.

Do merchants quite realize how necessary it is to have that proper setting? Do merchants realize that a customer, warmed up by the Christmas feeling and "good cheer" appearance of the store will feel much more extravagant than if chilled by a place that looks as if Christmas had been forgotten altogether? We are all impressionable. Make us feel good, and we will buy "good." How often has Hardware and Metal harped on the theme that Christmas goods must have a Christmas setting. Some merchants seem to think that any elaborate decoration is out of place in the hardware store. Why so? Is the store any more prosy than the grocer or the drygoodsman? Are the stable lines less suggestive of festivity than any other? Is the general lay out of the store itself more opposed to any scheme of decoration than other stores? As a matter of fact with his unusual amount of silent salesman, glass counters and stocks of lamps, etc., the hardwareman has the other stores beaten at the first going off.

Pricing Goods.

This is good advice to all merchants. Evolve the best setting for your goods so that they have the finest possible chance of commanding attention, and of looking well. Make inspection easy to the customers, and do not forget to price the articles. This is especially important in handsome looking silverware and glass. Some people have a very erroneous idea of the prices of some of these lines. Often they judge of the price from the figures they knew were obtaining years before, and therefore they will not seek information of the clerk because of the belief that the article is beyond their means. But the production of these things have cheapened, and many an article that looks terribly expensive to the uninformed is really quite within their reach. Therefore, it is well to quote the price. Especially too, as it saves the time of the clerk, and facilitates the looking round of the customer.

A BUNCOED TOWN.

Lindsay, Ont., has just had an experience which should put business men in all parts of Canada on their guard.

A short time ago a bright young fellow made his appearance in the town announcing he was representing a Cleveland firm that proposed locating a branch factory in Lindsay, employing 300 hands.

He was a welcome guest and the city council and the board of trade naturally did all they could to assure the location of the proposed factory in Lindsay. A site was selected, and the representative of the alleged Cleveland firm was even able to draw a few hundred dollars from two of the local banks. But this was followed by the withdrawal of Mr. Promoter from Lindsay.

The business and financial men of Lindsay now realize that they have been buncoed and have called in the police.

Canada is just now a particularly good camping ground for the alleged industrial promoter. There is probably no country in the world more so. The ambition of her people to excel as manufacturers is commensurate with the rapidity of her general growth. It is characteristic of every village town and city in the country. The crooked promoter therefore finds his ground already prepared for him when he appears. But the experience of Lindsay will be avoided if his bona fides are ascertained before the community takes him to its heart.

URGE EARLY BUYING.

Recent issues of Hardware and Metal have contained quite a number of articles dealing with various phases of the holiday trade so far as it applies to the hardware store. The methods of displaying and advertising different classes of goods, of decorating the store, etc., have all been gone into, and retailers have been urged to buy early and get their selling staff and stock in shape for an early "holiday opening."

This done, the dealer should also urge his customers to buy early. Items should be inserted in the reading columns of the local papers and reference should be made in the store advertisements to the opportunities which are available to those who have first selection of the stock and do their shopping before the rush.

FORMER CANADIAN HONORED.

Z. E. Martin, president of the Martin-Senour Company, Chicago, and the Martin-Senour Company, Montreal, was honored by election as president of the Paint Manufacturers' Association of the United States at its annual convention at Atlantic City, N.J., on Nov. 2 and 3.

Mr. Martin is a descendant of John Martin, who was sent to America as a surveyor by the English government to Boston in 1665. Late in the eighteenth century some of the family moved to Canada, locating at Knowlton, Que., where Mr. Martin was born and received his education, graduating from the high school in 1882. After graduating he went to Chicago, where he took a position as salesman with the Senour Manufacturing Company the same year in which it started in business.

After some years he became sales manager and subsequently vice-president. In 1893 there was a reorganization of the company, when its name was changed to the Martin-Senour Company, at which time Mr. Martin became president and general manager, which positions he has filled ever since.

Z. E. MARTIN, Chicago.

FOOTWARMERS AS HOLIDAY GIFTS.

Footwarmers are a very practical gift which hardwaremen can recommend to customers who drive autos or carriages during the winter. These heaters are such splendidly useful articles that anyone who does any driving at all in any kind of vehicle, either for business or pleasure, cannot help but appreciate one as a holiday gift. A heater will keep both the feet and the heart warm—the one to the comfort of the user, and the other to the great satisfaction and joy of the donor, for the only things worth giving are those that please the receivers.

A hardware merchant had a friend whom he wanted to remember with a gift last winter, but could think of nothing appropriate until his eye lit upon a pile of carriage heaters. "That's the very thing," he said to himself, "he drives his auto quite often in the cold weather, and it ought to be appreciated by him." So a medium-priced footwarmer, with a dozen bricks of fuel, was sent over to the friend. At first the recipient was doubtful as to its value and asked the hardwareman if they were generally used. About a month later, however, he brought a friend in to buy one, and he was the means of selling at least a dozen before the winter was over.

Push footwarmers during the holiday season. They are practical and useful articles and within the reach of any user of auto or sleigh, so far as price is concerned.

The "Clark" heater, marketed by the Chicago Flexible Shaft Co., 250 Ontario Street, Chicago, has been on the market several years and sell readily wherever their merits are brought to the attention of customers.

The "Ontario Lantern" footwarmer is a new device, which has been put on the market this year by the Ontario Lantern & Lamp Co., Hamilton, Ont., and from the interest manifested in the competition they are conducting amongst the children of customers of their retail dealers, it looks as though the sale of the lantern footwarmer this season will reach big figures. Owing to the difficulty experienced in supplying orders in time to get the leaflets in the hands of customers before the holidays, they have extended the date for closing the competition until Jan. 31, 1911.

THE MODEL TEA KETTLE.

The McClary Manufacturing Company, London, are introducing a new idea in tea kettle construction which ought to meet with universal favor. Instead of the lid of the kettle being set under the handle in the usual manner, a hinged opening is placed on the side. The person filling the kettle can lift it by the handle, and with the fingers hold back the cover, while the other hand is used to operate the water tap. The arrangement is a very common sense one, and the wonder is how the idea has not been thought of before, so simple it is. With the new style kettle all danger of scalding the hands from steam escaping from the kettle is removed, while the

The Model Tea Kettle.

opening on the side is also a more convenient arrangement, and makes it less liable to fill the kettle to overflowing.

Power of suggestion means much and placards about the store suggesting gifts for various members of the family will be appreciated and of material benefit. Don't waste valuable newspaper space trying to figure out something for somebody that somebody doesn't want.

What Can I Give?

HOW often, during the next month, will you have to answer that question? The most satisfactory present for a man is an Ever-Ready Safety Razor.

Your customers know it; it has been advertised extensively for years in all the leading magazines.

Farmers' sons are using Safety Razors, and ONE DOLLAR, the retail price of the Ever-Ready, just suits their pockets and their tastes.

Our display case, which is sent free to any dealer selling Ever-Ready Razors, will sell goods for you while your customers are waiting to be served. It will solve for hundreds the all-important question which men, women and children, the week before Xmas, ask in almost a tone of despair,

"WHAT CAN I GIVE?"

Trade Mark

INTERNATIONAL DI

MONTREAL,

Increase Your Xmas Sales

BY taking advantage of the elaborate plans we have outlined for helping to bring in business to your store.

OUR PLAN INCLUDES:

(1) New display case, illustrated on this page, which will be sent free to any hardware dealer purchasing a dozen Ever-Ready Safety Razors.

(2) Large supply of advertising material for use in window displays, such as dummy packages, outdoor signs, Ever-Ready price tickets, colored sheets for window trim and the old standby in the window placards; the familiar EVER-READY FACE cut out of heavy cardboard and fitted with the easel back. By following our instructions, windows can be trimmed in a few hours.

(3) Large advertisements in the leading magazines which circulate throughout Canada. The more we spend the more you make. We spend no less than $100,000 every 12 months in advertising. This is at least 10 times more than is spent by any other popular-priced razor made.

(4) Electros for use in local paper. These electros can be worked in with other lines dealer may wish to advertise for Xmas trade.

This Display Case FREE to All Ever-Ready Dealers

You Take No Chances

We guarantee absolutely every Ever-Ready Safety Razor. If a customer shows dissatisfaction we will buy back the Ever-Ready outfit at full retail price, and you, Mr. Dealer, need never lose the profit from an unsatisfactory sale.

If There Is Any Risk, We Take It

There is a good profit in these goods for you, but you have got to act at once or your chance is gone for 1910 Christmas trade. Write your jobber or sign attached coupon and we will express goods at once with display case and other "Xmas helps."

PUBLISHED EVERY SATURDAY.

THE VALUE OF ILLUMINATION.

The merchant who thinks that he is economizing by cutting down his illumination, or by paying little attention to it, is committing a grave error of judgment. In fact he is deliberately courting disaster. What is the use of a well-dressed window, if, when the shades of night are falling, a small light throws dismal looking shadows over the articles, and passers-by refuse to spoil their eyesight by gazing in.

The same with the interior. Who wants to buy in a store that looks as if the merchant was afraid of showing up the interior with a good light because he has stock which will not bear investigation, and that customers may notice that prosperity is not going hand in hand with him.

Light attracts us all. It is an advertisement in itself. People cannot but believe that a merchant who is brilliantly illuminating his store inside and out, is doing a magnificent business, and that consequently he is the man to get their trade. We think little of the man who hides his light under a bushel: we think less of the man who hides his stock under a small light. Place two stores close together, and illuminate one poorly and the other very brilliantly and see which gets the greatest amount of attention and patronage.

Besides, the system of a store is improved by good illumination. The clerks work better and make less mistakes when they can see what they are doing; while a strong light will show off the goods they are handling to the best advantage. There is also no loss of time in going from one end of the store to the other, and everything works under the most harmonious influences. A clerk falls over a box owing to poor light. He loses his temper, and speaks crossly to the next customer. The latter is annoyed and makes up his mind never to enter the store again. This loss would pay a good percentage of the light bill. A customer buys something that does not suit, because he could not see it properly. He likewise declines to patronize the merchant again. Where is the economy now in cutting down the light. Illumination has made great strides during the past few years, and it is easy for the merchant to fix his store up so that his light will be the talk of the district. And owing to the advances in illuminants, he can do it now with a minimum amount of trouble and of expense.

NAILS LIKELY TO ADVANCE.

The stiffening in wire and wire products in the United States has been followed by advances on the Montreal market while a stronger tone has been given to quotations in Toronto, although prices have not yet advanced.

The nail market naturally follows wire in its movements and while orders for delivery in the spring are being booked at old prices there is a lot of quiet talk about an early advance. The shading of prices which some manufacturers had been doing to large buyers has been discontinued and the price to jobbers is now held very firm.

The retail price of $2.35 has been held steadily and the past season has seen less cutting than in former years. Compared with the low price of around $2, obtainable a couple of years ago, the present quotation has also been very satisfactory to manufacturers, although both material and labor costs have increased.

An advance to $2.40 would not disturb the market much, but one maker is talking about $2.50 as the base price. Whether this level will be reached will be determined by the condition of the wire market. If rods cost the manufacturers more the increase must be added to the finished products.

The present appears to be a favorable time to book wire nails.

HAVE ADEQUATE HELP.

The need of adequate help is recognized by all merchants. Nothing is so detrimental to business as lack of clerks at rush times. If customers find it hard to get attention in certain stores, they are very likely to go elsewhere. Not only will they transfer their own custom but in all probability will mention to others that Brown's store is getting behind the times and that one cannot hope to be waited upon promptly there. That sort of thing does not take long to spread and it tells heavily against a firm's reputation.

At all times of the year it is essential that merchants guard against this by having adequate help. If it is found the Saturday trade is getting too heavy for the permanent staff to handle satisfactorily, help should be secured for those days. If the business of a store is too large for the staff to look after, it certainly warrants the hiring of additional clerks. During the Christmas season the need is accentuated strongly. The volume of business then is so great that a larger staff will be required for several weeks, if the merchant desires to cope with the trade. It would be wise to make such arrangements early in the season and see that the "subs" are given a certain amount of preliminary training. The utterly uninformed clerk is the prime nuisance of the Christmas trade and the wise dealer will endeavor by every means in his power to create a certain degree of efficiency in his extra salesmen prior to the commencement of the real rush.

WINDOW AND AD. COMPETITIONS.

Attention is drawn to the prizes offered by Hardware and Metal for photos of window displays and clippings of advertisements, announcement of which has been made in recent issues of this paper.

Three window competitions have been outlined, one for holiday displays (closing Jan. 1) and the other two for sporting goods and fall hardware (closing Dec. 1). In addition a holiday ad. competition closes on Jan. 1.

Each competition is divided into two sections, two prizes of $5 being offered in each competition, one open to hardware merchants or clerks in towns and cities over 5,000 and the other to contestants in places under 5,000 population.

In this issue the prize winning photos in Hardware and Metal's 1909 holiday competition are reproduced and we urge that window trimmers generally, adopt the practice of having their windows photographed when special displays are put in.

Already a number of entries have been received in the competitions which close on Dec. 1, but hardly enough to make the competitions interesting. The contests close next week, so have the windows photographed and send in the pictures at once.

CO-OPERATIVE BILL AGAIN.

Mr. Monk, M.P., who has already fathered two co-operative bills in Parliament, is persistent if nothing else. On Thursday of this week he introduced another bill along similar lines to his previous attempts. Merchants throughout Canada will again have to get busy to accomplish its defeat.

HARDWARE TRADE GOSSIP

Quebec.

The Granby Paint, Varnish and Cement Co. have registered.

Ranger & Lalonde, hardware dealers, Montreal, have registered.

W. A. F. Neuman, representing the Duryea Manufacturing Company, New York, makers of the Wooster Belting, a line which is now being introduced on the Canadian market, has been on a visit to Montreal. William G. Ashdown, Montreal, is the sole Canadian agent.

Owing to a misunderstanding, it was stated in a recent interview with Walter Sadler, of Sadler & Haworth, Montreal, on the question of belting prices in the West, that the firm were represented by an agent in the West. Sadler & Haworth, however, have a branch office and not an agent in this territory, it being located on Christmas Street, Winnipeg.

A meeting of Lewis Bros., Montreal, hockey club has been held, and was well attended, plenty of interest and enthusiasm being shown. The following officers were elected: Hon. Presidents, F. Orr Lewis and J. G. Lewis; vice-presidents, W. Lewis and Howard Lewis; President, C. M. Strange, Manager, R. Dawson; Sec-Treasurer, E. Booth. The captain is to be elected at a meeting of the team.

To celebrate the fact that the Canadian business of the Sherwin Williams Co. came out so prominently in the top notcher competitions of the company, C. C. Ballantyne, managing director was presented with a handsome trophy "The Runners," for winning the top notch district managers' honors; W. S. Fallis, Winnipeg sales manager, a trophy for winning the sales managers' top notch prize, and the Toronto representatives the trophy for the highest percentage of sales. Mr. Ballantyne gave a staff theatre party with supper at the Windsor Hotel this week. That the members enjoyed the hospitality of Mr. Ballantyne, and resolved to repeat the successes next year, goes without saying.

Ontario.

F. L. Webster, representing the Delta File Works, Philadelphia, has been calling on the trade in Toronto this week.

The hardware stock of C. H. Mainguy, Maxville, together with his other stock, is offered for sale by tender on Tuesday, Nov. 29.

The marriage of Miss Sadie Seldom to Aldred Wray Pratten, of the McMurtry Hardware Co., St. Thomas, took place in Waterford. Mr. and Mrs. Pratten left for a trip east before taking up their residence in St. Thomas.

A new company to manufacture carpet sweepers, vacuum cleaners and other household lines, is negotiating for a start in Guelph. The premises formerly occupied by the Crowe Iron Works will be secured, if some capital is subscribed locally.

Z. E. Martin, president of the Martin-Senour Company, paint manufacturers, Chicago and Montreal, and W. H. Gerke, general manager of the Canadian company, spent a few hours in Toronto on Wednesday.

Men are at work tearing out the front of the building of the Bond Hardware Co., Guelph. An entirely new front with one entrance will take its place.

J. A. Acton, Ottawa, has disposed of the Eganville branch of his hardware business to W. W. Watson, who has managed the branch for some time.

Western Canada.

G. Countryman has started a tinsmithing business in Edmonton.

The Lindsay Hardware Co. have started business at Vulcan, Alta.

The Northern Hardware Co. are opening a branch store in Edmonton.

Andrew Urquhart has started a hardware business at Fort Qu'Appelle, Sask.

Percy P. Chatham, dealer in hardware and implements, Holkirk, Alta., has sold his business.

Porteous & Stephens, hardware dealers, Carlyle, Sask., have been succeeded by Porteous Bros.

Pritchard & McCreary, hardware merchants, Neelin, Man., have been succeeded by W. O. Beatty.

A. S. Smith, hardware, Moosomin, Sask., has been succeeded by A. S. Smith Hardware Co.

The Griffin Hardware and Lumber Co., Griffin, Sask., have sold their lumber branch to the Canadian Investment Co.

The Saskatoon Hardware Co. will be represented in the mercantile hockey league, Saskatoon, this winter. Seven teams have entered so far.

The St. Boniface council has closed an agreement with the Taggart Iron Works, Winnipeg, whereby the latter will in the near future, erect a large building for a branch industry there.

R. Barker, who has had fourteen years' experience in general hardware and paints in England, has been engaged as manager of the Robinson & Co. hardware department, Winnipeg.

With the arrival of President J. L. Pollock and Engineer Zeigohm, of the Alberta Rolling Mills Co., the preliminary business of installing the new plant at Medicine Hat is going ahead and the rolling mills are promised by January 15. The building will be 100 by 224 feet and one storey high. Day and night shifts will be employed, about 100 hands in all being required. The output of bars, rods and flats for the first year is estimated at 3,000 tons.

United States.

The late Philip Corbin, president of the American Hardware Corporation, left an estate estimated at about $2,000,000.

The Colt's Patent Fire Arms Mfg. Co., Hartford, Conn., announce the opening of a New York office at 299 Broadway, under the management of Albert Foster, Jr., with a full line of samples of Colt arms. Mr. Foster is well known in the firearms field, having been previously connected with the Winchester Repeating Arms Co.

ESTABLISHES A CANADIAN BRANCH.

One of Sheffield's well known cutlery manufacturers, Thos. Ellin & Co., Ltd., established over a century ago, who have been doing an extensive business in Canada for the past fifty years, have made arrangements to better handle the increasing demand for their goods in Canada. In addition to traveling through the whole country with a full range of samples to take orders for shipment direct from Sheffield, they have opened an office and warehouse at 122 Wellington St. West, Toronto, in conjunction with the Starr Manufacturing Co., skate manufacturers, Dartmouth, Nova Scotia. Thomas Ellin & Co. intend carrying a stock of cutlery at that address to give their customers immediate delivery of leading lines which they may have run out of, without having to wait for the goods to be made and shipped from the old country.

Amongst other new lines Thos. Ellin & Co. are supplying is a new patent two blade Coronation Puzzle knife, which should have a large sale. The handle is made of light weight aluminum, embossed with a special design from their own dies. The knife is made up in three distinct forms, with two blades, one being a combination of puzzle and fly open blades which are locked when closed. A second can be used as a puzzle knife or ordinary knife at the will of the owner, while a third one being an ordinary two blade knife with the new Coronation scales.

BANNER STOVES AND FURNACES.

The Down Draft Furnace Co., Galt, have issued a 48-page catalogue describing their Banner Stoves & Furnaces, already favorably known to the trade throughout Canada. The line includes the "Art Banner," an entirely new cast iron range, together with about a dozen other styles of cast and steel ranges in various sizes as well as wood cook stoves, oaks and heaters. The Down Draft Banner and Active furnaces are also featured, together with the Down Draft wood furnace, which contains the same draft flue as the Down Draft coal furnace and is claimed to be able to hold fire longer than any other wood furnace.

RETAIL MERCHANTS BANQUET.

Guelph, Nov. 23.—The fifth annual banquet of the Guelph Retail Merchants' Association was held on Thursday evening last. President Henry Occomore, stove dealer, occupied the head chair, with B. W. Zieman, Preston, president of the Dominion Association, outlined the more important features of the new retail merchants' charter. The black list had been a rather dangerous thing to handle by the association before this legislation had been passed. Now, however, it was legal to collect, print and distribute among their members black list information. They were now working for improvements in existing conditions respecting the division court. They wanted the act amended so that a merchant in bringing a "dead beat" customer before the court would not have to spend more in court costs than the account was worth.

The distribution of gift cards with packages would not go amiss and the expense would be very slight.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Gum Shellac.—Advanced 4c.
Clothes Wringers.—Decline of 5 to 10 per cent.
Lead.—Advanced 10c.

MONTREAL.

Nov. 25.—There has been no change in local quotations during the week. Fluctuations in the primary markets have not been wide enough to affect prices, and on the whole the situation has been unaltered. Trade, although lacking the bustle noticeable the previous weeks when buyers were purchasing freely for water freightage, has been very good, and merchants are satisfied with the business done, and the way inquiries as to new contracts are coming in. It is evident that owing to the light stocks carried there will be a steady demand all the way through the winter.

The high price of tin, and the knowledge that figures may come down with a run at any moment, tend to keep back buying, but as the metal is generally wanted, good trade has been done. The copper market is being watched closely, and some good business is on the point of being placed. Increased activity is noticed in spelter, and some of the larger users are back on the buying market again. Imported iron is now quiet for the time being. Some fair orders for domestic iron have been placed.

The primary markets show very little change from last week. The bull party in London continues to upset all predictions, and despite contentions that they cannot continue, owing to light American buying, are still keeping things fairly high. Every break in the market is met by renewed buying. Barring users who have to meet requirements, there is very little legitimate buying going on. Copper is maintaining its position, although London is a little weaker. Sellers of second hand lots in New York are asking a shade higher prices. Exporting figures are reported to be very favorable. Spelter is maintaining strength under the firm control of the syndicate. There is good consumptive buying. Lead is about the same, although the tendency is to decline. In iron and steel new business has not shown any improvement in the States, and while it is expected that there will be no great improvement until the next year, it is not thought that prices will sag at all. They are considered to be pretty well shaken down by now.

Pig Iron—Business is now much quieter than it was. Some small orders have been placed, but the larger users are ant of the market for some time. Domestic furnaces report fair business, and a good tone all the way round. Authorities in the States have given up all hopes of any decided improvement in the iron and steel situation until February. New business is not rushing in, and it is evident that from now on production will decrease but prices will remain unchanged. Pig iron is on a low basis, while the finished steel men are keeping well together. John Gates states that "the steel industry will harden from now. The companies are making money on the basis of present operations. Next year should be one of the best the country has ever experienced." We trust that Mr. Gates will prove no false prophet.

Tin—Tin is unchanged this week, and fair trade has been done round 42c in jobbing lots. There is still a scarcity of Straits tin, and the market, reflecting London conditions, is very firm. Inquiries have fallen off, but it is evident that larger users are waiting patiently the day when the syndicate will loosen up in London. The 2c advance did not suit them at all last week. There is little change in the London market. New York is protesting at being dragged by the ears by London, but cannot do anything except grin and bear it like the rest of the world. Everybody is nervous and apprehensive at the extreme bulling going on, but the syndicate seem to be playing a game that suits them. At any rate the legitimate consumption is dull, although speculative buying is heavy.

Copper.—Copper is unchanged at 14c for jobbing lots, with an inside price for good round lots. Trade has been fairly good, and jobbers seem satisfied. New York is fairly confident, and prices are being well maintained. Consumption is quiet, which is only to be expected, in view of the recent stimulation in buying. Fresh rumors as to the copper consolidation are floating round, and it is stated that the large interests will merge as the Steel Corporation did. It is not planned that the merger should have complete control. A large number of the smaller companies will be left independent, but by the consolidation of the larger interests economies will be made and production controlled. Leaving in the smaller concerns is supposed to protect the consumer, and leave the market competitive. This is all right in theory, but will it work out so in practice?

Spelter—The market is unchanged, although very firm in tone. Good orders have gone through, and future business looks promising. The continuance of the figures in London gives a corresponding firmness here, and the sagging at St. Louis is not having any effect.

Lead.—There is no change this week either in domestic or imported. Trade is fair with inquiries improving. The English market seems to be losing ground again, under an increase in importations.

Scrap.—In the better metals such as copper, lead and zinc there is not much activity. Little scrap is offering, and little asked for. In cast and wrought iron there is more business being done, but even here the supply is on the short side. Prices are firm, and we quote: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, Nov. 25.—The metal market continues strong. Tin is a little higher and there appears to be no hope of a break for some time. The London operations keep the price up, despite the fact that consumption in America is low. The closing of 40 tinplate mills in the United States, at first believed to be a temporary move, has since come to be regarded in a different light and is thought to reflect the state of the American tin market. The continued fluctuations on the primaries have not directly affected the local quotations but there is a tendency here toward firmer prices.

Lead has advanced 10c for small bulk. Copper shows a good demand with price firm and the same can be said for spelter.

On the whole, the tone of the local market is excellent for this time of year. The volume of demand is satisfactory, although in some lines small orders are the rule.

Pig Iron.—The price for pig iron remains firm in all lines. The close of navigation has brought about a certain stimulation of immediate demand but this will not continue. There have been fluctuations in the primary markets in imported iron but no price changes are anticipated until the usual early winter increase of 75c per ton goes into effect. Quotations are :—Canadian No. 1, $19.50; No. 2, f.o.b. furnace sellers, $19 ; Middlesboro, No. 3, $20 ; Summerlee, No. 2, $22.50 ; Cleveland, No. 1, $20.50 ; Clarence, No. 3, $20.75 ; Jarrow, $20.50; Glengarnock, $22.50.

Tin.—The primary markets have not regained stability and continue to fluctuate wildly. Locally a feeling of uncertainty obtains, although an effort is made to keep the price steady. If anything it has firmed up some and while 40c and 41c were the quotations last week for small lots, there is a more marked tendency now to stick out for the higher price. Concessions are made for ton lots and over. There is a fair demand locally but mostly in small lots. Dealers are still prepared, it seems, to get along as best they can on small supplies in the hope that an era of lower prices will soon be reached.

Plates and Sheets.—The demand is not as strong but is still sufficiently active to keep the market up. The advance of 2s. on tinned iron sheets in London has not yet affected local prices. The free placing of orders for 1911 at the present time points to a general anticipation of a heavy demand next year. It is not expected that there will be any diminution of prices, in fact the prospects for 1911 are rather for stiffer quotations.

Copper.—The copper market is sound, with general confidence prevailing. Producers are making no effort to force

buying but the demand is still well up to the production. Rumors of advances on the New York market are not confirmed but there is a very large demand from abroad for scrap copper, at an advance of ¼ to ⅜ cents. The urgent buying of scrap from Europe is quoted as an evidence of the soundness of the copper situation. There is a good demand locally with the price remaining firm at 13½c.

Lead.—There has been an upward tendency in lead. Quotations are now given of $3.85 for domestic and $3.90 for imported when sold in small bulk, although as good as $3.75 and $3.80 respectively is quoted for ton lots and over. This is an advance of 10 cents on the generally prevailing price last week. There is a strong demand and enquiries are freely received.

Spelter.—The spelter market remains strong locally, accurately reflecting conditions in other countries. Sales are being made for prompt and near future delivery. The price here still stands at $6.15 to $6.25.

HARDWARE MARKETS

MONTREAL.

Nov. 23.—There is a fair movement to trade, although the bustle observable a few weks back has somewhat subsided. Christmas lines are very prominent in a sorting up way, while rush orders are coming in from dealers who have left off ordering until the last minute or so. The absence of any snow has tended to slacken the demand for snow shovels, but there has been a stimulation in heating lines.

The markets are very steady, little change in price being noticed. Following the higher tone in the States, barb wire, plain twist, galvanized and coiled fencing have been advanced. There is a good feeling all the way round, and travelers speak well of the preparations being made by merchants to meet the holiday demand. Booking ahead is slow, but there is a movement in screen hinges, poultry netting and green wire cloth.

Christmas Lines—There is a very good sorting movement on, while rush orders are coming in from belated dealers. Delivery is being made promptly, and very few orders are sent away incomplete. Carvers in cases, cutlery cases, fish knives and forks are prominent. The demand for silverware is well assorted, while shaving sets, razors, manicure sets, bathroom fittings, pocket knives and scissors form but a small portion of the lines moving. Brass and leather goods seem to be slackening off somewhat.

Winter Goods.—A fall of snow would improve the sorting up call for snow shovels and sleigh bells. Horse blankets and stable fittings are moving steadily, if not now prominently. Household utility articles which are suitable for presents are in good demand. This is especially noticeable in sad irons, meat choppers, cake and bread mixers. Tinware is also a good seller.

Sporting Goods.—Skates, skate straps, hockey sticks, are prominent. Snow would improve the sale of toboggans, snowshoes and sleds. There is still a fair call for ammunition. Gymnastic lines are improving, while air guns and revolvers for indoor shooting are prominent.

Stoves and Ranges — The colder weather has improved the demand for stoves and ranges. Dealers' stocks are reported to be on the light side, so any increased call due to a fall in the temperature will soon be felt by the jobbers. Coal hods, pokers, ash sifters, are in fair call. There is an improvement in oil heaters and cookers and spirit stoves.

Builders' Hardware.—There is still a good movement locally, although the country demand has fallen off. The market is unchanged, and we quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside) $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Bolts and Nuts — The demand is steady, with dealers' stocks reported to be on the light side. The market is firm, and we quote: Discount on carriage bolts, ⅜ and smaller, 70 machine bolts, ⅜ and less, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Lumbermen's Supplies.—The lines are showing stimulation, and prospects look good. Axes, axe handles, boot calks, cross-cut saws and snowshoes are in much more active call.

Wire.—Following the recent advance in the States barb wire, plain twist galvanized, and coiled fencing are advanced. We now quote: Barbed wire, $2.25, plain twist, $2.55, galvanized wire, $2.20, base coiled fencing (9) $2.25, (12) $2.40, staples, bright, $2.60, galvanized, $2.85.

TORONTO.

Toronto, Nov. 25.—The hardware market is characterized by seasonable activity, but colder weather is needed to help along certain lines. Sleighing would materially assist the sale of seasonable goods and Christmas lines, although no complaint is heard as to the volume of trade in either direction. On the whole, conditions are reported as quite satisfactory with every prospect of rapid improvement.

No changes are recorded this week with the exception of a general decline in the price of clothes wringers, due to the shrinkage in rubber quotations. The rubber "boom" in England has affected the market appreciably and made it possible for manufacturers to make a reduction on their wringer output.

Seasonable Goods. — The demand is good but jobbers are anxious for snow. The just good spell of sleighing would quicken trade in such lines as sleigh bells, sleigh heaters, snow shovels, blankets, weather strip, etc. No complaint is made, however, on the score of present business in these lines.

Household Goods.—Dealers are calling for household goods and there is much activity in pots, pans and kitchen utensils of all descriptions. The opportunity for a brisk trade in these lines, not only during the Christmas season but immediately preceding it, seems to be recognized now and dealers are stocking up early.

Builders' Hardware.—As long as the weather remains open, the call for builders' hardware will continue. Trading is still fairly brisk but most of the orders are for odds and ends, indicating that the end of the rush season is not far off. The bulk of the trade is in the larger cities but a surprising proportion of the demand comes from the provincial sections. Glass is still largely used.

Heating and Lighting Goods.—The stove trade is now handled by the manufacturers without any difficulty but the demand is still brisk. Had the cold weather of a fortnight back continued, the result would have been a couple of weeks of unusual rush and then a sudden slackening.

Clothes Wringers.—As a result of the slump in the price of rubber, clothes wringers are selling at reduced prices, the decrease ranging from 5 to 10 per cent. Prices now quoted are: Royal Canadian, 11 inch, doz., $47.75; Eze. 10 inch, $46.75; Bicycle, 11 inch, $60.50; Trojan, 12 inch, $100; Challenge, 3 year, 11 inch, $53.25; Ottawa, 3 year, 11 inch, $58.25; Favorite, 5 year, 11 inch, $61.75.

Sporting Goods.—The trade in sporting goods is confined almost exclusively to skates, hockey sticks and other typical winter lines. Although the demand for these is brisk, the jobbers report that snow is needed to bring on the orders. Other sporting lines are moving but nominally at present.

Heavy Hardware.—Bolts, nuts and rivets are selling still but the demand is not particularly brisk There are no changes in price. The discount on carriage bolts are quoted: ⅜ and smaller, 70; machine bolts, ⅜ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—"We are particularly busy in holiday lines," said a local jobber, "but more Christmas-like weather would stimulate trade." The demand for cutlery is particularly brisk and there is a noticeable tendency to carry the better grades. Other lines called for are cut glass, brass goods, household specialties such as chafing dishes, water coolers, table kettles and stands, coffee extractors, crumb trays, candlesticks and water filters. There is an improved demand for metal toys. Shaving goods are selling well.

Wire.—The promised increase in galvanized wire, as the result of the advance of $1 a ton in the United States, has not yet come into effect.

News and Methods of Canadian Hardwaremen

Reduction in Price of Gas Taken Advantage of by St. John Merchant—What Newspaper Advertising Has Done for Hamilton Store—Lamps as a Holiday Line—Art Brass Goods Featured in Winnipeg Store.

GAS GOODS PROFITABLE.

St. John, Nov. 23.—One of the local hardware establishments has found a profitable side line in mantles, shades, and other fittings for gas jets. Last week the local gas company announced that they were reducing the price of gas for heating, cooking and manufacturing purposes, commencing December 1, and as a result it is expected there will be a greater demand for gas stoves and ranges and various appliances for manufacturing purposes with which gas is used. One dealer immediately after the announcement made a display in his window of goods of this kind.

STORE HAD BIG DAY.

Hamilton, Nov. 22.—Stanley Mills & Co., who conduct a straight hardware store in connection with their departmental business, have been doing some enterprising advertising in which their kitchenware department has been the leader. They offer to pay the railway fare of any customer from out of town traveling 40 miles or less and buying goods totaling to $10 or over. Railway tickets must be presented in order to get the refund.

> In introducing their kitchen department they say: "A trip through it will reward any housekeeper, in the actual saving of time and the lessening of work which the scores of new novelties and clever devices of all sorts make possible."

On Saturday a total of 19,895 people visited the Stanley Mills store, markers being kept at the various doors to count the people. This large attendance is attributed to newspaper advertising, backed up by an efficient store service.

LAMPS AS HOLIDAY LINE.

Elora, Nov. 25.—The mild weather had a detrimental effect on the hardware trade in Elora during October, business falling off in a marked degree. The cold snap around the first of November brought a reversal of the state of affairs, however, and trade was brisk in the extreme. A. Hobbs states that he estimates the trade during the first two weeks of November to have been at least 50 per cent. better than for the corresponding period last year. On the whole, therefore, the past season has been satisfactory and fall stocks have been turned over as well as could have been expected. The trade has been good in all lines equally. The building season has been about the average and there has been a fairly steady demand for builders' hardware.

A. Hobbs has at present a fine window display of lamps. The demand for lamps has been good to date, but he intends to feature them as a Christmas line and expects to largely increase the output.

BRASS GOODS POPULAR.

Winnipeg, Nov. 21.—A leading attraction in the hardware department of the T. Eaton Co. store is a display of hammered brass goods made up into jardinieres, umbrella stands, table trays, ash trays, candlesticks, etc. Hammered brass has recently come into vogue and is very popular with the public. It is to be regretted that more hardwaremen do not handle the goods and get a share in the profits that are attached. The goods sell themselves if given display, and can be seen at the best advantage when set out on tables in the store, and in the store referred to fern plants are set in the jardinieres to show the use and beauty of the article.

Lay Bros., Birmingham, Sask., hardware and implements, have assigned. A meeting of creditors is being held on Nov. 27.

R. S. Campbell, hardware dealer, Norwood Grove, Man., is removing to Transcona.

A page ad. which won first prize in last year's contest open to merchants in small towns.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Nov. 24.—At the time of writing, western wholesalers and jobbers are not being rushed with orders. It is admitted, however, that a fair trade is going on in a wide range of specialties and sorting orders, but since the regular builders' hardware trade has discontinued, and agricultural activity has abated, the hardware trade in the West has greatly subsided.

Travelers are all out after Spring business, and although few extensive orders have yet been sent in, there is anticipation on every hand. At the present time the ordering for cutlery, household goods, silverware, chinaware and sporting goods is very heavy. There is no one disappointed in the ordering of holiday goods, as it began early, and will no doubt continue until the holiday date. Skates and hockey sticks are going out in enormous quantities, and with the development of the hockey game everywhere in the West, this particular line will be called for during the whole season.

Owing to the strengthening of the Canadian plate market, stove pipes have been advanced, and tinware is reported very strong. It is believed that tinware will have to be advanced very soon, as reports have come to local wholesalers that the market is going up.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $4.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9½c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 5 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

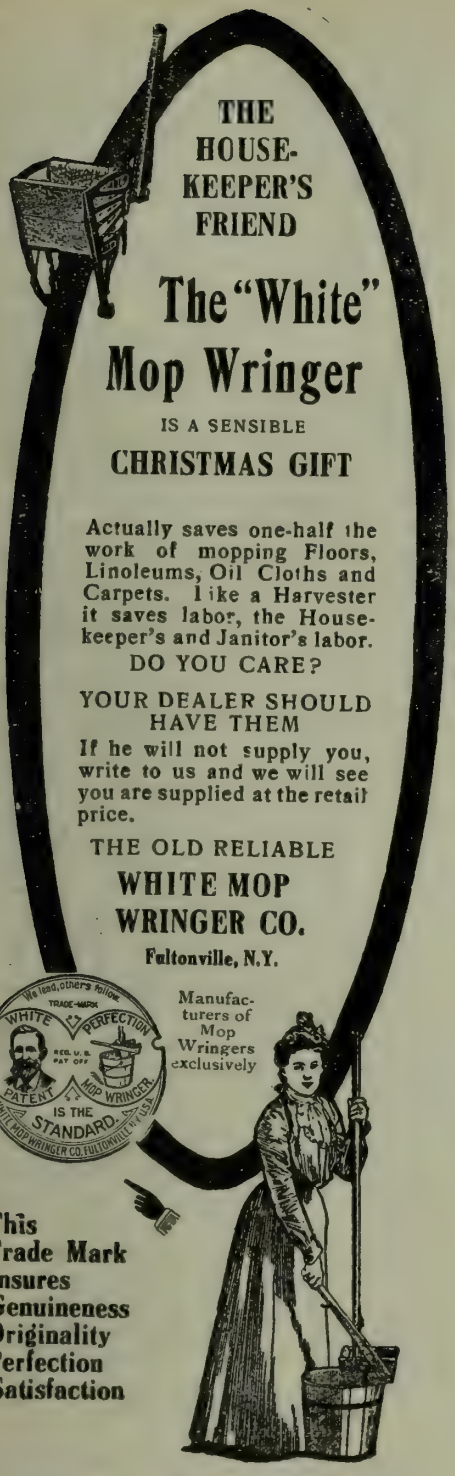
Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

Paints and Oils.

What is true of the general hardware market is true also of paints and oils. The trade is quiet at the present time, and jobbers are having a breathing spell in anticipation of heavy Spring ordering. As a result the present quotations cannot be said to be held firm as far as local trade is concerned, and the condition of the market the world over maintains the quotations here. There has been an enormous rush in all lines during the past season, and jobbers are well satisfied with the trade. Travelers are all out at the present time, and orders are limited for immediate shipment, while some splendid orders have been already received for shipment early in the year.



Linseed Oil—Reports are prevalent that linseed is very strong, and there is no abatement in the oil market. It is believed that a very large quantity of Canadian seed will be sent to the United States, as the crop there was very small. This is an indication that during the next year present quotations will be maintained, and perhaps advances made.

Turpentine—The trade is practically over this season for turpentine ordering, and there is very little stock on hand locally. There are two reasons why the stock is limited, namely, that the goods have all been sent out to every centre of the West, and also that the stock was not large in the first place, as the crop was short this year. The market stands very firm at $1.10 to-day.

Varnish—There is a good demand for varnish as an interior finishing product, and this demand is expected to continue durin the winter.

Putty and Glass—There are lots of putty and glass moving at the present time, which goes to show that building everywhere in the West was very extensive, and carried on until very late in the season. There is no change in the price of putty, barrels are moving at $2.90, cases at $3.15, kegs at $3.40.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 16c; Sunlight, 18½c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

TALKS ON PAINT SELLING

No. 2

Many paint dealers are not making the most of the tremendous opportunities presented by the combination of a well-known and complete line handled on the Agency System.

In ordinary retailing distribution is general and scattered. In the Agency System it is concentrated and the manufacturers and the dealers have a scope for close and united effort not otherwise possible. This is the great difference that so many dealers have overlooked. Those who have seen their advantage have secured a profitable share of the paint and varnish business in their territories.

The Sherwin-Williams Co. has developed the Agency System to its greatest possibilities by a two-fold plan: First, it has pursued a method of publicity that has made its name and products as familiar to the consumer as Pear's Soap or Beecham's Pills; secondly, its dealer policy is strict co-operation and a constant attitude of helpfulness with every individual agent to assist him to develop his territory along the right lines.

We have made the subject of store advertising a special study, because we realize that the closer the store is identified with our general publicity, the greater is the effect in compelling public attention and confidence. The success of the S-W policy is forcefully demonstrated by the increasing number of S-W Agencies everywhere.

Let us explain our plan in detail and you will see the real possibilities of a successful Sherwin-Williams Agency.

Stoves Make a Good Holiday Feature

Methods That Dealers Might Adopt in Pushing Sale of Heating Goods During Christmas Season — Have a Household Goods Department—Kitchenware is Largely in Demand and Should be Featured Early in Month.

There is an ever increasing tendency to give Christmas gifts that will be useful. A gift designed to be helpful to the recipient is more appreciated than any other kind. What is more useful than a stove? A housewife, who has, perhaps, been getting along for some time with a range that has been working badly, would be more than delighted to receive a new one as a Christmas present. If a stove is not needed, there are a great number of useful household and kitchen articles to be obtained in a hardware store—kettles, trays, pots, pans and carpet sweepers. Merchants would do well to handle these lines extensively and keep them before the public.

To feature stoves as a Christmas line requires time. People do not buy stoves until after careful consideration and it is therefore necessary to start the campaign in this branch before the regular season opens. The best possible method of paving the way to a good Christmas stove trade is to send out circulars, pointing out the useful nature of such a gift and the special values that it is possible to offer at the season of the year. The arguments can be rendered extremely plausible as the writer has splendid "talking chances." He is appealing to the common sense of the recipient and pointing out where it is possible to "kill two birds with one stone"—give a useful Christmas gift and provide the home with a comfort bringing stove. It has been found a wise plan to keep a supply of these leaflets in the store and to hand one to every person who enters, starting on such distribution quite early in the season.

Good Opportunity for Sales.

It is often said that the stove trade practically ends with the setting in of winter weather, as people who need stoves are sure to have bought them by that time. There is this counteracting feature, however. Lots of families do not invest in new heaters or ranges in the fall in the belief that the old one will last another winter. After cold weather sets in, they begin to find that the stove, after all, is not likely to give satisfaction. Every day brings accumulating evidence that a new one is needed. After a few weeks of this experience, they will be in a receptive mood for suggestions. Right at the "psychological moment," therefore, the hardware merchant would come along with his Christmas stove offers and the chances would be all in favor of the family embracing the opportunity to put in a new one.

It would be a great benefit to the merchant if he could turn over his stock in this way. Not only would there be the profits to be reckoned but he would be saved the inconvenience, financial and otherwise, of carrying the stock over until the following year.

Display the Stove Stock.

Of course a stove is an expensive article for any household to purchase at Christmas time, when there are so many demands on the family purse and hard work will be required to effect sales. Not only should an early educative campaign be conducted, but liberal provision would have to be made for display room in the store.

If a merchant has given up considerable store space to special holiday lines, he will probably find it hard to locate a place to suitably display the stove stock. Nothing is impossible, however, if a little ingenuity be displayed. In one instance, a Western Ontario hardware man determined that he would push his stove sales, but found that, economize on space as much as he liked, no room could he find in his store for an adequate display. Nothing daunted, he cast around and finally decided to utilize a room at the rear which was used as a tinsmithing shop. This he cleared out and arranged for a showroom of stoves, kitchen utensils and general household articles. No pains were spared in making the new department neat and attractive. Entrance to the store was obtained by means of a wide door and this was very elaborately decorated with evergreen and Christmas favors. Over the door was a large sign: "See our stock in the next department." In order to make sure that all who entered the store paid a visit there, placards of large size were placed in conspicuous positions. Some read as follows: "Keep right on. There is something worth seeing in the department at the rear of the store."; "For Useful Presents inspect the stock in our household department at the rear." Practically all his customers followed the placard precept and had a look at the stove department. That season he disposed of a number of stoves and had a very brisk sale of kitchen utensils.

Making Advertising Count.

A share of the newspaper advertising space taken should be given up to this branch of the trade. It can be used very effectively. In the last issue of Hardware and Metal a number of Christmas hardware advertisements were reproduced and in two of them stoves were very prominently featured. This example is well worth following.

An effective method would be to use an illustration of a range with reading matter, headed, "Cook your Christmas dinner with a new ——— range. Why should any woman spend the best part of the holiday in a hot kitchen, trying to cook dinner with a defective stove? A ——— range does the work for her. It would be a Christmas gift that mother would appreciate."

An offer of a special rate, coupled, perhaps, with a premium in the shape of some new pots, pans and kitchen utensils, would make the proposition a tempting one. The offer might even be extended of a turkey with every range purchased during the Christmas season.

Push Sale of Useful Articles.

Even more can be made of kitchen utensils. They constitute an inexpensive but very useful line for holiday giving. If proper attention is paid to this line, a brisk business will be done. The kitchenware trade should be started, however, a little earlier than the regular Christmas lines. Around the first of the month "a housewife's fancy lightly turns to thoughts of puddings, mince pies and such like things." She will realize then the need for newer and more up-to-date pans, steamers, cake dishes, etc. A window display of cooking utensils about the first of the month would be one of great interest to house keepers. The writer remembers a window arrangement which attracted much favorable notice some years ago. A table was placed in the centre, spread with a snowy white cloth. On it was displayed a fine big turkey, flanked with a round, rich pudding, luscious pies, a beautifully frosted cake and a number of other recognized Christmas edibles. It constituted one of the most tempting displays possible, and aroused pleasantly anticipatory visions of the coming festive season. Above the table was a large card with the announcement:

> TO COOK LIKE THIS REQUIRES PROPER UTENSILS.
>
> Look over our stock and find out what you need. We are offering special inducements for Christmas purchases.

The rest of the window was devoted to a display of all the latest ideas in granite, enamel, tinware and aluminum utensils. The dealer in question found that his ante-Christmas trade exceeded in volume that done in kitchen goods during the season proper.

Walter H. Cottingham, President of the Sherwin-Williams Co., Cleveland, and at one time a clerk in the Peterboro' Hardware Co.'s store, has written his regrets at being unable to accept the invitation to address the convention on the subject of "Price Maintenance," owing to arrangements already made to be elsewhere at the time of the Ontario Convention.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

Busiest Season of the Whole Year is Ahead

What to do Next Month—Attention Should be Concentrated on Christmas Trade—Make Store Attractive and Endeavor to Secure Ideas for Original Windows—Some New Plans for Drawing Trade—Have an Efficient Staff and Get Extra Help Early in the Month.

During the month of December hardware merchants should devote their attention almost exclusively to the Christmas trade. Some hardware dealers do not make any effort to secure special holiday business and seem content to go along with the ordinary lines right through December. They are missing a golden opportunity to turn over a neat profit and to appreciably supplement the trade connection of their stores.

The Yuletide season, from the business standpoint, begins about the first of December. The progressive merchant will, by that time, be fully prepared, with his stock laid in, his publicity plans mapped out and his store arrangements and decorations devised. It is not wise to leave the necessary preliminary planning later than the first week in December. If not ready by then, the merchant will find himself plunged into the holiday "vortex of trade" without any definite basis to work upon and will be compelled, through sheer lack of time, to handle the business in a haphazard way, as he best can.

The merchant should, therefore, begin the month by at once mapping out a definite plan of campaign. No detail of the business should be neglected. A wise general provides for all contingencies beforehand and knows just what he intends to do. The merchant, who is a general of commerce should show the same foresight.

A prime consideration is the arrangement and decoration of the store. The Christmas spirit is awakened and fostered largely by the bright and cheery appearance of the stores with their handsome array of presents and general suggestion of Yuletide cheer. Nothing is so potent to lighten the spirits and loosen the purse strings as a store filled with Christmas goods; and the merchant who desires to draw trade must have his establishment decked out in festive attire, with an attractive stock to display. Too many hardware dealers neglect to cater to the public sentiment which demands brightness and suitable decorations at Christmas. Some are content to go through the season with windows displaying nothing more attractive than gloves and mitts, chains, lanterns and goods of a kindred nature.

The best methods of store arrangement and decoration differ, of course, with every establishment. Each merchant must proceed along lines adapted to the stock he is carrying and his facilities for display. It is essential, however, that the Christmas lines should be featured, even if certain other goods have to be temporarily displaced. During December, there will be little call for heavy hardware, outside utensils, etc., and trade would not suffer if these goods were for the time relegated to the background and the additional space thus obtained devoted to toys, cutlery, cut glass, brass goods and the other attractive Christmas lines carried by progressive hardware dealers. Not only will sales be quickened by this, but the whole appearance of the store will be improved. Holly, mistletoe, floral bells and other typical decorations should be employed to beautify the interior.

Try for Originality.

While still effective, most Christmas ideas and schemes, are to a certain extent hackneyed and the merchant who strikes out along new lines and devises original methods will find his efforts well rewarded. A case is recalled where a hardware dealer erected an arch of evergreen about the middle of his store and used both sides for the display of holiday goods. This proved not only an effective and original way of showing goods but was a space saver, allowing extra display room.

Interior arrangement should not stop at measures of beautification. The display of neat placards over different sections, with reasons for purchasing certain articles, are found effective. They are always read and will often induce people to take an interest in some particular line and look over the stock.

Pay Attention to Windows.

The window display is one of the most important features of the holiday campaign, demanding, perhaps, more careful attention than any other subject. People go shopping before Christmas with pretty much the same idea as the mining prospector. They intend to look around and see what they can strike. Where indications look favorable, they decide to investigate. The "indication" is almost always the store window. It draws first the attention, then the people themselves into the store.

Recognizing the importance of the window, then, the merchant should at the first of the month arrange some plan by which all salable goods will be displayed at some stage of the season. Some lines will require more space and attention than others, but all goods which are counted as Christmas varieties should be shown once. More important still, he should cast around for ideas.

Originality is the keynote of successful window dressing. The man with ideas is the man who is bound to draw the trade.

Making Advertising Effective.

Advertising should occupy much of a merchant's attention during December. An attractive store, a well assorted stock and striking windows are trade winners. A merchant might have all these and yet, if he did not advertise, his whole campaign would be handicapped. There is a certain percentage of trade which is reached only through printed matter—people who prefer to look through the advertisements in the newspapers and carefully scan all catalogues that come to hand before going shopping at all. This class of buyer likes to start out equipped with a knowledge of goods and values and the merchant who does not advertise stands little chance with them.

Circular advertising—a very effective method—should be done early in December. In this connection it is essential to get in on the ground floor. "First impressions are best" and many a customer will form conclusions from the first line submitted to their attention which subsequent advertising by rivals will not supplant. Circular advertising, therefore, should be done early.

Newspaper space during the holiday rush should be used generously. So much advertising is done by other merchants that a modest sized advertisement, unless exceptionally well written, will attract little attention. It is next to impossible to convey any adequate idea of your stock in restricted space. A good-sized advertisement, well written and well illustrated, will not fail to bring results. The value of illustrations should never be lost sight of.

Methods of Developing Trade.

In entering the holiday season, a merchant knows that he must expect his competitors to be just as active and wide awake as himself. They can be depended upon to adopt every available means of drawing business. He should be prepared then to work hard to find some new methods of drawing trade that will give him an advantage over the opposition. Many ideas have been taken up, all with more or less success. Contests of all kinds are effective. The offering of premiums with every purchase of a certain line, is found to augment sales. Neither idea is new however.

Inducements That Count.

The good-will of the public can be propitiated most effectively, however, by efficiency of service and a willingness to oblige in certain respects. For instance, be willing to store goods purchased early in the season until such time as the customers want them. Be always ready to order goods that you have not in stock, but which you know can be obtained. Make a point to attend to such matters promptly.

During December, a larger staff should be employed. There is certain to be a great increase in trade and merchants should be prepared to handle it with regard to the convenience of the customers, as well as the increased volume of trade.

No. 36

PUSHING SPECIALTIES.

"What can be done with paints at Christmas time?" asked an incredulous merchant the other day, when told by a traveler that he should not neglect his paint department at this time of the year, "People do not give away tins of paint as presents." "Perhaps not," replied the traveler, "but from what I know of the utility of some things that are given, it would be a very good thing if they were."

There is a lot of truth in this rejoinder, although it was not meant very seriously, but if we remove paints from the category of presents there is a wide field for enterprise around this time in the direction of household specialties. Is there any other period of the year when the house should be brighter than at Christmas? Is there any other period when it is more necessary that the furniture, radiators, baths, washbowls, cupboards and floors should look their best? With the house full of guests and the place decorated with holly, the housewife naturally wants the house to appear to the best advantage. Is there not a wide field here for the enterprising merchant?

Can a dealer say there is no scope for stains, enamels, bronzes, aluminums, etc., who has failed to demonstrate to the women of his district how easily they can furnish up their houses, and appurtenances, with the aid of any of these lines? There is nothing more convincing than practical demonstration. Take a chair that has been knocked about. Revarnish one half of it, and show it in the window. State on a card how much varnish would be required to complete the whole job, and the cost of the tin, and brush. There is a large majority of people, especially among the women folk, who have no conception how a coat of paint, etc., alters the look of an article that has been badly knocked about. Many a chair has been thrown away because of this lack of knowledge.

The dealer need not confine his display to chairs alone. One merchant we know of, while having his store redecorated, left half of the floor of his window unpainted, while the other looked resplendent in a coat of new paint. A card was placed across the floor, bearing the following words, "Which looks better?" The window was only left like this for a couple of days, but the merchant estimated that it brought him in a large amount of floor paint business.

There is no time of the year when a

ELASTILITE

DEALERS can handle this varnish best. It covers so many kinds of work so perfectly---inside and outside---that it gives satisfaction to all types of customers. This helps the dealer's business.

For highest class trade "ELASTILITE" will give good satisfaction. It brushes well, flows well, holds its finish.

THE MONTREAL ROLLING MILLS CO.

MONTREAL

dealer can say, "There is no demand for paint." Interior paints and specialties reign supreme when outdoor painting is impossible. A farmer, for instance, leaves the interior of house severely alone when the weather permits him to be out and about, but when confined indoors he has the leisure to fix things up. And the ordinary business man is in the same box. It is the winter time that he spends most of his energy around the house, and, therefore, the merchant reaches him at the right moment by pushing at this time interior decorating paint and specialties.

But the dealer must throw his heart in the whole thing. He must talk convincingly and with enthusiasm. Whether he is pushing out-of-door paints for the fall, or indoor paints and specialties for the winter months, he must do so in a manner that convinces his customers.

PAINT AND OIL MARKETS

MONTREAL.

Nov. 25.—The markets have been firm but unchanged during the week. The white lead grinders have adjourned the question of prices until next week, but no forward delivery is being taken. The linseed oil situation is unchanged. There is still the same old scarcity, and the tension is being felt all the way round. Prices have been advanced in the turpentine area, and this makes the market very firm here, and an advance is not unlikely.

Trade is very good for the time of the year, and some satisfactory sorting up orders have been received. Some merchants are buying ahead anticipating higher prices on account of the prolonged bulling movement in raw materials. There has been a strong run on specialties for indoor work, and enamels, stains, bronzes, stove paints, etc., are moving well.

Turpentine.—Turpentine is very firm, but unchanged. Reports from the primary markets show that prices are in for another advance, and the market is firm in sympathy. There is a fair demand for the time of the year, with supplies in good shape. We quote: $1.02 to $1.05.

Linseed Oil.—The market has remained unchanged despite the high tension that is now being felt. There is little linseed oil in sight, and holders part with reluctance. Buying is fair although no one is taking more than they can possibly use. We continue to quote: $1.08 to $1.10 for raw and $1.11 to $1.13 for boiled.

White Lead.—The meeting of grinders called for this week was postponed and the matter of fixing prices will be held over until next week. The market continues very firm in sympathy with linseed oil. There is fair buying although it has dropped off some. We continue to quote $6 for small lots.

Varnishes.—A good call continues for varnishes, especially from the larger users who are taking fair quantities of bulk varnish. Household lines are also in good request and the market seems in very fair shape.

Putty.—The demand has fallen off somewhat but there is a fair call still obtaining. We quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Toronto, Nov. 25.—The feature of the market this week was the advance in dry gum shellac. Owing to the shortage in India, the demand has gradually been exceeding the supply and an increase of 4 cents was made this week in practically all lines. Further advances are predicted.

The general tone of the paint and oil market is dull. Putty has shown considerable activity and some jobbing houses have found the demand for white lead strong, but the slackness in other lines more than over-balances this.

Reports are to the effect that the prices of linseed oil and turpentine are likely to remain firm for some months at least. Advances in that time are not impossible, but hopes of an easier market have now been practically abandoned.

Shellac—The lowest prices for dry gum shellac in many years have prevailed recently, and the natural tendency now is upward. This trend is quickened by reports of a great shortage in the crop in India, where the base of supply is located in the Himalayan Mountains. From an authentic source, it is learned that the India crop is not likely to reach half of the average yearly output, and the demand, as a result, is bound to exceed the supply. Prices are now quoted 23c to 25c for T.N., and 28c to 30c for the better grades of gum shellac, a uniform increase of 4 cents. Jobbers look for higher figures in 1911. The low prices have stimulated the demand, large manufacturers of hats, shoe dressings, and electrical supplies having availed themselves of the opportunity to purchase at a low figure. This of itself has had a tendency to put the market up, without the added stimulant of a shortage at the base of supply.

Linseed Oil.—The situation presents no new features. Demand has fallen almost to the minimum, but this has not had any effect on the price, which remains persistently firm. Quotations range from $1.10 for raw and $1.13 for boiled to $1.12 and $1.15, respectively, for single barrel lots.

Turpentine.—Reports from the south

B.H. "English" Paints Please the Customer AND Increase Your Sales

Your short-sighted competitor may think he can make more money by selling paints that require frequent renewal, but you know better. The longer-lived paint you sell, the more you can sell. This is because your pleased customers not only send their friends to you, but themselves decide to do painting previously not contemplated.

B-H "ENGLISH" Paint, aided by tactful suggestions on your part, will renew and preserve your customer's walls, roofs, etc., which have long needed a good paint.

You can prove that it will save him money. The base of our paints is the best in the world,—70 per cent. **Brandram's B. B. Genuine White Lead** and 30 per cent. Pure White Zinc. The other ingredients are also of the very best.

In the long run, what is good for the customer is good for you.

Write to-day for proposition and hints to the trade.

MURESCO

TILELIKE

Your average customer is a very house-proud person, and will welcome your suggestion to purchase these well-known lines with a view to freshening up paint and wood-work for the coming Xmas festivities.

As a Wall-Finish . . .

MURESCO

stands on a plane by itself. Not only does it make more material, but it works more easily, covers better, goes further and produces more uniform, clear and beautiful effects than any other wall-finish on the market.

Can be applied with good effect by the most inexperienced painter.

TILELIKE

is a varnish and stain combined, which requires no stirring and is uniform in color from start to finish. Admirably adapted for the amateur's use, on all kinds of interior work, especially where the wear and tear is considerable. Will not hide the grain of the wood. Made of pure Kauri Gum and contains NO ROSIN.

EIGHT COLOURS, and in flat ground colours—black and white.

Give these lines a prominent place! They will surely sell in the next few weeks. Send for Colour Card and Prices.

Benjamin Moore & Co.
LIMITED
West Toronto
New York Cleveland Chicago

are not at all suggestive of relief in the turpentine market. Producers are rushing their supplies on the market to take advantage of the high price now obtainable and there is every evidence of continued firmness in price quotations for some months. Difficulty is being experienced in securing sufficient turpentine just at present. Locally, there is little demand and the price is still $1.05. One jobbing house reports that a great many contracts for painting are being held back on account of the condition of the market. Wood turpentine is quoted at 80c per gallon, with 85c in tin cans.

White Lead.—Reports differ as to the condition of the white lead market. Some jobbers report a tendency toward slackness in the demand but others have not yet felt any decrease in business. The last steamers are leaving Montreal this week so it is not expected that active conditions will be kept up much longer. Quotations range from $5.90 to $6. The expected increase has not yet materialized.

Putty.—The demand for putty is heavy. Now that the finishing up stage in building has been reached, putty is being used freely but so far the increase, confidently predicted by local jobbers last week, has not gone into effect. Standard putty is quoted at $2.20, bulk in casks; in 100 lb. drums, $2.50; in 25 lb. drums, $2.60; bladder in barrels, $2.70. Quotations for pure putty are: bulk in casks, $2.50; in 100 lb. drums, $2.80; in 25 lb. drums, $2.90; bladder in barrels, $3.00.

Rosin.—The rosin situation is a trifle easier in the south, but so far this has not affected the local market. "G" rosin is quoted at $3.25 per 100 lbs. There is a fairly brisk demand.

Petroleum.—Canadian prime white coal oil is quoted at 13c, American water white at 14½c and Pratt's Astral at 17c.

HIGH PRICES WILL CONTINUE.

Back from his trip to Jacksonville and Savannah, E. Fielding, Toronto, has interesting news to give with reference to the oil and turpentine markets. He does not hold out any hope of better prices in the immediate future, and gives rather startling facts with reference to the depletion of the supply of trees in the turpentine areas.

"I attended a meeting of the producers of spirits of turpentine from live trees," he stated to Hardware and Metal, "and endeavored to ascertain if there were any possibility of the present extraordinarily high price being reduced within the next three months. I regret to say that this does not seem at all likely. All the producers who attended the meeting reported that the supply of turpentine produced this year was being rushed on the market, as they were desirous of taking advantage of the prevailing prices.

"At the present time the gum is secured only by scraping the part of the tree that is cut in the early part of the year, and from which the turpentine flows freely during the warm weather. At the present time, and for the next two months it stiffens on the wood as soon as it comes out and is only secured by colored laborers scraping it. The producers cannot expect to get anything like the same quantity of spirits of turpentine.

Depleting the Trees.

"On my trip I saw extraordinary evidence of the efforts put forth to secure all the gum that was possible. I saw in many places trees not more than six inches in diameter, where one-third of the bark around was cut away to allow the gum to escape. This is an indication that the turpentine industry is approaching a very critical time, as the tree, after being cut in this fashion, cannot possibly live more than from three to five years.

Securing Wood Turpentine.

"The purpose of my visit was also to learn something of the methods by which they secure spirits of turpentine from trees that have been cut down and partly used for lumber or timber. The stump part, and portions of the tree not used for lumber, are cut up like cordwood and enclosed in cages made of steel slats, this cage being put into a steamer and the gum extracted in the form of vapor, which passes into a still. The parties that I met, who are engaged in this industry, claim that they are only able to make a profit while the ordinary gum turpentine remains at the present figure. It is quite possible, therefore, that this industry will be continued for some years; up to the present year all producers have been working at a serious loss. One manufacturer assured me that his experience had cost him $25,000.

"Another method is to split the wood up very fine, and put it into a retort, where the heat is more directly applied, the gum escaping partly in the form of turpentine, and partly as tar. Under this process, the odor is more objectionable, and many concerns have been compelled to cease work. At the present time there are only one or two known to be engaged in anything like successful operation.

"I exhibited some quotations that had been given to Canadians from Cleveland. The sale of the product thus offered is prohibited in Ohio, but dealers declare that they do not care while Canada is open to them."

Mr. Fielding believes that Canada is far superior, from an agricultural standpoint, to any of the states that he passed through on his trip.

Every man and woman on earth has some good quality, if you'll only take the trouble to look for it.

More than 1900 homes in Indianapolis have been mortgaged during the past year in order that the owners might buy motor cars, according to a statement in the Indianapolis Independent.

Build up a trade on **the repeat order** basis by recommending

"International" Varnish Products

A majority of Hardware Dealers *are* doing that.

Don't take it on our say-so, but *investigate* for yourself—

And you'll find out that a *big percentage* of Canadian Hardware Merchants *feature* "International" Products.

There are *more than a few reasons* why they should. Take

ELASTICA

for instance—the floor finish that's practically imperishable—The only truly elastic finish on the market—the finish that wears like nickel steel.

Elastica does not mar, scratch, white or spot.

It dries dust free in four to six hours and hardens over night.

Elastica Nos. 1 and 2 are used for Exterior and Interior work respectively.

Let us know your varnish and finish requirements and we'll give you solid reasons why you should always specify International Products.

All International Products are sold in full Imperial Measure Cans.

Varnishes

Do you realize that we spend more money each year in publicity advertising on ***Green Label Varnishes*** and ***Jap-a-Lac*** than is spent by all of the varnish manufacturers in the United States and Canada for this kind of work?

Think what it means, and the enormous business we must produce to be able to make this statement. When we tell you that 50,000 dealers and 400 jobbers handle our goods (exclusive of foreign business) it will give you some idea of how we can afford to spend this enormous sum each year in advertising.

We feel that every dealer in the country ought to buy ***Glidden's Green Label Varnishes*** and ***Jap-a-Lac.*** Why? Because the demand is being created by us with our money, and HE can reap the benefit if HE wishes.

Our advertising is educating the public to use varnish. Thousands are told of the uses to which it may be put. People are using ***Jap-a-Lac*** and varnish who never knew such useful and necessary things existed before we advertised them.

We have sent millions of people into the stores to ask for ***Jap-a-Lac*** since we started to advertise ten years ago. This is business we have created for YOU, as well as for ourselves. All we ask in return is your co-operation.

The combination ***Glidden's Green Label Varnish*** and ***Jap-a-Lac*** proposition shows more NET PROFIT than ANY OTHER varnish or colored varnish proposition on the market.

An advertising campaign, as extensive as ours, on articles showing more profit TO YOU than unadvertised lines, is worth your serious consideration. THINK IT OVER.

We have never talked quality, because the good dealer knows the quality is there; to all who doubt this, let them put our goods on a board against what they believe to be better, and weather-test it for two months---that will settle all talk to the contrary.

Don't forget:

FIRST—We spend more money in publicity advertising than all other varnish manufacturers in the world.

SECOND—We can show you a greater net profit on our goods than on anything else you can handle in the varnish line.

THIRD—No manufacturer is putting better quality into a can of varnish than we are.

FOURTH—We can PROVE every statement we make. Will you LET us?

Glidden

The Glidden Varnish Co.

Toronto, Ont.

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	"Taxite"
International Varnish Co, Ltd., Toronto, Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapco"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	"Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co, Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

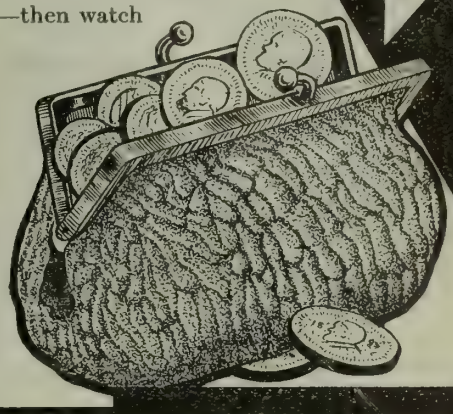
This is the Paint That Puts Profit in your Purse

No paint can put profit in your purse so long as it stays on your shelves or in your store. Some paint will only put profit in your purse once, and then the buyer never comes back. What you want is the paint that will bring the buyer back — so that your profits next year, the year after and for years to come, will grow larger each year.

Martin-Senour Paint

100 PER CENT PURE



The **quality** paint — the paint that gives lasting satisfaction. Sales increase and profits grow because the years of service show the purchaser the economy of buying the paint that wears the longest — that looks the best — that goes farther. This is just a hint, but a word to the wise dealer ought to make many more fat wallets. Write today for the agency—then watch your profits grow.

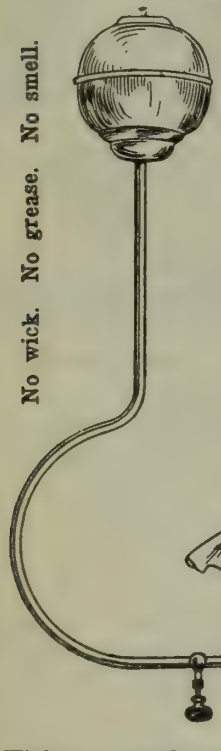
HE MAPLE LEAF
"IMPROVED RACER"

CROSSCUT SAW



This saw is different in its construction to other crosscut saws, being made with the slanting gullets, which discharge the saw-dust more freely and allows every tooth to cut fresh timber. It is a perfectly true tapered saw, being ground 4 gauges thinner on back than tooth. This allows saw to run free and easy with very little set.

The trade-mark "MAPLE LEAF" is a guarantee of quality, and every saw is thoroughly tested and examined before leaving our factory.

WRITE US FOR CATALOGUE AND PRICES.

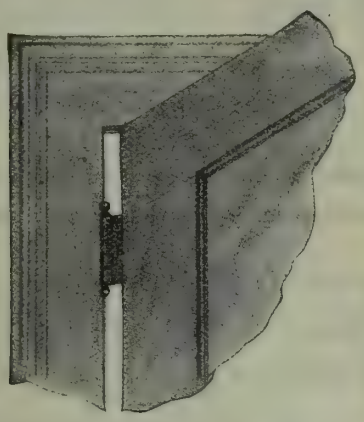
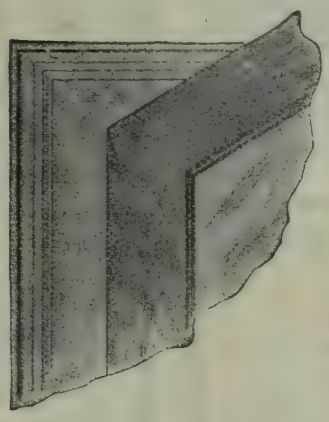
Ask Your Jobber for Cane's



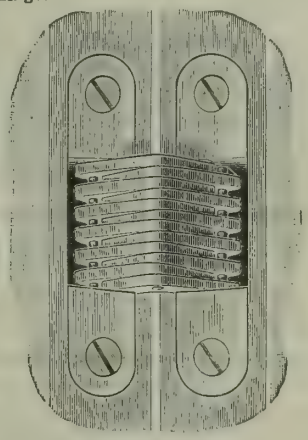
The Wm. Cane & Sons Co., Limited, Newmarket, Ontario

Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto



PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.

COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years.



The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge.

Invisible Hinge as it appears when door is open.

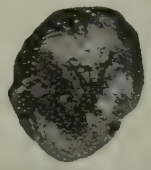
No. 101, suitable for wood ½" to ⅝" thick (furniture work.) Will carry a door 3' x 18".
No. 102, same as above, but has square corners.
No. 104, wood must be ¾". Will carry a door 5' x 2' x ¾.
No. 108, wood must be 7". Will carry a door 6' x 30" x 1¾.
No. 112, wood must be 1⅛" to 1½". Will carry a door 6' x 2' 6" x 1½".
No. 116, wood must be 1⅝" to 2½".

STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

UMC



HOLLOW POINT BULLET

A NEW FEATURE IN METALLIC AMMUNITION

The hollow point increases the shocking and killing power of the bullet because of the greater mushrooming qualities over the solid lead bullet.

HOLLOW POINT BULLET
(Before Firing)

HOLLOW POINT BULLET
(After Firing)

SOLID BULLET
(Before Firing)

SOLID BULLET
(After Firing)

.44 CALIBRE

Note the cross section of the unfired hollow point bullet and its mushroomed appearance as compared with the solid bullet after being fired. Sportsmen can increase the efficiency of their rifles and revolvers in game shooting by using hollow point bullets at a trifling added cost over the old solid bullet.

UMC hollow point lead bullets come in the following sizes:

.22 Short, Hollow Point, Black and Smokeless.
.22 Long, Hollow Point, Black and Smokeless
.22 Lon Rifle Hollow Point, Black and Smokeless.
.25 Stevens, Hollow Point, Black.
25 Stevens Short, Hollow Point, Black
.32 Winchester, Hollow Point, Black and Smokeless.
.38 Winchester, Hollow Point, Black and Smokeless.
.44 Winchester, Hollow Point, Black and Smokeless.

INCREASE YOUR SALES BY BEING THE FIRST TO INTRODUCE THE HOLLOW POINT BULLETS IN YOUR CITY

GREENING'S COW TIES

all the parts and fittings being made of proportionate strength.

These Cow Ties are made from the famous Greening Steel Chain, which leads all others in point of lightness, strength and handsome appearance.

You'll find many pointers in your Greening Catalogue for increasing your trade! Study it carefullly.

The B. Greening Wire Co., Limited

Hamilton, Ont. **Montreal, Que.**

BRITISH PAINTS

The Superiority of British Paint is Universally Acknowledged

We handle a first class line of Oil, Dry and Waterproof Paints, also Putty and White Lead of British manufacture.

We can give you better prices on these goods than any paint house in Canada and at the same time the quality of these paints is far above the average.

If you are looking for a means to increase your business we can interest you—why not take up the matter *now* and investigate? All enquiries receive prompt attention.

Manufacturers of

COLD ROLLED STRIP STEEL

For Deep Drawing, Blanking, Forming, all kinds of Bending. Has Bright Finish for Nickel Plating, Rolled accurate to Gauge. Made in all tempers and in any thickness from .002" to .250

"IMPERIAL" ANTI-FREEZING WINDMILL

FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary Always fitted with 1¼ flanges unless other size is specified.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

CONGO
NEVER LEAK ROOFING
The GUARANTEED ROOFING

Congo on Maryland Terra Cotta Company's Buildings—Baltimore, Maryland

We don't suppose you care a rap what Congo is made of—what interests you is *how long it is going to wear.* What it is made of interests us because we give with every roll a *Surely Bond Guarantee,* the like of which no other manufacturer has offered.

Herewith are a few of the features that make it possible for us to guarantee Congo 2 or 3 ply for *10 years.*

It never gets hard or brittle. It never breaks or peels off. It is giving as perfect satisfaction in Europe, India and Australia, where we ship thousands of rolls, as in America.

Congo doesn't run, rot, buckle up or shrink.

The caps, nails and cement which we furnish free, are the best money can buy.

We don't use the old style *tin caps* for Congo, but *galvanized caps* which never rust.

You can satisfy yourself as to its lightness, pliability and wonderful waterproof qualities by a little investigation. As to its wearing properties—we guarantee them. Can any reasonable man ask more? Further information on request.

The IRONCLAD *Alarm*

From now until Christmas all jobbers will ship Ironclad alarms in special Christmas Holly Boxes.

I'ts a box that'll make people open their eyes. It's a clock that will make your trade sit up and take notice.—It can't be knocked down, it can't be knocked out, it rings to beat the band.

We'll print your name on dials on a twenty-four lot order, we'll add a full window display if you can use one.

Rings 35 seconds, can be shut off at will. Height 5 inches. Weight 2½ lbs. Packed 12 in a box with advertising matter. Names printed on dials in lots of 24.

Disston Superfine Files

The genius of the Disston organization is strikingly manifest in this department of the great industry.

The superfine file building is perfectly equipped for the exceptionally fine class of work.

In this department we employ the most skillful workmen in America—many of them with half a lifetime of special training in our own establishment.

We make all the steel used. It is unquestionably the best steel in the world for superfine files.

Every file fully guaranteed.

A Section of the Superfine File Department

If you have work of any kind wherein close, smooth filing is required, by all means use a Disston Superfine.

Canadian Works, Fraser Ave., Toronto, Ont.

Our Business for the Year 1910 the Largest in our History

In our January announcement to the trade we predicted the largest year's business in our history for the year 1910, and we can now say to our customers and the trade generally that our prediction has been more than fulfilled, and that the present year marks the greatest progress and most unexampled demand for the Bissell sweeper in all its history. Every month of this year so far shows a large increase in our business over any previous year, and this, too, in the face of murmurings of general dullness throughout the country.

Facts are significant, as well as stubborn, things. Our new BALL BEARING line has revolutionized the carpet sweeper business, and under a rigidly-enforced policy of fixed retail prices, guarantees to every dealer, large or small, a good margin of profit.

If you have neglected to place your order for BISSELL sweepers for your Holiday wants, wire your order at our expense, and the goods will be shipped on the day your order is received.

BISSELL CARPET SWEEPER COMPANY

COMMUNITY SILVER

32-Piece Mahogany Chest outfitted with SHERATON

COPYRIGHT, 1909, BY THE STANLEY RULE AND LEVEL COMPANY

Stanley Tools

THE "BAILEY" Iron Plane has been the standard for over forty years and during that period has always maintained the leading position. From time to time other Iron Planes made in imitation of this celebrated plane have appeared upon the market. These imitation Planes are often put up with numbers and labels designed to make the consumer think that he is obtaining the "BAILEY" Plane. We are the sole manufacturers of the "BAILEY" Plane. Every Plane has the name "BAILEY" and the number cast in the bottom, and the name "STANLEY" is stamped on each cutter. Always insist that your order be filled with planes made by the Stanley Rule & Level Co., which carry with them a guarantee backed by a Company who have been manufacturing Carpenters' and Mechanics' tools for over half a century.

We are now prepared to ship from our Canadian Works all sizes of "BAILEY" Bench and Block Planes, also Bit Braces, Spoke Shaves and Pocket Levels. As fast as practicable we expect to increase the output of this plant to include other tools shown in our catalogue.

Address all communications to:

EVERY TOOL GUARANTEED

PLYMOUTH ROPE

Do you wish to please your customers?

It sometimes takes only a small thing to do it. Try this way: simply stock and offer them a thoroughly first-class brand of rope. We suggest

PLYMOUTH ROPE
"The Rope You Can Trust"

PLYMOUTH rope is made in one grade only, and we take pride in making that the best in the world.

PLYMOUTH Manila is what your trade needs for wear and long service. It won't wear out like common cheap rope.

PLYMOUTH Sisal rope is made in the same workmanlike manner as PLYMOUTH Manila, and is better than the second-quality Manila rope being offered to the trade.

Write for folder, "The Rope You Can Trust."

Ask your Jobber for PLYMOUTH.

Don't monkey with trashy fuel for automobile, sleigh, carriage or wagon heaters

It doesn't pay. Every customer who buys fuel bricks from you that do not turn out well has less confidence in you for the future. You can't build a larger business on that kind of deal. When you buy heater fuel you do not want fuel that is good one shipment and poor the next—you want fuel that can be depended upon to be right every time—fuel that always burns and gives the maximum amount of heat without flame or smoke or smell. There is but one fuel brick made which **always** meets those requirements and that is **the celebrated**

CLARK COAL

Every brick is guaranteed to yield 25 per cent more heat than any other fuel brick on the market. It is the one great heater fuel.

OUR ABC FUEL BRICK is a second grade heater fuel that we guarantee to be the equal of any brick on the market outside of our ***Clark Coal.***

CLARK HEATERS are each guaranteed to please the user or no sale. They are made right, are widely advertised and sell faster than any other make on the market.

Practically every jobber of importance in Canada carries this line. Now is THE time of all the year to sell these goods. Order some today.

A Self-Selling Range

is the range most worthy of your attention. And that is just why you should be handling "Monarch Diamond" Planished Steel Ranges. Their good points are so numerous, and so plain to be seen, that little or no argument is required to make sales.

MONARCH DIAMOND

HIGH GRADE THE DIAMOND LINE RIGHT PRICE

Planished Steel Ranges

burn any kind of fuel. They have large, roomy ovens that cannot warp or be in any way affected when in use by cold air currents along the floor or elsewhere. The BODY is THREE-PLY—two layers of heavy steel, between which is a layer of asbestos. The FIRE-BOX is splendidly proportioned and is fitted with easily-removable duplex grate bars. The Front Key Plate is hinged, allowing access to fire for broiling, etc. Reservoir holds three pails of water, is made of heavy planished steel retinned inside. Fire Door is extra large; takes in rough wood, it is made double, outside nickel which does not tarnish.

No matter what line you have been handling, it will pay you to look into the "Monarch Diamond" proposition.

These prices are F. O. B. our factory at Sarnia, or if you prefer to any point west of Toronto add 2c per rod, and east of Toronto add 3c per rod, and we will pay the freight to Old Ontario points only. All fence in 20, 30 and 40 rod bales. Our terms are cash with the order (send Express or Post Office Order.) To dealers who order in full car loads (about 3000 rods assorted styles) upon arrangement may have shipment made, draft attached to the Bill of Lading and pay on arrival of goods.

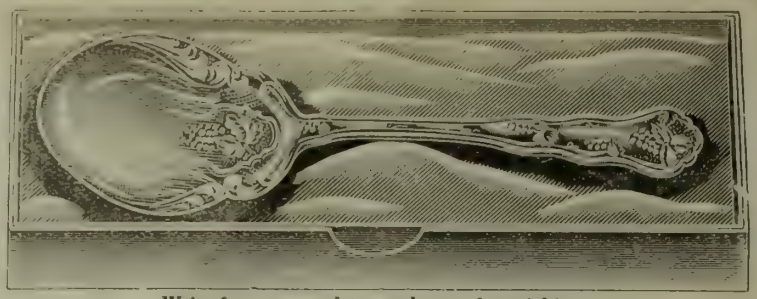
SUTHERLAND FENCE COMPANY, Sarnia, Ont.

When you think of Metal Ceiling, think of "Galt."

Dealer, House-owner and Architect all favor "Galt" Art Metal Ceiling

Ernest R. Beckwith, C.E., architect on this job, says of the goods supplied:—

"Besides being one of the prettiest ceilings I have ever seen, it was exceedingly easy to erect. In fact, most of the work was done by unskilled labor owing to the regular tinsmiths being busy.



The special material made for the stage-front was accurate in detail and satisfactory in every way."

If you want to please your customer and his architect; if you want to build up a business in Metal Ceiling and if you want to make the most money from your metal ceiling work, send your orders and enquiries to

The Galt Art Metal Co., Limited, Galt, Ont.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

MONTREAL

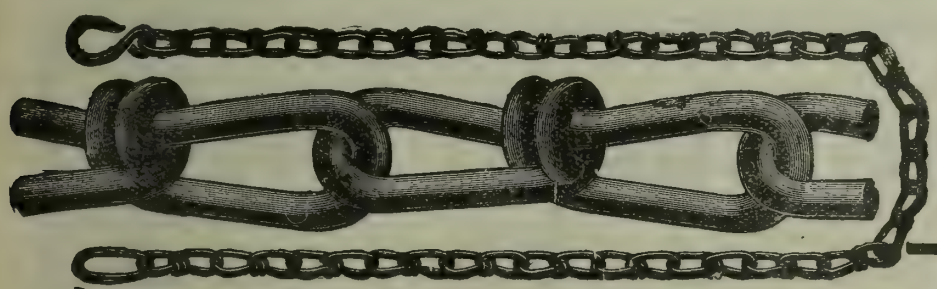
Suggest this for a Xmas Gift



Every fairly-well-to-do householder in your locality is a "red hot" prospect for this

"Automatic" Hand-Power Vacuum Cleaner

and now is the right time to suggest to every householder that this labor-saving machine would be the best of Christmas Gifts for his wife. This "Automatic" is the one thoroughly practical hand power machine. It is easier to pump, easier to carry, easier to empty and has far more powerful suction than any other hand-power machine on account of our exclusive double tank system. Slip joints used on all connections, making them instantly detachable and interchangeable. It is the most durable machine, made entirely of malleable iron and steel, and the only hand-power machine that "Blows" as well as "Sucks." Guaranteed for one year against all defects of manufacture. Will last a lifetime with ordinary wear and tear.

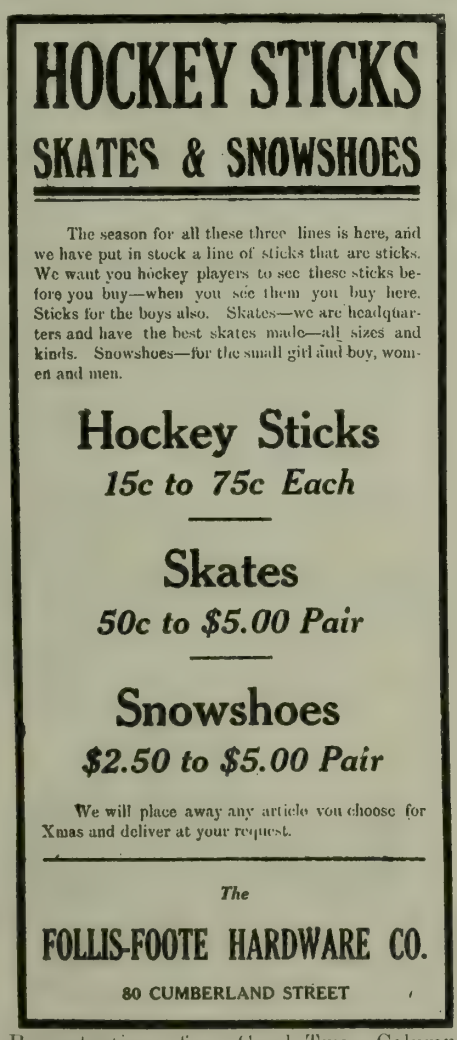
Sporting Goods Should be Featured at Christmas Time

Dealers Should Push Sporting Goods More Than They Do—Customers are Less Likely to Select the Wrong Article When Purchasing from the Sporting Goods Department—Valuable as a Means of Display—The Treatment of the Small Boy Customer.

It is extremely doubtful whether hardware merchants make enough of their sporting goods at Christmas time. Probably the merchant who is not a sporting enthusiast himself or who has been so unfortunate as to have no boys and girls of his own does not quite realize how fascinating a sporting goods article is to the majority of people. Talking to a sporting goods jobber on the question of the sale of these lines at Christmas the information was brought out that enough use was not made of sporting goods at Christmas time. "In the first place," said the jobber, "sporting goods are appreciated by young and old alike. Presuming they are seasonable lines, that is to say, toboggans, snowshoes, skates or hockey sticks, they enable one's Christmas holidays to be passed all the more pleasantly. Then again they are much easier to pick and choose from than other lines of presents. For instance, in buying a gift for a boy it is very easy to go wrong in the kind of articles selected. You buy him a toy, say an electrical railroad and he forthwith expresses the opinion that he would have preferred a steamboat or windmill, but if his tendencies are towards skating there can be no mistake. Any kind of skate will suit him."



And it is the same with people of older growth. If a brother is fond of fishing then a purchaser knows that he or she cannot go far wrong in buying a rod or a fish basket or some of those accessories with with fishermen like to equip themselves. There is no doubt that for the "manly" boy or the "manly" girl there can be nothing more acceptable than something which will enable them to pursue healthy recreation in the open air. The dealer, therefore, who brings forward instead of keeping in the background his stock of skates, hockey sticks, pucks, toboggans, bob sleighs, snowshoes, air guns and on to the more general lines such as fishing tackle, guns, revolvers, jack knives, sporting coats, boxing gloves, punching bags, sweaters, gymnasium shoes, Indian clubs, etc., will create a stronger demand than probably he had any idea that he could secure.

There is a growing feeling that presents should be not so much novel as useful. The idea was at one time if a person bought an article that was entirely out of the ordinary that it conferred a much greater pleasure on the recipient than if it had been something which had not those characteristics.

But this has given place to a more common sense way of looking at things and it is now considered the most useful present is one which possesses the greatest amount of utility combined, of course, with a certain amount of attractiveness.

Good For Display.

There is one great advantage in showing sporting goods, and that is that they make magnificient window displays. There is no window design which is more genuinely-or-distinctly attractive than a sporting goods one. Whether an observer has sporting proclivities or not,a window that is composed of various lines associated with sport always commands a very large amount of attention. It is impossible to imagine any department of a store which can produce spectacular effects more effectually than the sporting goods, but even if the window is not devoted to these lines sporting goods can be made to combine with other articles in a most attractive way. For instance, even though you are dealing with a purely Christmas subject, sporting goods can be introduced with great effect. Santa Claus can be made to carry his goods on a toboggan or a bob sleigh. He himself can be equipped with snowshoes or skates. It is extremely easy to introduce sporting goods in any design the merchant may wish to use and they add to the attraction.

Reproduction of a Good Two Column Ten Inch Ad. Used by a Port Arthur Firm Last Week.

Display Necessary.

Sporting goods will not sell well unless they are prominently displayed. The dealer must show that he thoroughly believes that sporting goods make the most useful and acceptable presents or else many of his customers will fail to think so. The dealer has a lot to do with the influencing of his customers' choice at Christmas time. He can by making a dead set on a certain article and putting it up in attractive shape swing a lot of trade that way, and it is so in sporting goods.

The merchant should not be afraid of allowing his customers to examine his lines. Of course, we do not suggest that he should bring his most valuable guns down and place them in reach of the ordinary school boy, but lines which a certain amount of handling will not hurt can be placed within easy reach of customers. The small boy, like those of older growth, wishes to see and examine for himself. Young as he is he probably has formed certain ideas as to what kind of skate, hockey stick or toboggan he would like. Give him an opportunity of examining and the merchant not only saves the possibility of something being bought that does not exactly suit but his store secures the good will of the young owner. It must not be forgotten that the boy or girl buyer of to-day is the man or woman buyer of to-morrow and that if the good will of these youngsters is secured the merchant is creating strong customers in the future. The boy who is received by the clerk as if he were a customer of great importance, whose first purchase is received as carefully and as solemnly as if he were buying an expensive gun, and who leaves the store with an enhanced idea of his own importance becomes a booster of that store and not only influences other lads but by his chatter among the family circle influences his father and mother and they look at the store through the enthusiasm of their son. But take the reverse case, and presuming a lad is treated offhandedly by the clerk, and is made to take something that he doesn't want and who comes away with the feeling that he has been thought only a "kid" says to himself that when he grows up he will never buy at that store. He goes home and in his way knocks the store and influences other people around him. A merchant or a clerk cannot be too careful in these little things. No matter how inexpensive the purchase or how small the purchaser big trade in the future may depend upon the way in which the young buyer is treated.

Suggestions for Preparation of Holiday Advertising

An Ottawa Hardwareman Increased His Holiday Trade 50 per cent. Last Year by the Use of Circular Letters and Booklets, Coupled with Improved Store Service—Pointers Helpful in Preparing Ads.—Assist the Printer in Making the Ads. Effective.

W. A. Rankin, Ottawa, who made a special effort to push his holiday trade a year ago, planned his campaign early and just as Hardware and Metal has been urging readers to do for the past month or two. Where many retailers endeavor to secure trade by offering a ten per cent. discount on holiday goods or announcing cut prices on certain lines, Mr. Rankin maintained his prices and engaged extra help, increasing his staff ten per cent. with the result that his holiday trade during the week before Christmas increased 49.13 per cent. and the business was handled more easily than in former years. On December 1. Mr. Rankin sent out the following letter to customers:

> Dear Sir or Madam,—The festive time of Christmas is almost upon us now, and we therefore take this opportunity of drawing your attention to the fact that the Hardware Store is the very place to buy Xmas presents of the useful and lasting kind.
>
> To give you a full detailed list of the many varieties of this class of goods we carry in stock would make this letter too long, so we enclose for your perusal a small booklet of some of the goods and the prices of same which we have for your inspection, and which are in every way suitable for Christmas presents;
>
> A visit to our store will further convince you of these facts.
>
> We thank you for past favors and in soliciting a continuance of same, we wish you a most enjoyable Christmas and a prosperous New Year.
>
> Yours faithfully,
> W. A. RANKIN.

With the letter went a 12 page booklet containing a list of very practical presents and the results, as far as could be traced, went considerably towards making up the increase referred to.

Urges Practical Gifts.

Gerry Bros., Port Arthur, during the week before Christmas took a large space about 12 inches deep spreading across a newspaper page, and featured such articles as silverware, cutlery, safety razors, skates, sleds, snow shoes, roast pans, food choppers and washing machines. They opened and closed their ad. with the following paragraphs:

> Some people have the idea that a hardware store has no suitable Christmas Goods from which to choose. Just glance over our list to be convinced that we have the right to stand in the top row of Christmas Gift stores. Our silverware department offers exceptional opportunities for sensible, pleasing gifts, and at prices to suit all."
>
> "The Best Gift of All. Buy the wife a Velox Water Power Washing Machine and save her backaches for a lifetime. Only $16. Simple to operate, nothing to get out of order. Does the washing while you are employed at other household duties. Every washer sent out on 30 days trial."

Features Skates in Ad.

T. McAvity & Sons, St. John, N. B., used a four column space in the St. John Telegraph of Nov. 26, all the space being devoted to skates, sixteen patterns being illustrated, each cut being accompanied with a paragraph describing its features, while sizes and prices were given in a second paragraph, the prices being printed in black type. Hockey sticks, pucks, straps, etc., were also given some space at the bottom of the ad.

That the ad. was intended to draw both city and country business was evidenced by the announcements that for 30 cents in addition to the price any pair of skates would be expressed to any point in the Maritime Provinces.

ORIGINALITY IS NEEDED.

In preparing his Christmas advertising, the merchant should aim to achieve something out of the usual run. A bare statement of facts will not do. There must be something to catch the eye, a bright illustration, or an opening remark sufficiently interesting and terse to impel the perusal of what follows.

Hardware Store Gifts Are Appreciated

Because They are Useful as well as Ornamental

A Tool Chest Will Please the Boy

Give the Boy a Tool Chest

and let him hammer away to his heart's content. We have tool chests of all sizes for all sizes of boys. Better step in and see them before Christmas.

Xmas Pocket Cutlery

We have in stock over 1200 Pocket Knives for you to select from in every size, style, and quality, at all prices.

This is the Place to Buy

Wiss Scissors and Shears, Gillette, Ever-Ready and Star Safety Razors, Ever-Ready Flash Lights, Silver-ware, Nickel-ware, Aluminum ware, Fine Carving Sets, Etc.

The Little Folk drop all other gifts to welcome Santa Claus and his ***Bissell Toy Sweeper.*** The lady of the house will appreciate even more than the children a gift of a genuine Bissell Sweeper. The Universal Percolator, Food Chopper, Bread Maker and Cake Maker all make very acceptable Xmas gifts. We are showing a complete line of the above in all the styles and sizes.

Some New Things for the Kitchen

will meet with the housekeeper's approval. A few of the useful articles we offer are:

Lisk Enamel Steel Roasters, and Kitchen Utensils of all kinds Savory Roasters, Tinware, Woodenware, Wire Goods, Etc., Etc.

Illustration Showing How Cuts Help to Brighten a Holiday Ad.

A Christmas ad. should possess originality and an interest for the reader distinct from any other ad. in the paper.

One of the readiest methods of accomplishing this "brightening up" of advertising matter is to use carefully selected illustrations. Hardware merchants have good opportunities in this respect, for their stock comprises a variety of articles which readily lend themselves to newspaper display. Christmas lines of hardware are particularly adaptable to this purpose. It is very easy to obtain suitable cuts; the jobbing houses will supply any number to their customers and send with them a bright line of talk on which the matter of the ad. can be based. The effectiveness of an ad. is so appreciably brightened by such means, that every hardware man should avail himself of the opportunity thus presented and conduct a live publicity campaign. It will be found a paying plan.

It frequently happens that the ideas of the writer of an ad. are most sadly distorted by the printer. It may be that the type used makes it impossible to get all the reading matter into the allotted space. It is not an unusual occurrence for printers under the circumstances to drop out some parts without consulting the advertiser. If the sentences omitted happen to contain the most telling statements, the whole pith of the argument in fact, it is all one to the printer. He may, on the other hand, omit a cut, or rearrange the matter so that it will fit into the space, even if the appearance of the ad. is sadly altered by so doing. The printer is perhaps not wholly to blame, as he is generally rushed for time and must do the best he can with perhaps a limited assortment of material. The advertiser should, however, make it his business to keep in touch with the printers, perhaps even go to the trouble of visiting the newspaper office and of explaining just what is wanted. It will be found that more satisfaction is gained in this way and full value will be obtained for the money invested in the newspaper space. If the printer finds that a merchant is paying fu'l attention to his advertising, he will in turn do his best to give satisfaction; if, on the other hand, he finds the merchant neglectful, he is pretty sure to assume the same attitude himself.

Hardware and Metal Subscribers' Letter Box

Any Question on Trade Subjects Will be Answered by the Editor in This Department. If the Correspondent Does Not Desire Publicity, He Can Use Initials. As Information for Replies is Sometimes Hurriedly Gathered, Replies May be Incomplete, and in Such Cases Additional Addresses or Information Secured From Readers Will be Published the Following Week.

LEADED IRON.

Orillia Hardware Co., Orillia: Where can we buy leaded sheets 24 and 28 gauge, and leaded angle iron?

Leaded sheets, or what is called terne (as there is more lead than tin in the making) can be obtained from metal jobbers, although the gauges referred to are not usually stocked. Leaded angle iron (joints for leaded glass windows, we suppose) can be secured from the James Robertson Company, Montreal and Toronto.—Editor.

TRACK AND HANGERS.

P. D. McCallum, Glencoe: Give us the names of manufacturers making track and hangers for moving heavy machines.

Taylor Forbes Company, Guelph, and W. D. Beath & Son, Toronto.—Editor.

SEAMLESS TUBING.

Ivan A. Bailey, North Sydney, N. S.: Where can I purchase thin aluminum, copper or iron seamless tubing, 1, 1½ and 2 inches in diameter?

Metal jobbers in Toronto, Montreal, St. John or Halifax can procure these on special order, if the gauge is given. Parke & Leith, 205 Yonge street, Toronto, are importers of aluminum products. The Booth-Coulter Copper & Brass Co., Toronto, are specialists in copper products. John Millen & Co., Montreal, carry a stock of Shelby seamless steel tubing.—Editor.

CHIMNEY BRUSHES.

T. G. Downard, Kenora: Where can I procure a 10 inch flue or chimney brush head?

Boeckh Bros., 80 York street, Toronto. —Editor.

GRATES FOR FIREPLACES.

J. W. Fleming & Son, Blenheim: Who are manufacturers of grates for fireplaces?

Barton Netting Co., Windsor; Whitaker Stove Works, Windsor; Canadian Ornamental Iron Works, 107 Sumach street, Toronto; and British-Canadian Hardware Manufacturing Company, 40 Queen street east, Toronto.—Editor.

ELECTRIC LIGHT GLOBES.

J. W. Fleming, Blenheim: What concerns sell shades for electric light globes?

Canadian General Electric Co., King and Simcoe streets, Toronto, and James Manison Brass Manufacturing Co., 89 Adelaide street west, Toronto.—Editor.

GOVERNMENT STANDARD WHITE LEAD.

"British Columbia": Can you give me any information regarding the government standard of white lead?

Government standard lead is 92 per cent. pure white lead, 7½ per cent. oil, and ½ coloring matter. Several white lead manufacturers use the yellow label of the White Lead Association of Canada to mark their product as Government standard, while other manufacturers give the warranty over their own name. John Hyde, Montreal, is secretary of the White Lead Association of Canada.—Editor.

WASTE PAPER.

Alex. McArthur & Co., Montreal, write in reference to inquiry in Hardware and Metal of Nov. 19, regarding waste paper. "This item is of considerable interest to us, as we purchase large quantities of this material, but we observe our name was omitted from the list of purchasers' names."

GASOLENE BURNERS.

M. Davey, North Bay: Who are the makers of gasolene burners?

Clayton & Lambert, Detroit; McClary Mfg. Co., London; and Otto Bernz, Newark, N. J.—Editor.

PRICE CUTTING ON NAILS.

Editor Hardware and Metal.—A few weeks ago the Wholesale Hardware Association met in Montreal, and all the jobbers agreed to maintain the price on staple goods, which could easily have been done.

Last Saturday I got my price for booking nails for May 1, 1911, delivery, and last night took an order for 50 kegs at $2.30 base F.O.B. Gananoque. This morning a traveler for a Toronto house offered the goods at $2.25 base F.O.B. Toronto; so you see that the trouble is jobbers will not do as they agree, which, to my mind, means that the association is not any good. I know of a traveler selling merchant iron this week at $1.70 base F.O.B. Montreal, and had to do it to meet the price the mill is selling this same customer at. The whole trouble is the manufacturers are out to-day selling goods to retailers, and not protecting the jobbers.

If the jobbers could be brought together in an agreement not to buy goods from any manufacturer who sells the retail trade direct, they could do themselves more good than by trying to cut each other's throats on prices.

Another incident came under my notice this week which was a bad thing for a jobber to do. A man near Picton was building a house. He went to the stores in Picton for prices on building hardware, and then ran across a traveler for a Kingston jobbing house who sold him the hardware for his house at wholesale prices.

My opinion is that the manufacturer should protect the jobber, and the jobber protect the retailer. If this is not done where are we going to end?

A Traveler.

Belleville, Nov. 17.

THE SLAUGHTER OF DEER.

That Ontario's game laws are in need of amendment is evidenced by the exhibition of carcasses of deer hanging in front of butcher shops and restaurants in Toronto and other cities during the past month.

The restriction of one deer to each hunter was intended to put a stop to the slaughter of deer for commercial purposes but it has not done so. While each hunter is restricted to one deer, the weakness appears to be that each hunter is not restricted to one license. But wherever the fault lies, the Government has a duty to perform and that is to so amend or enforce the law so that the exhibition and sale of deer carcasses shall be prevented and the preservation of deer hunting as a sport is ensured.

Enquiry should also be made as to how the big hotels secure their supply of small game, and if it is true that certain "sportsmen" controlling game preserves make frequent visits to these resorts and return with bags of a hundred or more, which are sold to the managers of the big hotels, a stop should be put to this practice by the placing of a restriction upon the number to be shot and the method of their disposal.

One of Canada's greatest heritages is in danger and many classes of merchants stand to lose heavily if hunting is to become a "business" instead of a "sport."

THE METAL SITUATION.

Barring the continuance of the fireworks in the London tin market there is very little change in the other markets. So far as it can be judged the consumption demand generally is very steady. It is anticipated, although even this may get a check in the next few weeks, that at the turn of the year will be seen a decided stimulation in legitimate buying, and that instead of the speculator being on top the consumer will take his place. This is especially hoped for in the case of iron and steel in the States where a depressing year is ending up with very little tangible improvement. The fact that merchants are taking future contracts without any premium is not the best of signs, in one way, but undoubtedly this has tended to increase future business, and may be the means of starting the ball rolling. All the large corporations have been economizing on their buying but this they cannot maintain forever They must come in sometime next year and the probability is that they will start early in the spring. All the way around things are fairly healthy, stocks are not heavy, and the first strong consumptive movement must be felt right the way through from the consumer to the furnace.

It is impossible to say much about tin. The movement now on is purely speculation and has laws of its own. Figures advance when they should recede, and recede when they should advance, and although to-day tin may be around £169, to-morrow it may be dropping to it's lowest point of the year. It all depends upon how long the bull party can carry the stocks they are piling up. Although copper prices in New York are showing a slight decrease there is no falling off in confidence. It is true that production is still away ahead of consumption, but holders are keeping well to prices and there is a feeling that copper is on the road to recovery. Spelter maintains a firm position in London and St. Louis.

Lead keeps surprising steady after it's record for the year and despite rather heavy importations to the Old Country maintains a fairly strong figure. It is rather a significant fact that domestic lead is so close to the import price. All the way around things are fairly solid and both first and second hands profess themselves to be pleased with the outlook.

REMEMBER THE SALESMEN.

A practice that is growing every year is for merchants to present one or more of their staff with a year's subscription to their trade paper. Hardware and Metal has noted quite a number of orders of this description going through in previous years and already these "presentation" orders are coming in, being usually accompanied by a request that a letter be sent the salesman, enclosing a receipt, and advising him by whom the subscription was paid.

The practice of having the head clerk, window trimmer, buyer or ad. writer each receive a copy of his trade paper is one which can only result in profit to the merchant as the more each one studies, the greater will be his capacity for work, and the greater opportunity for study, the more studying will be done.

With only one copy of a paper coming to a store it is not likely to be convenient at such times as the various members have opportunities to read the paper over. For instance, a stormy evening may cause a clerk to stay at home and if a copy of Hardware and Metal was at hand it would probably be read from cover to cover and some valuable selling helps gleaned by the clerk from the advertisements and reading pages.

Hardwaremen talk much, and rightly so, about "practical" gifts at Christmas time. What more practical can he give the members of his staff than subscriptions to Hardware and Metal?

KEEP THE STOCK NEAT.

The whole secret of many a successful holiday campaign is epitomized in that one phrase. Customers do not like to do business in stores where the stock is arranged in haphazard manner, or where the rush of trade has resulted in a complete disarrangement of the goods.

During the Christmas season, the volume of business is so great and the range of goods called for so wide, that many merchants allow their stores to get beyond control in the matter of neatness. This results from the clerks getting into the habit of not replacing an article after it has been moved from its original position. One customer may require to inspect a variety of goods before making a purchase and, if the store is crowded, the clerk will look after the next customer without taking the time to clear up first. The inevitable result is that the store soon resembles a junk shop and this condition of affairs is seriously detrimental to business.

Of course, customers cannot expect stores to be in apple pie order during the Christmas rush. They undoubtedly demand, however, that the stock be arranged with sufficient order and neatness to facilitate inspection. They do not care to select from mere piles of goods, heaped carelessly together on counters and tables. It is necessary, then, for a store to maintain a fair semblance of order, even if the work involved falls heavily upon the merchant and his staff. The clerks should do all in their power to help by using any lulls in the trade to straighten up the stock. Early in the

morning business is never brisk and the time thus afforded gives an opportunity to restore order. If a half hour or so every morning is devoted to this purpose, the store will present an orderly appearance at the start of each day and it will be possible to keep it reasonably neat.

"A place for everything and everything in its place," is a business axiom, which should not be forgotten, even during the Christmas rush. The neat store will draw better than the opposite establishment which is allowed to fall into complete disorder.

A DOUBLE MORAL.

One day this week a traveler walked into a Brantford hardware store with a stock of certain Christmas lines to show. "You are two or three week's late," said the proprietor. "I stocked up in these goods long ago and have been selling briskly already. There is no use of you coming around at this time of year." He added that the traveler might possibly get an order in a couple of week's as the stock might be depleted by that time, if the good trade done as a result of the early start, continued unabated.

There is a double moral in this incident—one for the merchant and one for the traveling salesman. It undoubtedly pays to stock early in the season and to be thus fully prepared when the time comes. The merchant in question had been early in the field and had done more than his share of business in those lines. It pays the salesman, or the firm he represents, to get around in good time with seasonable and holiday goods. The early salesman catches the orders, provided of course that he does not overdo it and make his rounds so much ahead of time that he is unable to arouse any interest in his goods. If the jobber starts early in his campaign, the merchants will probably do the same and the result will be an advantage all around.

INCENTIVES TO SALESMANSHIP.

Last January the members and employes of a Minneapolis hardware company enjoyed a unique banquet to celebrate the closing of a successful year and as the outcome of an interesting contest.

The firm offered its salesmen an extra commission on all sales for a given period preceding Christmas, and to make the matter more exciting the salesmen were divided into two teams with captains over each and it was agreed the team ending the stipulated period with a smaller total of sales than the other should pay for the banquet out of its extra commissions. At the finish, the total of sales showed a difference of only a few dollars, which proves the contest was a close and exciting one.

A similar contest between the various sections of Canadian hardware stores could be arranged to advantage, the net result being a big boost to sales and the creation of a better feeling amongst the sales staff.

Straight Talks on Hardware Salesmanship

TALK No. 4 BY VICTOR LAURISTON

You want to sell me a food- chopper.

I've just dropped in to enquire the price of a chopping knife. You are pointing out that a chopping knife is a sentence for life at hard labor, and that a food-chopper costs more at the start and saves more than it costs in the long run.

This is salesmanship. I appreciate the distinction. But I say: "I would like to see what sort of food-choppers Smith has to sell."

What do you say to that?

You say: "My friend, this is positively the best food-chopper on the market. It works more satisfactorily than any other food-chopper. It is, in fact, the only food-chopper that does give entire satisfaction. It has had a large sale. It will give you thorough satisfaction."

Jones, my friend, while you're telling me that, do you know what I'm thinking? And what I think is just what ninety-nine out of every hundred customers will think when you patter off that same story to them.

I tell myself—and each of them tells himself or herself: "Jones says this is the best food-chopper on the market. That's perfectly natural and quite excusable. Jones wants to make a sale. If it were a stove, or a can of paint, or a package of tacks, Jones would say it was the best on the market. That's part of the business. All honor to Jones! He believes in his goods."

But at the same time, Jones, you havn't shown us. Your general praise of that food-chopper is about as much help in selling it as kerosene would be in extinguishing a fire.

What you want to tell me, Jones, is the sort of stuff to answer the unvoiced questions that go jumping through my mind. Here's the way they jump:

"Will that chopper cut our mincemeat to the proper size? How does it chop suet for the pudding? Does it clog when the job's half through? Will that screw contrivance that fastens it to the edge of the table come loose after the first few turns of the handle and have to be tightened every minute or so? Will it be the deuce of a job to clean the inside of the chopper after it's been used?"

That's the sort of stuff that trots through the purchaser's mind, Jones: a lot of little, trivial questions coupled with the big question: "Is it worth the money?"

Answer the little questions and the big question is answered.

Show the purchaser the whole assortment of knives. Tell him what particular work each is for. Try each on in turn, showing how easily they can be changed. Tell him that suet chopped with an ordinary knife reveals itself in the pudding in little chunks, but that this contrivance with one of the knives grinds suet into a fine flour, which melts and imparts the same rich flavor to the entire pudding. Throw in a chunk of

Salesman: "This is the best food chopper on the market."

Customer: "Yes, but you will have to demonstrate that to me."

cabbage (cabbage is cheap) to show how easily the chopper works. Show that a little boiling water, shot from the hot water tap or kettle spout, will clean the chopper and leave it practically dry, and that taking it apart and putting it together is just an instant's work. Let him turn the handle himself, to show that the screw that holds the chopper to the counter edge stays tight.

You won't need to add the general observation that your chopper's the best on the market. You've shown your customer that it does the work he wants done in the way he wants it done. He'll want it and buy it, not because in a general way it's "the best on the market," but because it fills his particular need.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

White Lead.—Advance of 225c.

Brass and Copper Wire. — Discount now 50 and 10.

Toronto.

White Lead.—Advanced 25c to 35c.

Shellac Varnishes.—Up 20c to 25c a gallon.

Corrugated Galvanized Sheets. — Up 35c to 60c.

MONTREAL.

Dec. 2.—The markets have been undisturbed this week by any price changes. Trade has resumed a steady gait, with users continuing to buy only for immediate requirements, excepting maybe in the case of spelter. Tin is being kept back by the state of the London market, large users holding off as much as they can, and praying for a speedy smash to the bull operations. Despite this, however, as tin is wanted, fair business is being done. Copper is moving steadily, as the prospects are for a slight stiffening in prices, although New York has fallen back a point or two. Lead is not very prominent, but business may be considered fair. Large users of imported pig iron are out of the market, but the smaller buyers with no stocks are ordering steadily.

Altogether the week's trading has been satisfactory, and well up to the average. Stocks generally are not on the heavy side, and judging from the industrial activity going on, first hands and the jobbers anticipate good trading ahead. There is no doubt that the return of stability to the primary markets generally would bring in a lot of new business, but users are not prepared to purchase freely until it looks assured that the markets will not go back on them.

The tin syndicate in London has continued to rule the roost, and the slightest break in prices has been met with heavy buying. Heavy transactions have been recorded, and the market on the week's trading is higher. All this time legitimate buyers are groaning, and do with as little tin as they can manage. Copper sagged a little in New York, owing to a falling off in London, which of course is more speculative than New York, and therefore more easily affected by outside influences. Still there is plenty of confidence felt in copper, even though production is unrestricted, and consumption far in the rear. Spelter shows little change. The slight falling off, both in London adn St. Louis, is only natural, in view of the way the markets have been held, and is no evidence of weakness. Lead is unchanged but dull. Better domestic buying in the Old Country is anticipated, as consumers are reported to be not so well provided ahead as is usually the case. Cleveland warrants are keeping up well despite the interruptions of the coming election. The United States iron market is practically the same, with a growing feeling of confidence in next year's trading.

Pig Iron—Jobbing business continues good for imported iron, but large users are naturally out of the running for the time being. It is thought, however, that winter requirements have by no means been properly estimated, and that there will have to be plenty of scraping later on to satisfy the demand. Domestic furnaces report satisfactory new business, considering the contracts on hand. The situation in the States is very much the same. The sales of pig iron are light, and concessions in prices are still being made in some sections. It is believed that many of the large consumers are well covered for some six months, but the smaller interests are not so placed. Despite this, however, the opinion is growing that with the turn of the new year there will be a steady improvement in new business. The November tonnage in steel is estimated to be the lightest of the year.

Tin—Tin remains at 42c for jobbing lots, with a slightly better price for good round lots. Users continue to hold off and only buy for absolute necessities. Inquiries are moderate. The primary markets continue to keep stiff. There is very little slackening in the control of the syndicate, and there is no telling how soon or how far away may be the ultimate slump. Legitimate buying is naturally as light as can be under the circumstance, but there is not such bad business going through, as stocks in users' hands are not heavy.

Copper—Copper is unchanged at 14c, with good trade in moderate-sized lots. A somewhat better inquiry is noted. The weaker tone in New York induced better concessions for good round lots. There is plenty of confidence in New York in copper, despite the slight sagging consequent on the falling away of speculative prices in London, and the failure of buyers to round up in the shape that was expected. Holders do not lightly shade prices, and only big lots receive concessions. Exportations of copper keep up well.

Spelter—Spelter goes along undisturbed by any great price changes in the primary markets. Locally the trade is very good, and users are buying well in consequence of the stiffness that is in evidence in the primary markets. London has fallen away slightly, but nothing to denote as yet any change in the situation. St. Louis, too, has fallen back a little.

Lead—Lead is unchanged, both for import an domestic. Fair trade is moving, but there is nothing brisk about the situation. The English market is steady but on the dull side.

Scrap—The scrap market is unchanged. Cast and wrought iron are mostly in demand. We continue to quote:—Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, Dec. 2.—Dullness dominates the local metal market. The trade at this season invariably tapers off, owing to the close proximity of the holidays and stock taking time. Between the present and stock-taking only orders that are absolutely necessary will be placed, manufacturers being content to get along on a barely requisite amount until the opening of the busier season.

No changes in price have been made, although both pig iron and tin made fractional gains during the week. In the case of tin, advices of an advance shortly are received, but there is no evidence of a rush to buy in anticipation of the raise. No one is desirous of thus assisting the syndicate in London and only small orders are placed.

Pig Iron.—The demand is not great and the market will continue dull now until well into the new year, when active buying will be resumed. Fractional advances were made during the week, but the local prices remain the same. Quotations are: Canadian No. 1, $19.50; No. 2, f.o.b. furnace sellers, $19; Middlesboro, No. 3, $20; Summerlee No. 2, $22.50; Cleveland, No. 1, $20.50; Clarence No. 3, $20.75; Jarrow, $20.50; Glengarnock, $22.50.

Tin.—The changes on the London market have had but small effect locally and the prices quoted remain the same: 40c and 41c for small lots and 38c to 40c for ton lots and over. One local house received advices from New York to the effect that advances were on the tapis and that a change might be expected at any time. The threatened change has not resulted in enlarged orders, the prevailing impression seeming to be that the best way to steady conditions is to buy only what is absolutely necessary. Some surprise is expressed locally that the bull element has been enabled to control the London market so long.

Plates and Sheets.—There is a good demand for plates and sheets. Not only is the volume of orders for spot delivery satisfactory but advance demands for delivery after the first of the year are being freely received. The impression now seems general that the price is not going to be reduced and that advance orders can be booked without fear of loss. The advances in London on tinned iron sheets may affect the price after the first of the year when this line starts to move, but action will certainly not be taken before that time.

Copper.—The situation with regard to copper is quiet but sound. There are no

signs of an early revival in the demand but there is no uneasiness felt on that score. The American market is reported to be in such condition that it could drift along for some time before the producers would be forced to exert themselves to make sales. With regard to production, it is given out that there was an increase of 29,000 tons in the United States, but the consumption in America has gone up 31,000 tons, in England 19,200 tons, in France 2,500 tons, in Germany 7,500 tons and in all other countries 3,350 tons.

The local price has held firm despite the slackness now evidenced in the demand.

Lead.—The demand is comparatively strong. The local prices are $3.85 for domestic and $3.90 for imported in small bulk, a 10 cent. concession being made for ton lot orders and over.

Spelter.—The spelter market is quiet. Supplies are light and, while sellers are strong in their views, buyers are taking hold very carefully. They show no disposition to anticipate future wants but are content with small lots. The threatened advance has not worried them seemingly. The scarcity of offerings keeps the price up, local quotations ranging from $6.15 to $6.25.

Old Materials.—Prices remain firm in all lines but there is little disposition to buy. Stocks seem to be pretty well up to the mark and cases are known locally where chances to buy at reduced quotations have been turned down. Prices quoted are: Heavy copper and wire, 11¼c to 11½c; heavy red brass, 10¼c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $10 to $11; malleable, No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $13.

Bolts and Nuts. — There is a fair movement reported in bolts and nuts, especially the common sizes. The market is firm, and we quote: Discount on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Lumbermen's Supplies. — There is a stimulation in lumbermen's supplies, and axes, handles, cross cut saws and boot calks are showing a quicker movement. Lumbering operations promise to be on an extensive scale, and dealers are preparing accordingly.

Wire.—The demand is on the whole quiet. Some booking ahead is being done. No further change this week is announced, and we quote: Barbed wire, $2.25; plain twist, $2.55, galvanized wire, $2.20; base coiled fencing (9), $2.25; (12), $2.40; staples, bright, $2.60; galvanized, $2.85.

HARDWARE MARKETS

MONTREAL.

December 2.—Rush orders from dealers who have delayed buying have marked the trading this week. Apart from that, there has been little excitement, and business in a general way has been steady. On the whole, the volume of orders has been decidedly above the average, and jobbers are satisfied with the business done. Travelers are very confident as to future bookings and the prospects are decidedly hopeful.

Lines which come under the category of Christmas presents have been moving out well in a sorting-up way. The rush is over, except in the cases we have mentioned above, but dealers are looking over their stocks and adding to the lines that seem on the light side. Cutlery, silverware, razors, shaving sets and copper and brass lines are mostly prominent. The first-mentioned have been exceedingly active in demand, and one merchant says that he had never experienced such a season in cutlery.

Of the general lines, carpet sweepers, wringers, flat irons, meat choppers, pails and brooms are prominent. Enamelware and tinware are good movers, especially to the Northwest. The snowfalls have stimulated the demand for snow shovels, and sleigh heaters. Weather strip, horse blankets and lighting accessories have shown a sorting-up movement. Lumbermen's supplies have quickened, while there is still a steady movement in builders' hardware.

Booking is slow in screen hinges, poultry netting, and green wire cloth. The market is firm, with little change in quotations. Copper and brass wire has advanced, the discount now being 50 and 10.

Christmas Lines—There is a steady movement in a sorting up way from dealers who find themselves short on certain lines, while the usual rush orders have come in from merchants who persist in leaving off buying until the last minute. From all accounts this has been one of the best—to many the best—Christmas season on record, especially in cutlery lines. Apart from cutlery, silverware and cut glass, have quieted down very considerably. Razors, pocket knives, shaving and manicure sets, mirrors and scissors in cases, are in steady demand in a sorting up way.

Winter Lines—The snow falls have quickened the sale of snow shovels and sleigh heaters, also the sorting up call for weather strip. This is especially noticeable locally. There is a steady movement in food choppers, bread mixers, carpet sweepers, wringers, step ladders, baskets and brooms. Enamelware is prominent. The booking for spring lines does not show much improvement as yet, but some orders have been placed for poultry netting, green wire cloth, and fencing wire.

Sporting Goods — There is a good movement in skates, hockey sticks and pucks. Local hockey organizations are now in active preparation, and the demand in consequence shows stimulation. The snow falls have improved the demand for snowshoes, toboggans and sleds. Air guns, after a very good demand, have quieted down. Gymnastic supplies, such as Indian clubs, punching bags, boxing gloves, foils and sticks are steady.

Stoves and Ranges.—The demand continues to show improvement. Supplies are in good shape, and orders are met promptly. Heating accessories, such as coal hods, ash sifters, pokers and piping are in fair call.

Builedrs' Hardware — The building movement locally keeps up well, and consequently there is a steady demand for all lines of hardware. The market is firm, and we quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside) $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.: sash cords, 32½ to 33c.

TORONTO.

Toronto, Dec. 2.—The hardware market is still quite active, the colder weather of the last few days having served as a stimulus to trade. Seasonable lines are now moving fast and Christmas goods are perhaps in greater demand than heretofore. Although the more progressive merchants had their holiday stocks in as early as a fortnight ago, a large proportion leave off ordering until the last possible moment and this combined with sorting up orders, keeps up activity in Christmas goods. The jobbing houses expect no diminution in the demand for a couple of weeks yet.

In heating goods the demand continues remarkably brisk for this season of the year and the manufacturers are receiving orders daily. The year has been indeed a remarkable one. "Our business has increased in every section from the Atlantic to the Pacific this year," said the local manager of one of the largest manufacturing concerns, "and we have not in many cases been able to cope with the demand." The manager in Winnipeg of the same concern, who showed an increase of $160,000 in the volume of business done during 1909 as compared with 1908, predicts that his 1910 record will be $200,000 better than that of 1909, or $360,000 more than in 1908—a remarkable increase for 2 years, particularly when it is considered that the district of this manager includes only a portion of the west.

Notice has been received from manufacturers of a new scale of prices for corrugated galvanized sheets, making an advance in some lines.

Seasonable Goods.—The colder weather has made the demand brisker in all seasonable lines. There has been a brisk trade in lined mitts and gloves, while blankets have been sold in large quantity. The same can be said of snow-shovels, weather strip, sleigh-bells, sleigh-heaters, sidewalk scrapers, tobog-

guns, snowshoes, sleighs, and all other goods of the same kind. Some snow would put the trade in these goods at its busiest but the demand is quite satisfactory as matters stand.

Household Goods.—The demand for household and kitchen lines is steady. Not being limited to any one season but being rather of the all year around variety it shows no marked increase or decrease at any time. Jobbers report, however, that the demand at present seems to have been quickened by the approach of the Christmas season. Pots, pans, kettles, stove accessories and cooking utensils of all kinds are moving satisfactorily.

Builders' Hardware.—The demand is now falling off and the end is deemed to be not far away. The season has been unduly prolonged and in some sections the result has been a much larger trade in builders' hardware than in past seasons. The movement in Toronto continues good and is likely to continue.

Heating Goods.—The stove and heating trade has kept up better than was expected. Orders are still coming in, the Toronto office of one firm receiving an order to-day for four furnaces. Although small when compared with the rush during October and November, this order indicates unusual activity for this time of year. Manufacturers have caught up on their stove orders but are still a little behind in furnaces.

Sporting Goods.—The sale in hockey goods and skates is now very brisk, orders from the West being particularly heavy. The advent of colder weather has resulted in sudden activity on the part of dealers and most of the demand is now for rush delivery.

Heavy Hardware.—There is a fair demand for bolts, nuts and rivets. The discount on carriage bolts are quoted: ¾ and smaller, 70; machine bolts, ¾ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—The slow merchant, who is always behindhand with his orders, is proving the life of the trade in holiday lines to-day. With Christmas less than four weeks off, dealers are coming out of their apathy and sending in rush orders. Jobbing houses as a result are very busy and report all holiday lines to be moving well. Cutlery is in demand and other lines, such as cut glass and brass, are in request almost equally.

Corrugated Sheets.—New quotations are given on corrugated galvanized sheets ranging from 35 to 60 cents. The revised scale, made by one manufacturer, is as follows: 22 gauge, per square, $6.10; 24 gauge, $5; 26 gauge, $3.85; 28 gauge, $3.65, less 10 p. c.

HARDWARE TRADE GOSSIP

Ontario.

W. G. Whyte, Arnprior, has been succeeded by Brennan & Griffin.

John Harman, Uxbridge, has joined the staff of the Aikenhead Hardware Co., Toronto.

W. W. Schweitzer, Emo, harness maker and hardware merchant, has sold his stock and business to C. R. Langstaff, who occupies the adjoining store.

T. E. Reeb and Sons' foundry and automobile supply store at Humberstone, Ont., was totally destroyed by fire on Nov. 23. The loss is $15,000, with insurance of about $4,000.

Clarence H. Booth, a Toronto man, son of George Booth, president of the Booth-Coulter Copper & Brass Company, has been appointed general manager of manufacturing of the E.M.F. Company, Detroit.

Robert Home, hardware merchant, Sudbury, has moved into his new block, across the street from his former premises. The new store has two floors and basement and is in many respects a model store.

The Imperial Stove Works buildings at Morrisburg which were destroyed by fire a few years ago are being repaired by James Cowan, who expects to begin the manufacture of steel and cast iron ranges in about a month's time.

Walter H. Turnbull, of Turnbull and Cutcliffe, Brantford, is mentioned as a likely candidate for Mayor. Mr. Turnbull has not definitely decided to run, but it is thought probable that he will enter the field and his chances of election are regarded as good.

The hardware merchants in Sudbury having been unable to come to an agreement among themselves as to early closing during the winter months, Purvis Bros. announce that they will from now on close every evening except Saturday at 7 o'clock for the winter months, with the exception of the week before Christmas.

R. Watt, of Watt & Squire, Brantford, has been laid up for some time and will not likely be able to get out for a while yet. A. Squire has also been down with a serious attack of typhoid and is only now able to visit the store occasionally after a long spell. The addition of J. Heath, former continental traveler for the Massey-Harris Co., to the staff of the store has helped considerably during the absence of both members of the firm.

Quebec.

The Northmount Hardware Co., Montreal, has registered.

W. H. Evans of the Canada Paint Co., Montreal, has returned to Montreal after a few days' visit to the company's varnish factory in Toronto.

The schedule of the Montreal Wholesale hockey league has been drawn up, and three matches will be played each Tuesday evening. There will be keen rivalry this year for the trophy presented by the honorary presidents, as the Canadian Fairbanks have won it two years following, and have only to be successful this time to secure the cup.

E. K. Spinney, of Yarmouth, N. S., paid Hardware and Metal's Montreal office a visit last week. Speaking of conditions in the Maritimes, Mr. Spinney said that on the whole they were very good. The failure of the apple crop had been a severe blow, the crop in the famous Annapolis Valley this year not equalling one-third the output of last year. On the other hand, the fishing interests had a phenomenal year, and trade conditions in this line were particularly bright.

Geo. R. Burton, who has been associated for some time with the Dominion Cartridge Company, Montreal, has joined forces with E. Rich & Company, general merchants, of Sydney and Brisbane, Australia. Mr. Burton's duties will be to systematise the large warehouses of the firm at Brisbane, a task with which he is familiar, as he was engaged on this work while with Lewis Bros., Montreal, preparatory to joining the Dominion Cartridge. Mr. Burton, who is sailing from Vancouver on the 30th Dec., is looking for new lines to take out with him, for consideration, and he will be glad to hear from different manufacturers on the subject.

Maritime Provinces.

R. T. Holman Hardware, Ltd., are building an addition to their store.

H. B. McDonald, Chatham, N. B., has opened his new store. It has been completely renovated.

A new hardware store was opened in Chatham, last week, by Herbert McDonald. The new store is centrally located and is about opposite the hardware establishment of Goggins Bros. The fixtures are up-to-date and the stock well displayed.

Western Provinces.

Jos. Creary, hardware dealer, Neelin, Man., has been succeeded by D. O. Beatty.

J. Poplin, South Fort Rouge, has joined the staff of Johnston Bros.' hardware dealers, Brandon.

A. A. Hassard, Venn, Sask., dealer in hardware and implements, has sold his hardware business to R. Treleaven.

The McClary Manufacturing Co., has taken out a building permit for a warehouse in Vancouver, to cost $35,000.

Anderson & Paulson, Claresholm, have bought out the business of J. E. Bevan and Sons and are erecting a new stand.

E. G. Hipwell, Neepawa, Man., has sold his stock to Foreman & Son who will continue their business in the old stand and use the Bates building for hardware.

O. R. Thurber, Moose Jaw, announces that he has sold out the patent and works of the Moose Jaw Stove Co. to J. E. Coldwell. The stove manufactured is a straw-burning variety, the result of fifteen years' work on the part of Mr. Thurber, the inventor.

News and Methods of Canadian Hardwaremen

Novel Safety Razor Window Display at Halifax — Kingston Merchants to Prosecute Peddlers—Novel Window Being Planned at Woodstock—Short Cut in Store System Needed—Record Stove Sale at Brantford—Technical Education for Clerks.

NOVEL SAFETY RAZOR DISPLAY.

Halifax.—The retail hardware store of A. M. Bell & Co. is now making attractive and novel window displays for the Christmas season. Both of the show windows are brilliantly illuminated at night, and attract the attention of every passerby.

The south show window is devoted to one of the most interesting displays ever made in this city, that of safety razors in process of construction, from the raw material to the finished product. Four piles in the front of the window show first the coil of steel as it comes from the English rolling mills, before being run through the stamping machinery. Another pile shows the blade after being stamped, but before being tempered, being proven by the fact that many of the blades are twisted into all kinds of shapes. The next heap shows the blade after being tempered, and broken pieces lying about illustrate very clearly the extreme hardness which the blades finally attain. The next pile shows the blade ready for the face.

In the southwest corner of the window there is a framed velvet board, on which are sampled every part that enters into the make-up of the razor. It is shown in every form, from the very roughest to the last plate of silver or gold.

The north window is devoted exclusively to toys of various description, and all of the latest design. The firm now claims to be the largest importer of toys in the East, and they certainly have an elaborate and attractive display.

Both windows show a great deal of care in the make-up. The firm has been improving their windows for some time, and believe in showing the public what they have to offer in the latest novelties.

KINGSTON MERCHANTS AFTER PEDDLERS.

Kingston—The members of the Kingston Retail Merchants' Association are out with a big stick, after the men who go around the city, from door to door and throughout the country, peddling without a license, and they have decided to lght the matter out to a finish. The matter has been discussed from time to time by the members, and at the meeting held on Monday night it was decided that it was time to get a detective on the case, and have every guilty party brought before the magistrate.

The city police have had a few cases of the kind before the magistrate, but the members of the association feel that the matter has not been given the attention it should have received, and on this account they have decided to take the matter into their own hands, and employ police to work it out. Legal advice is also to be secured, so as the members of the association can find out just what rights they have in the matter.

The statement was made at this meeting that during the past two weeks an outsider who had been working in this district, and who had not taken out the necessary license, had realized over $1,000 on aluminum goods alone. This is not fair to local retailers.

As far as the local merchants are concerned, it will be war to the end, as they have decided that the thing has got to stop.

The Kingston merchants would like to get the co-operation of the merchants of other places along this line.

PLANNING MOTION DISPLAY.

Woodstock.—Frank Gordon, with A. H. Gingerich, is planning an elaborate roller coaster window, which he expects to have ready early next week. By the exercise of much ingenuity, and by much hard work, he has constructed a miniature "scenic railway," a very good representation of the kind found at any summer resort. By the use of an electric motor, small cars will be kept in motion navigating the ups and downs of the railway. The window should prove one of more than usual interest.

McKiggan & Davison have dissolved partnership, and are now conducting separate stores in the east end, the former with his son.

Gardner & Co. are displaying an extensive line of brass and art metal goods, with a window devoted to fireplace accessories in brass. Not only is the appearance of the store brightened, but Mr. Gardner reports that the art lines serve as effective trade getters for other lines.

The fall season has been quite busy in Woodstock, but the lack of heavy building operations, both in city and country, has made the demand for builders' hardware lighter than usual. It is expected that the new industries secured during the past season will mean busy building operations next year.

LAMPS IN HOLIDAY DISPLAY.

Orangeville.—Adamson & Sproule, in one of their holiday windows a year ago, featured electric table lamps, and found that it helped to draw trade.

The accompanying picture shows the arrangement of their window, and their method of shading the light from pedestrians' eyes, while throwing it upon the goods on display. The shield of cutlery, the trimming of the shelves with spoons, and the arrangement of the hollowware on the pyramid and in the base of the window, is effectively done.

Lamps Used in Holiday Window by Adamson & Sproule, Orangeville.

A SHORT CUT NEEDED.

London.—A customer walked into a London hardware the other day and asked for a bill for a screen door or some such article purchased about six weeks previous, and which he wished to charge his landlord with. The price was not known, and the date uncertain. The young lady bookkeeper hunted up the check-book copies for the month in question, and began to look through them for the name. After a quarter of an hour the customer began to squirm, and a clerk, grasping the situation, wrote out a new check-book slip for amount and date believed to be approximately correct, and sent the customer away rejoicing. Of course, this might have been done in the first place, provided the proprietor or clerk was assured that the transaction was bonafide, but is there any short cut to the finding of such records?

It is probable that the majority of hardware dealers in London use a system exactly or almost similar to that in Purdom's. "Every transaction is entered on a check-book," explained Purdom. "All the copies are filed by the month. There is no easier way of finding any copy than looking through the month's records, but of course a charge item is easier, because that means a day book entry. In the case of many paid transactions the name is not filled in on the slip at all. There is seldom need to refer to these old copies, and they are destroyed in fact, after two or three years. Theoretically, we fill in a slip for every transaction, paid or charge, and the amounts are supposed to check up with the cash at the end of the day's business. But there is nothing to prevent a clerk laying the cash for a quarter sale on the shelf and failing to make out a slip. In other words, the system can be fooled if a man is dishonest, but so can any system. If there were such persons on the staff they should be let go; that is the only way. Then if your men do not need to be watched absolute adherence to the system is not necessary." Purdom's do not use cash registers on their counters, but work with the overhead cash system instead.

In Cowan's hardware, a detail is added to the check-book system, in that all clerks are required also to fill in the amounts in columns provided at the back of the book, so that the total at the end of the day tallies, theoretically at least, with the cash.

The Stimson charge system, in use more among the grocers, precludes the possibility of finding an old record in this way. The original check book slip is sent to the customer with the goods, and the carbon copy of a charge slip destroyed when payment is made.

Many retailers, including hardware men, are firm believers in the petty ledger systems sold by a number of Canadian firms. Here the carbon copy of all charge items, at any rate, is filed away, not only by the month and year, but also alphabetically as regards the name of the customer. As to paid transactions, the whole check-book is usually filed, and the situation is the same as in other cases when it comes to finding a back record.

RECORD STOVE SALE.

Brantford.—The fall season has been a busy one with the hardware men, and general all-around satisfaction is expressed. The continued growth of the city has made the demand for builders' hardware active, and very considerably stimulated the stove and heating trade.

Turnbull & Cutcliffe followed their usual method of handling the stove trade, holding a big sale for two days toward the middle of November. They advertised for a week previous, using half-page space in both local papers, and experienced an almost unprecedented rush of business on the Friday and Saturday of the sale. On those two days no less than 45 high priced stoves were disposed of, the bulk of the trade being done on Saturday. As a result of this very satisfactory turnover of stock, Turnbull & Cutcliffe will enter on their annual dairy and laundry supply sale after the first of the year with greater confidence.

Geo. Elliott reports a heavier stove trade than usual. Not only did the sales satisfy during the regular stove season, but, by careful attention to that branch all through the summer, he managed to maintain a fairly active trade all through the year.

Watt & Squire have a window devoted to sleighs, children's wagons and metal toys. A small reproduction of a fire wagon occupies the centre of the window and helps to make the exhibit an interesting one.

Turnbull & Cutcliffe have added a new department. They now handle slate roofing, and figure on roofing contracts. Although they have been engaged in the line only for a month or so, the results have been most satisfactory. A large number of contracts have been secured, and the firm has been kept busy.

Watt & Squire are handling a line of clocks, jewelry and goldfish supplies with good returns.

TECHNICAL TRAINING FOR CLERKS.

Chatham.—A technical school may be established here as the outcome of the recent visit to Chatham of the Dominion Technical Education Commission. W. R. Landon, of the International Harvester Co., recently outlined a scheme for starting such a school on a small scale, training pupils along the lines of the present Chatham industries. W. H. Westman, of Westman Bros. hardware store was one of those who took a leading part in the discussion of the subject.

"Special training is needed for business as for manufacturing," was Mr. Westman's view. "Many who come into the stores as clerks are handicapped by not having the fundamental education necessary for business life, while they often have a lot of that sort of education which, instead of helping them, unfits them for business. Training is needed along the lines of bookkeeping, penmanship and arithmetic. Many have no idea of keeping stock tidy, or of neatness in the store. Good moral training along business lines is very much needed. Many young men are satisfied to draw their pay at the end of the week, to get by each day as best they can, and worry not the least with regard to giving their employers good value in return for the money paid them. Industry, willingness and interest in the business should be inculcated. Merchants are always glad to advance the willing employe."

The American Pad & Textile Co., of Greenfield, Ohio, a concern capitalized at $1,500,000, has purchased a property at the corner of Queen & Richmond streets, now occupied by Drader's Lumber yard, and will erect a factory and establish a Canadian branch in this city. The company manufactures horse pads and similar lines of goods, and has an established Canadian trade. From 75 to 100 hands will be employed at the start.

The Canadian Wolverine Co., Limited, manufacturers of brass goods and plumbers' supplies, intend building a large addition just west of the present factory. A corrugated iron storehouse is also being erected.

J. A. Simon, plumber and gasfitter, has opened a shop on Lacroix Slip, adjoining C. R. Bowers' plumbing shop. He also does tinsmithing work.

Packham & Myers, damper manufacturers, of Dresden, are building a large addition to their present plant.

CAR COMPANY CHANGES HANDS.

The Crossen Car Co., Cobourg, has been purchased by interests understood to be associated with the Ontario Iron & Steel Co., Welland, who are working in harmony with Steel & Radiation, Limited, which recently took over the business of the King Radiator and Expanded Metal Companies, Toronto, and which has purchased a twelve acre site on the Lachine canal near Montreal, where they expect to erect a plant to make boilers, radiators and expanded metal.

The promoters are backed by American capital and it is said that their plan is to acquire a series of plants which will consume the product of the Ontario Iron and Steel Co's iron furnace at Welland.

WESTERN OPPORTUNITIES.

According to the Land Dept. of the C. P. R. at Winnipeg, there are openings in Western Canada as follows:

Beverley, Sask.: Hardware store.
Cadogan, Alta.: Hardware store.
Ebor, Man.: Hardware store.
Erskine, Alta.: Hardware store,
Kennedy, Sask: Tinshop.
Yorkton, Sask: Foundry.

FOR SALE BY DEALERS EVERY WHERE

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Dec. 1.—As mid Winter approaches many lines quoted below are not being called for to a very large extent. Local wholesalers are well satisfied with the way things have moved out during the Fall and early Winter, and was not any weakness in the demand which was due to the much-talked-of deficiency in the money market. Considering former years when the wheat crop was light, the year 1910 has been an exceptionally good one.

Owing to the close of navigation, heavy goods, which have to be brought in by all rail route, will have to be advanced. This includes particularly bar iron and iron pipes. Local houses have not changed quotations yet but will do so within a few days. The orders for heating goods and all kinds of stoves have been heavy during the past week, and the repeat orders are very numerous. The output of brooms for curling has been heavy and there is quiet a scarcity on the local market. Prices are very firm on brooms of all kinds as has been the case for some time. Holiday ordering which includes chiefly sporting goods and cutlery are forming a large percentage of the trade at the present time, and the demand will no doubt keep steadily growing for some time.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅝ and smaller, 65; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corugated iron, 28 gauge, $3.87; pressed standing seamed roofing, 28, painted, $2.83; galvanized, $3.87; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.40; 8-inch, $3.65; full polish, 6 and 7-inch, $4.15; 8-inch, $4.40.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾-oz., $4.80; Queen's Head, 23, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9½c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops and 5 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

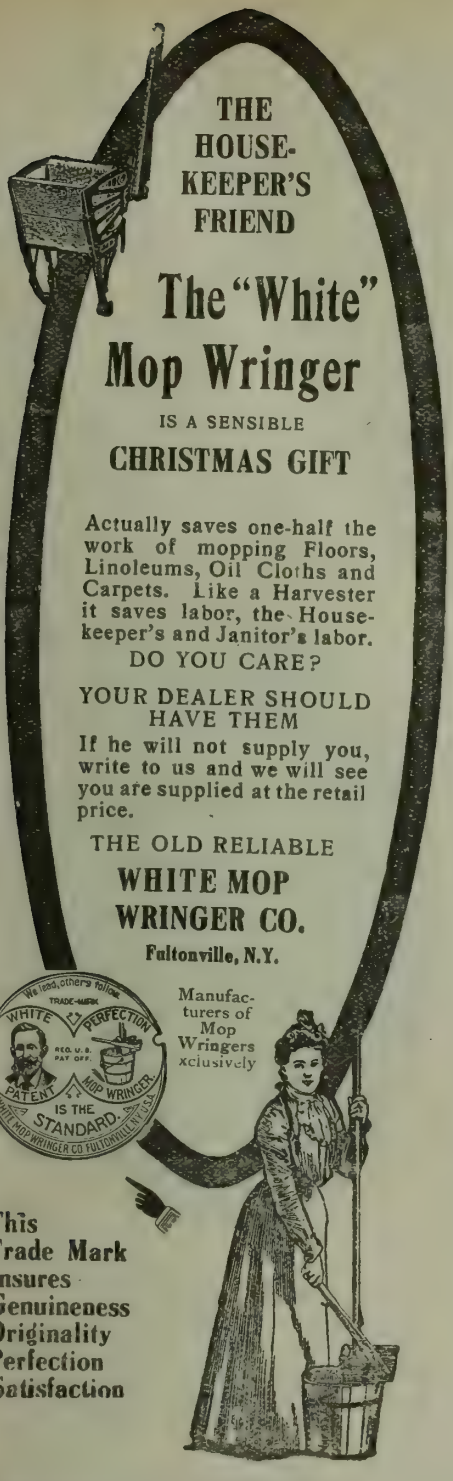
Wringers—Royal Canadian, $41; new easy, $45.25.

Paints and Oils.

Paints and Oils—There is no change in the paint and oil market at the present time, and the factories are working overtime making up supplies for Spring business. Sorting orders are very good on all lines for immediate shipment, and indications are that Spring ordering will be brisk after the New Year.

Linseed Oil—There is very little trade going on in the seed market, and reports are prevalent here that considerable advances are about to be made. The oil market is unchanged and stands at $1.15 for raw and $1.18 for boiled. This price of course must necessarily advance with the seed market and local jobbers expect prices to go up before long.

Turpentine—Although there is not much stock on hand the sorting orders which comprise the bulk of the trade at the present time, are being filled satisfactorly. What is true of Linseed Oil, is also true of Turpentine, as the crop conditions of both commodities are similar. The market is $1.10 today.



Varnish—The varnish trade is keeping up satisfactorily and there is considerable interior finishing to be done every where in the West. There will not be much abatement in the varnish ordering during the Winter.

Putty and Glass—The ordering for this line is weakening slightly and there has been a tremendous rush up to date. Of course considerable quantity is yet being distributed, and the trade will continue throughout the winter. Putty in barrels $2.90, cases $3.15, kegs $3.40.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

W. H. McKenzie has started a hardware and grocery business in Vancouver.

C. I. Pearson, dealer in groceries, boots and shoes, and hardware, Trochu, Alta., has sold his grocery and boot and shoe business.

Economic Production has been conspicuous in the growth of The Sherwin-Williams Co.

To establish and maintain the highest standard of paint and varnish excellence and to market our products at the fairest prices consistent with their quality, has involved the acquirement and control of the most improved equipment, warehouse facilities and raw materials.

These things all have a significance for you, Mr Dealer. There is unusual quality, prestige and selling force back of a product that requires five enormous paint and varnish factories, two dry color plants, two complete linseed oil mills, the direct ownership and operation of lead and zinc mines and smelters, a large white lead corroding plant, two box factories, printing plants and machine shops.

This great business is the effect of growth, not combination

Big business rests upon Demand, Demand rests upon Public Confidence, and that's the greatest Selling Force in the world.

These forces are all a part of the equipment of the Sherwin-Williams Agent. The success of our business rests upon the success of our agents. Could we say more?

Development of Canada's Iron and Steel Trade

Steady Increase in Domestic Production — Imports Not Increasing While Exports Remain at a Small Figure With Large Quantities Sent Out in 1902 and 1904.

The great development in the production and consumption of iron in Canada in the last decade is remarkably shown by a study of the figures bearing on the subject. Not so many years ago the iron and steel making resources of the Dominion were regarded by those having but a superficial knowledge of the intrinsic wealth of the country as being very inferior in character, and the suggestion that one day Canada would not only be exporting steel to foreign countries, but to the hub of the iron and steel world, the Mother Country herself, would have met with ridicule. But we have seen this exporting done, and there are indications that there is a very great development along these lines in sight.

But with all the great strides in the iron production the totals being 122,000 tons in 1900 and 757,162 last year, there has been great increases in the importation of iron, thus showing that despite the advance in the domestic plants, that the needs of the country are in excess of the powers of the home concerns, while at the same time demonstrating that there is very great scope even with the present dimensions of the demand for further extensions of the domestic furnaces and mills.

This development in importation is shown best by the figures for 1907 and 1908, namely 150,157 tons and 212,290 tons respectively. There was rather a marked falling off last year, the imports dropping to 148,338 tons, due to rather heavy stocks carried over from the previous years, and to the fact that the home plants were more closely up to the demand, which was, after all, not more than an average one, and certainly not up to the demand for this and other years. It is anticipated that the imports this year will show up very differently, especially as United States firms have been paying great attention to the western borders.

Figures speak more clearly than words, and the figures we give below show the tremendous strides in the iron production of Canada. And this production is but in its infancy. More furnaces are put into blast every year, great additions are being made, or contemplated, to the various plants, while projects for the building of entirely new concerns are constantly being made. Iron ore abounds in practically every Province of Canada, while there is no possibility of estimating as yet the extent of the coal areas. Thus the country is well prepared for the future. There is a rapidly growing population; railroads buying, with the extensions constantly going on, is rapidly increasing; steel is being employed more generally in general business and factory buildings, bridges are being planned here and there; the home production of machinery and implements is increasing, while there is the building of the navy to be considered. Thus we have a great demand before us, and at the same time we have the satisfaction of knowing that the country itself can cope with it all.

The great development in the past ten years in home production, imports and exports, is shown by the following figures. Domestic production for the last ten years was as follows:

1900	96,575 tons
1901	274,376 tons
1902	357,902 tons
1903	297,885 tons
1904	303,454 tons
1905	525,306 tons
1906	598,411 tons
1907	651,962 tons
1908	630,835 tons
1909	757,162 tons
Imports:	
1900	51,583 tons
1901	35,783 tons
1902	40,013 tons
1903	92,612 tons
1904	62,515 tons
1905	71,005 tons
1906	96,797 tons
1907	150,157 tons
1908	212,290 tons
1909	148,338 tons
Exports:	
1900	3,513 tons
1901	5,765 tons
1902	75,195 tons
1903	4,400 tons
1904	21,016 tons
1905	886 tons
1906	305 tons
1907	439 tons
1908	290 tons
1909	5,063 tons

PRESENTATIONS TO OLD EMPLOYES.

Few things help more to instil a spirit of loyalty amongst a staff of employes than the recognition of faithful service, either by promotion or by the giving of presents at appropriate times, after years of labor.

Working upon this principle, J. T. Sheridan, president of the Pease Foundry Company, Toronto, last winter, as announced in Hardware and Metal at the time, promoted Wm. Crane, superintendent of the company's Shaw street plant, and who had been with the company since 1884, to the position of boiler salesman in Toronto. Mr. Crane was a success in outside work, and the Pease Company had the best year in their history, both in hot air and hot water installations, so when Mr. Crane accepted a position with the Prudential Investment Company at Vancouver, the company and members of the office and sales staff both remembered him, the presentations taking place at the general offices of the company, 36 and 38 Queen street east, on Saturday, Nov. 26, he leaving for Vancouver on Nov. 27.

The second presentation also took place last week, Mr. Sheridan presenting a token of his appreciation to James R. Phillips, for twenty years superintendent of the Sheridan foundry at New Toronto. During this period the capacity of the foundry has been increased several times, and in addition to many molding machines, seventy-five men are employed. Mr. Phillips, has cut down foundry costs very materially by the invention of several devices, and although the foundry has been conducted as an open shop during this score of years there has never been a strike amongst the men, this being an excellent tribute

JAMES R .PHILLIPS.

to the qualities of faithful service and management which Mr. Sheridan sought to recognize.

The Pease Foundry Company have experienced a most satisfactory year, their businesss showing an increase of over 30 per cent. over 1909. The growth in the west, where the increase was over 50 per cent. was exceedingly satisfactory. Mr. Sheridan left on Sunday last for the Pacific coast with the intention of making arrangements for a further expansion of the company's business in Westerr Canada.

BATTERY OF GAS OVENS.

H. Occomore, Guelph, recently installed a battery of a dozen gas ovens in the McDonald Institute at Guelph, the ovens being constructed specially to Mr. Occomore's order by the McClary Manufacturing Company, London, a sketch being submitted by Mr. Occomore at the time of the Western Fair in September, and the order being filled in a manner

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

very satisfactory to Mr. Occomore, early in November.

The ovens are each eighteen inches wide, and each is independent of the other, asbestos insulation being placed between the ovens. Twelve students can, therefore, use the gas ovens at one time, this saving considerable time to a

Battery of Gas Ovens for a Domestic Science Class.

class. Each oven is equipped with a thermometer and a vent pipe also connects each oven to a central stack controlled with independent dampers. The floor space occupied is only 2½ x 12 feet. This is said to be the first battery of ovens of its kind manufactured in Canada, and reflects considerable credit upon Mr. Occomore.

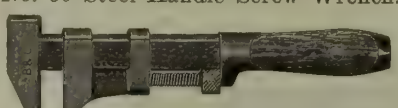
ELECTRIC FIRELESS COOKER.

A new form of firelss cooker with electric heater attached, has recently been put on teh market. This should tend to develop the use of electricity in the kitchen. It is well known that the ordinary kitchen range is exceedingly wasteful of heat, the vast majority passing up the chimney or into the room, while very little is taken up by the food which is to be cooked. In the case of gas or electric cooking, much more of the heat is confined to the food, whereas in the fireless cooker provided with an electric heater, there is practically no opportunity for the heat to escape, and consequently this method of cooking should prove very economical. The new device is very compact, and comprises a number of aluminum compartments, one above the other, in which the food may be placed, so that an entire meal may be prepared at once.

LACQUERED STOVE PIPE WIRE.

The B. Greening Wire Co., Hamilton, are making an important improvement in the method of marketing stove pipe wire. In the past much dissatisfaction has resulted from the awkward size of the eight inch rings, 1¼ pound hanks, and the liability of the wire to tankle, and become dirty. They have now decided to put the wire up in 19 gauge, 50 foot lengths in small three inch coils, packed in cartons, the wire being lacquered.

The improvements overcome all the objectionable features of the former methods of marketing, and, in addition, the neat, attractive and convenient form of the new package will particularly appeal to hardware merchants, as a class of stock more convenient to handle and care for. The cartons will retail to the consumer at five cents, carrying a good profit to the retailer, who buys them in boxes containing half gross lots.



TWO NEW WRENCHES.

Bemis & Call Hardware & Tool Company, Springfield, Mass., are introducing two new types of wrenches in their No. 60, steel handle screw wrench and No. 62, knife handle wrench.

The No. 60 type is designed to withstand the most severe usuage. The bar

No. 60 Steel Handle Screw Wrench.

No. 62, Knife Handle Wrench.

is made from a special open hearth steel adapted to wrench purposes, the slide is especially designed to receive the strain and not buckle, the operating screw is of solid steel, while the handle is semi-steel, hollow and powerfully braced internally, it is forced on to the shank under great pressure and securely riveted in place, both on the tip and with a lateral pin rivet. This handle furnishes a strong support to the screw, and being oval in form, fits the hand.

The bar of the knife handle wrench is forged from special open hearth steel and is made oval front and back, giving that amount of additional stock and strength over the ordinary form of square wrench bar. The slide is of a very tough malleable iron and especially constructed by reinforcement to the jaw to withstand great strain. The operating screw is solid and of a high grade steel. The handle frame and bolster is all in one piece and is powerfully braced. This frame is forced onto the wrench bar and is riveted in place both on the tip and with a lateral pin rivet. This frame has selected hard wood sides which are locked in place under pressure and securely riveted.

SAVING ELECTRICITY.

Tungsten lamps are coming to the front because they save electricty. In appearance, their only difference from the ordinary carbon filament incandescent lamp is that the filament is constructed of tungsten instead of carbon. But in actual use, it has been proved that they use only about one-third as much current as a carbon lamp to produce a light of the same illuminating power. True, their first cost is greater (approximately three times as much), but this is counterbalanced by the saving in current effected. They have one weak point, however. That is the ease with which the delicate tungsten filament is broken. On this account great care has to be exercised in installing them, and it is for this reason, too, that they cannot be economically used as portable lamps. Yet, when carefully handled, they have a long lease of life. In England, where they are used much more extensively than here, it is quite common for them to last 3,000 hours, and one instance is on record where a tungsten lamp burned continuously for over 15,000 hours. Even when allowance is made for morefrequent breakage, the tungsten lamp shows a saving over the carbon of about fifty per cent. That is an economy not to be despised, and points to the much greater use for stationary light purposes.

Most of us count up our virtues with the aid of the multiplication table—and the other fellow's by short division.

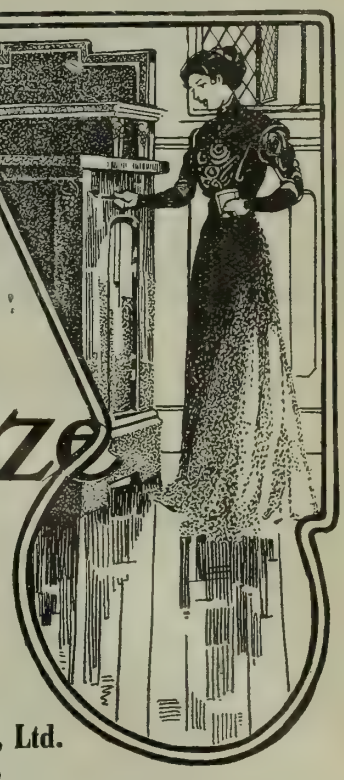
It is necessary for the merchant to listen to the hard luck stories of many other people, but it is very foolish for him to tell any of his own.

The broom should make a daily visit to every square inch of floor space and the dust cloth should be just as intimate with the show cases, shelves, etc. Cleanliness is one point that cannot be overdone in a retail store.

No. 37

SOWING GOOD SEED.

With the unusual number of people who will be visiting the store during the next few weeks, that is presuming the merchant has encouraged the Christmas trade, a good opportunity is afforded of bringing the paint department into strong prominence. As we pointed out last week, paint specialties can be pushed strongly at this time of year for the reason that their usage will help in the general scheme of Christmas decoration, and in the process of brightening up the house, which is so essential around this time.



But apart from the pushing of those lines which command a sale now, the dealer can kill two birds with one stone by letting the visitors, while they are wandering around the store looking at the Christmas lines, see what a fine stock of paints the dealer carries. Therefore any scheme of decoration that the merchant introduces should not be made to hide, but to bring out the paint stock, while any room left on the counters or show cases may very well be filled with a tin or two of paint. As brightness is so necessary at Christmas a generous use of the colored hangers and show cards supplied by the paint manufacturers will be found useful.

"But, why display paints at a time that they cannot possibly be used," the question may be asked. This is easily answered. The paints may not be used now, but they may be wanted later on, and now the people are flocking to the store, many who are only accustomed to do so at this time every year. It is the best opportunity to show them the various lines, and to get them to look at the different color schemes that the manufacturer has produced in connection with the painting of a cottage or a room.

"Did you notice what a large stock of paints Mr. So-and-So carries," says one fair visitor to another, "and that pretty color effect on the counter. I did not know that a cottage could look so pretty when painted in such shades, and I certainly am going to speak to my husband about it when I get home. Our place would look fine done like that." Is this not the strongest advertising the merchant can have? ? Another comment may be made that the speaker had no idea that so many varied shades could be obtained in ready mixed paints. It is astonishing the ignorance that exists in connection with the range of colors now produced by paint manufacturers. The development has been so rapid that the knowledge of the public has not kept

Sales with Profit.

To build up "come again" trade, opaque easily-applied "Floorglaze" works wonders. It is hard, high-finish and does good work inside or outside the house. Ten good colors for the dealer's stock.

M L Floorglaze

helps hold the women's trade—make profits.

Try it yourself, Mr. Dealer, on a test strip. Sample tin free on request. Then you'll know how good an article you're selling your customers.

pace, and there is no doubt that a large number of people have absolutely no idea that so many different shades are produced, or that a merchant has them in stock. While as to the beautiful effects that a combination or colors will produce, they are absolutely in ignorance.

It is up to the merchant to dispel all this, and he can only do so by prominently displaying his whole lines of colors, and the advertising matter that the manufacturer supplies him with. There is thus no better occasion than when customers are thronging the store at Christmas time. Impress them with the stock that is being carried, so that they will remember the store when the time arises for the buying of paint. Painting is often thought of during the winter. The housewife makes up her mind what she will have done when the spring comes round, and what colors she will use. If by a merchant's display at this time of the year he fixes his store in her mind, or has helped in her selection of colors, he will in all probability get the custom when the time comes. It is seed planted by the wayside that will bring in a good yield.

PAINT AND OIL MARKETS

MONTREAL.

Dec. 2.—As we anticipated, the price of white lead has advanced 25c at a meeting of the grinders this week, making the figure for small lots $6, and for large lots $5.85. Other lines are unchanged, although both turpentine and linseed my be billed for an alteration at any moment. Despite these high prices there is a good demand for the time of the year, with supplies on the short side.

Trade generally is satisfactory all the way round. The moderate weather has induced painting to be carried on vigorously, while there has been some good sorting up orders in ready mixed paints and indoor specialties. The tone generally is firm, and dealers seem very confident as to prospects.

Turpentine—There is a firm tone locally, and reports from the primary markets combined with a moderate spot supply keep thing exceedingly brisk. The demand is good for the time of the year, and we contine to quote $1.02 to $1.05.

Linseed Oil—The market continues at high tension, although there seems to be some feeling of hope that the tendency of large sellers in the Old Country to quote easier figures for forwa rd delivery, presages a change in the near future. The market locally is very bare of supplies, and even only the absolute needs of users is causing a severe strain upon stocks. There is no change in quotations, and we quote $1.08 to $1.10 for raw, and $1.11 to $1.13 for boiled.

White Lead.—The meeting of grinders this week resulted in an advance of 25c. This was only expected in view of the high price of linseed and raw materials generally. Stocks are in fair shape, and the demand very good. We now quote $6 for small lots, and $5.85 for large.

Varnish—With the firmness in turpentine, varnish is natural' showing more strength in figures. The demand generally is very good, the railroad shops, and carriage, implement and piano manufacturers are large buyers, while the hardware trade is showing distinct improvement, especially in small size tins. Japans, stains, enamels and shellac are prominent.

Putty—The demand has quieted down, but there is still a fair movement. The market is firm, and we quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Toronto, Dec. 2.—The long threatened advance in white lead, which has been discussed, and expected, for some weeks, went into effect with the first of the month. Early in the present week some of the makers sent out new lists showing an advance of 35 cents per 100-lbs for "Government standard" and increases on special brands, ranging from 25c to 30c. Others withdrew their lists prior to issuing a revised scale. The increase generally went into effect on Thursday.

The price of gum shellac, which advanced 4 cents last week, has been subjected to fluctuations but the price never dropped below the advanced figure set. Further increases are considered not at all improbable. Shellac varnishes have advanced 20c to 25c a gallon.

The situation remains the same with reference to linseed oil and turpentine, the prices being maintained solidly. It is now accepted as an assured fact that the present figures will see no reduction before the spring, if then.

Spring dating on paints is now in order with some local houses and booking can be done at present prices for delivery up to May 15, 1911. Despite the state of the market, it is expected locally that a fair number of orders for spring delivery will be received from now on.

With the end of November the year's operations were practically brought to a close. Local jobbers state that the year has been exceptionally good. Despite the slackness in some lines during the fall months—due to the reigning of unusually high prices—the volume of trade for the year has been large. "I think that the year has been the best our firm has experienced," said the representative of a large local house. "We have been busy right along and have not experienced at any time perceptible diminutions in the demand, other than seasonable, 'despite the state of the market."

If you are intending to go out of business shortly, this is not important — but if you intend to keep right on, it is necessary **now** to lay the foundation for your sales in 1915.

If you sell a man good paint this year, it is true that it will not need renewing so soon as an inferior article, but when it does he will come to you. Moreover, in the meantime, he will probably get some of that same good paint from you for another job.

Shellac.—Later reports confirm the statement that the crop in India is very light and the advanced quotations on gum shellac have been firmly maintained. While it is impossible to speak for the immediate future, jobbers do not hesitate to predict material advances before spring.

Varnishes and Japans. — There is a strengthening tendency noted in varnishes. As a result of the advance in gum shellac, an increase of 20c to 25c a gallon has been made in shellac varnishes.

Linseed Oil.—The demand for linseed oil has fallen off seasonably. The price sticks to the high mark maintained during the past few weeks—$1.10 for raw and $1.13 for boiled with $1.12 and $1.15 quoted for single barrel lots.

Turpentine.—The practical certainty of present quotations being kept up until spring at least is being generally accepted by dealers, as well as jobbers and there is a freer tendency to buy. The demand is still, however, quite small and the supply shows no marked improvement. The whole tone of the turpentine market is dull. Wood turpentine is quoted at 80c per gallon and 85c in tin cans.

White Lead.—The increase has come at last. For the past few weeks an advance has been contemplated, owing to the firmer quotationss for oil and dry lead. Why dry lead should have gone up is not easily explained as there has been no apparent shortage in the supply. The increase by the withdrawal of price lists by a number of makers early in the week, followed very closely by the issuing of a new scale by other firms. "Government standard" is now quoted at $6, an advance of 35c per 100-lbs. and quotations for other brands range from $6.15 to $6.25. There has been a good demand in anticipation of the jump in price and indications are that it will continue strong.

Putty.—The advance in freight rates has not yet had any effect on the quotations for putty and it is not now regarded as likely that any general change will go into effect. Putty has been going freely and promises to remain active for some time.

Rosin.—No change has occurred in the rosin market. Demand keeps pace with the supply and prices stand firm. "G" rosin is quoted at $3.25 per 100-lbs.

Petroleum. — The quotations remain firm, as follows.—Canadian prime white coal oil, 13c, American water white, 17½c, Pratt's Astral, 17c.

PAINTING IN FROSTY WEATHER.

The nights are frosty in most parts of the country now, and it is well to remember this when having exterior varnishing or painting to do. Varnishing should be done as early in the morning as possible, so that it can set before night. Paint will not be seriously affected unless a severe frost comes, in which case the paint had better be at least partly dry before the end of the day, otherwise it may be caught by the hard frost and ruined. Light frosts do not affect paint very much, if at all, but the hard, freezing frosts will damage paint if in a fresh condition. Also, the painting on the north and northeast sides are most likely to be hurt, while that done where the wind of a frosty night does not hit will escape.—Paint & Oil Dealer.

VALUE OF PAINT AND VARNISH

There are two important reasons for the uses of paints and varnishes. One is for the protection of the surface to which they are applied, and the other is on account of the decoration or making attractive of that surface. Of course, the first is the one that appeals to the greater number, as it is the more practical, and it is with this idea of protection in mind that the strongest appeal can be made to most property owners. Lumber has made such advances in cost during the past 15 years and enters so largely into the construction of the average home, that the cost of building has advanced very materially.

Any frame building that is not properly protected with good paint will deteriorate very rapidly, and probably in the course of 20 or 25 years it will practically have to be rebuilt to put it in good shape. A building that is properly painted will stay in good repair for a very great length of time, and at the end of 50 years, if it has been repainted whenever necessary, it will be found in pretty good condition. The fact that good paint protects buildings from the wear and tear of the weather, makes it an economy for the property owner to repaint every four or five years. Of course, under certain conditions, repainting can be put off for longer periods, and again, under specially severe conditions, repainting sometimes has to be attended to at shorter intervals.—Iron-Age Hardware.

PAINTING IN THE FALL

Painting done in the fall of the year will outlast that done at any other time. Paint will take to lumber and adhere better, giving a more elastic and durable paint film than at any other season. In addition to this, it gives the color a chance to become thoroughly hard before the rays of the hot sun can begin its deadly work on fugitive colors. Therefore, there are many reasons why painting should be done at this season of the year, and if the dealer's stock is not in condition to meet the requirements of his trade, it means the orders will go somewhere else, regardless of his efforts to hold his trade.

"PURTY GOOD PUTTY"

A WELL KNOWN HARDWARE MAN WHO BOASTS OF HIS CONNECTION WITH THE EMERALD ISLE, SAID TO THE WRITER: "YOUNG FELLOW, THE CANADA PAINT COMPANY MAKE 'PURTY' GOOD PUTTY. SEND ME HALF A TON OF THAT SAME." The Secret of Success

Sh-! LISTEN

The great secret of success lies in doing the right thing, in the right way, at the right time. That is easy for the paint dealer. The secret of success in the paint business is in selling the *right paint*, in the *right way, all the time*. So if you want to succeed you cannot afford to make a mistake in the paint you sell—because mistakes may be fatal to success. A disappointed paint buyer seldom takes an apology—you won't usually know he was disappointed — all you will know is that he goes elsewhere next time. Sell

Martin-Senour Paint

100 PER CENT PURE

and you will have no occasion to make excuses and your customers will have no reason to go anywhere else next time. Every can will be a recommendation for your store. A pleased paint buyer will go out of his way to say a good word for the paint that gives him satisfaction. **Martin-Senour** paint multiplies your satisfied customers. Your success will date from the day you get the agency to sell it — and you will have solved the secret of success. Get busy—write today.

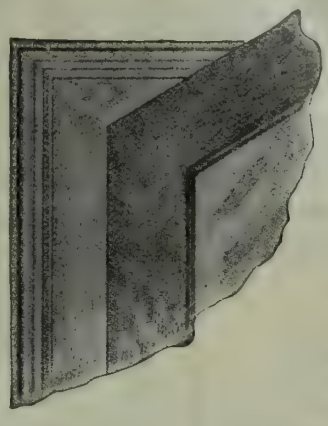
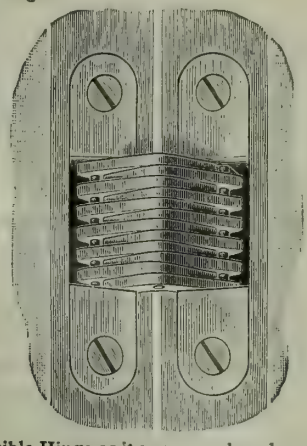
AGENTS FOR CANADA

B. & S. H. Thompson & Co.
LIMITED
381 St Paul Street - MONTREAL



Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto

PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.



COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years. The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge.

Invisible Hinge as it appears when door is open.

No. 101, suitable for wood ½" to ¾" thick (furniture work.) Will carry a door 3' x 18".
No. 102, same as above, but has square corners.
No. 104, wood must be ¾". Will carry a door 5' x 2' x ¾.
No. 108, wood must be 7". Will carry a door 6' x 30" x 1⅛.
No. 112, wood must be 1⅛" to 1½". Will carry a door 6' x 2' 6" x 1½".
No. 116, wood must be 1⅝" to 2½".

STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

Made in Ladies' and Gents' Sizes in Nickel, Oxydised, Blue Steel and Silver; also with Metal Dials (Gilt or Silvered).

THE "TORPEDO" WATCH

(KEYLESS LEVER)

A SEVEN YEARS' GUARANTEE is given with each watch

A Study in NEW CENTURY WASHER CONSTRUCTION

Inside view of the tub that does not warp.

No other machine has or can have a **Rust-proof Steel Ring** sprung into a groove inside of tub, preventing warping and leaking.

No other machine has or can have a rod right up through the tub, giving absolute rigidity,

These are ***Exclusive Features*** that cannot be copied.

No other machine has a tub so ribbed that the full thickness and strength of stave is secured at top and bottom.

No other machine is or can be constructed like it.

There is really an immense difference between the ***New Century*** and other kinds.

CUMMER-DOWSWELL, Limited, Hamilton, Ont.

McKINNON CHAIN COMPANY

BUFFALO, N.Y. ***ST. CATHARINES, ONT.***

"EDELWEISS"

Is the name of a plant or small white flower which grows only on the Alps and Pyrenees, at a great altitude, in situations difficult of access. "Edelweiss" is much sought after by Alpine travellers and mountain climbers.

The Quality and Temper of "Edelweiss" Razors are also very difficult to attain. None but the most skillful workmen treat this Razor during the process of manufacture.

The finished "Edelweiss" Razor is in quality as much above the ordinary Razors as the Edelweiss flower grows above other flowers.

For sale by all leading Wholesale Hardware Houses.

FIX UP YOUR CHIMNEYS

Even the best stove or furnace will be unsatisfactory if the chimney does not draw well. But the

"Zephyr Ventilator"

will give a good draft to any chimney. It will even allow the burning of soft coal in the stove, with good results.

We want you to sell the "Zephyr Ventilator" in your town. There is money in it, and the satisfaction that it gives will bring you new customers. **The "Zephyr"** cannot be excelled for ventilating the rooms of **Clubs, Steam Laundries,** etc. **The "Zephyr" makes high chimneys unnecessary.**

Brockville, Ont., Jan. 23rd, 1909
Messrs. J. W. Harris Mfg. Co., Ltd.
120 Sanguinet St. Montreal
Dear Sirs:
Enclosed you will find my cheque to cover account for the last of the many of your "J. W. Harris Rotary Ventilators," which I have installed here, and I have much pleasure in saying that in every case they have given perfect satisfaction.
Yours truly,
W. H. Harrison

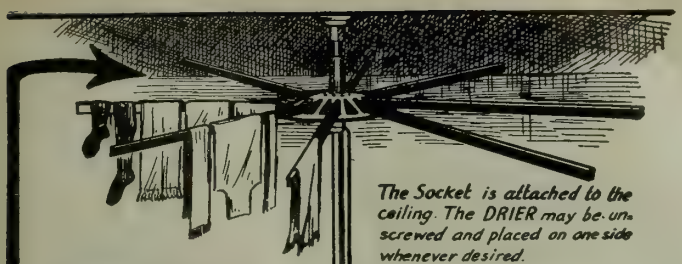
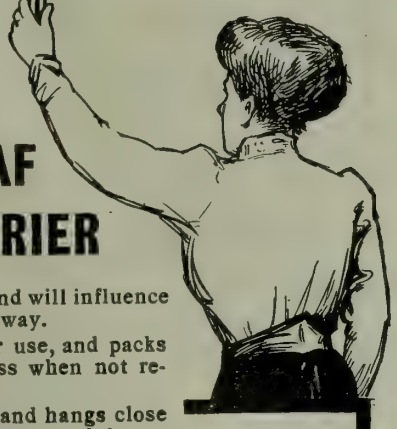
THE CONNOR BALL-BEARING WASHER



With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.



Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

Labor-Saving Devices Sell!

Here's a dandy, the

MAPLE LEAF CLOTHES DRIER

Saves time and toil, and will influence other family trade your way.

Instantly adjusted for use, and packs away into small compass when not required.

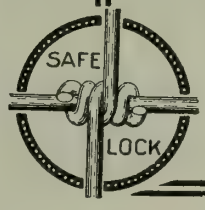
Is neat in appearance and hangs close to the ceiling—the hottest part of the room.

A line with big profit possibilities. Try a dozen. Send for prices and leaflet to-day.

RONALD MacMASTER, - Vancouver, B.C.

Ontario Sales Agents: STEWART & CO., 122 Wellington St. W., Toronto

"Safe-Lock" Wire Fence



is the easiest fence to sell, because it is by far the strongest fence made.

The strand wires of the "Safe-lock" Fence are not kinked—thus each wire retains its full strength.

And just note how the stay wires interlock where they wrap the strand wires. This lock absolutely prevents the slipping of the stay wires along the strands or in any other direction from any cause whatsoever

A local agency for the "Safe-lock" Fence will bring you the bulk of the fencing business in your locality.

Be wise—write us to-day for Catalogue and particulars.

THE MAPLE LEAF "IMPROVED RACER"

CROSSCUT SAW

This saw is different in its construction to other crosscut saws, being made with the slanting gullets, which discharge the saw-dust more freely and allows every tooth to cut fresh timber. It is a perfectly true tapered saw, being ground 4 gauges thinner on back than tooth. This allows saw to run free and easy with very little set.

The trade-mark "MAPLE LEAF" is a guarantee of quality, and every saw is thoroughly tested and examined before leaving our factory.

"IMPERIAL" ANTI-FREEZING WINDMILL
FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary Always fitted with 1¼ flanges unless other size is specified.

Amatite ROOFING

It has a rough surface of *real mineral matter* on the weather side. It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a coat of paint.

To paint Amatite would be a waste of time and trouble. Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof*.

No paint is good enough to make a durable roof; a thick layer of pitch, faced with a real mineral surface, is far better – *and that means Amatite.*

Further information will be sent on request to nearest office.

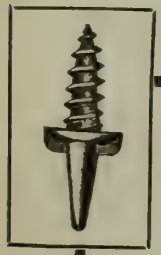
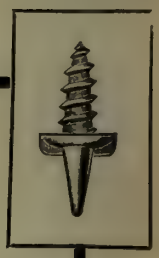
The "Ross" Sporting Has Won Its Way

Where there was one "Ross" Rifle two years ago, there are three to-day.





That means that the "Ross" Sporting Rifle is giving complete satisfaction all along the line.

With the sporting and the holiday seasons now on, there will be the usual demand for rifles.

If you have a supply of "Ross" Sporting Rifles you can confidently recommend them. You will find, as other dealers have done, that your sales will rapidly increase

$25.00 and upwards.

Sensible Fastener No. 1.

An Effective Window Fastener

Here's a line to recommend without hesitation! When the window is opened for ventilation, the fastener falls into position, acts like a spring and allows no rattling. When window is drawn up tight, fastener makes a perfectly air-tight lock. Made of best malleable iron, except lever, which is steel.

Sold by all Jobbers
Order parts by Letter and Number.

INDEX TO ADVERTISERS.—page 70-71.

A Christmas Gift Worth While

Backed by a GILLETTE Safety Razor, your Christmas Greeting of Good Will will be renewed every morning for years to come.

No article of personal use gains quite such a hold on a man's affections as the keen, business-like little GILLETTE. Daily, in three minutes, it transforms him from a man uncouth, ungroomed, into a clean-cut modern man of action.

So easy, too!. No honing—no stropping—no cautious working round the awkward corners of his face.

He just picks up the GILLETTE—and SHAVES.
It slips through the stiffest beard with never a pull, never a gash. Any man can shave with a GILLETTE the first ti

Handsome as a piece of jewelry, and a real, saving comfort, the GILLETTE is a Christmas —and worth getting.

Your hardware dealer, druggist or jeweler splendid selection of GILLETTES. Standard Editions, $5 to $6—Combination Sets from $6.50

GILLETTE SAFETY RAZOR CO. OF CAN

Gillette

OFFICE AND FACTORY,
63 ST. ALEXANDER STREET, MONTREAL.

It's Up to You!

At the left is a sample of the catchy, convincing Christmas copy we are running for your benefit throughout Canada.

We've put more good, strong advertising behind the GILLETTE this year than any other manufacturer has put behind any other article on your shelves.

The result?

Thousands of people are buying GILLETTES this season.

At the right is the ad. we are running in the papers in the second week of December.

Sensational? Yes, on purpose. We're bound to make everybody read it, and we rather think they will.

Read it yourself. Note what it says. The GILLETTE business is all around you. Some hustling dealer is going to get it.

It's strictly up to you.

CHRISTMAS SALE

of

Gillette Safety Razors

GILLETTES have been advertised during the whole year, and have sold faster than ever before.

Now that the Christmas rush is on, with the keenest demand of the whole twelve months, GILLETTE dealers all over the country are helping not only to remind you what a splendid Christmas present the GILLETTE makes, but to tell you in which stores you can find the best assortments to choose from.

If your hardware dealer, your druggist or your jeweler has a good assortment of GILLETTES you'll see his advertisement in the local paper or notice the big GILLETTE Depot Sign on his Store-front.

No use to look for

CUT PRICES

for the Standard GILLETTE sells the world over for the uniform and reasonable price of $5.00. Pocket Editions run from $5.00 to $6.00, and Combination Sets from $6.50 up.

Go in to the GILLETTE Dealer's store and look the GILLETTE styles over carefully. You are pretty sure to find among them just the Christmas gift for which you are looking.

MINISTÈRE DE LA MARINE

République Française

Liberté — Égalité — Fraternité

Paris le 28 DEC 1906

Direction Centrale des Constructions Navales.
Bureau
Bureau Administratif.
Bureau Technique.

Le Ministre de la Marine

A Monsieur le Directeur de la Compagnie Magnolia. 50 rue Taitbout, Paris IX.

Admission aux fournitures de la Marine.

Monsieur, par lettre du 10 juillet 1906 vous sollicitez l'autorisation d'être admis à soumissionner certaines fournitures de la Marine.

J'ai l'honneur de vous faire savoir qu'après examen des renseignements fournis par le Service de la Surveillance sur vos moyens de production, j'ai décidé que vous pourriez être admis à soumissionner les fournitures de métal antifriction "MAGNOLIA".

Par dépêche de ce jour je donne avis de cette décision aux Administrations des cinq ports, de la Tunisie, aux Etablissements de la Marine à Indret et à Guérigny et à la Commission des Machines et du Grand Outillage à Paris.

Recevez, Monsieur, les assurances de ma considération distinguée,

Pour le Ministre et par son ordre,
Le Directeur Général des Constructions Navales,

MAGNOLIA ANTIFRICTION METAL

TEST No. 783

By the Research Laboratory of the

FRENCH GOVERNMENT

These Tests were Divided into Three Sections

1st. Determination of the coefficients of friction under varying pressures.

2nd. Determination of temperatures under different velocities.

" Endurance Tests."

3rd. Determination of the rate of wear.

Report of these tests was accompanied by fourteen tabulations and the results were so highly favorable to Magnolia Metal—sustaining in every particular its well-known qualities---that the letter shown hereon was written by order of the Minister of Marine approving of the use of Magnolia Metal by the French Navy. No people surpass the French in scientific knowledge and highly technical, painstaking investigation, and their endorsement of Magnolia Metal is another strong link in the chain of evidence that we are able to furnish.

Sold by the leading dealers everywhere or by

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

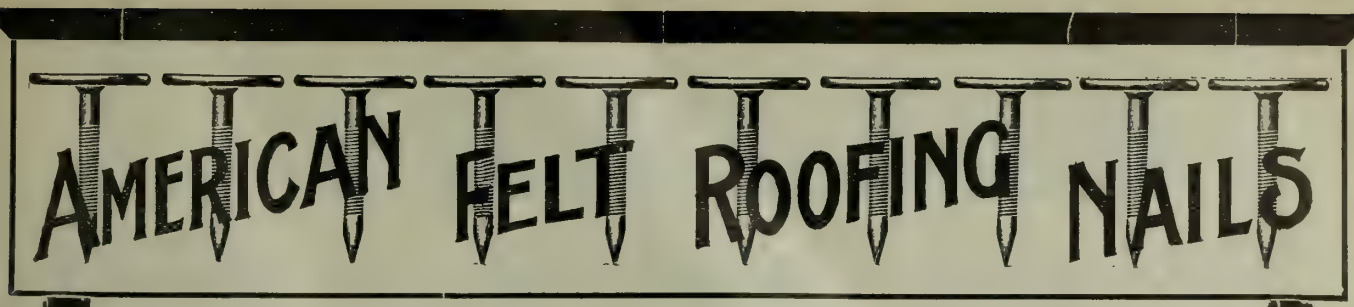
Hardwaremen



Are you assured of an income in addition to the profits from your hardware business? A large percentage of business men put aside a portion of their profits each year to invest in safe stocks or bonds. By so doing they are assured of a supplemental income when business is dull.

Are you investing your surplus to the best advantage? You will get the highest return possible by reading each week *The Financial Post of Canada.*

The Post deals with all manner of reliable investments and you will be able to save many times the price of a subscription. Our Investors' Information Bureau is at the disposal of our readers and will make special reports to them free upon any matter of investment interest.

Send us your name NOW and we will mail *The Post* to you until January 1, 1912, for the price of a year's subscription, $3.00. Address—

The Financial Post
143-149 University Avenue
TORONTO

WHY?

BECAUSE

THEY have been adopted by roofers and contractors as an article of unique merit that effects a two-thirds saving in labor.

THEY are pressed from one solid piece of drawn wire, with heads carefully rounded and planished, so as to afford a solid compact without injuring the frailest roof covering.

THEY make a much superior watertight finished roof, and will outwear any other roof fastener.

THEY are indestructible and particularly adapted to our climate, where sleet, snow and frost have demonstrated the unsuitability of other makes.

THEY have received the approval of the most conservative purchasers and are stocked by leading wholesale and retail hardware dealers.

THEY are in a class by themselves, so why not protect your customers' interests by starting now? It's never too late.

THEY sell themselves, after being properly introduced, with their unique features.

ORDER **NOW** FOR SPRING DELIVERY

UNITED STATES STEEL PRODUCTS EXPORT CO., MONTREAL

Some good reasons why you should sell our Trough and Conductor Pipe

We no longer make trough on a brake. The ordinary way is not good enough for us. But we make it by an improved method. Each length is made on a heavy power press *over the same form* so that they are *exactly alike.* Uniformity of shape, accuracy of fit are therefore assured.

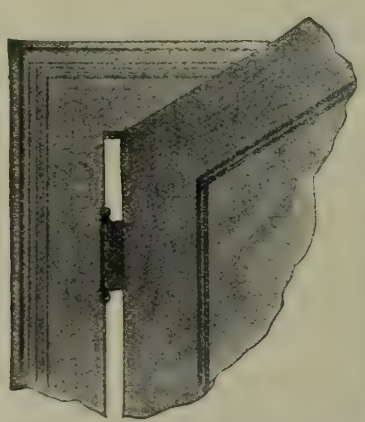
No other maker of trough in Canada is using this improved method. Please remember that fact when ordering trough.

Also remember that our trough is *easier to erect* and *requires less* solder, thus saving you time and money.

You can have trough made by this improved method in any gauge of steel, and with square or round bead. We make a specialty of circular trough, curved any radius you desire.

We make our *Conductor Pipe* just as carefully and accurately as we do our trough. So if you want superior trough and conductor pipe at very reasonable prices, just write us for quotations.

Metal Shingle & Siding Co., Limited



Branch Office and Factory, Montreal, P.Q. - PRESTON, ONTARIO

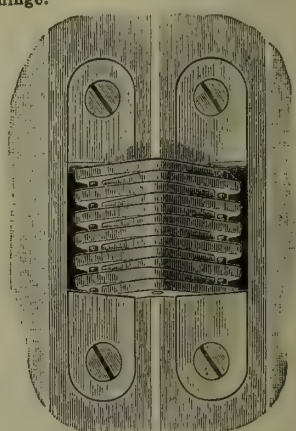
Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto

PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.



COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years. The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge.

Invisible Hinge as it appears when door is open

No. 101, suitable for wood ⅛" to ¼" thick (furniture work.) Will carry a door 3' x 18".
No. 102, same as above, but has square corners.
No. 104, wood must be ¾". Will carry a door 5' x 2' x ⅛.
No. 108, wood must be 7". Will carry a door 6' x 30" x 1½.
No. 112, wood must be 1⅛" to 1½". Will carry a door 6' x 2' 6" x 1½".
No. 116, wood must be 1⅝" to 2½".

STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

Why you should push Genasco

There's nothing you sell that has a better chance of good returns than

Genasco
Ready Roofing

To begin with, Genasco has the quality. That makes it easy to "talk it up." You can count on absolute satisfaction to your customer, and look for him back again for more.

We guarantee Genasco, and thus secure for you a greater degree of confidence than ever from your customer.

Another thing: we have paved your way for easy sales by our persistent advertising year after year.

And your jobber will supply you with printed helps to make your selling efforts tell to their utmost.

Genasco is an easy proposition—and a profitable one. It is satisfactory all around, and you ought to get the full benefit.

Write to-day for samples and full information.

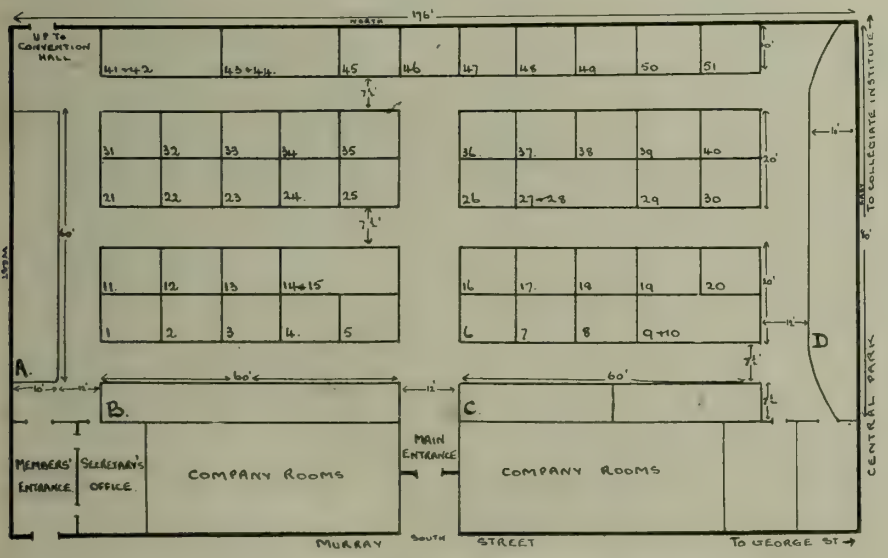
Many Manufacturers Will Make Exhibits at Peterboro

All the Booths in the Big Armouries Allotted Three Months Before the Date of Holding the Convention and Exhibition—An Effort Being Made to Secure Special Railway Rates from Western Provinces—Travelers Showing Their Interest in the Retail Association.



The executive committee of the Ontario Retail Hardware and Stove Dealers' Association are confronted with the pleasing but embarrassing position of having sold all the space available in the big armories at Peterboro, three months before the date of holding the convention. The armories are 80x176 feet in size, and judging by past experience it was decided that about 60 firms might desire to make displays at the Peterboro Exhibition. Consequently the floor space was divided up into 52 booths 12x10 feet in size, equalling 120 square feet, whereas the booths at London last February contained only 68 square feet. Special spaces were also laid out at the ends.

In August the first announcement of the exhibition was sent out and on Nov. 23 the last space was allotted. Since which time applications have been made for space by two vacuum cleaner manufacturers, one saw manufacturer, one varnish company and one sharpening stone manufacturer. An effort will be made to arrange special space for these and other late arrivals.

The accompanying sketch shows the floor plan of the exhibition hall, and the names of the firms who have been allotted space are as follows:

Lundy Shovel & Tool Co., Peterboro.
J. J. Turner & Son, Peterboro.
B. F. Ackerman, Son & Co., Peterboro.
Peterboro Canoe Co., Peterboro.
Adam Hall (stoves), Peterboro.

51 F. W. Bird & Son, Hamilton.

As exhibitors have been asked to make their booths places where visiting retailers can receive selling pointers about the goods and to pay more attention to the educational feature rather than to the distribution of souvenirs, it can be taken for granted that the exhibition will repay any merchant for the time and expense entailed in visiting the convention and exhibition. While business will not be pushed for by the exhibitors, orders will be taken by many to be shipped direct or through the jobber handling the goods. One Northern Ontario retail firm is said to have purchased $3,000 worth of goods at the London exhibition.

The expenses in connection with the convention and exhibition will be very heavy both for exhibitors and the Retail Hardware Association, the latter having contracted with Peterboro firms to erect the booths in the convention hall, decorate them with bunting, and place a large sign on each booth. A band has also been engaged for two nights and an orchestra and professional entertainer for the third evening.

Special Railway Rates.

The big attendance assured, however, necessitates making the arrangements upon an elaborate scale besides making it possible to guarantee a single fare rate (on the certificate plan) to all visitors from points between Fort William and Halifax. This special rate is available to any person attending the convention or exhibition, whether they be manufacturers, jobbers, travelers, retailers, or clerks. The wives or children of any visitors are also able to travel on the convention certificates.

An application has now been made to secure reduced rates from points in Canada west of Fort William.

Travelers are Boosting.

Quite a number of new members have been enrolled into the Ontario Association during the past month, many of these being sent in by travelers who are associate members of the association.

The new gold-plated membership buttons will be ready for distribution before Christmas.

Last Minute Suggestions About Christmas Displays

The Importance of a Good Display—The merits of the Simple Design—Whatever is Done Should be Done With Enthusiasm — Representing the Spirit of the Times—The Secret of Christmas Advertising—The Necessity of Illuminating the Store Well.

At this season of the year more than at any other, hardware mechants should put their heart and soul into their window displays. The old adage that "what is worth doing is worth doing well" is very applicable to the windows. There has been a great development in outside displays within recent years, but even now many merchants fail to grasp the importance of a really artistic, and yet business-bringer, window. There seems to be an idea which is hard to uproot, that unless a merchant can show something spectacular in his display, or have a design that is very much out of the common, it is better to leave his windows alone, or at least only pay a perfunctory interest in them. This is a great mistake. Staple lines of hardware, lines that everyone knows are carried in a hardware merchant's stock, can be so arranged as to present a most pleasant appearance, and be attractive to the general run of passers-by. It is not so much the individual lines themselves that make an attractive window. It is the general combination. The eye is attracted at first by the window as a whole, and then by the individual lines.

The Christmas Window.

So is this the case of the Christmas window. The merchant has no need to run a spectacular line, a model Santa Claus with reindeer, aeroplanes, toboggan slides, or railroad trains running through the Rockies laden with Christmas goods. He can, with the ordinary lines that he is carrying, helped out by simple Christmas decorations, so display his goods that they not only command attention, but bring in straight business, a thing which a spectacular window does not always do. Of course, we are not discounting the spectacular window. A design of this description is wonderfully attractive, and is a great advertisement for the merchant, but we wish to emphasize the value of the non-spectacular window, because many merchants are undoubtedly of the opinion that unless they can do something out of the ordinary, they might just as well ignore their windows or at any rate pay but little attention to them.

There is this great truth in window display, and that is whatever is done should be done with enthusiasm, and in no half-hearted way. Nothing should be attempted which is beyond the scope and ability of the merchant to accomplish. If a merchant has a spectacular window let it be spectacular without any doubt. Do not have something that looks neither one nor the other. Do not utilize mechanism which works one moment and not the next. Do not attempt any lighting effect which fails just when it is wanted to look its best. In fact, do it well or do not do it at all.

The great thing to be aimed at is the Christmas spirit. If the windows represent the feeling that obtains amongst us all at this time of the year, the merchant has won half the battle. People are on the lookout for something pretty. They go through the streets primed with the anticipation that they will see lots of holly, imitation snow, Christmas trees and a glittering array of pretty presents suitable for all pockets, and surmounting it all that feeling of good cheer and kindliness towards everyone that is associated with this time of the year. The merchant with just the ordinary lines of Christmas goods and a little ingenuity can easily give his window that desired appearance. The observer will gauge what the merchant has from his windows. If he fails them not in this Christmassy appearance of his windows, he will draw them inside, and after all this is the main object of window display. If he disappoints them they will pass on.

Unless a merchant has two windows to devote to display, and unless he has secured a reputation in previous years for Christmas presents, he would be well advised not to devote the whole space to any spectacular design, even though he is in a position to be able to have a good one. A window filled with stock gives a far better idea to the observer of what kind of goods the merchant carries than a window which is elaborate in its design. In addition the merchant has this advantage, that without spoiling the effect he can price his goods. There has been a signal reduction in the cost of many articles, and many a line that to the uninitiated would seem to be exceedingly costly, is much cheaper than is thought to be the case. For instance, many pretty lines of silverware are now shown which are one-third less in price than they used to be, and here the value of the ticket price comes in.

Thorough Combination.

Then there must be absolute combination between the window and the interior. The interest of the observer must not be excited only to be thrown down directly he or she enters the store. That is fatal to good purchasing. In fact, the whole secret of Christmas advertising is a happy combination between newspaper or circular announcements, and the exterior and interior displays. The one must enhance the influence of the other until probable purchasers are so worked up that they buy with celerity, and, let us hope, with due extravagance. It is so easy to work up the Christmas spirit. It is not like starting on absolutely unresponsive ground and working up enthusiasm unaided. Already the people are becoming excited and pleased with themselves. The children are chattering about Santa Claus, and their parents and brothers and sisters are reckoning the number of presents they are going to give. Everything is ready, like the Christmas pudding, for the stirring, and this stirring can be easily accomplished by the merchant. Let him throw his heart and soul into the Christmas feeling. Let him say to his people: "Here we are. Let us help one another to enjoy the times. I can aid you and you can aid me. Let us all be happy together." Imbue the clerks with the same enthusiasm. Let every customer be met with a smiling face, and with a feeling that an attendance on his wants is part and parcel of the Christmas fun. Let customers go away with a feeling that not only have they bought what they want, but that the merchant is a good fellow, his clerks are good fellows, and that his store is well worth visiting. Take the reverse side.

Presuming the store is but half decorated, presuming the merchant or his clerks have a grouch on them, and make it evident that it is somewhat of a burden to attend to customers. The purchasers feel their spirits evaporate, even though they have bought what they wanted; they feel that the buying has been destitute of half its pleasures—(for after all there is very nearly as much pleasure in buying something for somebody else as there is in receiving.) They say to themselves that they are sorry they ever entered the store, and that the merchant cannot be doing very well or else he would be more enthused with the times. This feeling is not lost at Christmas. It is reflected probably right through the coming year, and is remembered again the next Christmas, and some other store reaps the benefit.

Good Illumination.

One does not look at a Christmas tree if it is not illuminated. One does not receive a present with half as much pleasure from a tree that has no glittering ornaments, and it is the same with a store at Christmas. Not only do we urge the necessity of giving the store the right Christmas spirit, but we also urge the necessity of good illumination. There is an old saying "Do not spoil the ship for a ha'porth of tar," and do not discount the Christmas preparations by economizing, or what is thought to be economizing, in the illumination. Let everything look bright and cheerful. In the evening let the windows shine out across the street, impelling people to come and look in,

just the same as the candle draws the moth. Let there be no dark corners in the store. Let every article have its share of light, so that its attractions as a seller will not be diminished. Let there be no necessity for a customer to have to take an article from its place on a table or a counter and go to the light to look at it properly. Let the clerks have no trouble to put down their orders. It is not expensive nowadays with the great improvements that have been made in lamps and fixtures, to put up a good light at a minimum amount of expense, and if the merchant is not fitted with strong illumination he should at all events make due preparation to have these improved, especially for his Christmas trade, and let us remark that once having found the value of good illumination at Christmas he will appreciate it all the year around.

Demand for Dolls' Goods on the Increase

Folders, Carriages and Metal Dolls' Furnishings are Largely in Demand—Hardware Men are Taking Up These Lines — How They Should be Displayed.

Hardware merchants are handling more extensively this year than ever before such articles as dolls' carriages, dolls' metal beds and furnishings, metal go-carts and runners. Local supply houses are at the present time rushed to the limit meeting the demand for the Christmas trade and they report that a larger proportion of the stock than in past seasons is being taken by the hardware trade. There are, however, many places where only fancy goods and toy stores are supplied, demonstrating that in these places at least the hardware men are content to let others usurp a branch of trade which in reality belongs to them.

The demand this season is so large that it is quite evident the goods have found favor in the eyes of the public. This is to be expected as some of the best selling articles, such as sleighs, express carts, etc., are of a useful variety.

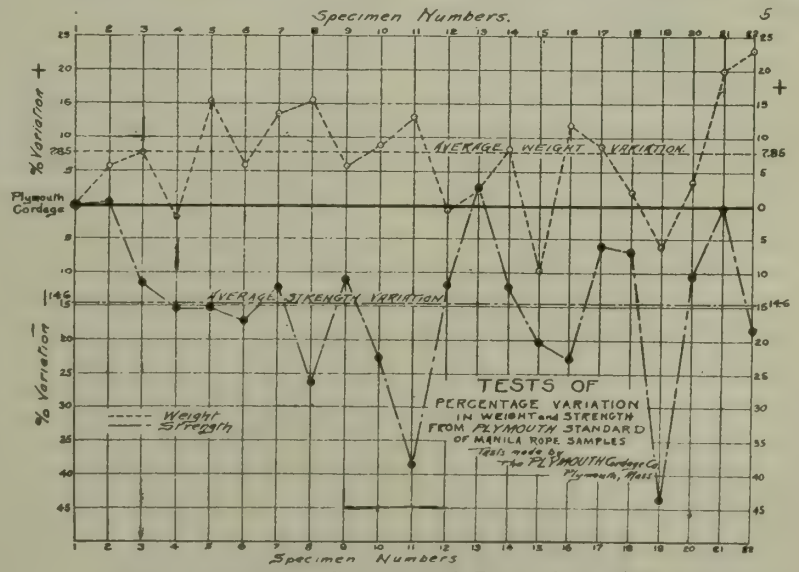
Some New Varieties.

Among the lines mostly in demand are dolls' carriages, dolls' beds, chairs, tables and hammock frames, dolls' folders, miniature sleighs for dolls and toy animals, sleighs and express wagons. All being of metal construction, they are suited to the hardware trade.

Dolls' folders are practically a product of the past year. Although offered last Christmas, they were shown only in small numbers and the demand was quite light. This year the demand is so great that the manufacturer finds it hard to keep pace with the orders. A doll's folder, by the way, is a miniature go-cart, in which little girls can wheel their dolls, and which folds up into very small and convenient space. The folding process is so simple that children can easily manage it.

The Gendron Mfg. Co., Toronto, are selling a very handsome sleigh this season, which is meeting with a ready sale. It is large, with high sides, most comfortably upholstered. The body is painted white with light decorations done in other colors. This handsome sleigh, despite the fact that it is fairly high priced, is commanding a heavy sale.

Another new line, which is going well, is an all metal express cart.



How to Feature the Goods.

To properly feature such lines, a window should at some stage of the holiday season be devoted to them. Effective displays can be arranged without any difficulty. A hardware man last year very happily arranged a "dolls' goods" window, which commanded much attention. A large dolls' house occupied the centre space. The rooms contained neat metal beds, chairs, tables, stoves and, in fact, everything in miniature that a house usually contains. Around the house were grouped supplies of the larger varieties—dolls' folders and carriages, dolls' hammocks, automobiles, pianos and stoves.

Inside the store, the dolls' supplies should have a table to themselves or be displayed with the other toys—if the dealer handles Christmas toys. It is found very difficult to display sleighs and express wagons during the holiday rush, but they can generally be lined up in some spot where they are sure to be noticed.

VARIATION SHOWN IN ROPE TESTS.

In order to determine the amount of variation in the behavior of specimens of manila rope a large number of tests have been made recently by the Plymouth Cordage Company, of North Plymouth, Mass. Twenty-two samples of three-inch manila, each specimen the product of a different manufacturer, were compared as to weight per unit of length and average tensile strength. The results are shown graphically on the accompanying curves which were plotted with the Plymouth Cordage specimen used as a standard and the percentage variations either plus or minus of the different samples figured from this standard.

Variation shown in Strength of Rope in a given test.

The extent of these variations is really remarkable, the weights varying from minus 9.6 per cent to plus 22.6 per cent. with an average deviation of plus 7.85 per cent., while the variations in strength were even more striking, ranging from plus 2.5 per cent. to a minimum of minus 43.7 per cent. The average strength deviation from the Plymouth specimen was minus 14.6 per cent. Not only is the extent of these deviations from a given standard surprising, but also the fact that there seems to be no logical relation between the shape of the weight curve and that of the strength curve. In many cases the latter rises when the former shows a depression and vice versa. This is particularly noticeable in the area of the curves included between specimens eight and fourteen.

A very evident lesson which these results point out is that there is room for considerable work in the matter of standardizing the production of rope so that size and weight will give more indication of the amount of strength to be expected from a sample. How shall anyone be able to foretell the load that may safely be carried by a three-inch manila rope when the specimens tested in this series showed results varying all the way from 9,010 lbs. for the maximum to 4,946 for a minimum, with the remaining samples scattered promiscuously over the area between? If rope is purchased with its strength based upon the minimum, which would naturally be a safe method, it is likely to have a maximum strength, in which case it could well be of smaller size, while if the average value was taken it may possibly be considerably weaker than has been figured upon, with a consequent shorter life.

It certainly seems that the standardization of rope-making should be made the object of rope-makers everywhere and the information gathered in this series of tests is an important step in the right direction.

PUBLISHED EVERY SATURDAY.

ABOUT SUBSCRIPTION COMPLAINTS.

An Ontario subscriber gave Hardware and Metal some friendly criticism last week because he was billed for his subscription a week or so before and on the same day one of our traveling representatives made a personal call on him and asked for payment of the account. "And," writes the subscriber, "my year is not up until April next."

We appreciate letters of this sort from subscribers and consider that a discussion of the points will be interesting to all our readers.

In the first place business men and firms should endeavor to collect all accounts when they are due—and it is an invariable rule that subscriptions to periodicals are payable in advance. Consequently the account in question was due in April last and our business department was but living up to our advice to subscribers that they make every endeavor to collect outstanding accounts as soon as possible after they are due. We are but practicing what we preach.

In the second place it was merely a coincidence that the subscriber should have been dunned by letter and in personal canvass the same day. It might look to the subscriber as though it was intended to harass him but it merely happened that our two systems of collection overlapped in this instance.

A staff of agents is constantly kept in the field, making collections, securing new subscriptions and gathering news. The agents are instructed not to press for collections but merely to suggest that it may be a convenience to the subscriber to pay through the agent rather than by writing a letter and buying a money order. At stated times in the year courteously worded letters are also sent out to firms whose subscriptions are not paid in advance. It was one of these that the subscriber received the same day that the collector called upon him.

The collection of accounts is one of the most unpleasant duties in business life and merchants, who themselves understand the problem, will appreciate our effort to get as close to the cash system as possible.

LAW NEEDS AMENDMENT

A discussion amongst railwaymen at St. Thomas in favor of a fortnightly payment of wages has brought forth opposition on the part of some merchants who contend that if wages are paid bimonthly the delinquent railway worker will seldom have enough money coming to him to enable merchants to garnishee for unpaid accounts. Unless an employe has more than $25 coming to him the wages are not subject to garnishment.

The merchants who are opposing the proposed change are barking up the wrong tree. It would be better for both merchants and workmen if wages were paid weekly instead of fortnightly or monthly. Business, then, would be upon a cash rather than a credit basis, purchases would be more carefully made and merchants stocks and books would be cleaner than under the monthly payment system.

What is needed is a change in the law governing garnishments. The minimum sum should be reduced to $5 or $10 and protection should be given the seller rather than the buyer of goods.

Merchants must bestir themselves if they are to make their influence felt in the halls of legislation. The Retail Hardware and the Retail Merchants' Associations have both taken strong ground in favor of the amendment of the regulations governing garnishments in the Division Court Act but the Ontario Government have listened more to the wails of the bailiffs and other hangers-on who oppose any change in the present law than to the merchants who desire protection from deadbeats.

Merchants should give greater support to their trade organizations. Acting alone the St. Thomas merchants can accomplish little or nothing. Organized they will be able to co-operate with merchants in other places in working for the amendment or abolition of laws which are unfair to retail merchants.

USE PLAIN FIGURES.

Some merchants still use secret marks for both cost and selling prices on the goods in their stock, but it is about as bad a practice as one could adopt in these days when customers are accustomed to see newspaper advertisements filled with figures and goods in window displays promiscuously marked with price tickets.

A secret mark is really an invitation to the customer to ask for a lower price. The buyer seeing some marks of a secret code which he cannot understand becomes suspicious and although he or she may not ask if the article cannot be sold for less than the price named, the thought is likely to lurk in his or her brain that the price was not right and, remembering that everything in the store down the street was marked in plain figures, the decision is made that it is safer to buy in the store where the proprietor has "one price for all."

Particularly in the Christmas season is it well to mark all goods in plain figures. The average customer is uncertain what to buy. Certain appropriations have been made for presents for relatives and friends and the gift giver wants to select suitable presents of a value established by the amount available for spending. And the buyer wants to roam through the stores, look for the new lines being introduced, and where an article is seen which seems suitable for one of the persons to be remembered the customer likes to pick the article up and examine it. Then if the price is plainly marked on the article or on a tag the customer decides at once if it is too expensive or whether it will suit the purpose in mind. The customer, in fact, wants to do his or her own buying and if the clerk is at hand to complete the sale, take the money and tie up the parcel that is all that is desired or required in many cases.

True salesmanship consists in making it as easy as possible for the customer to make the purchase and then, if uncertainty exists in the buyer's mind, to assist the buyer by making suggestions, not with the apparent purpose of selling goods, but of helping the customer to make a suitable selection. There is nothing which a customer resents so much as to feel that the salesman has encouraged the purchase of an article merely to make the sale.

To put a mark on your goods which is understandable only to yourself is like advertising in an out-of-town paper or putting in a window display and then pulling down the curtain. It is a deterrant to salesmanship and the practice should be stopped by all merchants who consider themselves progressive.

Advertise and display the goods so that they will attract attention, mark each article in plain figures and then have a sufficient staff of salesmen on hand who are instructed not to sell goods but to help customers to buy goods.

COURTESY IS REPAID.

Courtesy is a great selling factor. In the modern merchandising, the man who takes this means of pleasing his customers is banking on a sure thing.

There are numerous instances which prove, that exercised in the most ordinary way, this quality always repays in kind. The merchant who on a rainy day loaned his customer a brand new rain coat in order to enable her to reach home, not only made a sale of that coat the next day, but also put that customer in a most friendly attitude towards his store. Every day multiplies instances of this kind.

SHOPPING WEEKS AND CARNIVALS.

The trend of the times seems to be setting more and more toward co-operative effort on the part of retail merchants and tradesmen, for the advancement of their mutual interests. They are being forced into this attitude by present-day conditions, a strong factor being the opposition of the larger dealers and mail order houses. The tendency to act more in concert is not entirely due, however, to the recognized need of organizing against hostile influences. The fact that merchants are realizing now as never before the benefits of mutual assistance accounts to a great extent for the new movement. The bitterness that business rivalry so often bred in past days is not now so much in evidence. Cut rate wars are less frequent. Keen competition is still the order but it is gratifying to note that merchants in most branches of trade are willing to work together for the betterment of trade conditions.

One of the ways in which this feeling is manifesting itself is the organization of carnival and shopping weeks. These "trade revivals" are now the order in the old world, as well as the new, and are entered into by all classes of merchants. In England "shopping weeks" are being arranged in numerous towns, the object being to rouse loyalty to home interests and put a stop to the very general patronage now accorded to mail order houses. The plan is to set aside a certain week and arrange for big sales during that period. The stores and streets are decorated, plans of entertainment are arranged and the whole town gives itself up to a combined programme of business and pleasure.

In Calgary a shopping carnival is being arranged, but for a very different purpose. The merchants there realize that February is a dull month from the commercial standpoint and a carnival week is to be held to alleviate conditions during that month. As soon as the Christmas rush is over, the preliminary work will be taken up in earnest. The plan pursued will probably be to form a committee of representative citizens and to appoint an organizer. This executive, through their agent, will make all arrangements for railway rates, entertainments, decorations, special attractions and contests.

Merchants of London, Ont., are planning a "Trade in London" week to be held in January.

The idea, as the name suggests is to bolster up public loyalty to the home merchant.

Straight Talks on Hardware Salesmanship

TALK No. 5 BY VICTOR LAURISTON

The usually happy housewife was on the verge of tears.

"It's so hard," she declared, "to tell what to buy anyone for Christmas. Last year I bought Jennie a hand-bag, and Minnie Jones bought her another hand-bag. The year before I gave her a pair of gloves, and she got three other pairs. The worry of choosing Christmas presents is worse than the expense."

That's just the attitude of a big percentage of Christmas buyers. It's an attitude accentuated every moment with the near approach of Christmas Day. They're too busy with household and social duties to closely study the selection of Christmas gifts. They know of several conventional articles for a young man; and other conventional articles for dad, and an equally limited array for Sis. For a buyer to jump out of this rut and buy something novel in the gift line is a miracle.

Here's a golden business opportunity. Are you reaching out with all your business tentacles and grabbing this opportunity by the forelock?

You're now on the last lap of the Christmas season. Christmas buying and selling is the only thing fresh in your tired memory. And how many hundreds of people have you waited upon who would have bought and yet didn't buy—just because they weren't quite satisfied that this was the correct thing for Jim, or feared that someone else would duplicate the gift?

You know the answer. Buyers and sellers alike know the answer. Were this not just the common state of mind, Christmas buying and selling would be done in half the time.

The remedy is for the seller to—suggest.

First, know your goods. Study your Christmas lines, and mentally assort them. These lines are for Him, and those for Her—these others for It, and still others for Them.

This assorting has often been done in advertising, and sometimes in window and counter display. You can do it, too, behind the counter. Instead of acting as a mere automaton, handing down the one thing Mr. Buyer first asks for, find out for what class of person he intends his gift, and suggest other lines. Do it politely, gently, hesitantly, if you will—but suggest.

And widen your range of suggestion to the utmost. Don't be satisfied with the conventional Christmas lines. Look over all your stock, and seek for everyday articles that have a Christmas side.

You can't cram a natural gas service into a Christmas stocking; yet a gas company in a Western Ontario town has for weeks past handed out a convincing line of talk on this immense convenience as a Christmas gift to the tired housekeeper. Another man in the same town says: "Give your wife as a Christmas present a contract to have her housecleaning done by vacuum cleaner the year round." These are

"Why Not Give a Useful Present Like a hanging lamp."

everyday things; yet, looked at in this way, they have a Christmas side.

Your everyday shelves or your everyday plumbing shop or your everyday tin-shop may have dozens of similar ideas to offer on the subject of Christmas gifts—gifts whose unconventionality appeals to the jaded mind of the buyer tired of the monotony and duplication that always comes of buying the same old, conventional things. And, having discovered new things, suggest them. When you make buying easier for the buyer, you make selling easier for yourself.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Toronto.

Putty.—10c advance in some grades.
Tin.—1c advance.
Dull Canada Plates.—10c advance.

MONTREAL.

December 9.—Despite the nearing approach of the dead season a good volume of buying is noticed. The general industrial activity all the way round is demanding a satisfactory quantity of metal, and as users are working on low stocks, they are bound to buy steadily no matter how prices may be. The markets have been unchanged, although with the bulling in London it looked as if tin figures would advance once more. Copper had a firm tone, although the tendency in New York has not been altogether for firmer figures. Pig iron has been on the quiet side, with smaller users in the market at the higher figures.

The London bull operators have maintained control of the situation, and again raised the prices on favorable statistics as to American deliveries and a falling off in supplies from the Straits. The squeeze is strongly maintained, and users are paying dearly for all the metal they want. With less support from London, New York has shown a little sagging in copper. Holdets were more ready with concessions, and this seemed to have stimulated buying as larger business is reported from the legitimate trade. Exports keep up well, and altogether despite the concessions the metal is not on the weak side. Spelter continue as strong as ever. The iron and steel situation in the States is very dull. Sales and new inquiries are very moderate. The opinion is growing that the tide will not turn until the early spring. It is expected that the year will commence with a reduction in steel prices. This will encourage business.

Pig Iron.—Business is quiet, as only to be expected at this time. Small users however, are in the market for imported iron. Domestic furnaces report new business as satisfactory considering circumstances. Conditions continue dull across the border. New business is scarce, and what there is is of a light character. Reports of concessions to encourage buying are to hand. The decision of the steel interests not to reduce prices was not unexpected. But it is anticipated that it will come at the next meeting in January, when a reduction would have a much greater stimulating effect upon new business than now.

Tin.—No changes in prices occurred locally ,although it looked as if this would happen, when the London market commenced to jump up again. Trade has been very good considering all things. There is no encouragement to buy, but users want the metal, and they must pay the enhanced prices. So far as the primary markets are concerned, the bull operators continue to hold the trump cards. Helped by favorable statistics as to consumption and supply there has been more heavy bulling.

Copper.—Copper remains unchanged. There is a fair demand and inquires seem to be improving. This looks good for future business. The slight sagging noticed in New York has not been reflected very much locally, although good round lots are offered at fair concessions. On the whole the tendency in New York is for further weakness, especially if the London market continues to go back. Consumption is reported dull, but the exports keep up well. Holders, while not appearing very anxious to force sales, are not averse to cut figures.

Spelter.—Spelter is unchanged. The demand is good and close watch is being kept on the markets. There is more firmness in the London market, where buying continues good. St. Louis is showing a decline, but it is so slow that it is hardly noticeable, except to those who are closely watching figures.

Lead.—Both domestic and imported lead are unchanged. There is fair trade doing in both grades. The English market shows signs of improving again.

Scrap.—The scrap market is quiet, with little offering except in the coarser metals. We quote: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1, wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, Dec. 9.—The local metal market has shown greater activity during the past week and, while prices as a whole have remained steady, increases have been made in some lines. The feature of the market is the continuous rise in tin. An advance of one cent was recorded this week, directly due to the fact that the London syndicate continues to maintain its "squeeze," despite the allied interests working against it. Dull Canada plates have gone up ten cents, the price now being $3.00.

The dullness of the market last week was sharply in contrast with conditions prevailing now. There was quite a noticeable advance in stock orders this week. firms in all parts supplementing their supplies more or less substantially. The improvement must necessarily be of a temporary nature, however, as the stock-taking season is close at hand and manufacturers are not likely to stock up more than is absolutely essential.

Pig Iron.—The situation is quiet. Slight fluctuations in price have taken place during the week but local prices have not been affected. The price scale here stands: Canadian No. 1, $19.50; No. 2, f.o.b. furnace sellers, $19; Middlesboro, No. 3, $20; Summerlee No. 2, $22.50; Cleveland, No. 1, $20.50; Clarence No. 3, $20.75; Jarrow, $20.50; Glengarnock, $22.50.

Tin.—The predicted advance materialized this week, the local price increasing one cent. For small lots 42 cents is now asked and 39 cents is the price for ton lots and over. As most of the buying is done at present in small orders, the prevailing figure here is 42 cents. The advance can be traced to the bull operations on the primary market. Although the fluctuations in London are not usually followed here, the steady upward trend, forced by the bull element, inevitably must affect prices and the increase this week is said by some to presage further changes in the same direction. This, however, is purely a matter of conjecture as it is impossible to say how long the squeeze in London will be maintained.

Plates and Sheets.—There is a better tone in plates and sheets. During the past few weeks the supply has been fairly adequate but the stimulation in demand for the last two or three days has been marked and Canada plate stocks have been almost wiped out. Urgent demand is still made from the West for shipment from stock and there is every evidence that the consumption will again outweigh the supply as considerably as it did earlier in the season.

Dull Canada plates are now quoted at $3.00, an advance of ten cents.

Copper.—The local situation shows no change, the dominant features being firmness and confidence. There is not a great deal of trading done just now. Daily fluctuations have marked the foreign markets but the alteration for the week has been insignificant and has not been reflected locally. Sentiment, as a whole, remains favorable to the article but business here, as elsewhere, has undergone a contraction during the past few weeks.

Lead.—The lead market is fairly strong with a reasonably good demand. Prices quoted locally are $3.85 for domestic and $3.90 for imported in small bulk. For ton lots and over a 10 per cent. discount is made.

Spelter.—The situation shows no change. Although the demand is satisfactory, it is made up almost entirely of small lots. Buyers have no reason to delay the placing of substantial orders for future requirement, but they are holding off until after the stock-taking and holiday season. The consumption suits the supply, however, which is reported to be rather light. Local prices range from $6.15 to $6.25.

Old Materials.—While prices show no change, the fact remains that the situation shows an easier tone. If there was any disposition shown to buy, quotations doubtless would be forced down but that disposition is not apparent. Present prices are: Heavy copper and wire, 11¼ to 11½c; heavy red brass, 10¼c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $10 to $11; malleable, No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $13.

HARDWARE MARKETS

MONTREAL.

Dec. 9.—The Christmas rush has now subsided, but a steady trade is being done in seasonable lines. The absence of much snow is tending to interfere with the country trade, as the roads are not in the best of shape for sleighing. Skates are prominent, as well as hockey sticks, but snowshoes, except for lumbering purposes, are on the slow side. There is a distinct stimulation in lumbering tools, but on the other hand railroad and general construction supplies have quieted down.

Builders' hardware keeps up well, especially locally, while there is a steady trade in general lines, such as flat irons, food choppers, carpet sweepers, brooms, clothes baskets, carpenters' tools, mops, pails, and assorted enamelware. Weather strip, sleigh bells, and sleigh heaters are moving well in a sorting up way, but the absence of snow is checking the demand for snow shovels and ice scrapers.

Booking for early spring is still dull, although orders are being placed for screen doors, screen hinges, poultry netting and green wire cloth.

Prices are generally firm, and there is a good undertone. Travelers are now working their way back to headquarters for the Christmas holidays.

Christmas Lines.—A sorting up movement is still being shown in many lines, although the rush is now over. Jobbers are in a position to ship promptly, and there is little delay in getting the orders off. The range of articles continues to be very wide, and there can be no doubt as to the thorough way in which the trade have prepared for the Christmas demand. Safety razors, shaving sets, manicure sets, brass and aluminum goods, shears and scissors, not to mention the old standbys, cutlery and silverware, are among the lines being shipped.

Winter Lines—The absence of snow has checked the country demand, and also the local call for snowshoes and ice scrapers. General household lines are in steady demand, especially utensils such as food choppers and bread mixers, for use in the Christmas cooking. Enamelware and tinware are moving steadily. Weather strip, sleigh bells, sleigh heaters, horse blankets and lanterns are in steady request in a sorting up way.

Sporting Goods.—Skates and hockey sticks have received stimulation and are now moving in a vigorous fashion. Toboggans, snowshoes and sleds are being checked by the absence of snow. The holding of a week's carnival, supported this time by the railroad companies, is anticipated to stimulate the demand. Basketball accessories are showing stimulation, while there is a steady demand for gymnastic supplies.

Stoves and Ranges.—The cold weather has stimulated the call for stoves and ranges. The season is on the late side, but it is anticipated to last all the longer. Oil heaters and cookers are in steady call.

Lumbermens' Supplies. — The last week has seen a strong stimulation in lumbermens' supplies, good orders coming from all the lumbering districts. Boot calks, cross cut saws, snow shovels, axes and axe handles, and snowshoes are moving.

Builders' Hardware—The local demand continues to be steady, and some fair assorted orders have been booked during the week. Prices are firm, and we quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside) $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Bolts and Nuts.—There is a steady movement in bolts and nuts, construction work being fair all the way round. We quote: Discount on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Railroad Supplies — These lines are naturally becoming quieter, but there is a fair sorting up call in picks, hammers and shovels. Machinists' tools and measuring tapes are in fair demand.

Wire—There is fair booking being done, with the market on the firm side. We quote: Barbed wire, $2.25; plain twist, $2.55; galvanized wire, $2.20; base coiled fencing (9), $2.25; (12), $2.40; staples, bright, $2.60; galvanized, $2.85.

TORONTO.

Toronto, Dec. 9.—The Christmas season is now far advanced from the jobber's standpoint but they are still very busy and all lines are moving more or less rapidly. Builders' hardware has fallen off, owing to the decided change in weather conditions but the cold snap has brought a rush demand for seasonable winter goods. Late and supplementary orders keep the Christmas lines in demand. The stove trade is busier than had been anticipated and shows every sign of remaining brisk for some little time yet. Large orders are still being received daily.

Seasonable Goods.—The sudden turn in the weather to extreme cold has brought a heavy demand for winter goods. Dealers who held off as long as the atmospheric conditions remained mild, are now forced to stock up in a hurry and large rush orders are daily in receipt for sleds, blankets, lined gloves, sleigh-bells, runners, toboggans, snowshoes, weather strip, sleigh-heaters and goods of like description. The demand is particularly good for lines which might be termed Christmas sellers —children's sleds, express wagons and folders.

Household Goods.—The sale of household articles remains good. A recent tendency on the part of hardwaremen to feature kitchen utensils as holiday gifts has caused a rather larger demand than usual in such lines as fancy kettles, toddy kettles and enamelware goods. A good selling line is miniature enamelware and dishes, designed for children. Dolls' dishes are proving good sellers and liberal orders are received by local jobbing houses.

Builders' Hardware.— What demand there is comes practically from Toronto, the cold weather having effectually stopped building operations in other sections. Hardwaremen have turned their attention to more seasonable lines and the orders now received are almost entirely of the sorting-up variety.

Heating Goods. — Surprisingly well sustained is the demand for stoves and heating goods. Generally at this time of year the active trade will have subsided but the demand seems still to feel the stimulating influence of the long continued mildness. This is particularly true with reference to furnaces. Yesterday's mail brought orders for eight furnaces to one Toronto office and every day adds its quota still. Stoves are also going briskly. Manufacturers have caught up with their orders but the present demand is still heavy enough to keep them busy.

Sporting Goods.—With rinks open and drawing large crowds, hockey clubs forming and games being played, the skate trade has livened up most materially. The demand for supplementary skate supplies has become insistent. All hockey supplies are moving briskly and the prospects are for a big season in these lines.

Heavy Hardware.—The demand is not heavy, dealers being too busy with winter and holiday lines to pay much attention to such staples. Still there is a steady call for small supplies of bolts, nuts and rivets. Carriage bolt discounts are quoted at: ⅜ and smaller, 70; machine bolts, ⅜ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—A good proportion of the trade to-day is in holiday lines. Most dealers seem to have stocked up to capacity in staple holiday goods, such as cutlery, but supplementary orders are still coming in and the demand for Christmas specialties is now heavy. Brass goods of all kinds, ranging from art metal goods to fireside accessories, cut glass, chafing dishes, etc., are moving fast. In some local supply houses, even the members of the office staff can be seen nowadays with their coats off, busily engaged crating up Christmas specialties for rush shipment. During the next week the end of the heavy demand will doubtless be reached and sorting-up orders will be received until the last day of the Christmas season.

The Canadian Explosives Co., with a capital stock of $15,000,000 has been incorporated to manufacture explosives and ammunition and to carry on the business of coal and iron masters, brass and metal founders, tool-makers, etc., the head office to be in Montreal.

HARDWARE TRADE GOSSIP

Ontario.

J. D. Smith, Baysville, was a visitor in Toronto last Friday.

Adam Talyor, of the Taylor Forbes Co., Guelph, was a visitor in Winnipeg last week.

R. H. Smart & Co., Brockville, is making a special display of brass goods for the holiday trade.

M. Davey, North Bay, has put in electric power and will add grinding of edge tools to his business.

It is proposed to erect an enamel works at Port Arthur. Robert Greig is making the preliminary arrangements.

Geo. Dawson, an employe of the Bond Hardware Co., Guelph, cut his hand on a piece of glass, inflicting a very painful injury.

James & Reid, Perth, have moved into the new store which has been in course of erection by them during the past summer.

The enlarged factory of the Springer Lock Mfg. Co., Belleville, is now in running order, and the concern will employ 100 hands.

Robert Hobson, president, and F. H. Whitten, secreary of the Steel Company of Canada, Hamilton, were visitors in Winnipeg last week.

A chimney in Hoar's hardware store, Barrie, caught fire on Saturday night, but it was put out before any serious damage had been done.

Beginning on Dec. 1, McGowan Bros. and Jones Hardware Co., Uxbridge, adopted an agreement by which the stores close at 6 o'clock, Saturdys excepted.

W. H. Carrick, president and general manager of the Hamilton Stove and Heater Co., Hamilton, visited Winnipeg last week on his way to the Pacific Coast.

The St. Marys Hardware Co. report the installation of 25 furnaces this season, all in the vicinity of St. Marys. Business conditions have been good there this year.

The Wood Specialty Co., St. Marys, have received a large order from New York for a special line of hockey sticks, and also an order for a hundred dozen axe handles.

Ray Pratten, the general manager of the W. J. McMurtry Co., St. Thomas, is receiving congratulations from his friends on his marriage to Miss Z. Seldon, Waterford.

The Canadian Heating and Ventilating Co., manufacturers of stoves and furnaces, Owen Sound, are planning to enlarge their plant. To make this possible, the company has applied to the town council for a loan of $20,000 for twenty years, at four and a half per cent.

Quebec.

A. O. Stuart, Napierville, was a caller this week on the Montreal hardware trade.

Lewis Bros., Montreal, are now represented below Quebec by L. Ballanger who has succeeded A. Vallerand.

The Bedford Stove Co., Bedford, Que., have completed the restoration of their works since the fire, and have recommenced work in their nickeling plant.

Dingman & McCombe, manufacturers' agents, of Montreal, have opened a very commodious sample room, and their many and varied lines can now be easily inspected.

T. P. Anthier, Roxton Falls, J. B. Damour, St. Philomene, J. R. Deschambeault, Terrebonne, and L. O. Lasalle, St. Jacques, paid a visit to Montreal this week.

The National Glass Company, of Montreal, are to be wound up on the order of O. Dubois of St. Chrysostome, who is not only a shareholder of the company, but a creditor as well.

At the annual meeting of the Montreal Exhibition Association, it was stated that the first exhibition would be held in 1912. Negotiations were now going on to secure a permanent site.

C. R. Hosmer, the Montreal finacier, states that he and a syndicate have just completed negotiations whereby the Canadian Steel Merger, under the name of the Superior Rolling Mills Company, will open a foundry at Fort William. The new industry will commence operations in the spring, and those behind the scheme believe that they will eventually demonstrate that mineral deposits near Fort William are of equal worth with those of Nova Scotia, and that the future will see the Western market supplied to a great extent by iron ware manufactured from Atikoken ore.

Western Provinces.

L. Klump has started a tinshop at Riley, Sask.

M. Volfe has started a tinsmithing business in Calgary.

Wm. Garrick has started a hardware store at Trochu, Alta.

The O. S. Smith Hardware Co., Moosomin, Sask., have incorporated.

Andres & Goewen have started a hardware business at Laird, Sask.

W. H. Gordon, hardware dealer, Daysland, Alta., has moved to Hardisty.

Ralph S. Campbell, hardware dealer, Norwood, Man., has removed to Transcona.

Hills Bros. have started a general store and hardware business at Osage, Sask.

W. J. Thompson, hardware merchant, Okotoks, Alta., is reported moving to Calgary.

L. A. Lafreniere, hardware dealer, Howell, Sask., has added implements to his stock.

C. S. Williams & Son have started a grist mill and hardware business at Kinsella, Alta.

Samuel Glazen, hardware and furniture dealer, Rossland, has moved to Victoria, B. C.

James Rae, hardware dealer, Medicine Hat, has sold to Bernie Bros., formerly of Phoenix, B.C.

A. Stevens has started in the hardware business at Dysart, Sask. He is reported to be doing well.

It is said that R. E. Ball contemplates starting a paint factory at Red Deer, Alta., in the spring.

Saxon Bros. have started a grocery, hardware and dry goods business at Black Diamond, Alta.

The Imperial Oil Co., Humboldt, Sask., has erected a new warehouse, with a large tank in connection.

Becker Bros. & McDonald, general merchants and hardware dealers, Sealey, Sask., have dissolved. Mr. McDonald will continue the business.

A tinsmithing and plumbing shop has been opened in connection with the Alberta Lumber and Hardware Co., Cardston, Alta. E. N. Wakely is manager.

The village of Govan, Sask., was founded in 1906, and has now a population of 500. It now boasts of 25 mercantile establishments, including 2 hardware stores.

It is rumored that a large Chicago concern plans to establish a big linseed mill in Regina. The man mentioned as manager has been connected for years with the American Linseed Oil Co. of Chicago.

At a meeting of the Wholesale Hardware Hockey League of Winnipeg, the following officers were elected: Patrons —Messrs. G. A. Kobold, J. H. Ashdown, H. Miller, H. Annis, J. Gillespie, and H. Byers. President—W. Auger. Vice-President—J. Jack. Sec.-Treas. — H. Frank Waters. Applications were accepted from the Kobold Tool & Cutlery Co. and the J. H. Ashdown Co. retail department to enter teams, thus making a six team league.

British Columbia.

William Home, representing Berry Bros., Walkerville and Detroit, was a caller at the Vancouver office of Hardware and Metal, a week ago.

The Bownass Hardware and Plumbing Co., Victoria, B.C., are advertising —"Although burnt out we are still in business. Orders left at the Canadian American Realty Co., 1204 Douglas Street, will be promptly attended to." This is evidence of an enterprising spirit.

New Companies.

The Imperial Varnish and Color Co., Toronto, have increased their capitalization from $100,000 to $200,000.

J. Wiss & Sons Co., New Jersey, have received a permit to manufacture shears, scissors, razors, knives, etc., in Ontario, the capital used not to exceed $40,000.

The Dominion Instantaneous Heater Co., capital stock $100,000 and head office Vancouver, has been incorporated to manufacture Gray's instantaneous heaters.

The Carbon Oil Works, Ltd., Winnipeg, have been given a license to establish in Ontario, with head office in Toronto, the capital stock not to exceed $40,000.

The Eastern Pipe and Construction Co., has been incorporated, with a capital stock of $50,000 to carry on the manufacture of wire-wound, wooden water-pipe and continuous stave pipe in the town of Alexandria, Glengarry County.

News and Methods of Canadian Hardwaremen

Toronto Retailer Fined for Selling Air Rifles—Sale of Storm Doors at London—Holiday Window Display at Newmarket, Prescott and Peterboro—New Delivery System at Brampton —Goderich Store Remodelled.

BAN ON AIR GUNS.

Toronto—An interesting decision affecting hardware merchants was rendered in the Toronto Police Court this week when George Dean, 860 Queen St. East, was fined $1 without costs for selling an air gun and a quantity of ammunition to a boy under 16 years of age. A conviction was recently made in West Toronto for the sale of a revolver to a minor and the police are evidently bent upon enforcing the statute very strictly. Air guns, however, were not generally understood to be a prohibited article and Mr. Dean pleaded guilty stating that he had sold them freely for ten years while always careful about selling rifles or revolvers to boys. "If the charge had been for selling an air rifle, as those goods are known to the trade," said Mr. Dean, "I think I could have fought the case successfully."

Mr. Warren, of Warren & Ellis, Yonge and Agnes Sts., stated that he had been selling air rifles to boys without question for several years but in view of the decision in the Dean case he would only sell to a boy under 16 in future on an order from the parent. Other retailers also expressed ignorance of the fact that air rifles were included in the restricted class of firearms unsalable to boys.

The weakness of the present situation is that any boy can readily secure an air gun if he wants to by purchasing from the departmental stores. By merely telephoning the order and asking that it be sent C.O.D., the departmental would fill the order without question and it would be difficult to make out a case under the present law.

Hardwaremen generally will not object to the establishment and enforcement of proper regulations governing the sale of all kinds of firearms and ammunition, but they have a right to expect that the law will be made as effective against the big departmentals as the smaller retailers.

GODERICH STORE REMODELLED.

Goderich.—The Howell Hardware Co., who thoroughly overhauled their store during the past year, have been doing some good window advertising, two of their displays being shown in the accompanying picture. The window of "Maple Leaf" paints gives the suggestion of a well assorted stock, while the placing of the cards between piles of cans is well calculated to attract and hold attention. The mechanics' tool display is very neatly arranged, the saws being well placed, both on the slanting platform and wall.

Mr. Howell has had an addition of 23 feet made to the rear of the store, this giving him 100 feet depth. The extension has been raised two feet, this being considered an advantage in the display of ranges, tinware and farm tools. Outside at the rear is a large platform with a merchandise carrier running out far enough to enable goods to be placed direct into the customer's wagon. The carrier runs about 30 feet into the store to the elevator, and is found of great advantage in both loading and unloading goods.

Another improvement is the removal of the old fashioned cornice, which formerly surmounted the shelving on both sides of the store. Now the shelving is extended right up to the ceiling, the increased space allowing more room for both display and storage.

The store front is fitted with four six-foot wide plate glass windows, the entrance to the doorway being six feet. Above the plate glass is prismatic glass which throws the sun's rays clear to the back of the store. A transom 34 inches wide over the door is not shown, owing to the artist in retouching a blur in that part of the photo having painted it out.

The cellar, which extends the full length of the store, is well lighted with windows at the front and back, with one also on the side. The walls and floor are cement, and there are excellent facilities for the storage of glass, oils, roofing, rope, handles, etc., the back part of the cellar being nine feet high with an entrance at the rear as well as by elevator. Another wareroom on the second floor is used for second-hand stoves and surplus stock.

SALE OF STORM DOORS.

London, Ont.—For the reason that sash and door factories are not usually found on down-town streets, a storm door is one of the most inconvenient articles to include in one's shopping list. To give their customers the inside track on other folks' customers, Westman's Hardware here sells storm doors. Two signs, high up on the shelves, display the two words to remind customers of

Two Attractive Window Displays Shown Recently by the Howell Hardware Company, Goderich.

their needs and of the fact that they are for sale in the store. All hardwares sell screen doors, and trim them down, too. Why not storm doors?

Needless to say, Westmans do not manufacture these winter necessities. They have an arrangement with a mill, and, besides a margin of profit, have the pleasure of selling the hinges and latch to go with the door, in most cases. The selling staff is posted on the sizes, price and other details, and most buyers will appreciate as an accommodation the fact that the doors are sold up-town at all. They retail at $2.25, exclusive of fittings.

The London Retailers' Association has been organized with the following officers: President, D. Ross; vice-president, R. J. Young; secretary, H. A. Kompass. The association starts off with a membership of over 50, including a number of hardware men. A "Trade in London" week will be held in January.

Local merchants have received the annual letter of warning from the Canadian Fire Underwriters' Association in regard to danger of fire from the various forms of Christmas displays. Business is reported to have been fair so far this month.

A HOLIDAY WINDOW.

Newmarket.—A display which was the means of selling a large quantity of tableware and cutlery is shown in the accompanying engraving, it having been trimmed by Charles Byford, salesman for G. A. Binns. Light colored material was used in the background and in the base of the window, a contrast being secured by the use of black crescents, stars and stands upon which cutlery was shown. The raised platform was used effectively to show carving sets, knives, forks, spoons, etc., while on a series of shelves in the center of the background nickel-plated ware was displayed. Shaving goods, skates, etc., were also featured in the display.

Holiday Window Arranged by Charles Byford for G. A. Binns, Newmarket.

ELECTRIC GOODS WINDOW.

Prescott.—An attractive display of electrical goods for holiday trade was shown by W. F. Macpherson, hardware merchant, last week. Electrical table lamps, domes, chandeliers and shades of many colors, several of them connected up and lighted at night, gave the window a very pleasing appearance.

PRESENT SUGGESTION WINDOW.

Peterboro.—With Christmas but four weeks away, the hardware stores of this city are beginning to assume a "Present Suggestion" appearance.

The Peterboro Hardware Co. has an excellent window of present suggestions, composed of razors, safety and otherwise, together with the various articles that go with that necessary item of a man's belongings. The window shows much originality on the part of the dresser, Mr. McGibbon, as well as good taste in the color scheme. The color base is a very pale blue (mercerized sateen, which admirably lends itself to a display of plated articles, cutlery, etc.) which has been arranged here and there into mounds and hollows, these mounds increasing in height towards the rear and side of the window, the articles placed on the mounds or elevations in an artistic manner, at once catching the eye of the passing pedestrian. One weakness, however, is the non-pricing of the various articles.

The above firm has been busy this week moving their wholesale department into their large new warehouse near the C. P. R. station.

Macpherson & Co. report a very busy stove season, having to reorder a carload of stoves that had practically been sold before arrival, this arising from a practical demonstration they have been carrying on in their store.

A NEW DELIVERY SYSTEM.

Brampton.—During the present year, W. E. Anthony, formerly of the Orillia Hardware Co., established a hardware business in Brampton, his home town. From long experience in the trade, he has learned the necessity for business-like methods in all departments, and has adopted several new ideas in the management of his store.

One is the use of an order checking book. He keeps it on the counter, where it is handy, and all transactions are entered into it as soon as made. The name of the purchaser (where known) is entered, followed by the goods bought and the price. There is a margin on each side of the sheet, and in the space to the right of each entry the clerk making the sale marks "charged" or "paid." The other margin is used by the parcel delivery man to check off each article that is to be taken.

Mr. Anthony claims that the idea has been found a good one in many respects. In the first place, it does away with the necessity of directing the delivery man. The latter goes to the book for his instructions, and finds what is to go out. He then appends his signature to each item, and is responsible for the delivery of the goods. If at any time after that a customer, through forgetfulness perhaps, disputes a certain item in his bill, the date can be turned up, and the fact that the goods were delivered established.

"I find that by using this new system," says Mr. Anthony, "we save ourselves a great deal of trouble, and get the delivery work down to a better basis. The system has worked most smoothly so far."

The book serves other purposes. Cash and stock books can be posted from it, and, in addition, it serves as a ready reference in cases where it is desired to find out something with reference to past transactions.

Conflicting reports are given as to the state of the trade in Brampton during the past season. Some hardware dealers declare that business has been duller than in past years, but others say they have been quite busy, and have found trade good in all branches. The consensus of opinion is that the stove trade has been perhaps the best of any hardware line, despite the fact that the competition of the mail order houses has been felt in that branch. Quite a number of stoves have been placed in Brampton this year by the mail order houses.

Bright & Thayer are going out of business. During the past few weeks they have been selling out their stock, a number of successful auction sales having been conducted.

TO MAKE AN IDEAL PAINT

that will stand the trying weather conditions of Western Canada has been our object.

Stephens

House Paint

Is our attainment—it is right because

IT COVERS WEARS LOOKS **WELL**

It is always the same.

You have no difficulty in proving this, by trying at once any of the numerous shades. It is a paint that has become a favorite with hundreds of consumers, because it always gives the best service.

Write to-day for booklet, it is full of interest.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Dec. 8. This week, the trade so far as the wholesalers are concerned, is quiet. Specialty orders of holiday and sporting goods comprises the bulk of the trade just now. The heating goods trade is very good just now, but in this case also it is mostly repeats.

There are no changes in the following list, but it is expected that some heavy goods will be advanced, and local jobbers are endeavoring to come to a compromise at the present time.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅝ and smaller, 65; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corugated iron, 28 gauge, $3.87; pressed standing seamed roofing, 28, painted. $2.83; galvanized. $3.87; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-ihch, $3.40; 8-inch, $3.65; full polish, 6 and 7-inch, $4.15; 8-inch, $4.40.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white 70 and 5; diamond, 50; grainte, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron — Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 26, $4.20; 28, $4.60; 30 gauge or 10¾-oz., $4.80; Queen's Head, 23, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9½c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoop [illegible] p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

Paints and Oils.

Paints and Oils—The demand is weak for the general line just now and as the travelers are nearly all in from the road, there will not be much activity until after the first of the year. There is no change in the prices of linseed oil, raw being $1.15 and boiled $1.18.

Turpentine is on the firm side at $1.10. The varnish trade is fair for this time of the year, and there is no change in the prices. Putty is unchanged at $2.90 for barrels, cases, $3.15; kegs, $3.10.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

TRADE FOLLOWS THE LIGHT.

A few years ago a favorite slogan of the newspapers was: "Trade follows the flag!" The retail business world should not fail to impress upon the business mind the fact that trade follows the light.

Merchants in the cities have come to realize this, and those cities where the friendly strife to secure the best lighted streets and stores has been marked are reaping rich rewards from the advertising thereby secured, as well as direct returns in the way of increased trade.

There is no village so small that this principle cannot well be applied. First get the streets in good condition and then illuminate them brightly, and clean and illuminate the stores themselves, until they fairly glow with light, and your town and your stores will be talked about throughout all the surrounding country, and the farmers will take pains to drive in for long distances to see the display. It will cost something, of course, but it will yield a fine return on the investment. Figure it as an investment, charge it to advertising expense, or whatever way you may choose, but LIGHT UP!

Naturally a dirty and disorderly store will not look particularly well under strong light, but if you have been running that kind, so much the better if it compels you to clean up and put your stock in attractive shape. The difference in the returns will be felt almost immediately; at any rate, as soon as the public finds it out, and that will not take long. Merchants who use plenty of brooms, soap and water, paint, elbow grease and daylight or good artificial light, the whole mixed with a reasonable amount of brains and taste and judgment of what the public wants, seldom have occasion to complain of dull times or seasons.

MANY NEW IDEAS.

W. W. McCubbin, Oak Lake, Man., writes: "Would not like to do without the Hardware and Metal, it having given me many a new idea on how to conduct a hardware store successfully."

"TEAMWORK!" That's the keynote of the kind of practical co-operation existing between The Sherwin-Williams Co. and its thousands of agents.

We believe in teamwork because it has been the mainspring of our success.

It has built small and unpromising territories into successful and profitable paint and varnish distributing centers.

By the combination of quality products and correct merchandising methods it has aided hundreds of small merchants with just the backing they needed to enable them to become well established.

The Sherwin-Williams Agency not only insures you profitable paint sales, it does much more. It stimulates the sales in practically all the other departments of your store. The public likes to deal with the Sherwin-Williams Agent.

If you believe in that kind of "Teamwork," write for particulars.

Brisk Trade Conditions in the Mother Country

General Election and Labor Troubles Have Had a Detrimental Effect, However—Retailers Hit on Plan to Create Loyalty to Home Stores—Steel Tube Combine Proposed — Cutlery Manufacturers are Busy—Statistics Relative to Hardware Exports.

Sheffield, Dec. 1.—The state of trade gives cause for satisfaction all around. The general election, with the bustle and rush incidental to it, has been somewhat of a drawback, and has to some extent dwarfed the possibility of the year's trade being of bigger value than ever before in some departments.

To indicate how flourishing is trade, it is only necessary to say that Sheffield makers of guns and armor have found it necessary to refuse orders because of inability to get them out of hand in the required time. Some firms have orders on their books to last for several years.

Cutlery manufacturers are doing good business, and at the recent sales, ivory was bought in bigger quantities than usual for cutlery purposes. The general boom in trade has caused people to be less chary of buying the best in cutlery and electro-plate; all manufacturers report there has been a big increase in the demand for all qualities. A year or two ago, cheap sorts were all the rage; now there is a welcome return to the best.

Disputes with workers are still in progress. South Wales is the chief storm centre, and it has been found necessary to call out the military to quell the riots. The boilermakers' dispute is still in progress, although a settlement has been at hand many times. The effects of this dispute are far-reaching, as the lock-out interferes with many branches of the engineering trades. In Sheffield, although there is no dispute here, the boilermakers' trouble has caused over 150 molders to be out of employment.

Losses Through Labor Disputes.

To show how disturbing are the labor disputes it is well to give the official figures. No fewer than 179,169 workpeople were involved in disputes in October, or 109,751 more than in the previous month. The aggregate duration of all disputes of the month, new and old, amounted to 1,970,700 working days, or 1,106,500 more than in September, 1910, and 1,814,600 more than in October, 1909. Definite results were reported in the case of 38 disputes, new and old, directly involving 12,204 persons. Of these 38 disputes, 17 were decided in favor of the workpeople, 11 in favor of the employers, and 10 were compromised. The changes taking effect in October affected 94,700 workpeople, of whom 30,600 received advances, and 64,100 sustained decreases.

Sir Robert Hadfield Honored.

Sir Robert Hadfield, who is an ex-president of the Iron and Steel Institute, and the chairman of directors of Hadfield's Steel Foundry Co., Sheffield, has just received a high honor at the hands of the Committee of the Science and Arts of the Franklin Institute, U.S.A., in the shape of the Elliott-Cresson gold medal.

Shopping Week.

Quite a new departure has been made in retail shopping centres, and the results have been very gratifying. The traders' associations in various towns have decided upon a particular week to be boomed as a shopping week, and prizes are awarded for the best window displays in different trades. Advertisements are inserted in the daily and weekly papers, and descriptive accounts published of the multitude and variety of the goods to be sold. One chief object has been to stem the tide of orders from small towns and villages flowing into the big multiple shops in neighboring cities, and to a very large extent this result has been achieved. The scheme has been so well worked that the interest of buyers has been awakened to such an extent that a participation in the much-talked-of "shopping week" has been almost as fascinating as shopping by post. Certainly it has been plainly demonstrated that it is a very easy thing to "go further and fare worse."

Proposed Steel Tube Combine.

The Scottish steel tube producers who are negotiating with a view of amalgamating their businesses into one company profess to be fairly well satisfied with the progress made so far, although it is admitted that they are yet a long way from an arrangement such as is desired.

Of the ten producing concerns interested, the most important of all has declined to become a party to the negotiations This is disappointing, but not wholly unexpected, and it is said will not be allowed to stand in the way of the prosecution of the scheme. One of the main objects sought by the amalgamation is frankly stated to be the elimination of excessive competition, which, during the past two years has made the trade unprofitable.

Since the disruption of the Tube Makers' Association, about a couple of years ago, the competition has tended to become steadily worse, and home orders are still being accepted at what are described as ridiculous prices, notwithstanding the improvement which has taken place in the outlook for the industry.

The export trade, which absorbs about one-half of the British output, is being badly cut into by the unrestricted competition from America and Germany. No attempt is meantime being made to reconstitute the association, the energies of the prime movers being concentrated on the endeavors to bring about a hard and fast amalgamation. Among those not directly concerned considerable scepticism prevails as to the prospects of success, the interests of the negotiating producers being regarded as too conflicting to permit of agreement.

Growing Export Business.

The flourishing state of trade is reflected in the Board of Trade returns for October. The value of British exports totaled £37,691,232, an increase of £3,760,454, compared with October, 1909, and of £4,683,646, compared with October, 1908. Exports of manufactures totaled £29,515,716, an increase of £3,267,376, compared with October, 1909.

Trade with Canada continues to expand. Exports of cutlery totaled £12,705 last month, an increase of over £5,000. On the ten months the increase was £23,000.

Hardware exports to Canada totaled 1,889 cwts., compared with 2,372 cwts. in October last year. The ten months' total was 19,056 cwts., an increase of 4,000 cwts.

Canada took 85 tons of unwrought tin last month, compared with 39 tons in October, 1909, and 56 tons in October, 1908. The ten months' total is 737 tons, an increase of 15 tons.

Big Demand for Pig Lead.

The export of pig lead and manufactures of pig lead jumped to 1,520 tons last month, compared with 485 tons in October last year. The ten months' total is 6,111 tons, compared with 3,693 tons in the corresponding ten months of 1909.

The steel trade increased also. Bars, angles, rods and shapes rose to 7,477 tons, compared with 4,153 tons in October, 1909, and 3,636 tons in October, 1908. The ten months' total is more than double the total in the corresponding ten months of 1909. It was 35,709 tons, compared with 17,750 tons.

Tinned plates and tinned sheets totaled 3,077 tons, compared with 2,051 tons in October, 1909. In the ten months, Canada has taken 22,853 tons, compared with 21,960 tons in the corresponding period of last year.

The galvanized sheet trade dropped to 1,754 tons, compared with 3,468 tons in October, 1909, but it is well to note that in October, 1908, the total was 1,117 tons. On the ten months there is an increase to 18,383 tons from 14,848 tons a year ago. The wire exports to Canada dwindled to 362 tons from 759 tons in October, 1909,—an exceptional month. In October, 1908, only 111 tons were sent. On the ten months' total there is a drop from 4,183 tons in the first three months of 1909 to 2,937 tons in the corresponding period of this year.

New rails declined to 38 tons from 224 tons in October, 1909, and 91 tons in October, 1908. The ten months' trade is 3,087 tons, compared with 9,310 tons in the first ten months of 1909.

Pig iron increased to 13,305 tons, compared with 12,809 tons in October, 1909, and 3,722 tons in October, 1908. The ten months' trade reached the record of 110,064 tons, compared with 82,090 tons in the corresponding period of 1909, and 32,496 tons in the corresponding period of 1908.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

New Brass Goods are Finding Favor

Unique Articles are Offered This Year—Hardware Merchants Are Entering Largely Into the Decorative and Furnishing Metal Work Lines.

The range of articles which hardware merchants can handle profitably for the Christmas trade is continually enlarging, until it now embraces a very wide variety. There is the usual variety of cutlery and cut glass, to which many dealers add metal toys and fancy crockery. The newest lines, however, are chiefly in brass and nickel-plated ware, the goods offered being not only highly ornamental but very useful in every case.

"I find that hardware men are taking up these lines more and more," said H. F. McIntosh, manufacturers agent, Toronto. "This season a good proportion of the demand for the newest varieties of brass goods and nickel-plated ware came from the hardware trade. The lines are very suitable for the season as they make very effective displays possible."

Among the articles included now in decorative and furnishing metal work are brass kettles, casseroles, nickel-plated tea and coffee pots, trays, etc., chafing dishes, percolators, crumb trays, fire-place goods, bathroom fittings, hot water urns, water coolers and filters; house gongs, candlesticks, writing sets, fire irons, fenders, coal hods, fire screens, reading stands and jardineres.

Some Distinctly New Lines.

Among the articles placed on sale this season which are distinctly new, is an afternoon refreshment tray. It is light enough to be carried without difficulty, but will hold quite a number of plates, cups and saucers. It is of brass frame with an oak base.

A collapsible umbrella stand is one of the new features of the trade. It is made of brass, but is so constructed that it is possible to fold it up into a quarter the space, reducing risk of damage from moving to a minimum. When folded it lies perfectly flat but is instantly adusted.

A collapsible afternoon tea stand is another novelty. Although fitted with improved cushion plate holders, it is possible to fold it up flat, in which position it can very easily be moved. This article is said to be the very thing for picnics, insomuch as it can be carried any distance without difficulty.

Casserole goods of the nickel-plated variety have come largely into vogue and are being sold in good quantity to the trade.

Effective Displays.

A glance over the list of articles mentioned above will readily convince the dealer of the possibility for effective window and store displays by the use of these lines. A window made up by hardware dealer this season might be cited. In one corner he had a fire place with a brass screen in front and a variety of other brass goods ranged around, such as a coal hod, fire irons, fenders, etc. On the mantel he displayed an assortment of candlesticks, brass clocks, brass picture frames and a few varieties of metal bric-a-brac.

In the centre of the window space was a table, on which were placed a few of the household lines—casseroles, tea and coffee pots, brass kettles, a chafing dish, a water cooler and crumb trays. In the other corners were placed brass jardineres and stands, while the walls were decorated with house gongs, and small metal picture frames. As the merchant in question carried a line of lighting fixtures, he had a number of the most attractive kinds suspended from the ceiling.

The window was distinctly a brass display and, not only did it present a very attractive appearance, but it demonstrated effectively how useful metal goods are for a multitude of household purposes. It served to raise brass goods out of the luxury class and give them a place among the useful grade of goods.

NEW FREIGHT CLASSIFICATION.

The new Canadian freight classification which went into effect on Nov. 15 does not make many changes in staple hardware lines. It does, however, make a great number of changes in electrical goods. No less than 55 articles, previously not listed, are now in the classification and reductions are made in nearly all cases. The lines not listed before were shipped largely as No. 1 class for less than carloads and No. 3 class in carloads. Under the new arrangement, a big share of the newly listed goods are put in classes 2 and 4 and some even at 3 and 5. In addition a number of changes have been made in the regulations regarding individual lines which do not affect the freight ratings but which promise to be a great convenience for shippers.

Only two increases were made in electrical goods. Dynamos and parts, and motors and parts, less than carload have been advanced to No. 1 class. To counterbalance this, however, the same goods in carloads have been reduced from 5 to 6. As motors and dynamos are largely shipped in carloads, shippers do not suffer by this change.

The new classification is in every way favorable to the shippers, not only in point of ratings but on account of the greater convenience that will be experienced under the new regulations.

Hardware lines which have been added to the classified list are:

Shingles, asbestos and cement combined, in packages less than carload, class 3, in carloads, 5; garden shears, less than carload, class 2; copper pipe and tubing, in less than carloads, class 2; coke hooks, in less than carload, class 3, in carload, class 5; expanded metal for re-inforcing concrete in less than carload, class 3, in carload, class 5; coke scrapers, 3 and 5; painters' smalts, in boxes, kegs or barrels, less than carload, 3; currycombs, in boxes or barrels, 2 and 5; whip sockets, 2.

Electrical goods under this head include dynamos, motors and all kinds of telephone and electrical supplies.

Other goods are listed as "changed without advance in ratings." The change in such cases is with reference to the description of the article or some regulation governing it.

A third class are advanced in the rating. Electrical goods so listed are: dynamos and parts, 1 and 6; motors and parts, 1 and 6; transformers and converters, 1 and 6. No hardware goods are advanced in rating.

BIG BUSINESS TRANSFER.

The Cochrane Hardware, Ltd., Sudbury, which took over the lumbering and jobbing business conducted by Hon. Frank Cochrane at Sudbury last year, and which, in addition to Mr. Cochrane, includes W. J. Bell, lumberman, Sudbury; George Gordon, M.P., Cache Bay, and N. T. Hilliary, assistant manager of the Traders Bank, Toronto, has made big changes in the old business which Mr. Cochrane took over from Duncan McPhail, at Sudbury, twenty years ago.

After the formation of the new company last year, F. L. Shillington, for several years purchasing agent of the Canadian Copper Co. at Copper Cliff, was secured as manager, and in addition to enlarging and remodelling the store at Sudbury, branches were established at Copper Cliff and Little Current.

Last week a new development occurred in the purchase of the retail and jobbing business of Moore & Browne, at Sault Ste. Marie, where a stock of about $60,000 was carried. Mr. Moore, it will be remembered, died last summer, and Mr. J. H. Browne, it is understood, will remain as manager of the "Soo" business for Cochrane Hardware, Ltd.

Still another development is to be the establishment of a jobbing warehouse at North Bay, where a stock of heavy goods and lumbermen's supplies will be carried, the company then being in a position to make shipments to retail customers from any one of the three jobbing warehouses at North Bay, Sudbury and the "Soo," while retail stores will be conducted at Sudbury, Copper Cliff, Little Current and Sault Ste. Marie.

NEW MILLS ARE READY.

The new merchant mills of the Lake Superior Corporation will be ready for operation within the next week or two. At the present time, the company has under construction also new blast furnaces and coke ovens. So many orders are ahead that Lake Superior is assured of continued busy times in future. Orders from railroads alone aggregate 90,000 tons a year, the largest customer being the Canadian Pacific. The corporation is now operating practically at full capacity. When all construction work now under way is completed, as it will be by spring, Lake Superior will have a finished steel capacity of nearly 700,000 tons a year.

No. 38

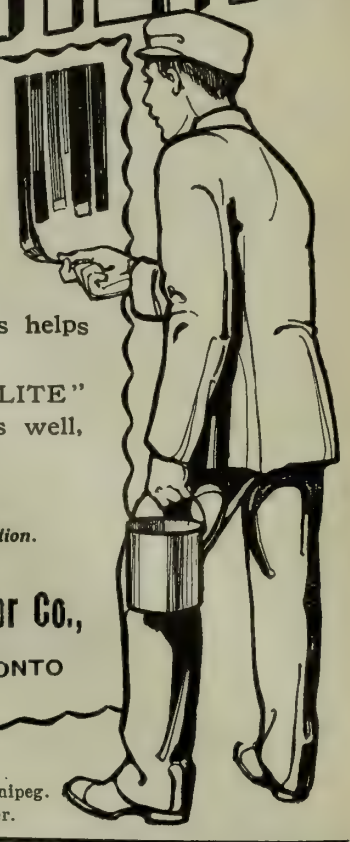
DISTRIBUTING ADVERTISING MATTER.

Besides encouraging Christmas traders to take a good look at the paint stock, merchants should utilize the occasion of so many people visiting the store to distribute folders and other advertising matter. Children are extremely trustworthy factors in this respect. Give them a folder showing a prettily painted house and rooms, or a color card with a few ranges of shades and there is little fear that this advertising matter will be thrown away before the home is reached.

With older people there is always the likelihood of the matter being glanced at and then discarded in the streets, but the children cling to these pretty colored advertisements and take them home with them, with the result that the folder, or what ever it may be, remains lying around probably for months. All this time it is continually catching the eyes of the older ones, until the names of the brand and of the dealer have become unconsciously fixed in their minds, and whenever paint is mentioned attention is at once riveted on that particular store.

In addition to paying particular attention to the children no parcel should leave the store without some paint advertising matter included. The aim of the dealer is to secure the attention of his possible customers when they are at home, and have time thoroughly to read the talking points of the dealer through his advertising copy. Load up a customer with paint matter when he or she as the case may be has a parcel or two to carry, and the stuff is got rid of as quickly as possible. But by placing the matter inside the parcel then the dealer can be sure that it will reach the home.

There is no doubt that merchants do not make enough use of their advertising matter. It is not systematically distributed. May be on receipt of a fresh supply from the manufacturer plenty of energy is expended on the distribution for a short space of time. The matter is circulated with but little heed to the best channels, as is often the case in distributing circulars through the streets, when unless there is very careful supervision, some houses get inundated and others get none at all.



To get the full benefit of the advertising material supplied by the manufacturers there should be regular distribution all the year round. No occasion should be lost for the placing of matter, but at all times care should be taken that the advertising is going where it will do the most good. Indiscriminate distribution is as foolish as no distribution at all. The advertising matter is handed to the merchant for a specific purpose. It costs a great deal of money, and is not intended to

ELASTILITE

DEALERS can handle this varnish best. It covers so many kinds of work so perfectly---inside and outside---that it gives satisfaction to all types of customers. This helps the dealer's business.

For highest class trade "ELASTILITE" will give good satisfaction. It brushes well, flows well, holds its finish.

"M.R.M." Horse Nails

Blacksmiths to-day demand Horse Nails of reliable quality.

"M.R.M." Horse Nails meet this demand, being made from Swedish soft steel rods by the new cold process, possessing great holding and driving qualities.

Hardware dealers can make a good profit by stocking this popular brand of Horse Nails.

THE MONTREAL ROLLING MILLS CO.
MONTREAL

lie fallow under the counter, neither to be used to wrap up parcels or to light stoves.

It is to the merchant's advantage that this material is placed in the best channels. It helps his general schemes of advertising. It is, or should be one of the many blows that he delivers at the ignorance which exists over the value of paint. There is a tremendous lot of educating to be done. The percentage of people who do not understand the true value of paint is very much greater than many hardwaremen imagine, and it is up to them to see that this is remedied.

PAINT AND OIL MARKETS

MONTREAL.

December 9—Both for present and forward delivery a sagging tendency is noted in some quarters for linseed oil, and prices have been shaded 2c. This reduction is not general by any means, however, prices being firmly held by many. Some of the large holders across the Atlantic are easing off in their quotations for forward delivery and this combined with the slackening in the demand caused the sagging that has occurred. There is however still the same scarcity of supply, and it cannot be said that any relief in the tension is in sight. The advance in white lead has been generally followed, and a continuance of firm prices is expected right through the winter. A large number of winter orders were placed before the advance obtained, but despite this, fair business is reported at the higher figures. Turpentine is firm under bullish reports from Savannah, and a steady local trade.

General business is well up to average, with a very firm undertone. Liquid paints are moving well in a sorting up way, and there has been a marked movement in household specialties.

Turpentine.—Quotations from Savannah for genuine turpentine are extremely firm, with fair quantities being shipped. Locally the demand is fair, and the market firm. We quote $1.02 to $1.05.

Linseed Oil.—The tendency on the part of large holders in the Old Country, as we noted last week, to quote slightly lower figures especially for forward delivery has had a sympathetic effect upon some local jobbers who follow the primary markets closely, and they have marked prices down 2c. Other holders are maintaining prices closely. The market is as bare as ever and supplies hard to obtain. We quote $1 to $1.10 for raw, and $1.09 to $1.13 for boiled.

White Lead.—The enhanced figures of last week are generally observed, and fair trade is reported at the higher quotations. It is anticipated that the firm tone to white lead will continue through the winter. We quote $6 for small lots and $5.85 for large.

Varnishes.—There is a firm tone to varnishes and good trade is reported for the time of the year. There is some steady buying in large quantities from the larger users, while the hardware trade continues to order steadily in a sorting up way.

Liquid Paints.—Fair-sized orders are being received for January shipment, especially in indoor lines. Dealers report a most encouraging year's trade and are buying confidently for next year. The enhanced prices do not seem to have interfered much with consumption.

Putty.—The demand is on the quiet side, although most assorted orders contain some proportion of putty. The market is firm and we quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Dec. 9.—The oil and paint market is seasonably quiet. Business in linseed oil and turpentine is, practically speaking, at a standstill, and the same condition is reflected in other lines. The manufacturing and jobbing houses are for the most part actively engaged at present taking stock and preparing for next year's business. Some of the houses have called their travelers off the road, and others have only a few out now. What orders are being received are for delivery next year.

On account of the high prices that the crushers have to pay for their raw material, and the uncertainty that exists with reference to linseed oil quotations during the next two months, few contracts are being booked for future delivery. "One thing seems certain," said a local dealer to-day, "Linseed oil and mixed paints must be much higher during the coming spring than they have been for some years past. Retail dealers have run their stocks down as low as they could do with respect to the safety of their business. When prices are decided on and the travelers start out in January, there should be splendid orders ready for booking."

In a few weeks the supply houses will issue their new price lists, and it is expected that quotations in some lines will be toned up. Material advances are not anticipated in any lines.

There is a firmer tendency in putty, an advance of 5c having been made in some lines.

Linseed Oil.—There is little demand at present, and the price has remained the same. Raw brings $1.10 and boiled $1.13, while $1.12 and $1.15 is asked for single barrel orders. Definite figures have been given out which show the shortage in linseed oil this year to have been very considerable. The normal demand in the United States is estimated to require 25,000,000 to 27,000,000 bushels of flaxseed annually. The 1909 crop was less than 18,000,000 bushels, while the 1910 crop, owing to droughts in the North West, will fall far short of 16,000,000. This means that the shortage will be over 40 per cent.

Turpentine.—The supply of spirits of turpentine coming forward in Savannah

Produces the beautiful soft effect of Water Colours and is WASHABLE, LIKE OIL PAINT, and just as durable.

Suitable for wall painting, furniture, wood-work, steel ceilings, radiators, and for all kinds of interior work.

Benjamin Moore & Company, Ltd.,
WEST TORONTO
New York Cleveland Chicago

and Jacksonville is very limited, but the demand is equally light, as varnish makers are now in the slowest season of the year. Turpentine is quoted here at $1.05, with barely seasonable demand. One local house predicts that in January the price of turpentine will stiffen.

Varnishes and Japans.—The demand in these lines is good for the season of the year. Firm prices prevail with no changes.

White Lead. —The market has steadied down after the increase of last week, and the higher quotations are being maintained. It is doubtful how prices will stand after the first of the year, but a return to the former scale is not regarded as likely. "Government standard" is quoted at $6, with some brands selling as high as $6.15 and $6.25.

Putty. — The price of putty has strengthened up some, an advance in some lines having been made. Standard putty has gone up 5c, and the prices asked now are: bulk in casks, $2.20; in 100-lb. drums, $2.55; in 25-lb. drums, $2.65; bladder in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50 in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.00.

Rosin.—The same authority who predicts a stiffening in the price of turpentine in January, sees an advance pending in rosin. The price locally has not changed yet, however, "G" rosin being quoted still at $3.25 per 100 lbs.

Petroleum. — Prevailing quotations are: Canadian prime white coal oil, 13c; American water white, 14½c; Pratt's Astral, 17c.

KEEP BRUSHES IN STOCK.

Some hardwaremen whose conduct of their paint department can hardly be criticized so far as the pushing of paint business is concerned, are very neglectful of their brush stock and carry such an incomplete line that customers in some cases, finding it impossible to be suited in the store where they buy their paints, go elsewhere for their brushes. In this way a good customer may be lost to the store.

An essential to building up a good paint trade is to carry a stock of the best brushes and be able to explain the virtues of each type of brush and recommend the kind best suited for each particular class of work. What will suit a master painter will hardly suit a less experienced amateur working on his own house. And what will do for floor paint may be altogether unsuited for use in thinner liquids.

A good stock of brushes will also help a hardwareman to build up a business with master painters, but unless a complete line is carried it is useless to look for trade in this quarter. Brush manufacturers, as a rule, do not care to sell direct to painters, but if the hardwareman will not put in a fair stock, and the painter goes to the brush manufacturer, it is hard for the latter to refuse to supply the painter with goods. In some places, hardwaremen make a bid for the lead, color and oil trade of the master painter by supplying the painter with brushes at very close prices, or by giving the local painter an opportunity to select what he wants from the traveler's samples when the salesman visits the town. Both are good plans if carried out cautiously, but in bringing the master painter and traveler together a risk is taken unless the dealer can place confidence in his customer.

The brush trade must be cultivated, just as assiduously as the paint or any other branch of trade, and dealers who neglect it or do not carry the stock, can hardly expect to get the business.

AN ALLEGORICAL CALENDAR.

The Canada Paint Co., Montreal, has supplied its customers with a handsome calendar for 1911, which is out of the ordinary in two respects. In the first place, it is an allegorical scene linking the past and present together with modes of transportation as the subject portrayed. In the foreground is an Oriental scene, figures of a lady and a camel being shown to illustrate the mode of traveling used in 1911, B.C.—thirty-eight centuries ago, and in the background, a modern steel bridge is pictured, to illustrate the method of transportation common to 1911, A.D. The second feature of interest is that the picture is the work of a member of the Canada Paint Co.'s staff, Henry Clucas, manager of the Toronto branch, painting the scene from which the lithograph was made. The calendar is a credit to the artist, as well as to the company.

WAYNE OIL STORAGE TANKS.

The National Equipment Co., 21 to 27 Lombard street, Toronto, who have been supplying plumbers and hardwaremen with water service systems and septic tanks for country houses, besides making tanks and pumps for storing gasolene in garages, have secured the agency for Canada and Newfoundland for the Wayne Oil Tank and Pump Co., Fort Wayne, Ind., and it is the intention of the company to institute an active campaign for business in installing self-measuring oil and gasolene storage outfits in stores, paint and varnish factories, garages, etc. The "Wayne" outfits have been endorsed by the National Board of Fire Underwriters, and they are so simple in construction that anyone who can thread pipe can make the connections necessary in the installation of an outfit.

M. J. Quinn, manager of the National Equipment Co., was formerly mechanical superintendent for the Ontario government.

The Ottawa Vacuum Cleaner Manufacturing Co. has been incorporated to make vacuum cleaners and electrical apparatus, with a capital stock of $150,000. The head office will be in Ottawa.

?????

QUERY BOX

"MOOSE JAW"—The blistering and cracking upon the front door is probably caused by the strong sun and wind. Remove the offending Varnish and Paint with "CUMOFF" and then use the C. P. Co.'s Graining Colors and Exterior Varnish.

"BRUSH HAND" — The article you require is called "CUMOFF," and when applied according to directions on the tin, you will see the old Paint, Varnish or Enamel, stand up like "quills upon the back of the fretful porcupine." It is then easily removed, leaving the surface ready for refinishing.

"PERPLEXED" — No, "CUMOFF" does not raise the grain of the wood. It quickly softens old Paint, etc., so that the Paint or Varnish can be taken off by a scraper or putty knife.

"SUN"—The "SUN" brand of Varnish is made by The Canada Paint Company. They have an extensive Varnish plant in Toronto.

"PIEBALD" — Enquires if "CUMOFF" will remove some Enamel which he received upon his Epidermis owing to slipping in the bath. It will. "CUMOFF," however, is only intended to soften Paint or Varnish upon wood or metal surfaces.

"CAR FINISHER" — Certainly, the Head Painter of the Michigan Central Railway, St. Thomas, Ont., considers 'CUMOFF' "an excellent article, leaving the surface in good shape, without discoloring or injuring it."

"SPRIGBIT"—Yes, "CUMOFF" is in a handy form for retailing, being put up in Half Pints, Pints, Quarts, Half Gallons and Gallons.

Mixed Paints

It is astonishing to what an extent the mixed paint trade has grown in Canada, in fact throughout the world. This is due very much to the help of the agents in the many stores throughout the country, keeping always in stock a first-class brand of pure paints.

Are you doing it?

Doing what?

Keeping a first-class brand! Let us send you some of the cards and catalogues about

Ramsay's Paints

the pioneer liquid paints of Canada. Then when the time comes to buy for your big 1911 trade you will be ready. Don't put it off and keep going along the same old way. Learn about the leader, and get ready for a stock. Remember 1911 will be big with possibilities for the pusher of pure goods.

STAR HACK SAW BLADES

Apparently no one questions the superiority of Star Hack Saw Blades and at our present figures there is absolutely no room to question the price.

They are equally good in hand frames or power machines. When used in a machine the feed should be adjusted to suit the stock being cut. The softer the stock the lighter the feed. Such treatment will prevent clogging of the teeth. Open your eyes wide and look at this list of prices:

6	7	8	9	10	11	12	inch
30	32	34	38	42	46	52	cents per dozen.

Notwithstanding the great reduction in prices, the quality of Star Blades has been improved.

Satinette

(White Enamel)

should be on every dealer's shelves if for no other reason than that it is one of the famous International Varnish Products.

But—it has plenty of intrinsically superior qualities to recommend it besides that.

Satinette is suited for decorative work of every description—Gloss Interior and Flat Interior for interior work and Gloss Exterior for exterior work.

Satinette is known all over the world as the white Enamel that stays white—it cannot become yellow.

Architects, painters and decorators always think of Satinette now when they think of enamel.

Satinette is the most perfect and durable white enamel ever made.

It has great covering capacity and **CANNOT TURN YELLOW.**

Like all International Products, Satinette is sold only in full Imperial Measure Cans.

JAP-A-LAC

A HIGH GRADE

VARNISH AND STAIN COMBINED

NEW LIST PRICES— In October we notified the trade by mail of the list prices effective November 1st. We were compelled to make this advance owing to the continued increase in the cost of raw materials, so that we could maintain the high standard quality of JAP-A-LAC that has always characterized the goods. The list prices of JAP-A-LAC are as follows:

ALL COLORS EXCEPT GOLD AND ALUMINUM

1-Gal. can Imperial Measure	Each, $3.50	Covers 480 sq. ft. (2 coats)
½-Gal. can	" 1.95	" 240 "
Quart can	" 1.10	" 120 "
Pint can	" .60	" 60 "
½-Pint can	" .35	" 30 "
¼-Pint can	" .25	" 15 "

GOLD		ALUMINUM	
Size No. 3	Each, $1.10	Size No. 3	Each, .60
Size No. 2	Each, .60	Size No. 2	Each, .35
Size No. 1	Each, .35	Size No. 1	Each, .25

JAP-A-LAC Crack and Crevice Filler, 2½ lb. packages, each ..... .50
JAP-A-LAC Crack and Crevice Filler, 1 lb. packages, each ..... .25
(One pound is sufficient for about 40 sq. ft. of surface)
JAP-A-LAC GRAINING TOOL (except when sold in the Model Floor Set) ..... .50
JAP-A-LAC GRAINING COLOR, Size No. 1 each ..... .30
(One Jar of Graining Color is sufficient to grain about 100 sq. ft.)
JAP-A-LAC Model Floor Set, each $3.25

The above prices apply to sales in the Dominion of Canada only.

In order that all dealers may have no difficulty in obtaining the present list price, we are supplying the trade with small stickers to be attached to the cans, showing the prices now in effect. We shall be very glad to forward as many stickers as required, upon request, to any dealers.

We urgently request all dealers to secure the new prices on JAP-A-LAC. The high cost of raw materials warrants the list prices charged, and in order to maintain a uniform selling price we wish all dealers to secure the prices now in effect.

PROFIT— The trade discount on JAP-A-LAC is 30 p.c. from the list prices, producing a profit on the cost of the goods of 42.85 p.c. In addition to this discount, JAP-A-LAC may be purchased under a special contract, providing for a further allowance as follows:

10% on purchases amounting to $100, and less than $250 (producing a profit of 58.73%)
15% on purchases amounting to $250, or more, - - (producing a profit of 68 06%)

This contract includes purchases not only of JAP-A-LAC, but of our Green Label Line of Architectural Varnishes and Advanced Finishes for modern building construction as well, thus making it possible for the smallest dealer to earn the maximum allowance, by combining his purchases of JAP-A-LAC and general finishing materials.

Look over your stock and send in your spring order at once. Don't neglect to order a liberal supply of Gold and Aluminum JAP-A-LAC, as these Specialties are particularly rapid sellers.

The Secret of Success

Sh-! LISTEN

The great secret of success lies in doing the right thing, in the right way, at the right time. That is easy for the paint dealer. The secret of success in the paint business is in selling the *right paint*, in the *right way, all the time.* So if you want to succeed you cannot afford to make a mistake in the paint you sell—because mistakes may be fatal to success. A disappointed paint buyer seldom takes an apology—you won't usually know he was disappointed — all you will know is that he goes elsewhere next time. Sell

Martin-Senour Paint

100 PER CENT PURE

and you will have no occasion to make excuses and your customers will have no reason to go anywhere else next time. Every can will be a recommendation for your store. A pleased paint buyer will go out of his way to say a good word for the paint that gives him satisfaction. **Martin-Senour** paint multiplies your satisfied customers. Your success will date from the day you get the agency to sell it — and you will have solved the secret of success. Get busy—write today.

THE MARTIN-SENOUR CO., Limited

The Maritime Paint and Varnish Co., Ltd. Halifax, N. S.

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	**"Taxite"**
International Varnish Co, Ltd., Toronto, Canada	**"Klensa"**
Pratt & Lambert, Ino., Bridgeburg, Ontario, Canada	**"Expedite"**
British American Paint Co., Victoria, B.C.	**"Bapco"**
Mount Royal Color and Varnish Co., Montreal, Canada	**"Scrape-off"**
James Robertson Co., Ltd., Toronto, Canada	**"Robertson's Paint and Varnish Remover"**
Sanderson Pearoy Co., Ltd., Toronto, Canada	**"Devolite"**
Stewart & Wood, Toronto, Canada	**"Solvo"**
Martin-Senour Company, Ltd., Montreal, Canada	**"Martin-Senour Paint and Varnish Remover"**

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

"ENTERPRISE"

THIS well-known Food Chopper is made with characteristic "Enterprise" skill and care.

For a popular-priced seller there is no chopper to equal it.

It's strong and simple, and the cutting mechanism is perfect. We guarantee it to chop *raw meat* and to do more and better work than any food chopper made.

Thousands of satisfied customers and extensive national advertising have made the "Enterprise" Food Chopper famous the country over.

If you would like to link your store to our advertising campaign, drop a line for some of our trade aids. Gladly sent free on request.

The Enterprise Mfg. Co. of Pa.

PATENTED HARDWARE SPECIALTIES

Philadelphia, Pa., U. S. A.

21 Murray Street, New York 544 Van Ness Avenue, San Francisco

THE MAPLE LEAF
"IMPROVED RACER"

CROSSCUT SAW

This saw is different in its construction to other crosscut saws, being made with the slanting gullets, which discharge the saw-dust more freely and allows every tooth to cut fresh timber. It is a perfectly true tapered saw, being ground 4 gauges thinner on back than tooth. This allows saw to run free and easy with very little set.

The trade-mark "MAPLE LEAF" is a guarantee of quality, and every saw is thoroughly tested and examined before leaving our factory.

WRITE US FOR CATALOGUE AND PRICES.

TWO CENTS PER WORD

You can talk across the continent for two cents per word in a Hardware and Metal Want Ad.

"IMPERIAL" ANTI-FREEZING WINDMILL

FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary Always fitted with 1¼ flanges unless other size is specified.

HEINISCH
TINNERS' SNIPS

This cut shows the well-known Heinisch regular pattern that is so highly thought of by all tin workers. It will cut straight lines, curves, all irregular shapes, cornicework, small circles, etc., with equal facility. Forged steel handles and highly-tempered laid steel blades.

R. Heinisch's Sons Co., Newark, N. J., U.S.A.

CONGO
NEVER LEAK ROOFING
The GUARANTEED ROOFING

Congo on Maryland Terra Cotta Company's Buildings—Baltimore, Maryland

We don't suppose you care a rap what Congo is made of—what interests you is *how long it is going to wear.* What it is made of interests us because we give with every roll a *Surety Bond Guarantee,* the like of which no other manufacturer has offered.

Herewith are a few of the features that make it possible for us to guarantee Congo 2 or 3 ply for *10 years.*

It never gets hard or brittle. It never breaks or peels off. It is giving as perfect satisfaction in Europe, India and Australia, where we ship thousands of rolls, as in America.

Congo doesn't run, rot, buckle up or shrink.

The caps, nails and cement which we furnish free, are the best money can buy.

We don't use the old style *tin caps* for Congo, but *galvanized caps* which never rust.

You can satisfy yourself as to its lightness, pliability and wonderful waterproof qualities by a little investigation. As to its wearing properties—we guarantee them. Can any reasonable man ask more? Further information on request.

Ordinary Straight Trimmers

Why Sell Clauss Shears?

We can't give you all the reasons in a short talk like this! But here are just a few:

They cut from heel to point — They work easily and smoothly
They do not cramp the hand — They are perfectly nickel-plated
The screw does not come loose

Clauss goods are the most complete line of cutlery in the world. Our catalogue will convince you. Send for it to-day.

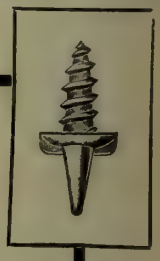
What Do You Think of the "Ross" Rifle?



Sales increased 80% last year—mostly repeat orders.
Wherever introduced they scored an immediate success.
The owner of a "Ross" Rifle would not exchange for any other make.
Dealers make good profits.
Supplies can be secured so promptly that a large stock is not necessary.
No trouble with duty.
The "Ross" Rifle gives a good profit to the dealer and complete satisfaction to the buyer.

$25.00 and upwards.

INDEX TO ADVERTISERS.—page 70-71

The IRONCLAD Alarm

From now until Christmas all jobbers will ship Ironclad alarms in special Christmas Holly Boxes.

I'ts a box that'll make people open their eyes. It's a clock that will make your trade sit up and take notice.—It can't be knocked down, it can't be knocked out, it rings to beat the band.

We'll print your name on dials on a twenty-four lot order, we'll add a full window display if you can use one.

Rings 35 seconds, can be shut off at will. Height 5 inches. Weight 2½ lbs. Packed 12 in a box with advertising matter. Names printed on dials in lots of 24.

Western Clock Co.

La Salle, Illinois.

THE

"PERFECTION" Steel Ankle Support

has solved the question of providing a support for the ankle while skating. It is neat, easy to fix, strong and light. By means of a hinge and sliding attachment it allows the ankle to move backwards and forwards, but never sideways.

Sells at sight to every skater, whether learner or expert, and is warranted to give unrivalled comfort.

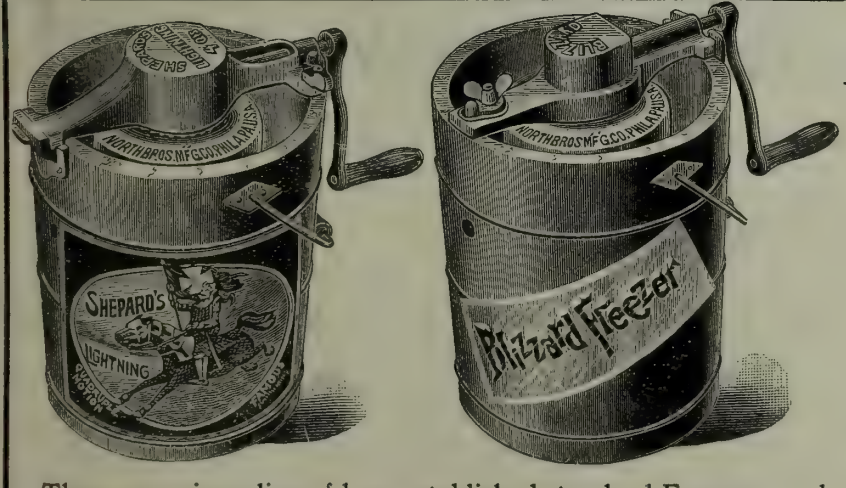
Ladies' size suitable for children.

The Owen Sound Steel Press Works,

Owen Sound, Ont.

Mistakes! Oh yes!

We make them, but we try very hard not to make the same mistake twice.



You may have been offering your customer another make of

Axe Handles

and we suggest you put yourself right at once, by insisting on having STILL'S and no other brand. They are the best.

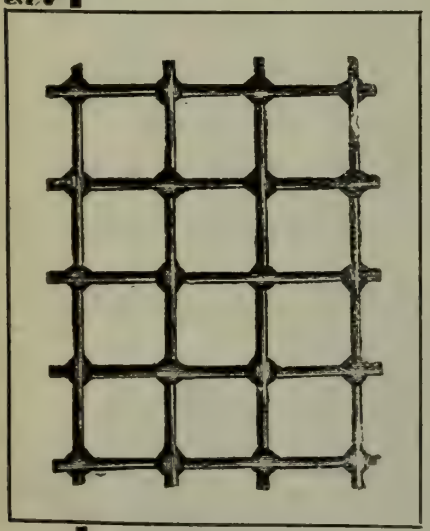
ARE YOU?

ARE YOU A SHREWD BUYER?

DO YOU APPRECIATE THE STERLING QUALITIES OF GOODELL-PRATT'S AUTOMATIC DRILLS?

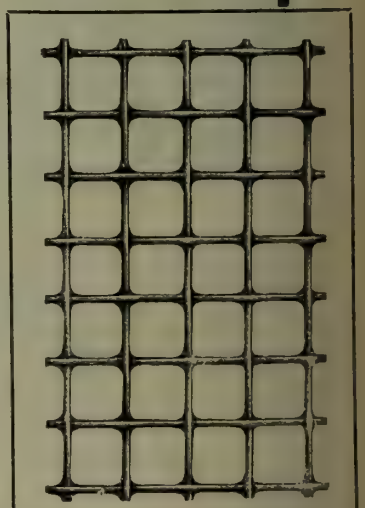
The design and construction of these tools have proven their worth by the test of time. Dealers are calling on us for more of these Drills than ever before. Are you getting your share?



GOODELL-PRATT COMPANY

Toolsmiths

GREENFIELD, MASS., U.S.A.



A Necessary Feature of Good Wire Cloth

is uniformity of mesh, and you'll find that

Greening's WIRE CLOTH

is absolutely uniform in mesh, because of the quality of the metal and the skill employed in weaving.

It is made from specially imported high-grade iron and steel rods, drawn in our own splendidly-equipped wire mill by expert wire-drawers. All Greening's Wire Cloth is made 'double crimped,' which ensures the greatest strength and uniformity of mesh. We make Wire Cloth of every description for every purpose.

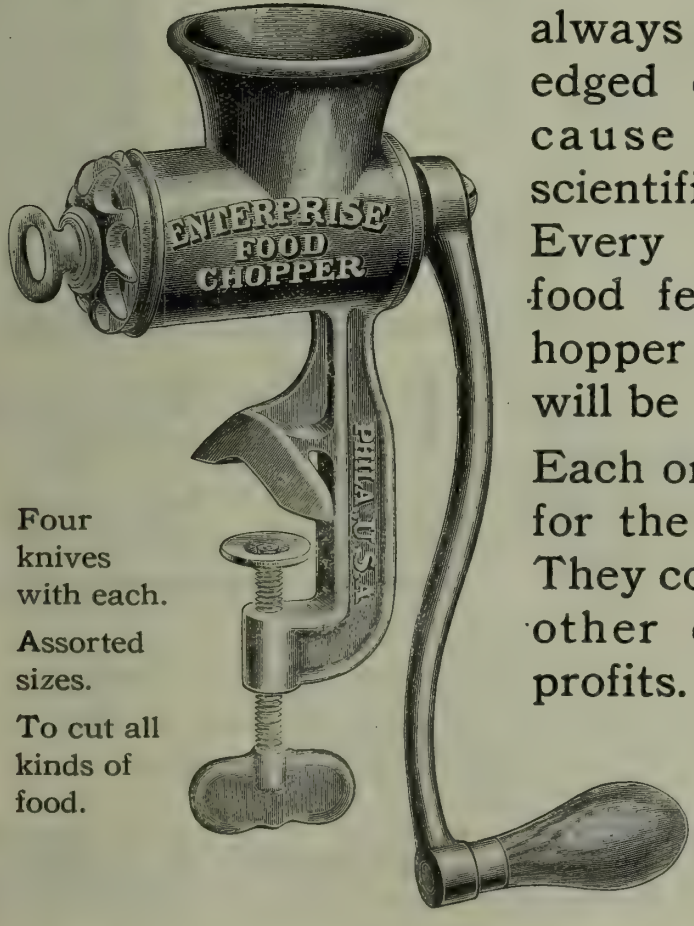
Montreal : : : : : Canada



ARE YOU SELLING THE
SMOOTH-CUTTING

Enterprise Food Choppers

or cheap imitations that will only "tear" meat and vex customers.

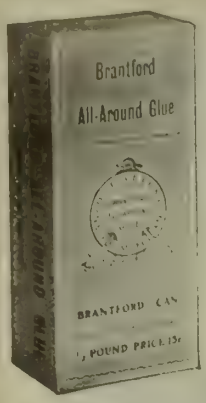
ENTERPRISE CHOPPERS

always have keen-edged cutters, because they are scientifically made. Every particle of food fed into the hopper of one of these choppers will be evenly cut.

Each one sold is an advertisement for the store that made the sale. They command a better price than other choppers---hence better profits.

Four knives with each.

Assorted sizes.



To cut all kinds of food.

No. 202 shown here will chop 2½ lbs. per minute, and sells for $14.40 dozen to dealers, F.O.B. Montreal.

Disston Superfine Files

The genius of the Disston organization is strikingly manifest in this department of the great industry.

The superfine file building is perfectly equipped for the exceptionally fine class of work.

In this department we employ the most skillful workmen in America—many of them with half a lifetime of special training in our own establishment.

We make all the steel used. It is unquestionably the best steel in the world for superfine files.

Every file fully guaranteed.

A Section of the Superfine File Department

If you have work of any kind wherein close, smooth filing is required, by all means use a Disston Superfine.

When you think of Metal Ceiling, think of "Galt."

Dealer, House-owner and Architect all favor "Galt" Art Metal Ceiling

Ernest R. Beckwith, C.E., architect on this job, says of the goods supplied:—

"Besides being one of the prettiest ceilings I have ever seen, it was exceedingly easy to erect. In fact, most of the work was done by unskilled labor owing to the regular tinsmiths being busy.

The special material made for the stage-front was accurate in detail and satisfactory in every way."

If you want to please your customer and his architect; if you want to build up a business in Metal Ceiling and if you want to make the most money from your metal ceiling work, send your orders and enquiries to

The Galt Art Metal Co., Limited, Galt, Ont.

The Reason Why

Tobin Simplex Guns

you should sell Tobin Simplex Guns is because every owner of a Tobin Gun is satisfied with his purchase. We guarantee every gun to suit the purchaser's idea of what a good gun should be, or the money is refunded.

We do this because we have confidence in our guns. We know that the material we use is the best obtainable. We know that our workmen are skilled mechanics, who can produce a good gun. We know that our patents cover the very latest improvements in Hammerless gun construction. We have subjected our guns to repeated tests, to prove their fitness for every occasion on which they could be brought into service.

Write for our catalogue and other information.

We want you to handle our goods. We want to introduce at least one gun into your locality, because "every Tobin gun is built to sell another."

Sell Clark Heaters and Coal

Here's the "BIG HIT" Assortment

2 Leader Heaters
2 No. 5B Heaters
2 No. 7D Heaters

6 Dozen Clark Fuel Brickettes (Best Grade)

Some of these heaters you can sell as low as $1.20 and make a good profit.

The Proposition to Dealers is Mighty Interesting

Its a proposition that means ready sales and liberal profits.

Everyone who drives or owns a carriage, wagon, sleigh, automobile—any kind of vehicle—needs them. Everybody traveling in cold weather needs them. The need is known—the demand is positive—It's for the dealer to supply the product and pocket the profits.

Clark Heaters and Clark Coal sell wherever displayed. The wonderful compactness, the unique principe of heat distribution, the neat appearance, the low price—all are factors that make Clark Heaters the unchallenged leaders.

Our guarantee goes with each, and the guarantee protects the dealer and the consumer.

And the coal is just such another proposition. To **prove conclusively** that it's better than other fuel, we give a guarantee, **with each brickette,** that it will give 25 per cent more heat than any other heater fuel made.

DEALERS——ACT NOW

The season is on. Send for the "Big Hit" assortment and add more dollars to your profit. Send to your jobber. Put a heater just inside your store—where customers can **feel** the goodness of it. "Warm them up" to the necessity of buying from **you.** We'll help.

"IMPERIAL" ANTI-FREEZING WINDMILL FORCE PUMP

Fig. 18

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary Always fitted with 1¼ flanges unless other size is specified.

Mr. Hardware Dealer!

—How many merchants do you know in your town?

Suppose you know only one round dozen.

If you can show them how to make their stores more attractive—you stand to make some money.

Because they'll do more business.

Before passing up this proposition figure it out for yourself.

There's a certain profit in MATERIAL for this dozen and—further profit in the ERECTION.

But, consider the effect these will have on the other merchants in your town.

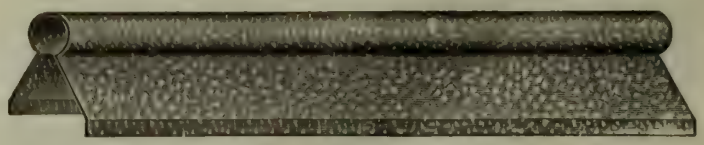
It will create a big demand for artistic interiors— for

METALLIC
Ceilings and Walls

—and every square yard erected means profit to you.

"Metallic" Ceilings and Walls are just as essential in the home.

They are FAR SUPERIOR to the ordinary decoration — MORE ARTISTIC, MORE ECONOMICAL and PERFECTLY SANITARY.



"Metallic" is the cleanest and brightest interior decoration on the market and is ABSOLUTELY FIREPROOF.

Write to-day for illustrated design catalogue—it means dollars and cents to you.

Send measurements of store or home for complete estimate of cost.

Manufacturers of "Eastlake" Steel Shingles and "Metallic Building Materials.

The Metallic Roofing Co. Limited
TORONTO & WINNIPEG

Ridging No. 872 is a Good Seller.
It's Galvanized Steel at a "Wood-Price."

An energetic hardware dealer can sell a good many lengths of Ridging No. 872 in a season. Very few will choose to erect an ordinary wood ridge when the advantages of No. 872 are explained to them. For one thing it is much more ornamental than wood. And because it is made of galvanized steel, it is also several times as durable as wood. No. 872 is easy to erect. It is made on special machinery, in ten-foot lengths, and is absolutely straight. The lengths fit together accurately. No wood filler is required. And you can sell No. 872 at practically the same price as an ordinary wood ridge. How many lengths are you going to sell during the remainder of the year? There's a good margin of profit for you in each sale you make.

Get the local agency for "Safelock" Wire Fence

You will find "Safelock" the best selling line of wire fence you ever handled, because you can prove by actual demonstration that it really is the strongest fence made.

Look at this little cut—note how the stay wires interlock where they wrap the strand wire. You simply cannot make a "Safelock" stay slip in any direction. And, as the strand wires are not kinked at the lock, every wire retains its full strength.

Better write us to-day about getting an exclusive "Safelock" agency for your locality.

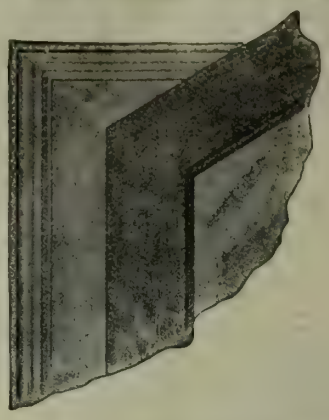
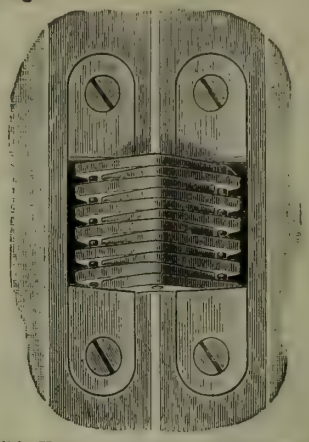
R. McDougall Co., Limited

GALT, CANADA



Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto

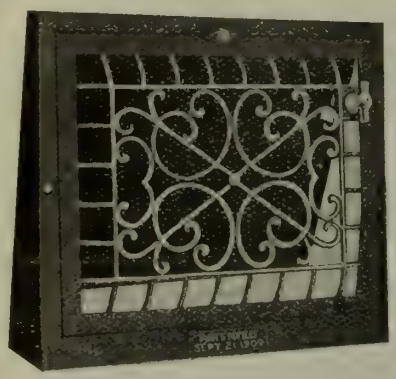
PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.



COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years. The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge.



Invisible Hinge as it appears when door is open

No. 101, suitable for wood ½" to ⅝" thick (furniture work.) Will carry a door 3' x 18".
No. 102, same as above, but has square corners.
No. 104, wood must be ¾". Will carry a door 5' x 2' x ¼.
No. 108, wood must be 7". Will carry a door 6' x 30" x 1¾.
No. 112, wood must be 1⅜" to 1½". Will carry a door 6' x 2' 6" x 1½".
No. 116, wood must be 1⅝" to 2½".

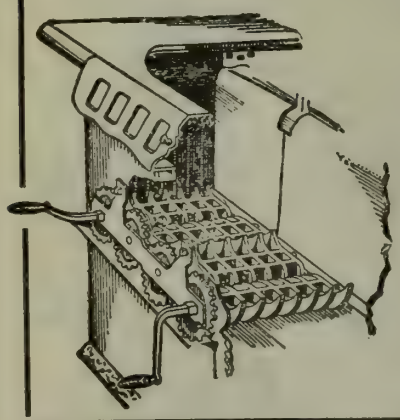
STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

"GOOD CHEER" Sidewall Registers

A line in four sizes, of uniform design throughout. Neat and tasteful pattern, and supplied in black japan, ordinary oxidized or full oxidized finish, with enamelled green fan. Our ordinary oxidized will about equal the more expensive full oxidized finish of other makes.



Positive acting fan---stays exactly where set, and when closed locks tight. No springs, etc., to weaken or loosen.

The price? It will pay you to inquire.

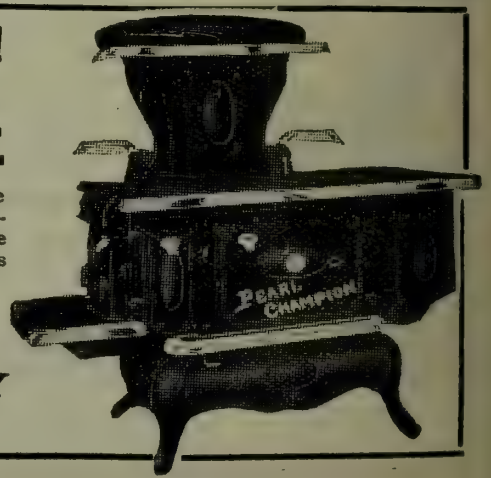
A full line of the above carried by The Jas. Stewart Mfg. Co., Limited, Winnipeg, Man

The Jas. Stewart Manufacturing Co., Ltd.

Woodstock, Ontario

Here's the Range to Feature!

and it is just as good as it looks. The



CHAMPION RANGE

is rendered specially attractive because of the CHAMPION GRATE with the cross-wise, non-warping bars. This grate leads all others because it is more open and more easily shaken, and makes the "Champion" a very favorite range.

Are you selling the "Champion"?

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Preliminary Work Necessary for Taking of Stock

Merchants Should Have Sorting-up and Counting Done ahead of Time as Much as Possible, so That all the Work Will Not be Left Until the Last Moment—Keep Closely in Touch with Stock Throughout the Year and do not Allow Odd Lines and Dead Stock to Accumulate.

Stock taking is one of the most necessary features of the year's work. By this means a merchant is able to find out where he has failed and where gained in his business during the twelve months. He is enabled to detect his mistakes and, with a concrete review of the past year before him, to plan for the year that is ahead, in such a way that the successes of the past will be repeated and the errors avoided.

By taking stock, a merchant not only finds what goods he has on hand but acquires a practical insight into the trend of public demand. He sees what lines sell readily and the articles that are hard to dispose of. He is thus in a position to buy more intelligently than before.

Some hardwaremen—the number is not large happily—do not take stock every year with any degree of thoroughness. They go over the store and estimate the stock and the amount of money represented approximately. A shrewd man might be able to come very close to the value of the stock in this way, but even then he would not gain the practical knowledge that a thorough investigation provides. A case is recalled where the owner of a hardware store was too busily engaged with other affairs to personally attend to the business. He had a manager to look after it for him. Claiming lack of time, the manager practically ignored the necessity for taking stock and allowed the business to go along in the most happy-go-lucky manner possible. In the third year of its existence under the new order, the owner found his business, not absolutely submerged, but just on the point of going under. He discharged the manager and took the store under his own supervision for a time. Stock was taken and the fact revealed that the store had not been thoroughly overhauled once during the whole time. Articles at least three years' old were found at the backs of drawers, old stock had been allowed to accumulate while new had been bought and sold again. At least a quarter of the stock had been allowed to depreciate and become almost unsalable. The profits had been more than swallowed up in this way.

This is an extreme case but it tells what the future holds in store for the merchant who neglects to properly keep in touch with his stock.

Preparation is Required.

It is unfortunate that the time for stock taking follows so closely on the heels of the Christmas trade. Careful preparation for some time beforehand is necessary, if the work is to be carried out properly, and with no loss of time.

"We start preparations for stock taking fairly early in December," was the statement made to a Hardware & Metal representative at the Russill Hardware Co., Toronto. "In fact, we have been at it for a couple of weeks, and will continue right through with the preliminary work until the time arrives for starting in on the lists."

The Russill Hardware Co. have found that stock taking can be carried out most effectively if all the work of sorting up, placing in order and counting is done ahead of time. The actual stock taking consists, then, of going over the store and filling out the lists. As they follow the system of having a certain department for each salesman, the work is greatly facilitated. On each clerk rests the onus of having his department ready for the taking of the inventory. During the day, as occasion arises, the clerks put in the time sorting up, counting, dusting and arranging in convenient form. This rule is followed right up until the second week of the new year, when the task of listing is commenced. The Russill Co. use the "loose leaf" system in stock taking. One man calls and another marks down. The work is carried on simultaneously in all departments, the whole staff joining in. No attempt is made to rush it though, however; it takes ten days generally to complete the work. In this way, it is possible to proceed without disturbing trade. Sales are regarded as the first consideration, and, when customers enter, they are waited on as promptly as at any other time of year.

This system has many advantages. It does away with the strenuous, nerve-racking rush that is bound to result where everything is left to the last moment. It enables a merchant to get through without working nights for a week or so and it certainly results in more thorough work. Lastly, it does away with the inevitable hindrance to trade under the other method.

The objection may be raised that the time for stock taking comes too soon after the Christmas rush to permit of such preliminary work being done. In cases where hardware dealers cater to the holiday trade by carrying large stocks of typical Christmas lines and specialties, it would be wise not to undertake stock taking immediately after the first of the year. The store would not be in shape for one thing. It would take a week or two of steady work to rearrange and clean up the stock. For another thing, the staff would hardly be fit to plunge immediately into the trying work involved, after the heavy stress of the holiday trade. By making good use of the dull week between Christmas and New Years, it should be possible, however, to start stock taking in the second week of January.

Every Day of the Year.

To many merchants stock taking is a "bogie"; a labor to be looked forward to with dread. It need have no terrors for the wideawake dealer, who anticipates the work, and keeps his stock well in sight all the year around.

"I take stock every day in the year," said a Western Ontario hardwareman recently. "I know what I have in the store, and I take pains not to let anything accumulate on my hands.

"If some line moves slowly, I take steps to stimulate the demand," he continued. "Odds and ends of stock I clear out at reduced prices. I would rather sell at cost than have the stuff collect dust on the store shelves. I know almost from day to day what I have in stock."

"Does it not keep you busy?"

"Yes, but then I don't have to work into the small hours every morning for a couple of weeks in January," was the rejoinder. "I spread the work out over the whole year. But I don't follow the plan merely to save myself labor. I do it to make my business a paying one. I don't believe in losing money every year through depreciation of stock."

A good motto for the hardware man would be, "Every day a stock taking day." Continued vigilance alone makes it possible for a man to keep closely in touch with the goods in his store. But it pays. Thorough stock taking at the end of the year will reveal the presence of old and dead stock; but an all-year-around policy will prevent the accumulation of such. An ounce of prevention is worth a pound of cure.

Even with merchants who make an effort to keep their stock in sight all through the year, the annual stock taking is still very necessary. They are then able to see how they stand—financially and otherwise. It shows the volume of trade done during the year, and the expense of the establishment; it stimulates to greater things or points the need for rentrenchment. Without annually turning the business inside out—so to speak—the merchant would be working in the dark. Attention to stock throughout the year cannot by any means take the place of the yearly inventory, but it makes the latter work comparatively light, and insures the establishment of a better record.

Advice From a Veteran.

"Do not depend on an after-inventory sale to clear out odd lines of stock and left-over goods," is the advice of a veteran hardware dealer. "How can you sell binder twine, ice cream freezers,

refrigerators, scythes, baseball bats and croquet sets in January? The accumulation of a whole year cannot be sold out at one time. The only way to do is to keep your eye on the stock the whole time, and have your clearing out sales just as often as occasion arises. Don't leave it until the end of the year."

This advice is well worth considering. Stock taking may reveal an unprofitable accumulation in certain lines when it is too late to successfully dispose of such goods before they become shopworn and unsalable at their original value.

Merchants should bear two facts in mind. The first is that it is necessary to go over their stock thoroughly each year. The second is that they should not leave the whole thing to one time, but, in addition to the making of an annual inventory, constitute "every day a stock-taking day."

SHORT TALKS TO CLERKS

By An Ex-Clerk

In this article I am talking to clerks. And most of you do need to be told a few plain truths—in a way that will get underneath your skin and make you sit up and take notice.

Somebody has very truly said that all men from the shoulders down are worth about $2 a day. As a mere automaton—a thing of muscle, but lacking brain—no man's earning capacity goes beyond that figure.

Did you ever stop to think that the difference between you with your few dollars a week and the salesman who makes $5,000 to $10.000 a year is the difference between his thinking apparatus and yours?

If you're an intelligent, ambitious clerk you are only in training. You don't expect to be a clerk all your life. You hope some day before long to be in business for yourself.

Are you going to be a fourth-rate merchant, struggling along on about the same or a little more than you could earn as a clerk? Or are you going to be a good, bright, sound business man, with a bright, well-equipped store, and the cash register's cheerful music as a continuous performance?

It's entirely up to you.

The Almighty gave you brains—as many as lots of fellows earning several times your salary—but you've got to help yourself to the extent of using and developing them.

Every day you put off starting to bring out all the powers that lie within yourself is an opportunity lost—a golden opportunity.

You've got brains, you've got self-respect, you've a desire for the good things of life, you want to be somebody in this old world.

Just how far you can climb depends entirely upon yourself—depends upon just how well you grasp the opportunities that lie all round you.

Do you realize that there is a scarcity of good men in every branch of business? Ask the head of any big concern and he'll probably tell you he has a dozen or two positions for which high-grade men are not available.

You have started in a splendid business, and one that will soon be immensely better—for the good man.

Stick to the retail business—know all there is to know about it—try to be the best hardwareman in Canada.

Rich rewards await the clerks of to-day who prepare themselves intelligently to become the merchants of to-morrow, and who bring to bear on their work the best that is in them.

The most valuable training you could have is that which you will get through

All men from the Shoulder Down are Worth About $2 a Day.

studying your employer's business. Analyze it, pick out its strong and its weak points.

If your employer is successful you can be sure that there are certain definite reasons for it. If he is only fairly successful there are also clearly-defined reasons why he has not climbed higher.

Find out what these reasons are and study them closely. If there are weak spots in the business try to remedy them. Be as careful about the store's welfare as you expect to be about that of your own store.

See that the windows are always well dressed, with goods that are seasonable and profitable. Start out with the idea of making the windows produce real business and lots of it.

And watch the results.

Encourage your fellow clerks to be more familiar with the goods in stock, to develop their ability to sell, to always be as neat as possible themselves and keep the store the same way.

And watch the results.

If your employer needs a cash register or other equipment, encourage him to get it. Modern appliances increase your efficiency, and they generally pay for themselves within a short time.

When these modern appliances are installed, see that they are used so as to bring the maximum benefit to the business.

And again I say, watch the results.

One of the greatest aids to success at the present time is the use of modern equipment and appliances—appliances that obviate worrisome detail, stop leaks, prevent mistakes, minimize the chance of dissatisfying customers and losing their business, enable you to more effectively display your goods, etc.

As a prospective merchant, you should study all the successful methods of buying and selling goods, apply the best of these methods, and—

—watch the results as you go along.

AGAINST FAKE ADVERTISING.

Winnipeg, Dec. 13.—The Advertising Club of Winnipeg, met recently, and elected officers for the ensuing year. C. A. Abraham, editor "Winnipeg Telegram," retiring president, occupied the chair. W. T. Devlin, representing the Retail Merchants' Association, was appointed on the Protection Committee of the club.

The Protection Committee was appointed after a lengthy discussion of clause 4 of the report of the executive which was as follows:

> "Your committee recommends that a committee of five be appointed to pass upon the merits of all advertising schemes offered to the members of the club. That this committee consist of the president of this club, a member who is also a member of the Retail Merchants' Association, another who is a member of the Winnipeg Industrial Bureau, a member of the Winnipeg Board of Trade, and also one who is a member of the Real Estate Exchange. It is proposed that suitable cards be printed and placed in the offices of the club members, stating that before any proposition would be considered it must have the approval of the protection committee of the Winnipeg Advertising club. It would be the duty of this committee to look carefully into the merits of the proposition, and if worthy, to issue a permit to the agent to be recognized by advertisers who are members of the club. Your executive believes this plan will relieve the merchants and advertising public of Winnipeg of many fake schemes, and save to the city several thousand dollars annually."

Protection Committee: — Hugo Ross, representing the Real Estate Exchange; H. J. Hardie, Board of Trade; C. F. Roland, Industrial Bureau; J. J. Foot, representing the Advertising Club; W. L. Devlin, Retail Merchants' Association.

In the election of officers which followed J. J. Foot, manager McClary Manufacturing Co., was elected president.

Over one hundred new members were admitted, and the club starts the New Year with bright prospects. E. S. Horne and William E. Campbell, both former presidents of the Kansas City Advertising Club, were among those who spoke, and they offered many valuable suggestions.

Direct Returns from Trade Paper Advertising

Under What Circumstances They May be Expected—How Advertising of This Sort Performs Actual Selling Work—A Little Common-Sense Reasoning By T. J. Tobin.

"I'll use three half-pages at a cost of $37.50, and if the results are good I'll continue in that space right along," said a manufacturer to a trade newspaper representative not long ago.

"Just what sort of results do you figure this advertising should bring you?" asked the solicitor.

"Why, inquiries about my goods," was the reply.

"Before going any further," said the solicitor, "let us look at the real nature of selling work and its relationship to advertising.

"We'll say that you want to push your —— ——.

"You have ten travelers on the road selling these goods, not to speak of the hundreds of jobbers' salesmen who handle them.

"You have the trade pretty well covered and you feel that your goods and selling facilities are quite satisfactory. Competition is keen and you've got to hustle for business.

"You place a half-page advertisement in this paper, in which you speak earnestly and enthusiastically of the quality of the goods, of the satisfaction they have given where introduced, of the worth-while profit paid the dealer.

"Now what is the attitude of the dealer when he sees this advertisement?

"We'll say that it contains a good illustration of your package and that the typographical arrangement is neat and attractive.

"The dealer reads what you have to say about your goods and it interests him.

"You have used a good-sized space to give him your main selling arguments, and your story is told in a frank, earnest, enthusiastic way. To be brief, your advertisement gets his attention, and impresses him with the fact that behind your talk is a strong faith in the goods. He feels that such a house is likely to be a 'live wire,' and that when its salesmen call they'll be men of the same stripe—aggressive and equipped with something worth while to tell him.

"But does this merchant rush away to write you a card or letter, inquiring for prices, etc?

"No, he does not.

"He knows that you are not doing a mail order business.

"He knows that if you want to sell him you are going to send a traveler to call on him.

"He's as sure as he can be of anything that a salesman will call to try and sell him these goods.

"Then why should he sit down and write to you?

"He won't buy the line anyway until the salesman arrives, and perhaps he won't then—on the first call.

"Your first advertisement gets his attention and he looks for the succeeding ones, into which you introduce new arguments, and in which the typographical arrangement is attractively varied.

"Your talks reach him, you know, at a time selected by himself to study matters connected with his business—at a time when his 'buyer's attitude' is dropped and he is willing to listen to what the firms who are trying to sell him goods have to say through the paper that has his thorough confidence.

"You may never receive a line from this dealer direct, but when your salesman arrives he gets a good hearing.

"Through your advertising you have won the dealer's attention, and aroused his interest.

"Now don't you think the salesman's work has been simplified by this favorable reception you have prepared for him?

"Don't you think he will sell a higher percentage of the dealers he calls on, than he would if this introductory work had not been done?

"Don't you think the securing of attention for your goods beforehand will save a good deal of the salesman's time—permit him to make more calls in a day than he otherwise would?

"Won't you admit that by carrying the dealer through the stages of attention and interest—always essential in the process of selling—this trade paper advertising has accomplished actual selling work? Won't—"

"You talk like a lesson in scientific salesmanship," interrupted the prospective advertiser, with a smile.

"Well, doesn't all this appeal to you as common-sense reasoning?. Doesn't it fit in with the real nature of selling work?"

"Yes, I must admit that it does. I have never looked at the matter in just that way."

"You did not realize," went on the solicitor, "that it is the established system by which you distribute your goods that discourages inquiries on the part of dealers.

"You overlooked the fact that only one class of advertising ever brings direct sales—mail order advertising.

"The general advertising on which manufacturers spend millions in the daily newspapers and magazines, never even brings inquiries, unless the public is asked to send in for a book of recipes, catalogues or samples.

"Even then the value of the advertising cannot be judged by the inquiries. As a matter of fact, they are merely incidental to the real value. At the same time, results are sure and certain, the same as from advertising in a good trade paper."

"Do you mean that your paper will not bring inquiries at all?" asked the prospective advertiser.

"Not by any means. It will, and does, bring inquiries to the advertising of some firms.

"Take an advertisement for a store fixture or appliance that can be accurately illustrated and described.

"Or take an advertisement that offers the dealer a price inducement to buy goods whose quality he is well acquainted with.

"In such instances as these it brings splendid inquiries, and often actually makes sales."

Here the solicitor turned over the pages of his paper and pointed to advertisers who had proved this to be so.

"A half-page every week for a year would cost $425. would it not?" inquired the prospective advertiser.

"Yes," replied the solicitor, "and don't forget that by means of it you reach about ten good buyers for every cent expended.

"It costs you only about $8 per week to reach over 7,000 of the best merchants in Canada.

"This represents a charge against each of your ten travelers' expenses of 80 cents per week.

"Not to speak of the extra sales it brings through the jobbers' salesmen."

"I'll take that half-page for the year," said the manufacturer, "and I'll clearly explain its purpose to my salesmen. Through showing them just how it performs actual selling work, by getting the dealer's attention and interest, and making their task easier, I hope to put enough additional ginger into them to make the advertising worth while for that reason alone."

The order was signed, the advertisements carefully written and a new advertiser made a very valuable addition to his selling staff—one in which he has every confidence. since he knows just exactly the work that it can be relied upon to accomplish.

Live displays both in the window and in the interior serve to hold the attention of the crowd and are very productive.

Don't use poetry and jingle in Christmas advertising; the space is too valuable to waste and children will be able to hear enough without your adding to their knowledge.

One merchant, last season, hit on the happy idea of offering to supply and deliver Christmas trees at a reasonable price to all his customers. It is in some parts a very difficult matter to secure good trees and many families go without them because the head of the house does not care to go to the necessary trouble. The offer of the merchant drew many new customers.

Prize Winners in Hardware Window Competition

Four Hardware Salesmen in Stores at Fort William, Newmarket, Peterboro and Campbellford, Win Prizes of $5 Each in Competitions Which Closed December 1—Another Competition on Holiday Displays Closes January 1.

The two window dressing competitions announced by Hardware and Metal in October, to close on Dec. 1, were successful in bringing out a fair number of photographs of sporting goods and fall hardware windows, and the result of the awards are announced this week. In addition to the four cash prizes, two special prizes are given in the fall hardware competition. Two of the prize winning photos are reproduced this week, and the others for which prizes have been awarded will be published at times when the goods displayed are seasonable.

Two Good Fall Windows.

Mr. Smith's display of saws and mechanics' tools in D. W. Douglas' window, was arranged on a background six feet high, covered with red sateen, above this being a paneling of twisted crepe red and white paper, stretching up to the ceiling. Saws and tools were hung in an artistic manner on this background, while others were neatly displayed on the base and side of the window. In the center was a gigantic candle with the query: "How long will it burn?" each cash buyer of goods to the value of $1 or over, being entitled to a guess as to the number of hours it would burn. A companion window was trimmed with cutlery, carving sets, shaving supplies and silverware, the whole making a splendid display. These windows were productive of a large number of sales, more than any windows shown in Douglas' store for a long time.

Kitchen Scene in Window.

Ray P. Best's display arranged for the Best Stove and Hardware Co., Peterboro, for Thanksgiving week, was decidedly original in its composition, and in addition to being "the talk of the town," and a constant source of amusement, many sales of ranges were directly traced to the window.

The window was dresed to represent a kitchen, a range being set up, and by means of a gas connection a kettle was kept sizzling on the stove. This put action and life into the display, and it was made more realistic by placing a dummy figure of a man in a sitting position at the kitchen table, with his breakfast before him. Sitting on the table, too, was the alarm clock which had aroused the man from his slumbers, it being an "Ironclad," which "rings to beat the band." As W. D. Campbell, of the Best Company says: "The window was a distinct success, as it brought a considerable number of customers into the store."

Awarded First Prize in Hardware & Metal's Fall Window Contest, Open to Dealers in Towns over 5,000—Trimmed by Ray P. Best, Peterboro.

A New Year's Display.

Where electric or other motor power is available for light moving objects, the following window design is particularly suitable for a New Year window trim.

For the frame work, take a large umbrella with the cover removed. Attach a stiff wire very firmly to the outer end of each rib for a rim. The handle must be straight, and to reduce friction as much as possible, should be brought to a point and a round-headed screw inserted. Run this lower end through a hole in a hardwood board or plank, bored smoothly and loose enough to allow easy turning, but sufficiently snug to prevent wabbling. If the screw-head rests upon some smooth, hard surface like a glass or granite plate, the friction will be materially reduced. The upper end of the handle also works in an easy fitting socket for support. A grooved wheel for carrying the band from the motor may go near either and according to convenience and ease of concealment. The covering of this frame depends upon the occasion. For the holiday season it should be covered and festooned with evergreen and holly, care being taken to have everything swing clear of all stationary objects.

From the rim suspend a number of stout wire supports or holders, all, of course, trimmed to harmonize with the general decorative plan. These may vary in number according to the variety of display desired, but should be evenly spaced. For New Years an appropriate number is either twelve or fourteen, one for each month of the approaching New Year, and, if desired, one for the Old Year himself, and one for the New Year. Each should, of course, present in miniature some object of particular interest to the season it represents.

This same frame, differently trimmed, is capable of infinite variety of occasion. A couple of weeks before Christmas its denizens might each bear in hand some appropriate gift suggestion, the figures, of course, being prepared to represent different members of the family. The boy, father, mother, half-grown girl, young lady, and grand-mother, not forgetting the baby and perhaps including the youth hunting for a razor to shave with.

SPORTING GOODS WINDOWS.

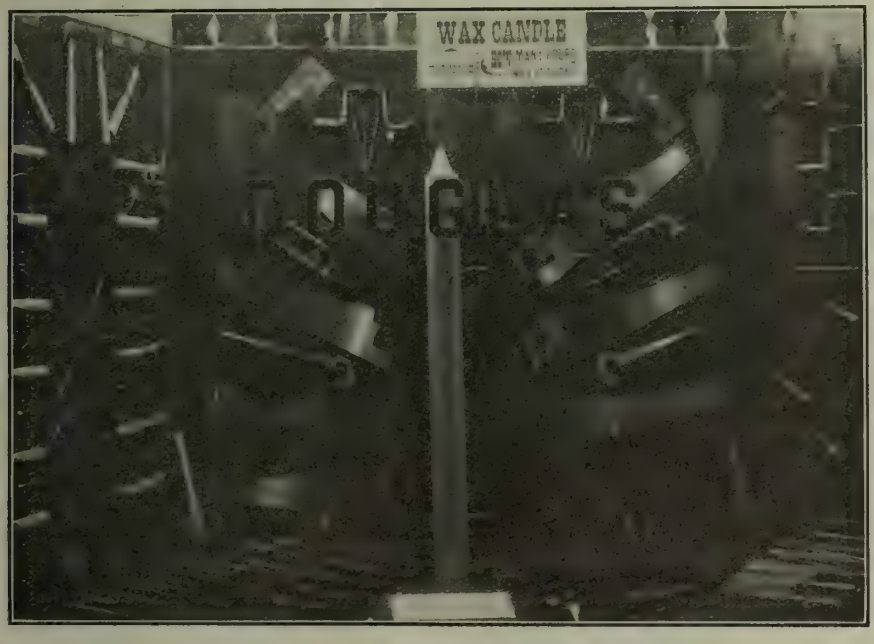
Two prizes of $5 each offered by the Dominion Cartridge Co., Montreal, were won by:

G. R. Colville (cities over 5,000 population), with W. G. Colville & Co., Fort William.

Charles Byford (under 5,000), with G. A. Binns, Newmarket.

FALL HARDWARE COMPETITION.

Ray P. Best (over 5,000), with Best Stove and Hardware Co., Peterboro.



C. H. Smith (under 5,000), with D. W. Douglas, Campbellford.

All the above won cash prizes of $5, while special prizes were awarded to H. E. Burgess, with Brown & Mitchell, Brandon, and C. A. Willets, Leamington, Ont.

Pointers for Merchants During Christmas Week

The Value of Courtesy, the Avoidance of Mistakes in Making Sales, and Prompt Delivery—The Reputation of a Store is Enhanced by a Strict Observance of These Points and Good Business May Follow When Christmas Shopping is Completely Forgotten.

During the last week of trading, with all the bustle of customers rushing in wanting their goods in a hurry and hardly giving anybody time to attend to them properly there are just three things to be considered These are: courtesy, the avoidance of mistakes in making sales, and prompt delivery. We know it is very easy to talk of courtesy, but there are occasions when it is very hard for a person to maintain an unruffled demeanor. After a merchant has been working probably all day and all night, and his clerks likewise, it is not easy to put up with the whims of a good many customers who often are not inclined to make allowances and forget that while they may be absolutely fresh the poor salesman has been on his feet for many hours. But all this is in the day's work.

Awarded First Prize in Hardware & Metal's Fall Window Contest Open to Dealers and Clerks in Towns Under 5,000—Arranged by C. H. Smith, Campbellford.

Christmas-weeks only come once a year, and though, therefore, the salesman's burden may be very heavy he should remember that he must, on his part, make allowances, and do his best to serve everyone with equal courteousness so that there will be no kicking against the store and that future business in other months may be the result of this preservation of temper. A store that has a reputation for courteous treatment is very strong in it's district. People like to have all the attention that they can reasonably expect given to them. It is only natural. They are paying the piper and can call the tune. We always take a certain amount of satisfaction in buying anything, and this satisfaction is increased when we feel the salesman is entering into it somewhat and is doing his best to make us feel sure that we have bought the right thing at the right price. The Christmas shopper is full of enthusiasm and expects everybody else to be enthusiastic likewise. He beams when he buys a razor for his brother, and though he may take half an hour to select the article and has probably every specimen in the store placed in front of him he expects the salesman to beam likewise. He goes away convinced that the salesman is a smart fellow and knows his business and that that store is the only store worth purchasing from.

Mistakes in Sales.

Then there is the question of mistakes in sales. Although with the rush on the usual amount of attention that is given to taking orders must be clipped yet the old adage "more haste, less speed" must not be overlooked. Mistakes are annoying at all times but probably they are more annoying at Christmas than at any other season and unless the stock that is displayed is well looked after there is always a liklihood of things getting mixed. People come in and turn things over and fail to replace them in the right position, the result being that articles which are of two or more parts sometimes get mixed. Unless the clerk is very careful, especially in fancy articles, he may pack up a part of one article with a part of another, the difference being so slight probably that he does not notice it in the hurry of packing, but it is at once noticed by the customer on reaching home. This probably necessitates, especially in the country, a drive of many miles. It may be even too late owing to the customer having delayed buying, to make a change. The annoyance caused by a mistake of this description can be well understood.

The Delivery.

Then we come to the question of delivery. It is at times like these that a merchant's system of delivery gets completely disorganized and thrown out of gear. Delivery is very important. The advice to shop early is very seldom followed. People always make up their minds to leave plenty of time between the buying of presents and the giving of them but in the end they never do. The rush is generally the last week before Christmas, and even less than that, but no matter how belated the customer may be he does not expect his goods to be belated and woe betide the merchant, although he may be taking orders all the day before Christmas, who does not deliver the goods in time for Santa Claus and the next morning distribution. There is always a rush to get extra help in delivery so that the merchant who finds himself at the 11th hour inadequately equipped will find it extremely difficult to get an extra horse and rig. It is well, therefore, to look thoroughly now into the matter of delivery and to make absolutely sure that full provision has been made for the trade that the merchant expects. It is better to over-estimate than underestimate, and if the merchant has not made any arrangement to increase his delivery he should do so at once. Even if he does not push his delivery up to its full limits, even if he feels that he could have done it without an extra horse, he has the feeling that it is there if it is wanted. He has one less worry to contend with, and it is contending with worries that spoils a merchant in looking after the trade that is within his doors. If the clerks feel worried because they know that things are going wrong with delivery, if they know that dissatisfaction is being already expressed by some of the customers they cannot put their hearts into their work and do justice to those who are coming into the store; but if everything is going smoothly, if goods are delivered promptly and everything working like a charm, then they are able to greet every customer with a smile and to throw that amount of enthusiasm and courtesy into each order that does so much to accentuate the pleasure of purchasing and to consolidate the merchant's position in the customer's eyes.

HOLIDAY GREETINGS.

The coming week will be a strenuous one for readers of Hardware and Metal; more especially if the splendid weather of the past two or three weeks continues. There is every reason to look forward to a record-breaking total of December sales to top off what has been in many cases the most successful year yet experienced by the Canadian hardware trade. A prosperous season betokens a merry holiday and consequently mirth and goodwill should prevail in the hearts and homes of Canadian hardwaremen this year.

With such a spirit the members of the warehouse, office and store staffs should not be forgotten. They have assisted during the rush of the holiday season as well as through the year's activities and nothing will so gladden their hearts on Christmas day as to feel that loyal service has not been forgotten. With hope in their hearts and a will to merit similar recognition a year hence the members of the staff will enjoy the holiday to its fullest extent and return to their labor with a determination to give better service than ever before.

Each merchant must, of course, decide for himself as to the form of recognition to be given, but Hardware and Metal suggests that to the ambitious clerk nothing more practical could be given than a year's subscription to this paper as it will enable him to improve his selling and earning power and be a constant reminder of how the present was earned and inspiration secured.

Hardware and Metal extends to all in the hardware trade, manufacturing, jobbing and retailing, a Merry Christmas and its best wishes that even the prosperous season now being experienced will be eclipsed in 1911.

PHOTOGRAPH THE WINDOW.

At Christmas time the hardware window is at its best. Special decorations are used and the very best work of the year is put into the display.

This is the time to photograph the window and preserve the idea of the display for future year. It will be an advantage to be able to study a picture of this year's window when planning the display for 1911.

In addition to this there is the opportunity to win a prize in Hardware and Metal's holiday window contest. Two prizes of $5 each are offered for the best photos of hardware windows, one contest being open to retailers or clerks in places having a population of more than 5,000 and another to those in places of smaller size. To those who do not win prizes, and whose photos are accepted for publication, we offer a prize of a year's subscription to either Hardware and Metal or Busy Man's Magazine.

This is a busy time but we urge that arrangements be made to have photographs taken Christmas week, when everything is in gala dress.

BEWARE OF LIBRARY VOTING CONTESTS.

From various towns in Ontario come reports of the promotion of "library voting contests," the plan being to get a number of merchants to contribute $25 each in return for which the promoters provide a bookcase filled with a supply of books to be donated to the school, church or other public institution securing the largest number of votes, ballots being given by the contributing merchants to purchasers of a certain amount of goods.

The scheme is said to be contrary to the Trading Stamp Act passed by the Ontario Legislature in 1901, but no one has as yet begun a prosecution and the promoters are making hay while the sun shines.

The scheme is a costly one for any merchant to participate in and it would be far better to spend the money in some special advertising in the local paper or in a mailing list campaign.

HIDING THEIR LIGHT.

Curious excuses are sometimes heard for not advertising. Dealers will contend that their margin of profit is so small that they cannot afford to advertise; thereby showing one all important reason why advertising is sorely needed in their business. Manufacturers are often equally obtuse and inclined "to hide their light under a bushel." Some time ago, an English buyer had occasion to place a large order in a certain line. He looked over the advertisements in his trade journal and found a description of the article he wanted in the announcement of an American importer. The deal was closed and the buyer did not discover until some time after that a home manufacturer made the same article and would have been able to have suited him. Regretting that the order had gone out of the country, he wrote the home manufacturers, stating that he had not known before that they handled the line and politely criticizing them for not advertising their goods. "Good articles recommend themselves," wrote the makers in reply. They seemed oblivious to the fact that an article, no matter how good it may be, must be used and known first before it can recommend itself. In this one instance, certainly, the fame of the article had not reached to quarters where it should have penetrated. An order was lost, the profit on which would probably have footed the advertising bill for the whole year. The firm added: "Advertising has the serious disadvantage of letting your competitors know what you are doing." The two reasons are very inconsistent. If the goods made were of such remarkable quality that they could sell solely on their own merit, the makers would not need to fear competition. In any case, advertising would not reveal anything more of the methods of the firm than keen competitors would find out.

RETAILERS MUST BE ON GUARD.

The persistent agitation maintained in favor of the extension of the parcels post system in the United States by mail order interests has been given encouragement by President Taft in his annual address to Congress and it is also announced that Postmaster-General Hitchcock, in his annual report, will recommend a limited parcels post system on the rural mail delivery routes, parcels up to eleven pounds in weight being carried in this service. Mr. Hitchcock further predicts the establishment of a complete parcels post system covering the entire country as soon as the postal savings system has become established.

Wholesale and retail hardware associations, backed up by associations of retailers in other branches of trade, have been fighting the mail order houses on the parcel post issue for a number of years and have been successful in securing the defeat or postponement of several previous measures. The last

scheme was a wily game to pull the wool over the eyes of the country retailers, the proposition being to establish a parcels post over the local rural mail routes, parcels being accepted only, however, from merchants in the districts served. Of course, the game would be to amend the law a year or so later to allow the acceptance of parcels from merchants in the larger cities. The mail order houses would make the plea of unfair discrimination in favor of the smaller merchants and, with the assistance of their subsidized press and the manufacturing interests supplying goods to the mail order houses, they would be able to gain their point.

Canadian merchants are interested in the fight being made across the border as if a parcels post system is established there the Canadian mail order houses will make a supreme effort to establish a similar system here. In fact, they are but resting upon their oars now and Postmaster-General Lemieux is on record as in favor of not only a parcels post but a C.O.D. parcels post. The fight will come sooner or later in Canada, but if Canadian retailers are strongly organized in the Retail Hardware and Retail Merchants' Associations they will have a fair chance of defeating the mail order houses as they did four years ago when the parcels post c.o.d. regulation was suggested in Parliament by Postmaster-General Lemieux.

An important factor in the fight will be the stand taken by the wholesalers and manufacturers. Undoubtedly their interests lie with the retailers and it will be suicidal upon their part to stand by and let the retailers carry on the fight alone. To strike a blow at the smaller towns and by acquiescence in the passing of an act aiming at the building up of the larger cities at the expense of the smaller communities will be but inviting a boomerang blow to land upon themselves.

Until the express rate tariffs are definitely established by the Railway Commission or a Parcels Post law is passed in the United States it is unlikely that there will be an open fight on the question in Canada In the meantime the mail order houses are quietly preparing for the fight and it behooves retailers to do likewise.

SPECIAL TALKS TO CLERKS.

A former retail clerk begins a series of special talks to clerks in this issue and as he has made a special study of the subject upon which he writes his articles will contain much food for thought on the part of the men behind the counter.

Every clerk knows that personal appearance, service, punctuality, knowledge of goods, etc., have all a bearing on his power to sell, and therefore, on his efficiency to his employer; and the more efficient one becomes the more is he worth.

Straight Talks on Hardware Salesmanship

TALK No. 6 BY VICTOR LAURISTON

"Here's a first-class hockey skate," exclaimed the hardwareman, enthusiastically, to the tall youth with the collegiate manner. "The shipment just arrived, and—"

He checked himself sharply.

"A bit of water must have splashed on that one," he added, as, with his handkerchief, he rubbed vainly at a big dab of rust.

"Sure it isn't a last season's skate?" queried the youth, jocularly. "Why, there's enough dust in the corners—"

"Confound that boy!" ejaculated the merchant, a trifle crossly. "He must have forgotten to dust again. I told him to be sure and go over everything, particularly the window stuff. That's a first-class skate," he added, though with perceptibly less enthusiasm, "and," he concluded, "as I was saying, the shipment just came in yesterday."

The collegiate youth merely sniffed. Evidently, he accepted the testimony of dust and rust in preference to the dealer's word. The latter sighed, and proceeded to dilate upon the merits of another skate.

A last year's hockey skate, for all practical purposes, ought to be as good as one of this year's stock. A rusty, dusty hockey skate, so long as its properly sharpened, ought to give as good service as a perfectly clean one. In fact, a hockey skate in use speedily loses much of its brilliance. But to the hardware purchaser, no matter what he buys, from refrigerators to wire nails, outward appearances count for a lot.

In hardware, dust is bad—and rust is worse.

Hence, you should wage unremitting warfare, alike against dust and rust.

With a host of buyers, cleanliness is the hardwareman's must effective salesman. There are none to whom it does not appeal. For most farmers, half the attractions of a new implement is the smoothness with which it runs, unclogged by dust and dirt. For the school boy, half the glory of a new pen-knife is in the sheen of the blade. In an article's brightness and newness lies a large percentage of its selling power.

The buyer is often prone to unjust suspicion. In the stove with a speck or two of dirt or rust showing here or there, he discerns a second-hand article taken in trade and furbished up. Dust on an implement is more conclusive evidence that it is an old model than is its recent number that it is new.

Keeping the stock clean, and neatly arranged, involves work, but cleanliness and neatness are both salesmen that work without salary. An attractive display says a good word before the actual salesman has a chance to open his lips. An article's brightness and evident newness has an eloquent appeal that goes direct to the buyer.

And then, with things kept bright as a part of the ordinary routine of business, there's no need to halt for two or three minutes in the selling process to dust off a sewing machine and blame it upon the boy—which constitutes, in any case, a confession of bad store management and frequently is a libel upon the boy as well. Such a halt does more than lower the article's value in the customer's eyes; it likewise breaks the current of the salesman's argument and shatters the purchaser's more or less conscious subjection to the spell of the salesman's personality.

Rusty Skates Prevent Sales.

No store can be kept absolutely spotless. The man who trains his staff to be particular in little things has a big task before him and before them. It means work—piles of work.

But it's work that is an investment; an investment, which, year in and year out, never passes a dividend.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Toronto.

Linseed Oil.—Reduction of 2c made by some.

MONTREAL.

Dec. 16. -There is an easing off in orders due to the time of the year, although the aggregate volume is well above the average. Anticipating a falling off in the demand for the finished article users are not buying so much metal for the time being. With more inflation to tin prices in the London market jobbing prices have been extremely firm but no general advance has been made as holders hesitate to follow the market in case it may go back on them quickly again. Fair trade has been done in copper. The weakness in New York has not reflected in local figures although it probably had the tendency to keep back forward buying.

A rather unusual feature of the imported pig iron situation is the fact that the warehouses are holding less pig iron than was expected owing to heavy buying on the wharf by users who felt that after all they had not looked far enough ahead. This means that, like last year, iron will be scarce before the river opens again. Domestic furnaces are feeling American competition in the West and prices are on the soft side to meet it.

The primary metals have changed very little in relative position. Tin is still under strong control, and the syndicate meet all hammering with easy complacency, while users continue to groan. Copper has developed further weakness. Wall Street went back on the metal, and London followed. The Producers' Statistics showed that some of the leeway between legitimate consumption and production and stocks were made up, but it was very slight. The pig iron situation in the States shows little relief in the tension. The output is still receding, although even now the output is enormous. On the other hand stocks are increasing so the statistical position does not improve. Prices are on the soft side. Spelter is practically the same in London, although St. Louis continues to show further weakness. Lead is about the same. Iron conditions in the Old Country are on the soft side, and contracts for spring and early summer delivery can be taken at present prices.

Pig Iron.—Business is naturally on the quiet side just at present. Warehouses are not overstocked, however, as a lot of iron was bought up before going into stock. Ex-store prices are as follows: Summerlee No. 1, $21.50 to $22; Middlesboro, No. 3, $18.50 to $19. Poor business on the other side of the border is causing plenty of competition this side with a consequent shading of prices by domestic furnaces. But orders are not to be taken ahead at prevailing prices owing to the belief that conditions will improve in the States on the turn of the year. Canadian No. 1 is quoted here around $19.50. New business in the States is on the small side, and stocks are accumulating despite restriction in production. Cleveland warrants, despite the boiler makers' strike and the elections are not fluctuating very much, and show a surprisingly good strength considering.

Tin.—Although the primary markets warrant an advance in prices, local quotations are generally unchanged, but an advance is threatening. There is some hesitation in altering figures as primary quotations may fall back again to last week's average or even lower. There is little Straits tin on the market, but other grades are not scarce. There is little new about the bulling operations in the London market. The Syndicate maintain control, and so long as they are financially strong enough to carry the metal under their hands, there seems no reason why the present situation may not be maintained.

Copper.—Fair business is being done at unchanged figures, although large lots are now being met with better concessions. New York has developed the weakness spoken of previously in these columns. The Producers' Statistics, while showing a little better position, was not sufficient to produce a brighter tone. Wall Street failed to support, and London naturally followed, being very speculative.

Spelter.—Spelter is unchanged and meeting with a fair demand. Large users are out of the market at present. London is maintaining its strength, but St. Louis still falls back, and the market is now getting unstaple.

Lead.—Lead is unchanged both for imported and domestic. Fair trade is being done. The English market maintains a steady level, but is without any strong feature.

Scrap.—The scrap market is on the quiet side for the finer metals, although fair business is being done in cast and wrought iron. We quote: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2¼c; machinery cast iron, No. 1, $14.50; No. 1, wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, Dec. 16.—The local metal markets has entered on the quiet season, consequent on general stock taking. There is little demand and what orders are received are almost invariably of the sorting up kind. Local houses report a few enquiries but they are, without exception, from firms which do not take stock until the middle of January or later.

The activity noted last week was what might be termed the final rally before the market settled down into the dull condition which must ultimately prevail at this time of year. It will take several weeks at least for normal conditions to be reached again. In the meantime prices are firm and it is expected that present quotations will continue until the turn toward greater activity is reached.

Pig Iron.—The situation is unchanged. The local price scale is: Canadian No. 1, $19.50; No. 2, f.o.b. furnace sellers, $19; Middlesboro, No. 3, $20; Summerlee, No. 2, $22.50; Cleveland, No. 1, $20.50; Clarence No. 3, $20.75; Jarrow, $20.50; Glengarnock, $22.50.

Tin.—The tin situation is rather peculiar locally. The high price has caused trading to fall off. Buyers have contented themselves with small orders and stocks locally are almost at the vanishing point. The supply is scarce at the present time. The price is remaining firm, 42 cents being quoted for small lots. Concessions for ton lots and over are not given by some but it is possible to obtain large bulk at 39 cents.

Plates and Sheets.—There is rather a better demand for heavy sheets and plates but, with prevailing weather conditions, no outside work is being done and there is consequently no call for galvanized sheets. The tone all around is good and prices have remained firm. An advance in dull Canada plates to $3.00 was noted last week and there is a tendency now to shove the price above that mark. Some houses report that their supply of dull plates has been absolutely exhausted.

Copper.—The primary market remains firm. The effect of the decrease announced in American production has been received well abroad and has stimulated further purchases on all markets. Further decreases in production can be looked for during the next two or three months on account of weather conditions and voluntary restriction. Locally copper shows no change but the fullest confidence is evidenced on all sides.

Lead.—Quietness is the ruling characteristic of the lead market. The demand is light with prices standing at $3.85 for domestic and $3.90 for imported in small bulk. A 10 per cent. discount is allowed for ton lots and over.

Spelter.—No response has been shown locally to the changes made on the primary markets through manipulation on the part of the large sellers. There are other reasons for the advances noted in the United States, which lead to the opinion that the holders are warranted in seeking higher values. The shortage of the metal in Europe is a prime reason and now the prospect of a similar condition has arisen on the other side. This, combined with the increased consumption, is deemed sufficient to warrant the belief that higher prices still are not far off.

HARDWARE MARKETS

MONTREAL.

Dec. 16.—Trade has naturally quieted down, although in a few individual lines such as skates and hockey sticks there is an active call. Dealers within easy shipping reach are still sending in rush sorting-up orders in Christmas lines, but others not so well situated have finished with their ordering this side of Christmas. Purely local trade will be continued longer as the French Canadians pay more attention to New Year's day than to Christmas.

Builders' hardware is still prominent considering the time of the year, and lumbermen's supplies are showing seasonable activity. Heavy hardware has dropped off. Trade on the whole is of a general sorting up description but there is an absence of real swing, as is only to be expected.

Booking is about the same, with orders for early shipment in screen doors, hinges, poultry netting and green wire cloth prominent. Prices are of a firm tendency with no important changes. Travelers are already returning to headquarters and the next few days should see them all in.

Winter Lines.—The demand is of an easy character, but general household lines such as irons, carpet sweepers, wringers, meatchoppers and bread mixers are probably the most active. There is still an absence of snow, and snow shovels and ice picks are moving slowly in consequence. Sorting up is noticed in weather strip, sleigh bells, and sleigh heaters. General enamelware is again on the quiet side.

Christmas Goods.—Except in the case of those who are within easy reach of the supply houses, little is being shipped in the way of Christmas goods. Locally the demand will continue as Quebec Province is more given to making New Year's day the occasion for presents, so merchants have this much longer time for display. Rush orders are noticed in cutlery.

Sporting Goods.—There is an active call for skates and hockey sticks. The continued absence of any heavy snowfalls is keeping back the sale of toboggans and snow shoes. Bob sleighs have received stimulation and seem to be getting more popular. Gymnastic supplies are steady.

Lumbermen's Supplies.—These lines are probably among the most active of all goods going out. Steady buying is noticed from the various lumbering districts, especially in boot calks, crosscut saws and axes.

Builders' Hardware.—There is an active local movement, as building is still being continued most strenuously. The market is firm, and we quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside) $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Bolts and Nuts.—The demand is on the easy side, with a good undertone. Stocks are reported light in dealers' hands. We quote: Discount on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Wire.—Immediate shipping is quiet but booking is improving as the turn of the year approaches. We quote: Barbed wire, $2.25; plain twist, $2.55; galvanized wire, $2.20; base coiled fencing (9), $2.25; (12), $2.40; staples, bright, $2.60; galvanized, $2.85.

TORONTO.

Toronto, Dec. 16.—The Christmas trade is at height. Local jobbing houses have been working day and night for the past week handling the orders and there is no likelihood of a let-up until well into next week.

The orders now pouring in are not entirely of the sorting-up variety as one might suppose. A surprising number of hardwaremen are only now laying in their stocks of sleighs, skates, hockey goods and similar lines. Others are coming back for large supplementary supplies, due in many cases to the business done with the public being larger than had been expected. A trip through the shipping rooms of a local jobbing house this morning revealed the fact that some lines, such as skates, hockey supplies, toboggans, cutlery even and seasonable lines such as sleigh bells, mitts, etc., are moving in large bulk. Sleighs are being shipped out in large lots, the results of the recent downfall of snow.

Altogether the market points to a most thriving and prosperous condition of trade throughout the country and satisfaction is expressed on all points.

Seasonable Goods.—The belated arrival of snow has resulted in the demand for winter goods taking even a livelier turn. Sleighs are selling briskly and such goods as blankets, sleigh bells, whips, toboggans, snowshoes, moccasins, lined gloves and mitts, and snow-shovels are moving now more rapidly perhaps than at any other time during the present season.

Household Goods.—Despite the fact that the Christmas trade now monopolizes the attention of the public and the merchant alike, there has been no falling off in the every day class of goods. There is still a fair demand for household goods. Pots, pans, kettles, steamers, spoons, enamelware and tinware of all descriptions are sold in large quantity. Brooms, mop handles, carpet sweepers, shovels and useful articles of the same variety are moving.

Builders' Hardware.—The trade in this one branch has slackened somewhat but there is still a certain demand.

Heating Goods.—"Our trade now is better than at the same time last year," said the local agent of a large stove manufacturing firm. "It is not to be expected that the stove trade would be very brisk around the holiday, but at the present time the demand is about all we care to handle." Manufacturers are still a little bit behind with their orders in some lines but on the whole conditions are now much easier.

Sporting Goods.—The most marked feature of the hardware market is the demand for skates and hockey goods. All lines are being shipped out as fast as they can be crated and even at that it is hardly possible to satisfy the insistent demands of the dealers. With winter conditions upon them before they are prepared to meet the seasonable trade, hardwaremen in all sections are now trying to catch up without further loss of time. Gymnasium lines have sold well and there has been a pretty fair all around demand for sporting goods as Christmas features.

Heavy Hardware.—The trade in heavy hardware is normal. Carriage bolt discounts are quoted at: ⅝ and smaller, 70; machine bolts, ⅝ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—The tendency on the part of the dealers to stock high-grade goods for the holiday trade is one of the most satisfactory features. Where a limited number dealt in cut glass a few years ago, the number is now comparatively large and is continually on the increase. It is the same with brass goods while high-grade cutlery has sold this year as never before. Metal clocks, kettles, teapots, chafing dishes and similar articles are so widely in demand that it is becoming the rule to deal in them rather than the exception. Metal toys and banks, and similar small ware have had an extensive vogue.

U. S. IRON TRADE.

Cleveland, Dec. 15.—The Iron Trade Review says:—The principal feature of the iron and steel trade this week is the series of meetings being held by representatives of the various branches of this industry which have been called by the chairmen of the different committees of the American Iron and Steel Institute. Other meetings will be held later by representatives of other branches, but details have not been made public. These meetings are being held to discuss trade conditions in general and follow closely upon the general meeting of iron and steel manufacturers held in New York several days ago.

General market conditions show little change from a week ago and the opinion is now general that there will be little, if any, improvement until the first of the year. It is now believed that a decision by the inter-state commerce commission regarding the proposed advance in freight rates will be postponed for several weeks, probably until April, and for this reason it is likely that there will be comparatively little buying on the part of the transportation companies for some time. Low prices have been made on semi-finished steel. Actual bookings of wire, nails, pipe and bar iron have been light. The pig market has been extremely quiet and few coke sales are reported.

HARDWARE TRADE GOSSIP

Ontario.

E. Fielding commission agent, Toronto, has been on the sick list for the past fortnight.

Weichel & Son, Waterloo, have improved the interior of their store by adding two silent salesmen.

The assets of the Allen-Schofield Co., hardware manufacturers, Montreal, have been advertised for sale by tender.

W. Vallance, of Wood-Vallance, Hamilton, is on a tour of the West. He paid a visit recntly to his nephew, James Vallance, of the Vernon Hardware Co., Vernon, B. C.

S. A. McCartney, Orangeville, reports stove business to have been exceptionally good this year. Up to the present time he has disposed of 57 ranges and expects to reach the 75 mark before the end of the year.

The Imperial Construction Co. which has the contract for the erection of the new enamelware factory at Port Arthur, has lost no time. A building has been put up for the storage of tools, and the work of excavation has been commenced.

A. E. Berryman, manager of Metals, Limited, Calgary, Edmonton and Lethbridge, is spending a week conferring with the Gurney Foundry officials and other trade connections in Toronto and Montreal.

J. N McGregor, Oakville, is building a 34 foot extension to his tinshop. It will be constructed of cement. During the winter Mr. McGregor will make improvements to his store. The store-room at the rear will be thrown into the main store, silent salesmen installed.

W. A. Rankin, hardware dealer, Bank street, Ottawa, is given a lengthy notice in the Ottawa Free Press, the size and assorted nature of his stock being commented on. Among the goods mentioned were skates, knives, sleighs, electric irons, sweepers, carving sets, scissors, cutlery, razors, and sporting goods of all kinds.

The Diamond Flint Glass Co., Hamilton, will dismantle their present plant on James street north, and operate exclusively on a new site which they have secured. The capacity of the present plant will be trebled. Three new buildings will be erected. The purchase of the site for this new factory has caused property values in the east end of Hamilton to increase considerably.

The Bond Hardware Co., Guelph, are carrying on Christmas business under difficulties. They are enlarging their store by taking in the stand next to it. An entirely new front is being put in, and the intention is to make the whole space into one store. The front has been completed by very expeditious work, but only the original store is open to the public so far.

T. Aikenhead, donor of the Aikenhead Trophy to the Mercantile Hockey League, gave a banquet in the King Edward Hotel grille room Tuesday night to the Aikenhead Ironsides, winners of the cup. About 16 were present, the proceedings being quite informal. The members of the team who represented the Aikenhead Hardware Co. in the league were: R. Tew, Geo. Simpson, M. McKenzie, H. Lorrimer, R. W. Taylor, J. Harman and Victor Smith.

Quebec.

Lewis Bros., Montreal, will hold their annual convention of travelers on Dec. 28, 29 and 30.

G. Caverhill, of Caverhill, Learmont & Co., Montreal, has returned from a visit to the Old Country.

C. E. Wood, Standard Arms Co., Wilmington, Del., has been calling on the hardware trade in Montreal.

S. Brewer, of Thomas Robertson Co., Montreal, has been laid up with a severe cold. His many friends in the trade will wish for a speedy recovery.

G. Parent, Pt. Claire; J. Lebeault, Longueuil; A. Lemieux, Henryville; J. B. Damour, Ste Philomene, and J. A. Paquin, St. Eustache, Que., have been on a visit to Montreal.

William Starke was re-elected president of the Metal and Hardware Association of the Montreal Board of Trade, and also chosen as the association's nominee for election to the council. H. J. Fuller was elected vice-president; J. H. Hanson, treasurer; H. W. Dorken, C. H. Godfrey, W. J. Hayes and T. Esmond Peck as directors.

Western Provinces.

The Lindsay Hardware Co., Vulcan, Alta., have incorporated.

E. Clump has started a plumbing and tinsmithing business at Ryley, Alta.

Bellefuille & Dery have started the manufacture of tube skates in Winnipeg.

Martin Bros., hardware dealers, Rossland, B. C., have sold out to W. K. Ealing.

O. C. Snider, hardware dealer, Leslie, Sask., has added implements to his business.

D. J. Ross, hardware dealer, Saskatoon, is negotiating for the sale of his business.

A. R. Hart, representing Lewis Bros., Montreal, in Calgary, is on a visit to headquarters.

J. L. Dods, hardware and implements, Halbrite, Sask., has been succeeded by R. J. Fenwick.

The Ross Lumber Co., lumber and hardware dealers, are opening a branch at Salvador, Sask.

J. A. Lindsay's building for his new hardware store at Vulcan, Alta., is practically completed and business has been begun.

J. Wood has resigned his position with the W. J. MacKay hardware store, Medole, Sask., and with Mrs. Wood has removed to Alameda.

Among recent sales of real estate, the Manitoba Free Press mentions the transfer of property to two hardware dealers, T. Rasmussen, Quill Lake, Sask., and W. Collinge, North Battleford, Sask.

J. A. McKenzie, Fairview, B. C., has sold his hardware store to Grant Gunn. The new proprietor is a practical hardware man, having been in the business in Vancouver for some years. He is now with W. R. Owen, and will take over his new store on January 1. Mr. McKenzie has accepted a position with the Canadian Rubber Co.

An overheated stove in the hardware store of A. R. McPherson, Dauphin, Man., started a fire on the night of Saturday, Dec. 10, which resulted in the destruction of three business blocks. The damage is placed at $25,000 with insurance covering about 80 per cent. Mr. McPherson was away, having left town for a hunting camp the day before. The stock in his store was entirely destroyed. The loss on the stock is estimated at $5,500 with insurance of $4,500.

British Columbia.

Cunninghams, Limited, have succeeded Cunningham-Sanderson, Limited, Vancouver, and have just removed into a fine new block at 1012-1016 Granville street, where they have installed beautiful new fittings, which with largely increased stock gives them one of the finest retail hardware stores in Western Canada. "Vancouver, at the present time," writes Mr. Sanderson, "is the most virile city in America, which is the same as saying in the world, and we take considerable pride in the position we occupy, as having the finest retail hardware store, on the best retail street in the best city on earth. The above may sound optimistic, but that's the way we feel."

Maritime Provinces.

The Gold Coin Paint Co., Dorchester, N. B., have elected officers as follows: Hiram W. Palmer, president, W. Frank Tait, vice-president; A. C. Morton, secretary-treasurer; C. Lionel Harrington, W. E. H. Perrin, John W. P. Ritchie, Dr. E. Kennedy, directors.

NEW VACUUM CLEANER.

Ottawa,—One of Ottawa's new industries will be the manufacture of vacuum cleaners. A company known as the Ottawa Vacuum Cleaner Mfg. Co., has been formed with a capital of $150,000, for the purpose of manufacturing these cleaners in different forms such as, the Electric portable, all sizes of hand power machines, and those for permanent installations in various sizes. Mr. S. Gillespie, the superintendent states that the new machine will be a double pump mechanism.

Use plenty of signs and have them placed conspicuously in the departments.

Try to induce early in the morning shopping and make special attractions. The idea of crowding the store too early in the morning is not advisable, but make such offerings that the trade will come to a department that can be prepared the night before.

Organize some system for keeping a close record of goods out of stock.

News and Methods of Canadian Hardwaremen

Striking Method of Advertising Bringing Results at St. John —Practical Demonstration of Salesmanship at Ottawa—Carleton Place Firm banquets its Employes—Co-operative Delivery System at Goderich.

CO-OPERATIVE DELIVERY SYSTEM.

Goderich.—R. W. Wallace, Simcoe, who has established delivery systems at Simcoe, Ingersoll, Tillsonburg and Orillia, has added Goderich to his list. On November 28, many of the local merchants gave up their private delivery wagons and began distributing parcels through Mr. Wallace's service. The public were notified of the change through the local papers as well as by hand bills. Deliveries are made at 9 and 11 a.m., 3 and 5 p.m., and at 9 p.m. Saturday night. Four wagons are used, but on Saturdays some of the grocers also use their own rigs. Similar systems are also working satisfactorily at St. Mary's, Picton and Seaforth.

BANQUET TO EMPLOYES.

Carleton Place,—Taylor Bros., Limited, who conduct retail stores here, and at Almonte and Lanark, tendered their employes a banquet on Wednesday evening, Nov. 30, a company of 32 being made up of the employes and their wives, the seats of honor being taken by Frank and John Taylor, and Lett Simpson, manager of the Lanark store. Addresses were delivered by all of these and a program of music, songs and recitations also helped to make the evening enjoyable. Taylor Bros., in the past eleven years, have built up their business from one store and four employes to three stores and 35 employes.

SUGGESTIONS ADOPTED.

It is gratifying to note that suggestions made through the columns of Hardware and Metal are very frequently taken up by merchants. Cases of this kind come to light every day, evidencing the fact that subscribers not only watch the contents of this paper closely but are prone to act on the ideas presented.

Suggestions for window displays and descriptions of windows dressed by hardware merchants, are among the most frequently copied. Many instances might be cited where plans for effective displays, described in Hardware and Metal, have been taken up and used by window dressers. Generally, the main idea alone is taken, the details being arranged and modified to suit the requirements of the window and the taste of the designer. Last Christmas R. Blain, Jr., Brampton, arranged a very effective display, in the nature of a rural scene. The window was raised at the rear, with a steep slope down to the front, the slope being covered with moss. At the top was a rural fence, with a background of evergreen, arranged to represent trees. On the fence was an owl and at the front of the window, running along the base of the slope, a tin trough of ragged shape was placed. This trough was filled with water, which was allowed to freeze. The window proved an excellent representation of a winter scene. The sides and background were used to display guns and ammunition. An illustration of a window along the same line had appeared in Hardware and Metal some time before and Mr. Blain received his inspiration from that source, adding several new features of his own. So striking did the display prove that he intends to repeat it again this year.

On November 26 of the present year, Hardware and Metal suggested a skate and hockey window, in the form of an open air rink, with tin plate to represent ice, asbestos cement for snow, a small waiting room at the side, hockey nets, etc. The idea has been taken up by Geo. Pearsall & Son, Yonge St., Toronto, with many new ideas of their own added. Owing to the back of the window being open, it has been found necessary to reduce the size of the display. The ice space occupies only a portion of the window, the effect of real ice being very happily produced by a plate of heavy glass, streaked with white. At each end, a small post, with an electric light attached, is placed and the waiting room at the side also contains a light. When the lights are turned on, the effect is good.

WANT RAILWAY CONNECTION.

Kingston. — Albert Freeman, New York; William J. Morton, New York; and J. B. Hannah, of Cleveland, have been in this city this week as directors or the Exploration Syndicate of Ontario, which is developing the Wilbur Iron Mines, with J. G. McNulty, the manager of the mine. Over 20,000 tons of iron ore are now in the dump, awaiting shipment. The ore cannot be got out until railway connection is made to the mines. The directors have about decided to build a railway spur to Newboro, and ship the ore to Kingston, by way of the Rideau canal. Negotiations are now in progress with the Kingston & Pembroke railway company. The directors are well pleased with the ore.

STRIKING ADVERTISEMENTS.

St. John, N. B.—A series of striking full-page advertisements are being run in one of the daily papers here by T. McAvity & Sons. These advertisements appear each Saturday in the daily, and also in the semi-weekly edition. They are headed always in large type, "McAvity's Messenger," and the space is utilized for specializing on one class of goods at a time. In the issue of December 3, they direct attention to their line of lavatory and bathroom fixtures, showing 39 illustrations of different articles with a description of each and the price beneath it. The firm have found this method of attracting attention to their goods a pronounced success.

IS CONSIDERING ALTERATIONS.

Fergus, Ont. — Conditions have been brisk in this section during the fall season and the stove trade is reported to have been more satisfactory than for some years. The demand was particularly for heaters, although the trade in ranges was pretty well up to the average.

A. E. Nicholls is considering the advisability of putting in a front entrance for the offices above his hardware store. The change would necessitate some alterations in his present retail quarters.

A PRACTICAL DEMONSTRATION.

Ottawa.—When a customer enters a store with a purchase in view, does it necessarily follow that such a purchase will be made? Will not a great deal depend upon the intelligence of the salesman—his knowledge of the uses of the article desired? As an example of the necessity of such knowledge, a case arose in a local hardware store here the other day. The proprietor asked one of his clerks if he had sold any of a special make of safety razors which he was carrying. The clerk's reply was to the effect that he had shown the razor mentioned, but no one had evidenced any particular inclination to buy it. The proprietor questioned him as to the method of using it—with what result? The clerk absolutely did not know anything about the razor at all, so that if a prospective buyer had asked how it was used this salesman would have been unable to impart the requisite information. Here was but one article taken at random from the stock. How about other portions of the stock? His employer impressed upon him the importance of having a complete knowledge of the goods he was selling—took the razor and explained the method of its use. The clerk admitted his evident lack of salesmanship, and apparently the lesson had its beneficial effect.

How many proprietors take this plan of illustrating deficiencies on the part of their sales forces? This plan pursued occasionaly would undoubtedly prove to the profit of the employer, as well as equip the clerk with the armament of good salesmanship. At this season of the year more than any other, thorough acquaintance with one's goods is very essential.

Let the clerks read their particular trade papers; let them studiously examine the various new imports, and thus acquire a thorough knowledge of each article—thereby improve and enhance their value as business promoters.

Hardware Letter Box

PLATFORM SCALES.

R. C. Puddicombe, Ayr, wants information as to the names of manufacturers of 2,000 pound scales. Also what is the address of the National Manufacturing Company?

The Aylmer Pump & Scale Company, Aylmer, Ont., and Burrow, Stewart & Milne, Hamilton, and the National Manufacturing Company, Ottawa, are manufacturers of these goods.—Editor.

STOVE REPAIRS.

McKillop & Ferguson, West Lorne: Can you tell us where we can procure repairs for "Silver King" ranges?

Guelph Stove Co., Guelph, and Jones Bros., Bracondale.—Editor.

PUTTY PASTE.

Kent, Garvin & Co., Hamilton: Who are the manufacturers of putty paste?

R. J. Waddell & Co., 52 Beekman street, New York, and handled in Canada by McIntosh Granite Co., Toronto.—Editor.

ELECTROS FOR ADS.

The Whitten Company, Bracebridge: Kindly give us the names of one or more firms that could supply advertising electros.

Electros for advertising purposes similar to those used in the advertisements of the Russell Hardware Co., Toronto, Stanley Mills & Co., Hamilton, and other concerns using same size of etchings, can be obtained from the David Williams C. 14-16 Park Place, New York, National Hardware Bulletin, Argos, Ind., or the House Furnishing Review, Broadway and Murray streets, New York.—Editor.

WASHING MACHINES.

An Alberta Subscriber: Who is the manufacturer of the "One Minute" washer.

White, Ehrhardt Co., 121 Logan avenue, Toronto.—Editor.

STEEL CASED CARPET SWEEPER.

S. R. Peart, Rockwood: Can you tell me who makes steel cased carpet sweepers?

Streator Metal Stamping Company, Streator, Ill.—Editor.

A KITCHEN CORNER WINDOW.

Chatham, Ont.—A kitchen corner window display was put on some time ago by Westman Bros., in one of their small corner show windows. The display showed a chimney corner, with a kitchen range in the foreground, the pipe being connected with a chimney. The two corner walls as shown were hung with cheap paper, giving a very realistic representation of an ordinary kitchen papering. Cooking utensils were hung from nails, and the kettle was shown on the range shelf. The window, though small, barely having room for the ordinary range, gave a very homelike representation of a kitchen, and attracted much attention.

The Baling Tie Buckle Co., has been incorporated to manufacture baling tie buckle and all kinds of machinery, implements and tools, head office to be in Hamilton, capital stock, $20,000.

Metal-Workers' Specialties, Ltd., has been incorporated, with a capital stock of $40,000; incorporators, H. B. Nicol, W. Cowan, J. C. Cole, W. Walsh and W. J. Bellingham, all of Toronto; head office to be in Toronto.

WORK PROPOSED FOR BOARDS OF TRADE

If each merchant felt positive in his own mind that there was no business whatever going over his head to mail order houses, a great weight would be removed. True there are many who do not give the catalogue houses in the big centres very many thoughts. They have been able to offer their customers goods of such a value as to persuade them that nowhere else could they secure the same or better for the money.

But in almost every town, village and country community there are heard complaints about money going direct to mail order houses—houses which never pay a cent of taxes in these places—and the merchant is not only losing but the community is becoming weaker.

There are two classes of people affected in most districts. There are the farmers and the townspeople. The question arises how can each class be convinced that it is to its own monetary interests to deal at home? The argument has been put forth that to confer on the question with the farmer he must be met at his institute or club. The labor men similarly could be reached through their unions but what about the remainder of the townspeople?

A prominent agriculturist—one who holds an important position with a provincial government—says that the people in the villages and towns send much more money to the mail order houses than do the farmers.

To stop this drain on the resources of a community which benefits only the big cities, he suggests that the boards of trade take up the matter. By holding public meetings and announcing a subject such as "Why the General Public Should Support Their Home Towns;" "Advantages in Spending Your Money at Home to Yourself and to Your Community," or "How to Make Your Home Town Prosper," the citizens could be taught to buy solely from their local merchants.

Speakers from neighboring towns could be secured to give facts and figures illustrating how money can actually be saved. Statistics could be presented showing localities where mail order house competition had reduced the population, the standing of the community and the value of the property; it could be demonstrated how villages and towns are dwarfed from the present system of sending money out of a community to enrich another a hundred or two hundred miles away.

But the question would have to be treated on a sound business basis. Complaining simply about mail order houses selling lower than local merchants would be of no avail. Figures must be quoted pointing out where catalogue prices are above those of the home merchants, the quality being equal or superior. The on-the-spot service which the catalogue house cannot give could be pointed out. The drifting away of young people and the depreciation of property values are other items to be considered.

By such methods people could be taught that they have been mislead by a few paltry bargains, often on inferior goods handed out as baits; that these bargains are seldom included in catalogues; that one must be in the city in which the house quoting the alleged bargains is situated in order to get them; that they can buy better goods at home at the same or lower prices; that the value of their property is being depreciated by sending out their money; that it is not honest for them to pay the mail order house cash for goods every time and allow their own dealer who takes a personal interest in serving them to wait long periods of time; that these catalogue houses pay no taxes in support of their municipalities; that the great burden of taxes rests on the local merchants and that the local merchants are the nucleus of the community.

When these facts have been driven home by a board of trade anxious to built up the town by not only getting new industries but by circulating more money in it, then a greater prosperity ought surely to follow their efforts.

Their meetings, of course, would be given wide circulation through the daily press but care must be taken that there should be no spirit of "knocking" shown. The matter must be presented in a fair, business-like method—on a dollars and cents basis—so that everyone will be convinced of the sincerity of the agitators in advising people to deal at home.

Stephens

Wagon Paints

are just the thing for wagons, sleighs and all sorts of agricultural implements.

First-class paints, but easy to handle.

Cheapest paint in the long run, because it wears.

You will never have dissatisfied customers if you stick to Stephens' Paints.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Dec. 15.—Wholesalers and jobbers have been well satisfied with the timely ordering on the part of the retail merchants. This week the ordering for seasonable goods practically came to an end. There have been no bulk orders received for several days except for new stock, and just now there are few hardware stores opening. The trade is very light, and only repeat orders for holiday and sporting goods are being received. Wholesale houses are beginning to take stock to keep their employes engaged, and it is believed that by the first of the year stock-taking in local houses will be complete.

Travelers are all in from the road, and they report the retail hardware trade in splendid condition. The fact that merchants were a little afraid of the crop returns in their particular district, forced them to buy lightly, and the result is that a few of them are dangerously overstocked. Although collections are only fair at the present time, it is believed that after the large output in the month of December that collections will be fair after the first of the year.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.25.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9¼c.

Sheet Zinc—Casks, $7.75; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 5[illegible] 2½ p.c.; No. 1 scoop[illegible] p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

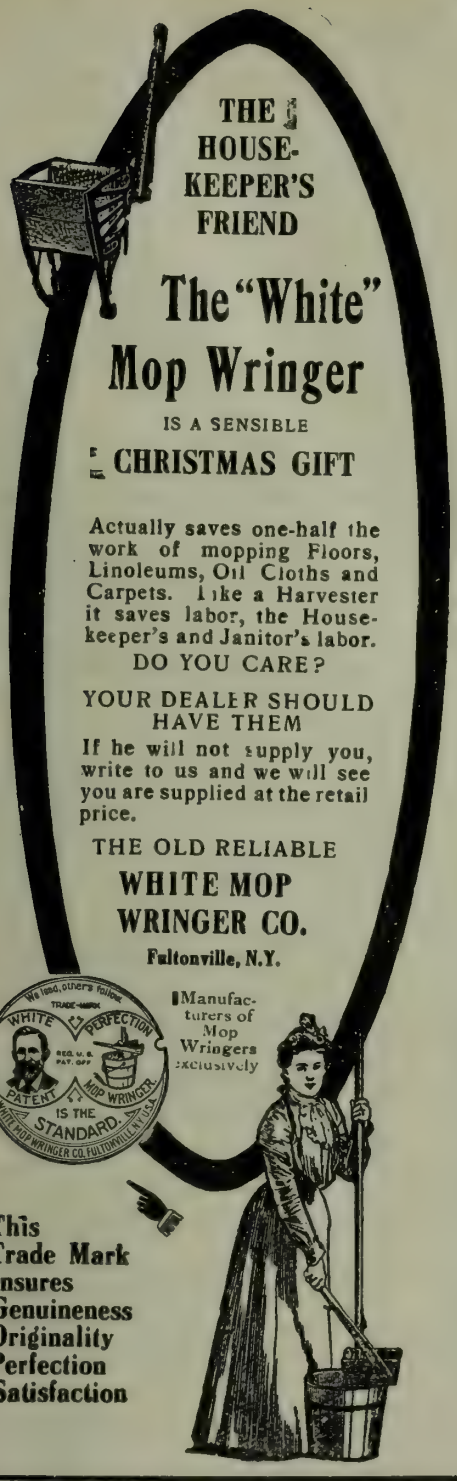
Wire Nails—$2.90 Winnipeg and $2.45 Fort William.

Wringers—Royal Canadian, $41; new easy, $45.25.

Paints and Oils.

Only sorting orders are coming in for immediate shipment, but this covers a wide range of supplies, and in some cases the quantity is large. Travellers are sending in some good orders for shipment early in the year, covering full line of paints, oils and supplies. There is an excellent year in view for mixed paints, and although the price is high, there will be no abatement in the ordering. At the present time, putty and glass are going out remarkably well, as is also varnish for interior work.

Linseed Oil.—There is no change in the linseed oil market, and the prices continue firm at $1.15 for raw, and $1.18 for boiled. Local jobbers expect that after the first of the year when the demand begins to grow, that prices will be forced higher. The condition of the seed market would also warrant this conclusion.



Petroleum and Gasolene—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

WESTERN OPPORTUNITIES.

According to "Western Progress," there are openings in western towns as follows:

Bredenburg, Sask., hardware store.
Beverley, Sask., hardware store.
Colonsay, Sask., hardware store.
Cadogan, Sask., hardware store.
Ebor, Man., hardware store.
Erskine, Alta., hardware store.
Kennedy, Sask., tinsmith.
Yorkton, Sask., foundry.

Illustrate your advertisements, but don't over exaggerate. The trade may as well stop off at your store as well as further down the street and you don't want to bring them in under false pretenses.

TALKS ON PAINT SELLING

No. 5

When a dealer secures the Sherwin-Williams Agency, he also acquires the following business-building co-operation:

I. Advertising Literature designed and written by men specially trained in paint and varnish selling.

II. Store and Display Advertising in the form of window trims, cut-outs, hangers and posters which make the S-W Agency the bulls-eye of attention.

III. The big national advertising campaigns, including the magazines, farm papers, bulletin boards, etc.

IV. A special department devoted exclusively to promoting property owners and other consumers by mail for the agent.

V. Representatives willing and capabl of aiding you to secure specially desirable and difficult business and the good-will of many of your local painters.

VI. Warehouse facilities that insure prompt deliveries of all orders.

VII. The entire organization, including the Decorative Department, which stands back of every agent prepared to help solve all technical and other problems in the handling or sale of any S-W Product.

An inquiry now may link all these forces to your store.

How the Roofing Business May Be Increased.

In Order to Secure Business the Roofer Must Cultivate the Trade—The Present an Opportune Time to Study the Conditions and Lay plans for Next Season.

An increase in the amount of business done and a corresponding increase in profit may be realized by any roofer by the simple use of intelligent enterprise. As a test to see if he is doing all that he can he might consider that he is being asked the following questions:

Are you making it a point wherever a new building is to be erected to see the owner and explain to him the advantages in having good work done and with good roofing material? Have you pointed out to an owner, where complaints have come up, that the reasons are poor workmanship and poor material? Have you explained that a good base plate with a heavy coating is qualified to render a service that will be satisfactory both as to its duration and its weather-proofing? Have you explained the advance that has been made in the character of roofing plates which have come about within the past half dozen years? Have you made the investigation of this matter, so that you are in possession of the facts and can enthusiastically present them to the man who is to be a customer?

Have you explained to the architect, the carpenter and the owner, that even where a flat seam roof is to be laid, that some pitch to it is of decided advantage, and the additional cost for material so slight as to be negligible? Just because a tin roof can be soldered so tight that it will not leak is no reason why it should be made so near flat that pools of water will lay on it after a rain storm to evaporate or lay a day or two, so that if there is any possibility of the moisture getting down to the tin plate it will bring the strain and wear upon the material instead of rolling off to the gutters? Have you explained that paint will afford a better protection to the roof material if there is a sufficient pitch for the water to pass rapidly over to the gutter, so that as soon as the storm is over there will be no water lying on the paint to cause it to rot, or to find any crack in the paint that may be due to imperfect application?

There is an advantage in bringing to the attention of the owner, as well as to the architect and builder, the detail of the construction of the tin roof of both the flat seam and the standing seam type. The roofer may know all about this himself, but his patrons are not aware of the difference in workmanship between what is a first-class job and one that looks exactly the same, but open to all manner of criticisms from the roofing expert. There is an impression made for good and for his own advantage where the roofer gives a careful explanation in detail where the opportunity is offered.

Where the opportunity is not offered, he should seek the opportunity to impress upon his customers that only the best materials and workmanship will be economical to them and satisfactory in its service. Too little attention is paid to bringing the merits of the various important details in roof lines to the attention of those who should know it. In consequence they look only on the price that is quoted to them and they cannot see that there is a vast difference between a good roof and a poor roof, although the general appearance may be the same. The buyer is likely to assume that one man's guarantee is as good as another's, and possibly there may be some truth in this, but one man's intelligence is likely to be different from that of an other, and the man who has the most information about his business and who lays it before prospective customers, is very likely to be remembered favorably by them.

Too little attention is paid to salesmanship by this class of tradesmen. They are likely to assume that the building has to be built and has to have a roof on it, and that they have to bid for it in competition with others, and that there is little opportunity to influence the owner or the builder in favor of the better class of work which they are seeking the opportunity to do.

There is an advantage in knowing the age of evey metal roof in the community, so that when anything is said about tin roofing it can be pointed out that some have been in service 10, 15, 25 or more years, as the case may be.

If there is any case where a tin roof is unsatisfactory and has to be replaced, it is well worth the time of the roofer to investigate the cause of the trouble to see if it was a cheap plate, if it was thinly coated, if it was improperly laid, if the sheathing boards were not dry, if the pitch was not sufficient or which one of the many reasons why the work should never have been done as it was. It affords the opportunity to make the positive statement that the roof could have been guaranteed if the conditions had been as they should. It affords the opportunity for a roofer to say "I will not put the roof on the building under the conditionus which you name, because it would hurt my reputation, and hurts the reputation of tin roofs after I am out of business." When a man is building up his reputation by good work he is building up something that is not only of value to himself, but to every person in the community who some time my be called upon to make a selection of the mechanic to do something for him.

LEAVES NAME OFF CALENDAR.

Hartford, Ont.—B. W. Thomas, general merchant, here, has decided on a change in the manner of sending out calendars this Christmas.

"It is the usual method to have the firm's name printed directly on the picture," he says. "This year we have an extra nice calendar, and instead of defacing the picture with printing, we paste a 'Season's Greeting' card over the pad, so that after reading, it can be torn off. Another card 'Compliments of B. W. Thomas, etc.,' is pasted on the under side of the pad, and so the name is left on the calendar all the year."

The card on the outside of the pad reads as follows:

SEASON'S GREETINGS.

We take this opportunity of expressing our thanks to you for your thoughtfulness during the past, in helping us in our business. We appreciate what you have done, very sincerely.

And now we ask for the coming year of 1911, a continuation of your favor, and we will endeavor to serve you to the best of our ability.

B. W. Thomas,
Hartford, Ontario.

There is no printing establishment in Hartford, and Mr. Thomas does his own printing and press work, and it is very neatly done, too.

NEW COMPANIES.

The Dominion Carlite Explosive Co., Wallaceburg, capital stock $100,000, to manufacture explosives, has been incorporated.

Adam Hope & Co., Hamilton, have been incorporated with a capital stock of $75,000, for the carrying on of a wholesale metal business.

The Gilbert Manufacturing Co., with capital stock of $250,000, head office Toronto, has been incorporated to manufacture copper, brass, nickel-plated, iron, aluminum and tin goods and hotel sundries.

The Graley Boat Co. has been incorporated to make boats, canoes, launches, gasoline engines, etc., capital stock to be $50,000 and the head office in Penetanguishene.

The Murray Brass Manufacturing Co., has been incorporated, to manufacture brass, copper and sheet metal work. capital stock to be $40,000. The head office will be in Windsor.

The Watson Fire Arm Sights, Ltd., has been incorporated, with a capital stock of $40,000, head office to be at Niagara Falls. Guns, sporting goods, firearms, ammunition and hardware specialties will be manufactured.

The Lightning Furnace Co., Montreal, capital stock, $90,000, has been incorporated, to manufacture furnaces, radiators, stoves, kitchen and laundry ware, refrigerators, filters all kinds of hardware, plumbers' and steamfitters' supplies, paints, oils and electrical apparatus. The manufacture of the "L'Eclair" hot water furnace has been taken over.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

Judgment Needed in Installing Furnaces

The Dealer Needs Competent Men as Well as a Good Make of Furnace if He Desires to Give Satisfaction and Work Up a Business.

The successful installation of a furnace depends upon the proper exercise of judgment. The dealer in furnaces must, therefore, reckon on more than a good make of furnace to insure the building up of a good trade. He must have a competent staff of men to see to the work of installation, so that his customers will be satisfied with the results.

A good furnace may prove very inefficient if not advantageously located. If it so happens that a new furnace, through some fault of installation, does not heat the house as well as it should, the dealer who put it in is bound to be made the target for much irascible criticism. Nothing is more trying on the temper than a furnace which requires constant attention, or which burns up coal at an alarming rate of consumption. The householder, who finds that his furnace does not work as it should, will in every case make the subject one for discussion everywhere, and Brown & Co., who supplied it, will be severely criticized wherever that man goes.

Each contract presents features all its own. Judgment is required to decide on the proper size and location of the furnace, the registers and the conductor pipes in every instance. Many things have to be considered—the construction and exposure of the building, prevalent climatic conditions, the plan of the rooms to be heated, etc. An error of judgment may mean an unsatisfactory heating system, and, as a natural sequence, the perpetuation of a tangible reason why trade should not be given to Brown & Co. The memory of such mistakes rankles in the minds of customers as long as the furnace lasts, and may be the means of turning hundreds of dollars' worth of work from that particular firm.

By the employment of reasonably competent men, however, serious mistakes can be avoided. It is not a difficult matter for experienced workmen to determine the best way of installing a furnace—provided that proper attention is given. A prime consideration is, of course, to instal a heater sufficiently large to properly warm the house. Penny-wise landlords will sometimes place economy before comfort, and want to put in a furnace too small for the house intended. A wise dealer will protest firmly against any such course. It would sometimes pay to refuse orders of that description, as the furnace is certain to cause dissatisfaction, and it is on the dealer that the blame will recoil. In practically all cases, a size larger than is judged to be absolutely necessary, should be recommended. It will prove more economical, durable and satisfactory. A heater of not sufficient size is bound to be a heavy consumer. The householder must keep the rooms warm and will endeavor to create comfort by loading the furnace up and letting it rip. His coal consumption will exceed that of a larger furnace, and the life of the heater will be shortened.

Some Prime Considerations.

An American furnace manufacturing company issues a list of directions for setting and piping, including the following:

"The furnace should be placed as nearly central to the rooms to be heated as possible, favoring that direction from which the prevailing winds blow. In setting the castings, see that they are perfectly level on foundation, and that faces of the mouthpiece of both ash pit and feed section, dome, or that of radiator, as the case may be, are plumb, so that the door shield will properly fit against them. Mix dry cement with water to the thickness of mortar. Thoroughly cement all joints with this, excepting flanges on door shields; on these use asbestos cement. Spread this carefully around shield flanges and also in cup joint where shields join, then place shields in position and draw them up tightly and evenly with bolts. See that smoke pipe fits tightly over smoke pipe collar, and do not allow it to project into chimney flue. Before connecting smoke pipe with chimney, see that there is a good draft and that the flue is clear of obstructions, such as brick, mortar or soot. Carefully line with tin all woodwork in close proximity to smoke-pipe, leaving space for circulation of air around it.

Make Pipes Short.

"Locate registers in such parts of room as will make the air conducting pipe short, of nearly equal length, and distribute them around hood of furnace as evenly as possible.

"The warm air pipes in basement should be straight, and have all the elevation possible (not less than one inch to one foot). If necessary to make turns, avoid all sharp angles. The only power that conducts air through the pipes is that caused by the tendency of heated air to rise; avoid horizontal and crooked pipes. Protect all warm air pipes from cold air currents, because these will chill the pipes and stop the circulation of air within. Pipes exposed to cold currents, or where they pass through cold rooms in basement, should be made double, or wrapped with air cell asbestos paper. Provide all warm air pipes with dampers close to the furnace.

"Without particulars, no reliable rule can be given as to size of pipes required in conducting the warm air from the furnace to various rooms. The judgment of the mechanic doing the work must decide in this respect."

The Importance of the Chimney.

Remember that the successful working of the furnace depends largely on the chimney. The furnace smoke flue should be a separate one, with no other openings or connections, straight as possible, of same area from top to bottom, extending several feet above the highest point of roof, and provided with an ash pit door below the smoke pipe opening. We recommend that the furnace smoke flue be not less than 8x12 inches inside measurement. However, an 8x8 inch flue with a good draft may answer for heaters with 8-inch or smaller smoke pipe. No smoke flue should be less than 8 inches in depth. Long, narrow flues, such as 4x12 or 4x16 inches, are no good.

DECORATE THE STORE.

Talking to a hardware merchant, located in a district that would not appear to be at first glance one of the best fields for a strong Christmas trade, and yet who has worked up a present trade that brings him, relatively speaking, more profit than the usual lines of hardware, this necessity of giving the store a Christmas appearance was strongly commented on. "The first thing I do," he said "is to clear all my stoves and other heavy articles on the floor out of the way, and set up small tables in their place. I also clear out the basement and give it a bazaar appearance. Then I decorate the whole store, leaving no part untouched, so that a customer wandering around does not get away from the spirit of the time, and get chilled and his pockets likewise. Some merchants I have noticed just decorate their windows and the front of the store. But I decorate all over. The cost is very little more, and it all adds to the effect. I found when I first started catering to the holiday trade that the feeble atempts at decoration I made did not warm up the store at all, and that people buying the goods did not seem happy and pleased with things all the way round. They bought the goods as solemnly as if they were buying a saw, and were not certain of the quality shown them. I then perceived that my store was too "cold" for the time of the year, so since then I have put plenty of time and trouble over the decorations and I find that the money is well spent. I have music going, and I encourage people to come in whether they intend to buy or not. "Come and bring the children, listen to the music, and see the pretty things displayed." That is what I say to them, and I tell you they come in from all parts. Decorate the store thoroughly and your trade will be stimulated."

Educate your customers to use the telephone during the rush season because it will eliminate to an extent staple purchasing and lessen the duties of the "extras."

THE BANK OF MONTREAL

Proceedings of the 93rd Annual Meeting of Shareholders.

The 93rd annual general meeting of the Shareholders of the Bank of Montreal was held yesterday at noon at the Board Room, at the bank's headquarters.

There were present: Messrs. D. Morrice, H. V. Meredith, C. R. Hosmer, James Ross, Sir William Macdonald, Sir Thomas Shaughnessy, Sir Edward Clouston, R. B. Angus, E. B. Greenshields, Hon. Robert Mackay, A. Baumgarten, E. Rawlings, C. J. Fleet, K.C., R. S. David, A. Piddington, John Patterson, W. A. Murray, H. Joseph, J. T. Ross, James Alexander, W. B. Blackader, William Stanway, William H. Evans, William Agnew, John Taylor, W. R. Miller, C. Meredith, C. Simpson Garland, G. F. C. Smith, C. J. Doherty, M.P., James Kirby, K.C., James Skeoch, Henry Dobell, M. S. Foley, C. H. Cahan, K.C., P. R. Gault, P. F. McCaffrey, Dr. Gardner, John P. Knight.

On motion of Mr. D. Morrice, the President, Mr. R. B. Angus, was requested to take the chair.

It was then moved by Mr. C. J. Fleet, K.C., seconded by Mr. A. Piddington, that Messrs. G. F. C. Smith and William Stanway be appointed to act as Scrutineers, and that Mr. James Aird be Secretary of the meeting. This was carried unanimously.

THE ANNUAL REPORT

Sir Edward Clouston, Bart., the General Manager of the Bank, was then called upon to read the annual report of the Directors to the Shareholders at their 93rd Annual General Meeting, held 5th December, 1910:

The Directors have pleasure in presenting the Report showing the result of the Bank's business for the year ended 31st October, 1910.

Balance of Profit and Loss Account, 31st October, 1909		$ 603,796 30
Profits for the year ended 31st October, 1910, after deducting charges of management, and making full provision for all bad and doubtful debts		1,797,992 81
		$2,401,789 11
Dividend 2½ per cent. paid 1st March, 1910	$360,000 00	
Dividend 2½ per cent. paid 1st June, 1910	360,000 00	
Dividend 2½ per cent. paid 1st Sept., 1910	360,000 00	
Dividend 2½ per cent. paid 1st Dec., 1910	360,000 00	
		1,440,000 00
Balance of Profit and Loss carried forward		$ 961,789 11

Since the last Annual Meeting Branches have been opened at Barton-Victoria Street (Hamilton), Penticton, B.C., High River, Alta., Perth, N.B., and Prince Rupert, B.C.

The Branches at Andover, N.B., and Warsaw, Ont., have been closed.

With deep regret the Directors have to record the death of their esteemed President, the Hon. Sir George A. Drummond, K.C.M.G., C.V.O., who had been a member of the Board for upwards of twenty-eight years. During that period he served as Vice-President for nineteen years and President for five years.

Mr. R. B. Angus was elected to succeed him as President, and the vacancy on the Board has been filled by the election of Mr. H. V. Meredith.

All the Offices of the Bank, including the Head Office, have been inspected during the year.

Bank of Montreal,
5th December, 1910.

R. B. ANGUS, President.

THE ANNUAL STATEMENT

The annual statement of the position of the Bank at 31st October was read as follows:—

Overdue debts not specially secured (loss provided for)	208,117 52	
		112,527,524 17
		$239,892,330 49

Bank of Montreal,
Montreal, 31st October, 1910.

E. S. CLOUSTON, General Manager.

THE PRESIDENT'S ADDRESS.

The President, Mr. R. B. Angus, then moved the adoption of the report, seconded by the vice-president, Sir Edward Clouston.

In moving the adoption of the report the president said :—

"With your permission, gentlemen, I move the adoption of the report just read.

"On this occasion we recall the fact that at last annual meeting of the shareholders the president was unable to attend, because of illness, which, unfortunately, and to the great regret of his colleagues, resulted in his demise on the 2nd of February last. Sir George Drummond occupied a most distinguished position in the business community; and the shareholders of this bank may well entertain a grateful appreciation of his services as president and of his work in the Senate, where his intelligent and patriotic efforts were largely devoted to the protection and development of the banking interests of the Dominion.

"To fill the vacancy created by the death of Sir George it was deemed advisable that I should, for a time, occupy the chair; and consequently I was elected to the presidency on the 22nd of July—while the directorate was at the same time strengthened by calling the Assistant General Manager, Mr. H. V Meredith, to a seat at the Board. The expansion of business in recent years vindicates the expediency of this latter arrangement.

"The period under review has been marked by almost unbroken prosperity. The bounteous crops harvested during preceding years had raised the expectations of our farmers and excited the attention of intending immigrants, and although the bright prospects of the present season were somewhat dimmed by the excessive drought of June and July, causing partial failure of the wheat crop in some districts of the West, the actual result has proved more favorable than was then anticipated. The latest estimate of the harvest from the Western grain fields, by parties well qualified to judge, gives a yield of

95 million bushels of wheat
128 million bushels of oats
25 million bushels of barley and flax

which under the conditions existing may be regarded as fairly satisfactory.

"We are naturally most interested in the outcome of the young and rapidly-growing country, for to it belongs the future. Still it may be long before it overtakes the productiveness and wealth of the older provinces, which in their undeveloped resources, timber, minerals and arable lands, afford abundant opportunities for expansion and settlement.

"On the first intimation of injury to the growing crops in the West the confidence of the eastern merchants and manufacturers was somewhat shaken, but the curtailment of business activity which followed was only temporary in its character and soon gave way before more hopeful indications. Business quickly revived and has continued good throughout the year.

"One notable feature may be remarked, that the Western people, farmers and settlers and tradesmen, shewed little sign of depression under the circumstances. The unusually dry season might serve as a warning to more careful tillage of the soil, but could not disturb the prevailing hopefulness and contentment. The agricultural results in

the eastern provinces of the Dominion were upon the whole quite gratifying.

"Immigration from Europe and the United States of America was on an extensive scale, no less than 300,000 to 350,000 being the estimated number of arrivals during the season, enriching the country by valuable contributions in property and money and still more by additions to the agricultural population. Such an unprecedented influx of new settlers to a comparatively small community, many of them experienced farmers, could not fail to have a stimulating effect upon all the commercial interests of the country. The extraordinary expenditures on railway construction and other public works also largely contributed to this result. The rapid growth of all industrial enterprises no less than the great and profitable expansion of agricultural operations, together with the opportunity of acquiring unoccupied land, render Canada a popular field for the employment of European capital. Important transfers of money to this country are of daily occurrence and especially from England, where political and financial unrest has induced many people to seek new avenues for investment.

"Contributions through the Stock Exchanges and money markets of Europe to the financial enterprises of Canada have been extremely generous of late and it is eminently desirable that the confidence thus displayed should not be abused. Some offerings have been made, it is feared by over sanguine promoters whose statements it would be hard to justify, and in relation to schemes where the advantages to buyers are not quite apparent. It might be well to consider that, while money seeking investment is much more abundant in some countries than it is with us, there is seldom much lack of capital here for participation in enterprises that are unquestionably sound. Our friends abroad might reflect that a home market, especially in the case of industrial securities, will generally furnish some indication of values.

"In the earnings of the railways, the output of factories and the large volume of commercial transactions there is evidence on every hand of widespread and almost universal prosperity throughout the land. The statement of the Bank's affairs now submitted shows that this institution has participated to a considerable extent in these advantages: the net profits have been fair, about the same as last year, and would have been more ample had not the Bank met an unfortunate complication through the error of an agent and the failure of a foreign bank. The earlier rumors concerning this matter were much exaggerated and to the best of our knowledge the ultimate loss has been fully provided for

"I leave the General Manager to comment upon the annual exhibit and the more technical aspects of the situation but may here state that the accounts, cash and securities of the bank have been examined and verified by the inspecting officers and by committees of the Board. The organization of the bank is believed to be in excellent condition, and, as is customary in this institution, the reserves have been maintained at a very high standard of safety.

"In reference to a question that has exercised the minds of some of our friends, who marvel that the bank premises account remains at the comparatively modest figure of $600,000 while the known expenditures under that head have of late years been unusually large; the fact is, as stated, the explanation being that the directors have been indisposed to burden their assets with any large item that could not be promptly converted into cash; and they have consequently charged directly against revenue the entire expenditure connected with the building, extension and maintenance of the bank's premises; these amounts have been considerable, owing to the necessity of opening branch offices in new settlements and enlarging facilities at important centres where business has outgrown the existing accommodation.

"The directors are, however, of opinion that the call for extraordinary outlays of this nature has almost passed and that such charges will hereafter cease or greatly diminish.

"It is unnecessary that I should attempt to give a specific account of the various industries of the country, but in reference to the more important natural products it may be noted that the lumber business has been fairly good in the east, and unusually active on the Pacific Coast. Exports to the United Kingdom have not been as large as in former years, but have been offset by the greater home demand.

"The wood pulp mills have found a good market for their product, notwithstanding adverse duties in the United States.

"There has been a wholesale falling off in the exports of produce from this port during the past season of navigation, owing partly to decreased production, and also largely to increased home consumption.

"A marked decline in the exports of live stock, which was observable during the last few years, and was probably to be accounted for by the requirements of new and expanding settlements and the home consumption of a growing population, seems now to be checked. It was natural to suppose that in view of our unequalled facilities for cattle raising the condition would only be temporary, and it is gratifying to find a change for the better has set in—the shipments, especially from the West, having largely increased.

"A true index to the rapidly increasing trade of the country may be found in the combined imports and exports of the past fiscal year, which amounted to the big total of $693,211,221, as compared with $571,268,767, showing an increase of $121,945,454 over the previous year.

It is to be noted, however, that the excess of imports over exports is increasing; the government revenues are buoyant, but Canada's borrowings from Europe are very large, and will doubtless continue so, while expenditures for railway building, the improvement of navigation and for the legitimate needs of growing municipalities are maintained on the present extensive scale.

With regard to trade, the wholesale dry goods houses report that business during the past year has been exceedingly good, and payments have shown a fair average, while failures have been rare. The same remark applies to groceries, iron and hardware trade, leather, boots and shoes, and other branches.

"I am aware these are but running comments, and to give any adequate description of the season's results would call for a review from the Atlantic to the Pacific. With our partial shortage of crop in the Western Provinces, we have one reassuring view exemplified this season, namely, that with the newly developed territories, the field is now so extensive that what affects one part of the country adversely or otherwise, is unlikely to induce similar conditions elsewhere. Even the visitation of the drought was by no means uniform. The weather was so capricious that the injury from that source occurred in widely separated spots, and the result of the harvest, although less than anticipated, was yet immense, considering the small population which has to share its benefits.

"We are, therefore, safe in saying that the country as a whole has undoubtedly experienced a fair degree of prosperity throughout the year, and no doubt need be entertained as to its continued and rapid growth in wealth and population; if, however, we are to realize our best expectations, we must carefully avoid undue inflation. In some districts there has been excessive speculation in town and village properties, but the movement already shows signs of languishing, while farm and fruit lands maintain their value or steadily appreciate.

"Money has been very abundant throughout the year, and from a lender's point of view the rates of interest, except for a brief period, have been abnormally low, thus rendering it difficult to employ our surplus funds to advantage in London or New York, where short or call loans are readily available. But this department of the subject will be left to the General Manager, Sir Edward Clouston, who seconds the adoption of the report."

The conclusion of the President's address was greeted with applause by the meeting.

SIR EDWARD CLOUSTON.

In seconding the adoption of the report, Sir Edward Clouston said:—

"In my address last year I made the remark that I should be very much disappointed if we did not make a better showing of profits during the year we have just passed through, and, though I did not say it, I had in my mind that I might be able to suggest to the directors that it was time to do something for our shareholders in the way of a bonus. Unfortunately my anticipations were not realized. Our profits show $28,000.00 less than last year.

"The general statement, as you see by the copies you hold in your hands, is a strong one, and exhibits the steady progress the Bank is maving. For the first time in our history our circulation exceeds our capital, and we were obliged to make use of the emergency circulation authorized by the Government.

"Our deposits have increased $18,000,000, but this does not fairly show the actual increase in our regular deposits, as last year we had some large special deposits which were withdrawn during the year. Our readily realizable assets, that is our reserves, are about the same, though they show a slight decrease in percentage to our liabilities. The amount of money employed outside of Canada has been reduced $14,000,000. Fault has been found with us by critics who have not given sufficient consideration to the subject for keeping such large balances in other countries, but experience has taught us that it is not on-

ly safer for the Bank but for Canada, that we should hold large reserves which we can draw on in case of necessity without disturbing financial conditions in our own country. The important position of the Bank of Montreal in the financial fabric involves the keeping of a large portion of our assets in a form immediately available for conversion into cash. Our responsibilities in this respect force us to be content with a very low return on the money we lend on call in London and New York, a return, which for long periods during the past year was little better than 2 per cent. at either centre, and taxes to come out hf that. It is not to be supposed that we would ignore the superior advantages of a 5 per cent. call rate in Canada, could we employ $10,000,000 or $20,000,000 here, with the certainty that we could get it back on three hours' notice any day we wanted it.

Of the increase in our investments, $5,000,000 is accounted for by the purchase of a municipal issue which has been largely disposed of since the close of the statement.

"Our loans and advances have increased $21,000,000, and call for no special comment, except that they evidence that we are doing our share in assisting the development of our rapidly growing country.

"The present session of parliament will see introduced legislation of importance to bankers, as our charters come up for the usual decennial renewal. Though the Bankers' Association has not been taken into the confidence of the government about any proposed alterations or amendments, I think it hardly likely that there will be any great change. The Act is a very good one as it stands, is thought well of by financial authorities in other countries, and answers admirably the requirements of our own. When trouble arises it is apt to be condemned by unthinking critics, but it is not the fault of the Act but of those who work under it, and no amount of legislation will guard against the fallibility of the personal factor and keep men from being fools or knaves.

"The President has spoken on the general trade of the country, which may be characterized as satisfactory, with a promising outlook. There is possibly too much real estate speculation in some sections of the country, and municipalities are borrowing rather heavily; the greater part of it, however, is quite legitimate, arising from the rapid growth of the newer cities and towns throughout the west.

To them flows the ever increasing tide of our immigration, which, from the best figures at present available, will this year number over 300,000 souls. The quality of this immigration is admittedly high, and when one considers that it represents in a single year about 1-20 of the country's population, it is well that it is so. To this influx of population, as well as to the greatly increased prosperity of the people, is probably due the fact that while our production of such food-stuffs as butter, eggs, cheese, etc., has increased during the present twelve-month, the exports of these products have declined, indicating a large home consumption.

"As regards the general prospect, in the older countries there seem to be at least enough pessimists to counterbalance the optimists. In Canada we have many of the latter, and few of the former—too few, perhaps, at times, to sufficiently regulate our youthful exuberance. It might be well to remember that the prosperity we have enjoyed may be largely due to a continuity of policy and a disposition to employ experience rather than theory as the basis for the conduct of our affairs. Such principles have made us self-reliant, and seem best calculated to ensure our future progress and permanent stability." (Applause.)

After the usual resolutions of thanks were passed, the retiring Board of Directors were re-elected as follows:

Messrs:—R. B. Angus, A. Baumgarten, Sir Edward Clouston, Bart, E. B. Greenshields, C. R. Hosmer, Sir William C. Macdonald, Hon. Robert Mackay, H. V. Meredith, D. Morrice, James Ross, Sir Thos. Shaughnessy, K.C.V.O., Rt. Hon. Lord Strathcona and Mount Royal, G.C.M.G., G.C.V.O.

OFFICERS ELECTED.

At a meeting of the Directors held later the Right Honorable Lord Strathcona and Mount Royal, G. C. M. G., G.C.V.O., was elected Honorary President of the Bank, Mr. R. B. Angus President, and Sir Edward Clouston, Bart., Vice-President.

THE GIVING OF CALENDARS.

"Will I give calendars this year?" is a question every hardware man asks himself each fall. It is impossible to make a set rule, or to establish a positive case either for or against calendars. The advisability of giving holiday greetings depends on circumstances, such as the business done by the firm, and the local conditions.

To the merchant newly starting in business, it is often a great aid in working up a connection. A pretty calendar, addressed to the head of each house, is undoubtedly a means of creating a favorable disposition towards the new firm. The calendar hangs in a prominnet place in the house for perhaps the whole ensuing year, and the name of the merchant becomes a familiar one through that means. The calendar, as an advertising medium, is limited to that; it exploits the name of the merchant, but does not advertise his store, his stock or his methods. For this reason, some merchants who are old established do not see the necessity of using calendars. "We have been in business for years, and are known to every householder anyway," said one dealer recently. "We do not have to put calendars in the houses to make people know we are in the business. Instead, we spend the money on a little extra advertising of what we have in stock. We leave calendars to the younger merchant."

Every Other Year.

The following plan has been adopted by a Western Ontario store after careful study of the situation. "We give calendars every other year," said the head of this firm. "This season we are spending $60 on calendars, and next year will put a similar amount into extra advertising. We are old established, and do not need to work up a connection by means of calendars, but we consider it a good policy to not give them up entirely. A greeting every other year lets our customers see that we have not forgotten them."

There can be no doubt, however, that the money spent on calendars could very profitably be employed in other forms of advertising. It is a question that every merchant must decide for himself after a study of local conditions and the state of his own business.

ARE LIBRARY COUPONS LEGAL?

Steps are about to be taken to test the legality of the coupon system described in Hardware and Metal of Nov. 12, as in operation at Newmarket, and which has been tried at Ingersoll, Burlington and other places. G. A. Binns, Newmarket, who is using the coupons, says the scheme is working satisfactorily in that town.

The plan is something similar to the trading stamp idea of former days. The merchant buys a number of coupons, which he distributes to customers with purchases of a certain amount. The purchasers use these coupons as ballots, casting them in favor of some local institution. The promoters of the scheme offer a library of a certain number of books to the church, or other institution which receives the most ballots at the end of a certain time. The aggregate sum paid by the merchants is $250, and just what the value of the library may be, is not stated.

The scheme was declared contrary to law by the town solicitor of Ingersoll. E. M. Trowern, Dominion secretary of the Retail Merchants' Association, also declares that it is illegal. Other parties who have considered the question do not agree with these statements. Steps are, therefore, being taken to test the legality of this method of presenting libraries to public institutions at the expense of the local merchants.

WEEKLY MEETINGS WITH CLERKS

There is no retail store in the country that cannot afford one half-hour each week to a discussion of store subjects and to instruction to the entire sales force. Such a period of discussion and instruction will bring out the latent qualities in many clerks and will impress into all of them the fact that to sell goods is more than to be able to know what is on hand and offer it to the customer who asks for it. Not only can the force of clerks understand by such common meetings that instruction is not individual, but for the common use of all, and thereby avoid a misunderstanding, but also the power of team work that can be infused into the understanding of the whole force. To raise the power of the selling force of the store is one of the necessities of store keeping now.—Southern Merchant.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

Rates: 2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion when box number is required.

ARTICLES FOR SALE

CASH REGISTER—Stylish nickel plated detail adder. Registers one cent to twenty dollars. 5 year guarantee. For quick sale, $50.00. Particulars R. O. Smith Co., Orillia, Ontario. (51)

FOR SALE—1 Dey Time Recorder, 100 hands, in first-class order. Just the thing for hardware shop or small factory. Reason for selling, not large enough to handle force. For full particulars apply to—The National Manufacturing Company, Limited, Ottawa, Ontario. (51)

BUSINESS CHANCES

FOR SALE—Good hardware and tinsmithing business in good section of country. Stock about $4,000. Good reasons for selling. For particulars apply Box 1060, HARDWARE AND METAL, Toronto. (51)

FOR SALE—An established retail hardware and furniture business in a live town in a prosperous community on the C.P.R. in southern Saskatchewan. Present owners going into the banking business. Reason for selling. Address Box 1054, HARDWARE AND METAL, Toronto. (52)

FOR SALE—Retail hardware business, established 20 years ago by Geo. B. Morris and conducted by the present owners for the last 4 years. In connection with the winding up of the existing partnership, the business is offered as a going concern. Correspondence invited. McMillan Bros., Guelph. (25tf)

HARDWARE FOR SALE—Stock $4,000, doing good profitable business. Stock in good shape. Western Ontario. Worth investigating. Box 1053, HARDWARE AND METAL, Toronto. (52)

TO RENT—A handsome new building in Brantford's business centre, two large modern stores, well lighted, high ceilings, easy terms. Apply UNION REALTY CO., Brantford. (52)

WANTED—A man with a $5,000 to $10,000 hardware stock and $10,000 cash to take up a first-class hardware proposition in the West. Address Box 549, Edmonton. (55)

COMMISSION LINES WANTED

WANTED by responsible, energetic firm about to open an agency in Calgary, lines on commission, or will buy outright if necessary. Address Room 37 Herald Block, Calgary, Alberta. (55)

SITUATIONS VACANT

WANTED Hardware clerk. Must be good stockkeeper and able to dress windows. State experience age and salary expected. Box 1059, HARDWARE AND METAL, Toronto. (51)

WANTED—A practical salesman, capable of taking charge of sales department. Must be posted in lantern and burner trade. Full particulars to Box 1058, HARDWARE AND METAL, Toronto. (51)

SITUATIONS WANTED

HARDWARE SALESMAN AND MANAGER, 15 years' experience in Maritime Provinces, wants position as manager or representative for St. John territory. B at references. Box 1057, HARDWARE AND METAL, Toronto. (51)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 814, Stair Building, Toronto.

MISCELLANEOUS

AT LAST—A really practical pencil sharpener. The "Spiro" sharpener, built on a new principle, positively does not break the lead. Ten blades. Sharpener lasts a lifetime. Every pencil user needs one. Your pencil sharp in a second. Ask your stationer or write us direct. A. R. MacDougall & Co., Canadian Agents, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

BY paying a small amount each month you can buy a first-class rebuilt Typewriter from us at bargain prices. Stock-taking is only a month away. We do not want to carry any of these machines over. We can give you any make. THE MONARCH TYPEWRITER COMPANY, LIMITED. 98 King Street West, Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson-Crain, Ltd., Toronto and Ottawa. (tf)

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited. Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE—By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

ERRORS AVOIDED, LABOR SAVED Using the Shouperior Autographic Register. Three copies issued at one writing. 1st, Invoice; 2nd, Delivery Ticket; 3rd, Charge Sheet, perforated for filing. No handling of carbons. High grade printing and neat invoices. Make full inquiry. Autographic Register Co., 191-193-195 Dorchester St. E., Montreal. (tf)

INDISPENSABLE in office, store, home—Canadian Almanac, 1911—a National Directory. Complete classified information on every subject of Dominion interest. Full Postage, Customs, Banking, Insurance, Legal, Educational, Newspaper, Army, Clerical, Governmental, Particulars of leading institutions and societies, Paper cover, 60c; Cloth, Leather Back, 75c, All stationers, or sent postpaid on receipt of price by The Copp-Clark Co., Ltd., Toronto.

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

GET THE BUSINESS; INCREASE SALES—Use Multigraph Typewritten Letters. Three thousand per hour produced on Multigraph. The Multigraph does every form of printing. Saves 25 p.c. to 75 p.c. of printing bills. Multigraph Office Forms, Letterheads, Circular Letters. Write us. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

IF you have been afflicted with one of those Fountain Pens that won't write when you want it to, or leaks when you don't want it to, give it to one of your poor relations and buy a Moore Non-Leakable Fountain Pen and you will be happy. Consult your stationer. W. J. Gage & Company, Toronto, Sole Agents for Canada.

KAY'S FURNITURE CATALOGUE No. 306 contains 160 pages of fine half-tone engravings of newest designs in carpets, rugs, furniture, draperies, wall papers and pottery, with cash prices Write for a copy—it's free. John Kay Co., Ltd., 36 King St. West, Toronto.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

THE METAL REQUIRED in a modern concrete building. Special facilities enable us to produce at minimum cost Concrete Reinforcements, Fenestra Steel Sash, Automatic Fire Shutters and Steelcrete Metal Lath. Complete stock; quick delivery. Before deciding write for catalogue and prices. Expanded Metal and Fireproofing Co., Ltd., Fraser Ave., Toronto.

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

YOU DON'T BUY a National Cash Register—it pays for itself. Saves money. Prevents mistakes. We can prove it. National Cash Register Co., 285 Yonge St., Toronto.

PARTNER WANTED

PARTNER WANTED—With $3,000 cash, in hardware business. Have an up-to-date and well assorted stock of hardware and do all plumbing work in good live town of 900 population. Apply immediately to Box 1049, HARDWARE AND METAL, Toronto. (51)

PERIODICAL DEPT.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading, BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS AND PAPER HANGERS—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paper hanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. No. 39

A REFERENCE BOOK.

"These are the days when I get busy with my recording book," said a merchant to the writer. "It is astonishing what valuable hints can be learned by keeping one's eyes open, especially at rush times, and instead of trusting to the memory putting things down in a book for future remembrance. This is not only true in general lines of hardware but in paints as well. Last year, just before Christmas, I was asked for more handy sized tins of varnish than I had in stock, and I carefully jotted the fact down, with the additional reference to push this line next time. The result is that this year I made a special feature of varnish and similar lines for brightening-up purposes and am doing a splendid trade. Now I am on the look out for any special trend of color, or size, or specialty, and in fact anything that is being prominently asked for, and down it all goes in my book."

The example of this merchant should be followed. The memory is treacherous. There is little use in remembering anything after the occasion has gone by. It is the rush times that bring out the largest numbers of "things that could have been done differently," among these may be included the delivery; handling large numbers of people in the store; dealing with last minute orders; and keeping the stock from getting completely out of order.

If the merchant tries any innovation he should keep careful watch upon it and advise his clerks to do the same thing, the results being jotted down. For instance, some new way of handling paint advertising may have been tried, or an innovation in the distribution, in the hanging of the posters, and in the style of the newspaper copy for Christmas specialties. The results from this should be carefully noted, so that if success has been achieved the plans can be adopted again next year, or if the experiment has been a failure then a careful avoidance in the future.

The closer watch a merchant keeps upon the various ramifications of his business the better able is he to develop things along the best lines. This will be found in the strict following up of probable paint users, in the keeping of the stock, and in the buying. One difficulty, where a large assorted stock is kept, is to prevent any sudden shortage in a particular shade or size. There is nothing more irritating to a customer, or more harmful to a store, then, when after a sale has been practically made

Sales with Profit.

To build up "come again" trade, opaque easily-applied "Floorglaze" works wonders. It is hard, high-finish and does good work inside or outside the house. Ten good colors for the dealer's stock.

M L Floorglaze

helps hold the women's trade—make profits.

Try it yourself, Mr. Dealer, on a test strip. Sample tin free on request. Then you'll know how good an article you're selling your customers.

"M.R.M." Horse Nails

Blacksmiths to-day demand Horse Nails of reliable quality.

"M.R.M." Horse Nails meet this demand, being made from Swedish soft steel rods by the new cold process, possessing great holding and driving qualities.

Hardware dealers can make a good profit by stocking this popular brand of Horse Nails.

THE MONTREAL ROLLING MILLS CO.
MONTREAL

the clerk suddenly finds that owing to a run on that particular color, there is none left in stock. The merchant has probably been pushing varnish for brightening up at Christmas and started with a good stock of pint tins. There has been a good demand in consequence and before the clerks are really aware of the fact all these size tins are sold. In the hurry of the Christmas trade the fact is not noticed and then next day a clerk persuades a customer to buy a tin only to find that there is none in stock. One merchant overcomes this by sorting up twice a week, and by keeping a book which is looked at every night, for recording facts about the stock. For instance, a clerk in going to the varnish tins, notices that there are but a few pint sizes left, say three. Instead of saying to himself "I must tell the boss about this" and then forgetting it over the next order, he writes down the fact and then the merchant, in the evening, sees the reminder of the clerk. If he has not time to order any more he can inform all his clerks that the stock is short and thus prevent the sale of a pint tin of varnish when there is none left in the store. A recording book is easy to keep and it saves much ground for complaint.

PAINT AND OIL MARKETS

MONTREAL.

Montreal Dec. 16.—Trade has naturally slackened off, although steady sorting up business is noticed. Good orders are coming in for spring shipment, however, and there is every prospect as things are now going for a fine demand next year. All the way round stocks are on the light side, and travelers speak confidently of the business they see in sight.

The markets are generally firm, and although one or two slight fluctuations on the advancing side are noticed generally prices can be considered unchanged. The linseed situation is the same; some houses holding to the cut noticed last week, but others maintaining old prices. The tension is just as severe as it was, in fact it looks to be getting worse. Turpentine offers no change, and prices are firm.

Turpentine.—Prices are unaltered this week. The demand is not so active as it was but the primary markets keep figures firm. Supplies are in fair shape We quote $1.02 to $1.05.

Linseed Oil.—Jobbers who marked down the price last week are maintaining their position, but anticipate going back to old figures, but others are maintaining former quotations, and if anything, showing a tendency to advance. There is no desire to sell oil, and the market is as barren of supplies as ever. Up to now there has been little evidence as to any turn in the tide, and grinders are still face to face with a scarcity of seed. The demand is quiet, but there is still a fair quantity going out for immediate shipment. We quote $1.06 to $1.10 for raw and $1.09 to $1.13 for boiled.

White Lead.—The market is on the firm side, with the new prices generally observed. Trade is quiet, but some good booking is being done for the opening of navigation. It is evidently the opinion of many that prices will rule higher next year. We quote $6 for small lots and $5.85 for large.

Varnish.—There is a fair call for orange and white shellac. Hard oil finish is moving, also varnish for coaches, implements, and for household uses. The market is firm.

Putty.—The call for putty is quiet. Fair orders are being booked for next year. The market is firm, and we quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Toronto, Dec. 16.—There is not a very heavy demand at present for any lines. The Christmas trade is now monopolizing the attention of the trade, and the supply houses are experiencing a quiet spell which will last until the first of the year. Some travellers are still out on the road, but the majority have come in for the holiday season. What orders are received are almost entirely of the sorting up variety, but some fair sized orders for delivery next year have been placed.

Local commission agents have received orders not to quote prices on linseed oil for spring delivery. Just what this presages is impossible to say, but a change in prices is not unexpected. There is a tendency toward easier quotations on linseed oil at present. One local supply house made a reduction of 2 cents this week, but the majority are holding up the previous figure.

The new price catalogues which will be out in some cases by the first of the year, are being awaited with interest, but no material changes are anticipated.

Linseed Oil.—The demand is quite nominal at present, and no stimulation is anticipated until after the holiday season. Enquiries are being received, however, and indications point to a brisk rally beginning with the first of the year. Prices are tending downward, although no general reduction has yet gone into force. One local firm, which has been quoting rather lower than the prevailing prices for some time, has made a drop of 2 cents, and is asking $1.06 and $1.09. Other houses are still asking $1.10 and $1.12 for raw, and $1.13 and $1.15 for boiled, the lower quotation in each case being for ten barrel orders.

Turpentine.—The turpentine situation shows a better tone all around. Reports

FIT THE HAND COMFORTABLY

THE OLD STYLE

Dandy Brushes have many good points, but if you want perfection itself it can only be found in

BOECKH'S
"Handy Dandy" Brushes

The design is the result of careful study on the part of the experts in the largest Brush Factory in Canada. Recommend them to your customers—they are sure to be well pleased with them.

The Boeckh Bros. Company, Ltd., TORONTO, CANADA

The Big "P" Stands for Paint, the Little "p" Stands for Profit.

and the comparative size of the two letters illustrates the relative value of *paint* and *profit* to your business, Mr. Dealer.

The paint you sell is of vastly more importance to your success than the profit you make on it. Profit at the loss of trade soon kills any business — there must be big value and satisfaction in every sale.

It is quality your customer wants — and you will never be able to make a profit on paint, after the first sale, if the quality of that paint will not bring the buyer back. Single sales never built up a worth-while paint business — it is the repeats that put profit in your pocket.

MARTIN-SENOUR PAINT — the entire line of paints for every purpose — are the paints that bring the buyers back, and their friends and neighbors. Good profits, too. So what is the use of wasting time with inferior paints.

Write today for the agency, and begin to get the profit from the paint that repeats.

THE MARTIN-SENOUR CO., Limited
Montreal — Pioneers Pure Paint — Chicago

The Winnipeg Paint & Glass Co., Ltd. WINNIPEG

The Maritime Paint & Varnish Co. Ltd. HALIFAX, N. S.

from the south are more encouraging, with respect to supply, and there is a fair amount being shipped out. Locally the demand is light, and the accepted quotation stands at $1.05.

White Lead.—There is a very slim demand for white lead. The higher prices fixed a fortnight ago are being steadily maintained, and quotations range from $6 to $6.25.

Putty.—There is, perhaps, more activity in putty than in any other line on the market. The demand is heavy, and the orders that come in are for fairly large bulk. Standard quotations stand: Bulk in casks, $2.20; in 100-lb. drums, $2.55; in 25-lb. drums, $2.65; bladder in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.00.

Rosin.—The rosin trade is about on a par with the rest of the market; "G" rosin sells at $3.25 per 100-lbs.

Petroleum.—Activity is the pronounced feature of the petroleum situation. The setting in of severe winter weather has quickened the demand for oil, and all lines are moving rapidly. Prices remain steady; Canadian prime white coal oil, 13c; American water white, 14½c; Pratt's Astral, 17c.

Glass.—There is a brisk demand, although the last few weeks has seen some falling off. Reports from Europe indicate that there will be higher prices before spring, but. for the present, no change has been made in the price.

A GOOD LOOKING STORE.

One of the greatest drawbacks a paint dealer can have is a poorly painted front to his store, and the next is the inside woodwork "crying" for paint. It takes a big store front these days to require a gallon of paint, and the usual sized front can be covered with half a gallon, because there is so little woodwork. Therefore, as far as expense is concerned, a paint dealer can easily repaint every fall or spring, and this would largely be a "drawing card." Certainly it would not displease any one, or prove a repeller of trade.

PERSONAL SOLICITATION.

Retail hardware merchants who handle paints are successful in proportion to the amount of energy and push that they put into this line. A well assorted stock, intelligent advertising, both by personal solicitation and newspaper publicity, a knowledge of and faith in the goods carried, and prompt deliveries, are some of the requisites necessary to make the paint department pay.

An Illinois hardware firm writes that while they only added paint to their stock last year they have found it a very profitable business A good supply of free samples for distribution is always kept in the front part of the store, which is regarded as having brought business

The most effective method, however, has been found in sending the names of prospective buyers to the manufacturers and have them write these prospects concerning their paints and referring them to the concern as their agent.

A personal acquaintance with every paint contractor in the town has resulted in a very satisfactory business, by simply keeping after them until they agree to try the paint handled by the firm.—Iron-Age Hardware.

DEAL NOT YET COMPLETED.

The reported transfer of ownership of the Crossen Car Company, Cobourg, referred to in Hardware and Metal Dec. 3, has not yet taken place and W. W. Near, president of the Ontario Iron and Steel Company, Welland, makes the emphatic staement that his company is not in any way concerned in such a deal with the Crossen or Canada car companies.

According to information received from a man closely connected with the Crossen Car Company, negotiations are pending for the transfer of the company but the absence in England of the chief promoter will delay the completion of the deal for a month or six weeks. "So far as I can tell," he said, "it is not intended to merge the Crossen into the Canada Car Company, but there is no telling what may happen before the deal is completed."

N. Curry, president of the Canada Car Company, Montreal, adds his denial to that of Mr. Near to the statement that the Canada Car and Ontario Iron and Steel Companies are to establish a community of interests by an exchange of stock, the latter establishing a blast furnace at Welland and the former contracting for its raw material with the Welland furnace.

Further developments in the car company negotiations will be watched with interest.

CORRECT FALSE REPORTS.

The Standard Arms Co., Wilmington, Del., takes exception to untrue statements that have appeared in American daily papers with reference to their action in reducing their manufacturing staff. The company worked night and day shifts until the first of November, when, in common with other firearms manufacturers, they reduced their force. The game shooting season being over then, as far as the jobbers and dealers were concerned, it was deemed wise to run light until the time came for more energetic operation.

A Texan Paint Creed.

The paint creed of a successful house in Texas is briefly as follows:

Make a leader of staples at close margins and push fancy goods at a profit.

Don't buy in too large quantities.

Watch your stock closely.

Keep what the trade requires.

Putty Versus Pudding

A Chinaman seeing some bladders of Putty in a window thought they were Christmas Plum Puddings. He purchased one. In a few days "Chu Chu" returned and said: "Puddin' Fillee Upee Tooee Muchee. Plefer Chopey Suey. Savee?"

The Canada Paint Company's Putty is an excellent "filler"—Fills up Cracks, Seams, Crevices, Nail-Holes, Knot-Holes, and, above all is an excellent GLAZING PUTTY. 25-lb. irons or 100-lb. drums should be ordered in preference to Bladders.

The Canada Paint Company is the only Company in Canada who run their mills direct by power supplied by the River St. Lawrence, supplemented by steam and electricity.

THE CANADA PAINT COMPANY

LIMITED

Mixed Paints

It is astonishing to what an extent the mixed paint trade has grown in Canada, in fact throughout the world. This is due very much to the help of the agents in the many stores throughout the country, keeping always in stock a first-class brand of pure paints.

Are you doing it?

Doing what?

Keeping a first-class brand! Let us send you some of the cards and catalogues about

Ramsay's Paints

the pioneer liquid paints of Canada. Then when the time comes to buy for your big 1911 trade you will be ready. Don't put it off and keep going along the same old way. Learn about the leader, and get ready for a stock. .Remember 1911 will be big with possibilities for the pusher of pure goods.

STAR HACK SAW BLADES

Apparently no one questions the superiority of Star Hack Saw Blades and at our present figures there is absolutely no room to question the price.

They are equally good in hand frames or power machines. When used in a machine the feed should be adjusted to suit the stock being cut. The softer the stock the lighter the feed. Such treatment will prevent clogging of the teeth. Open your eyes wide and look at this list of prices:

6	7	8	9	10	11	12	inch
30	32	34	38	42	46	52	cents per dozen.

Notwithstanding the great reduction in prices, the quality of Star Blades has been improved.

Do You Know the Main Facts About Our Two-Coat Combination Standard Turpentine Shellac and G. P. Hard Oil Finish?

Send for our sample on wood and judge for yourself.

Note particularly the remarkable *surfacing* and *holding up* or supporting properties of *Standard Turpentine Shellac.* It dries semi-flat, does not raise the grain of the wood and requires little or no sandpapering.

A single coat of our *G. P. Hard Oil Finish,* on account of its intrinsic body, produces over *Standard Turpentine Shellac* a really remarkable finish, as demonstrated in our *Two-Coat Combination.*

For first coating open grained woods, also paste filled woods, nothing equals *Standard Turpentine Shellac.*

All Standard Varnish Products are manufactured by International Varnish Co., and sold only in Full Imperial Measure Cans.

Amatite ROOFING

It has a rough surface of *real mineral matter* on the weather side. It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a coat of paint.

To paint Amatite would be a waste of time and trouble. Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof*.

No paint is good enough to make a durable roof; a thick layer of pitch, faced with a real mineral surface, is far better — *and that means Amatite.*

Further information will be sent on request to nearest office.

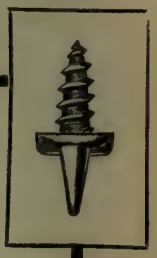
"ROSS" RIFLE REASONING

The "Ross" Sporting Rifle is cheaper than any imported rifle of equal quality. What sense is there paying the extra duty for another rifle, certainly no better and probably not so good as the "Ross" Rifle?

Dealers who can make this clear to their customers make more sales and help their customers to economize.

The fact that sales increased **80% last year** shows that dealers are wide awake to the advantages of selling the Canadian Arm.



If your stock is low, increase it. If you are not handling them take a leaf from the other dealers' book and order now.

$25.00 and Upwards.

Ready for Business

Wait for Our Travellers ---
And the Minerva Proposition

We feel that no special introduction is necessary for Minerva Paints and Varnishes, which, since being put on the market in 1834 (76 years ago) have attained world-wide reputation.

Our success has been achieved by supplying honest goods at honest prices, and our faith in the prosperity of Canada prompted the establishment of our Canadian factory, which is efficient in management and completely equipped with the most modern machinery and facilities to maintain the high standards of quality in Minerva Paints, Enamels, Varnishes and Paint Specialties for all classes of trade.

The superior quality of Minerva Paints and Varnishes is evidenced by the fact that the BRITISH ADMIRALTY, the largest steamship and railroad companies in the world, also the largest and most prominent decorators, are constant users of these goods, which are always marketed in NET WEIGHT AND FULL IMPERIAL MEASURE PACKAGES.

Superior quality in Paints and Varnishes is not all that we are offering to the trade, but the most complete co-operative proposition ever devised for stimulating sales is extended to you. Our salesmen are now on the road, and it will pay you to investigate the Minerva Proposition before placing your order. Write for full information; a post card will bring it.

Minerva Brand Always Signifies Superior Quality.

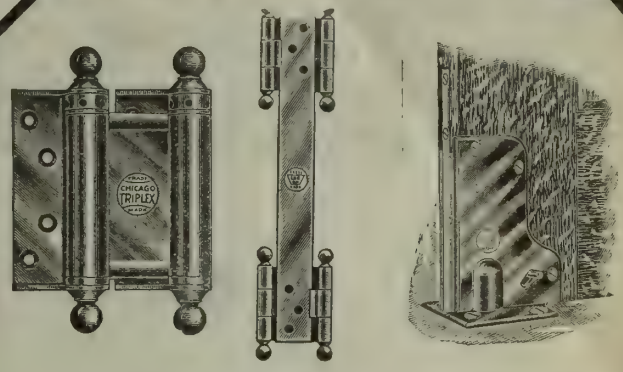
A New Ankle Support

that will help you sell more skates

"PERFECTION"
Steel Ankle Support

The Perfection Support is made of light strong steel with a sliding hinge attachment that permits the wearer's ankle to move forward or backward, but never sideways. It is, therefore, of enormous assistance to beginners, and a great help even to experienced skaters. They are easily attached and the ladies' size is suitable for children.



The Perfection is a brand new idea, but during the short time it has been on the market it has enjoyed an enormous sale.

As the skating season is just beginning send along your enquiry to-day.

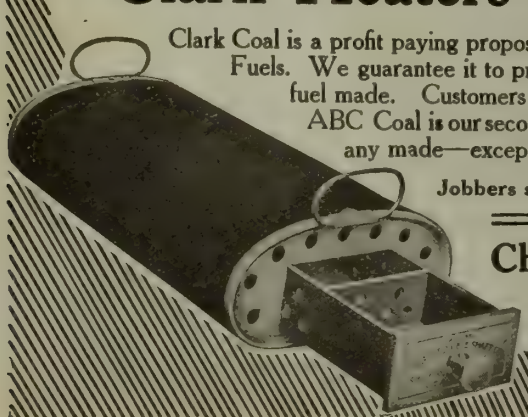
Products That Sell In The Winter



Liberal Advertising all the time makes Clark Products the Dealers' Line

Get ready for winter, before winter gets ready for you. Right now is the time to prepare for the demand—before the demand arises. No use in waiting until you have to turn customers away. Get ready **NOW.**

The demand for Clark Heaters is beginning. In every carriage, wagon, sleigh and automobile is a place for a Clark Heater.

The public will naturally ask for "Clark's," because they are made from best materials, have no soldered joints, no screws to get loose. Every joint is solidly riveted.

Clark Heaters and Clark Coal

Clark Coal is a profit paying proposition. Unquestionably the King of Heater Fuels. We guarantee it to produce 25 per cent more heat than any other fuel made. Customers **buy** this coal—guarantee or no guarantee. ABC Coal is our second grade fuel. Guaranteed to be the equal of any made—excepting our Clark Coal. Prices are interesting.

Jobbers sell these—or write for 1910-1911 Catalog.

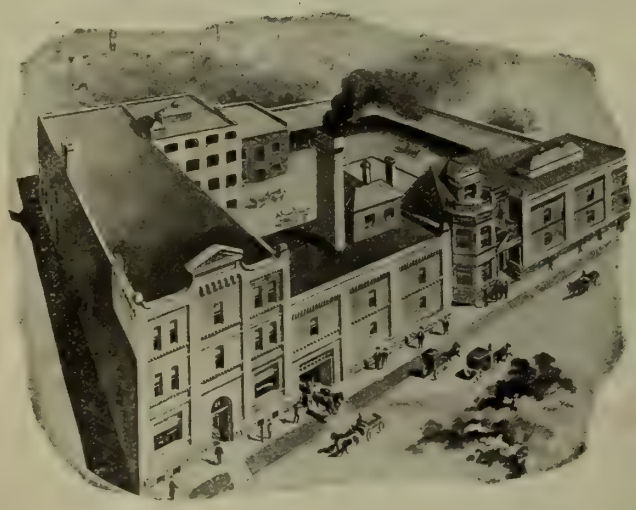
It is Easy To Sell The Tobin Gun

Tobin Simplex Guns

Its fine finish and simple, complete construction give it first place.

Every Tobin Gun is built to sell another. Introduce it to your customers. We guarantee every gun we make to be not only perfect in workmanship, but to suit the customer's idea of what a gun should be.

The patents we control enable us to make a gun simple in construction, and, while not departing radically from what is recognized to be essential in the hammerless type of gun, it possesses new and exclusive features.



The material from which the Tobin Gun is made is the very best obtainable. Both the exposed and hidden parts of the gun are fashioned with the utmost care, which makes the Tobin Gun not only a good gun, but also a good-looking gun.

Made in Canada

Maxwell's Latest is the "Champion High Speed Washer." This machine differs from the famous "Puritan" only in the driving mechanism. The

Champion High-Speed Washer

is run, as the illustration shows, by a lever. This lever also starts the balance wheel, which revolves four times for every stroke. The great momentum of this balance wheel helps to turn the dolly block and makes the "Champion" run very smoothly and easily.

It is sure to be a splendid seller.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, munufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Roof Reasons

One reason dealers sell Genasco Ready Roofing so easily and find it so profitable, is because its quality backs up all their selling-arguments.

Another reason is : Our persistent campaign of national advertising is continually convincing consumers and making them "RIPE" for the dealer's touch. But the biggest reason is:

Genasco
Ready Roofing

is made of genuine Trinidad Lake asphalt, and it resists and lasts longer than any other ready roofing.

It pays your customer and makes repeat-orders. And that's the reason it is bound to pay you.

Write for full information and samples.

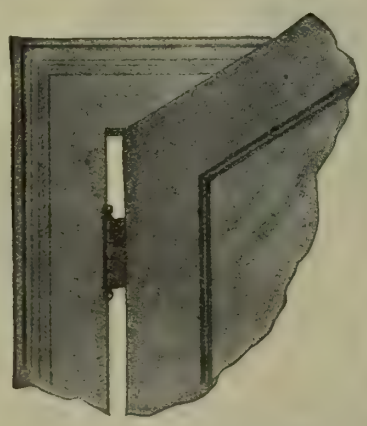
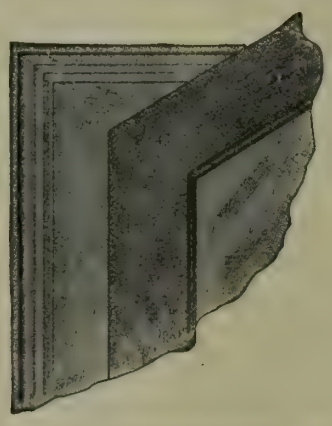
Corner King Street and Spadina Avenue



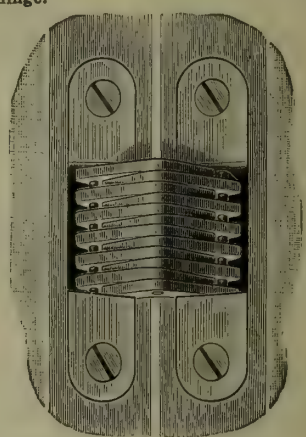
Toronto

Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto



PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.

COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years.



The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge.

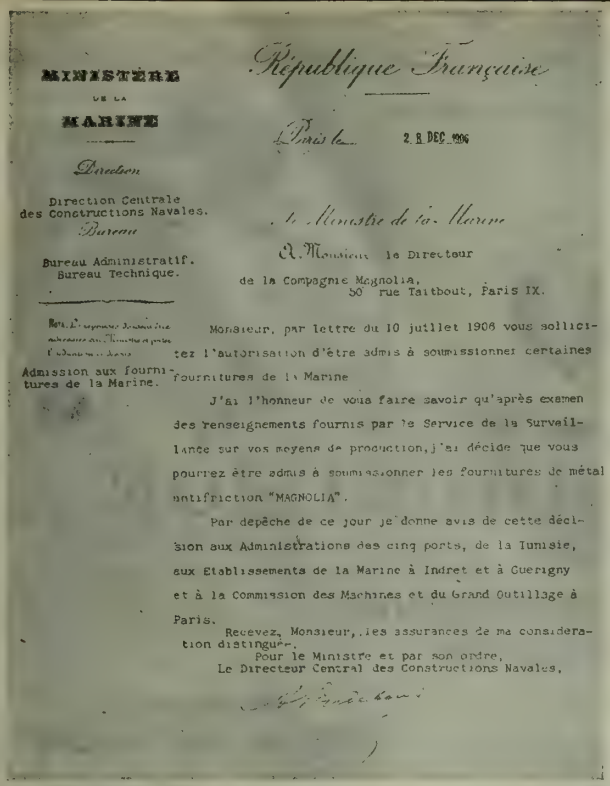
Invisible Hinge as it appears when door is open

No. 101, suitable for wood ⅛" to ¼" thick (furniture work.) Will carry a door 3' x 18".

No. 102, same as above, but has square corners.

No. 104, wood must be ¼". Will carry a door 5' x 2' x ⅛.

No. 108, wood must be 7". Will carry a door 6' x 30" x 1½.



No. 112, wood must be 1½" to 1¾". Will carry a door 6' x 2' 6" x 1¾".

No. 116, wood must be 1¾" to 2½".

STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

Paris le 28 DEC. 1906

Le Ministre de la Marine

A Monsieur le Directeur de la Compagnie Magnolia, 50 rue Taitbout, Paris IX.

Admission aux fournitures de la Marine.

Monsieur, par lettre du 10 juillet 1906 vous sollicitez l'autorisation d'être admis à soumissionner certaines fournitures de la Marine

J'ai l'honneur de vous faire savoir qu'après examen des renseignements fournis par le Service de la Surveillance sur vos moyens de production, j'ai décidé que vous pourrez être admis à soumissionner les fournitures de métal antifriction "MAGNOLIA".

Par dépêche de ce jour je donne avis de cette décision aux Administrations des cinq ports, de la Tunisie, aux Etablissements de la Marine à Indret et à Guerigny et à la Commission des Machines et du Grand Outillage à Paris.

Recevez, Monsieur, les assurances de ma considération distinguée.

Pour le Ministre et par son ordre,
Le Directeur Central des Constructions Navales,

MAGNOLIA ANTI FRICTION METAL

TEST No. 783

By the Research Laboratory of the

FRENCH GOVERNMENT

These Tests were Divided into Three Sections

1st. Determination of the coefficients of friction under varying pressures.

2nd. Determination of temperatures under different velocities.

" Endurance Tests."

3rd. Determination of the rate of wear.

Report of these tests was accompanied by fourteen tabulations and the results were so highly favorable to Magnolia Metal—sustaining in every particular its well-known qualities---that the letter shown hereon was written by order of the Minister of Marine approving of the use of Magnolia Metal by the French Navy. No people surpass the French in scientific knowledge and highly technical, painstaking investigation, and their endorsement of Magnolia Metal is another strong link in the chain of evidence that we are able to furnish.

Sold by the leading dealers everywhere or by

WONDER-SHINE FOR 1911

Four reasons why you should have **WONDER-SHINE** in Stock for the New Year.

WONDER-SHINE is an entirely new process of cleaning silverware, gold and plated ware. The easy way to remove tarnish---no rubbing.

WONDER-SHINE is known by thousands of Canadian housewives to be the best and quickest silver cleaner on the market. We are spending $10,000 in telling those who don't know.

WONDER-SHINE is backed by the manufacturers with a binding guarantee that it is absolutely non-injurious to silver, gold, plated-ware, hands or clothing.

WONDER-SHINE is a high-grade specialty and gives you 50 per cent. clear profit. Compare this with the small profit on staples, together with the proportionate investment.

There **is** a demand for **WONDER-SHINE.** Don't let your competitors monopolize this demand and reap your profits.

Send for a three dozen trial order. Each dozen in attractive display carton. Place one carton in your window and keep one always on your counter. Write to-day.

First of the Year is the Best Time for Taking Stock

Hardwaremen Would do Well to Start Early and Lose no Time in Completing the Work—The Relative Merits of Before and After Inventory Sales Discussed—Should Stock-Taking be Advertised?

Merchants differ as to the best time for taking stock, but the consensus of opinion favors early in January. A great many plunge into it right after New Years, others wait until the second week of the year before starting. A few have found it advisable to wait until February. In the latter instance, however, the date is generally placed late in order to allow the holding of pre-inventory sales.

Summing up all available information and weighing the arguments advanced by dealers of conflicting views, the conclusion is reached that the best method to pursue is to start as early in the new year as circumstances will allow. It is a dull season at best and the necessary time can be spared better then than at any other stage of the year. A further purpose is served in that the inventory follows directly after the close of the year and provides the merchant with the facts necessary to enable him to reach an accurate estimate of the business done during the twelve months. It is advisable that the close of the business year coincide with the taking of stock.

Clearing Up Sales.

Many merchants hold clearance sales around stock-taking time—some before and some after. A great majority favor the after-inventory idea and there are undoubtedly good reasons for this preference.

An advocate of the pre-inventory sale is M. Canfield, manager for J. R. Myers Hardware Co., Stratford. It has been the custom in the J. R. Myers store to hold a big clearance sale in January and follow it up by taking stock toward the end of the month. The results have been satisfactory and the practice is being continued. Mr. Canfield points out that, by so doing, it is possible to clear out accumulated stocks, old lines, and the odds and ends which are bound to gather in the course of a year's business. The sales, if successful in any degree, materially reduce the supply and make stock taking much easier.

Supporters of the after-inventory sale urge that, to bring the sales on before stock taking, is tantamount to putting the cart before the horse; that the sale is the logical outcome of the making of a stock taking inventory and not, in any sense, a preparatory step. They say that it is not possible to hold a clearing sale until the stock has been carefully sorted over. Taking of stock shows what lines need reducing and brings to light all odd goods which have collected during the year. It would be impossible to know beforehand what stock the store contained which required speedy handling, unless a sort of preliminary inventory were made. In other words, the stock would have to be more or less thoroughly gone over before the sale and then the real stock taking would come after.

However, there are a large number of thoroughly progressive dealers who get results perfectly satisfactory to themselves out of the early sale and it is therefore impossible to establish a set rule for all to follow. What suits one man's business does not prove satisfactory in another case.

Specialty Sales.

There is again another class of dealers who hold specialty sales after the taking of stock; that is, they make a display of some particular line of goods and endeavor to stimulate trade by featuring that one branch.

Turnbull & Cutcliffe, Brantford, hold a laundry and dairy supply sale in February each year. As a side line they feature a clearance sale in kitchen utensils, general tinware and heating accessories. This firm believes in doing things on a pretty wide scale. They advertise their laundry and dairy sale for a week in the daily papers, using half page space and attractively illustrating the matter with numerous cuts. They devote the whole second floor of their store to the lines featured and the result is a grand clearing out of the stock. Churns, separators, pans, washing machines, wringers, clothes baskets, clothes pegs and similar articles are sold in large bulk.

This firm is convinced that publicity pays to the fullest extent. Up to the last few years, they did not advertise the sale very extensively. Two years ago, they decided to try printer's ink and found an immediate increase in business. From moderate proportions, the sale grew at once to such size that the only difficulty was to handle it to the fullest advantage.

It Stimulates Trade.

One great advantage of holding a sale of some kind during the dull winter months is that it stimulates trade. People become interested in the particular line featured and come to the store. When they get there, some need may come to mind and a sale is made in that way. The difficulty at this period of the year is to get people into the store; the special sale effects this purpose. Once within they are as likely to buy as at any other time of the year.

Do Not Lose Time.

To hark back to the question of stock taking, it should be borne in mind that the sooner it is over the better. It is bound to prove a hindrance to trade in some respects. The clerks cannot be expected to display a very deep interest in making sales while this tedious and heavy work is in progress. They will wait on such customers as enter but their service will be strictly confined to supplying the needs of the caller as expeditiously as possible. Customers know this and prefer to do their shopping at any other time. It follows then that the best time to take stock is when least customers are likely to call. It is also apparent that the sooner the work is finished up the better it will be for the business.

As stated before, the dullest period is just following the Christmas trade and in practically all cases it will be wise to go ahead then without delay.

"Last year I decided to postpone stock taking," said an Ontario hardwareman recently. "My custom had always been to plunge right into it almost as soon as the last holiday customer had made his exit. Still there had always been some demand for left over Christmas goods during the time we were at work and it occurred to me that it might be a wise plan to postpone stock taking for a couple of weeks and get all I could out of this belated trade.

"I did so last year. Unfortunately my customers had come to expect that we would be hard at it right after New Year's and the expected increase in business did not materialize. The clerks stood around half the day with nothing to do. Then when we did get started, customers began to arrive with a rush, thinking it was all over. It was a very unfortunate state of affairs and cost me the loss of considerable business."

Let Your Customers Know?

In this connection, the suggestion was made by a practical hardwareman to the writer that merchants would do well to let their customers know when they intended to start at stock taking.

"Advertise the fact," he explained. "Start to tell the public some time before that they will oblige you and benefit themselves if they make it a point to do their shopping a little earlier. They will take the suggestion up. Also give them a hint that stock taking will be followed by a big sale of goods, when special inducements will be in order. What with those who hurry up with their shopping to avoid the stock taking period and those who wait for the special inducements, you will find your trade concentrated before and after, leaving a fairly clear period to finish the work. I have followed this plan and I don't think I have lost any trade. Business has evened up for me."

The Other Side.

Objection was taken by another dealer with whom the writer discussed the above suggestion.

"It would amount to warning custo-

mers off your premises," he declared. "Lots of them would neither hurry up their shopping nor wait until it was all over; they would just go to another store. Of course most stores take stock at the same period practically and that would help some. If an agreement could be reached with your competitors to choose the same week, the idea would work splendidly."

"One phase of it appeals to me," he added, "and that is advertising the after-inventory sale. I am a believer in advertising and I consider that what success I have achieved in business is due to the fact that I have never neglected to let the public know what I was doing."

One of the chief considerations should be to so arrange matters that trade will not suffer to any appreciable extent. What is lost during the actual period of work, should be made up in some way before and after. Some merchants effect this by taking stock at night time only. The idea bespeaks energy but not discretion. Business gains bought by overwork is not worth the price paid. A man's business depends greatly on his health. If he ruins his health, the business may also come to grief.

What To Do After the Holidays

A "Mid-Holiday" Sale Suggested to Clear the Store of Left Over Holiday Goods—The Beginning of the Year a Good Time to Lay Plans for the Enlargement of the Business—be Friendly With Your Competitor—Buy Spring Goods Early.

The Christmas rush is over and big holes have been made in the stock, but there is quite a lot of articles left over which if not disposed of during the next two or three weeks will be dead stock for a year besides being considerably depreciated in value in the interval.

A "Mid-Holiday" Sale was conducted by an Eastern Ontario hardwareman a year ago and during the week between Christmas and New Years practically every left over article in the special Christmas stock was disposed of, a discount of ten per cent. being offered to make all goods move. The day after Christmas a circular was distributed to every house in the town announcing the sale and by the time the buyers commenced to arrive the stock had been thoroughly overhauled and the clerks had been directed as to what it was desired to sell. What would otherwise have been a dull week was turned into a season of activity and while profits were sacrificed both merchant and customers benefited by the sale.

Many people plan family gatherings and entertainments for New Year's Day and all of these call for an extra supply of table ware, cutlery, food choppers, and similar articles of table and kitchen use.

Too many merchants let the opportunity pass of having a clean up of their holiday stock during the holiday week. After the Christmas rush, the stock is in disorder and the clerks are willing to "let things slide." The merchant is liable to be cranky and customers few and far between. Unless something is done to liven things up the week passes and a New Year begins before the staff becomes efficient again. It is well, therefore, to make a final effort during the last week of the year to top off and increase the holiday trade with the results of a "clean up sale."

Such a sale is also valuable in the preparations for the annual inventory which should be taken as early as possible in January.

Keep the New Resolutions.

During the year that has gone many plans for improvement in the store system have been evolved by the merchant and some of these have been laid aside to be put into force at the beginning of the year. Adopt them now and if the preliminary trial indicates that their use will enable the work of the store to be more efficiently done, insist upon the new method of doing things be carried out to the letter.

No store system is perfect and if thought has not yet been given to plans for making the details of the store run more smoothly the beginning of the year is the proper time to go into the matter.

Experience may have shown that a remodelling of the store is advisable, that additional space is necessary for the storage of goods, the display of paints or some other class of stock. A new store front may be necessary or the establishment of a stove display room above the store. Now is the time to give thought to these things and though the work may not be gone on with at once plans should be worked out before the rush of spring business compels the giving of all attention to the stocking up and sale of seasonable goods.

Be Neighborly.

The new year offers an opportunity for the renewal of friendship or the making of new friends. If you and your next door competitor are not on speaking terms because of some real or fancied wrong of some time in the past, be man enough to begin the year by calling upon and extending the hand of fellowship to the supposed enemy. It is small mindedness and mighty poor business to be at odds with you competitor, and profits will be lost by both unless a change is brought about.

An important factor in bringing warring competitors together has been the Retail Hardware Associations organized in different parts of the United States and Canada. Hardwaremen get together at conventions, and soon realize the advantage of developing a friendship with other hardwaremen in nearby towns—and this is but a step toward bringing the retailers in one town together. At the convention, too, across the dinner table, stories are told of how the hardwaremen in a certain town got together and decided to stop cutting prices on nails or white lead, and, as a result, all had increased margins of profit at the end of the year.

One instance which illustrates how advantage can be taken of friendships created during the convention, happened last spring when dog muzzles were a much wanted article. A dealer in a Western Ontario village who was pretty handy at the workbench found it difficult to secure a stock of muzzles, so he set to work and made up a supply. Then he telephoned to two or three hardwaremen in adjoining towns, and finding they were short of stock, he arranged to make up several dozens for each, and for a month did a rushing business in dog muzzles.

The turn of the year brings nearer the date of the big hardware convention to be held in Peterboro Feb. 21 to 24 next, and Ontario retailers will be wise in arranging to do their stocktaking in January or in the early part of February, in order that they may be able to attend the convention without interruption to their business.

Buy Spring Goods Early.

Travelers for many lines of goods will begin their calls upon the trade during January, and judging from the difficulty experienced in securing deliveries of many lines during 1910, and the bright outlook for 1911, it will be well for retailers to place early orders for spring goods. Little attention need be paid to the talk of trade depression in the United States, as it seems to be largely a result of political causes. Canadian factories are extremely busy and orders in their hands are very heavy. Consequently the manufacturers look for an even greater trade in 1911 than during 1910.

VARNISH TRAVELERS' CONVENTION.

The traveling representatives of the International Varnish Company, Ltd., met at their head offices at Toronto on December 19 and 20, when the past year's business was gone over and plans and suggestions for 1911 trade considered. A feature of the meeting was a presentation to J. E. Ebersole, the general manager of the company as a token of the esteem in which he is held by the staff. Following the presentation the party adjourned to the Queen's Hotel, where the annual banquet was held and an enjoyable evening spent.

The staff of Pinchin, Johnson & Co., manufacturers of Minerva paint, who had also been holding a convention, joined with the International Varnish Company staff, in the banquet party on Tuesday evening.

Merry Men About the Banquet Board

Members of the Dominion Commercial Travelers' Association Hold Annual Meeting and Banquet—J. Bevans Giles The New President — Politicians and a Railway Magnate Present—Sparklets Gathered Up From Around The Board.

Staff Correspondence.

Montreal, Dec. 22. — More than two hundred commercial "line" men attended the annual meeting of the D. C. T. A. at the Windsor Hotel on the 17th inst. The centre of interest no doubt lay in the declaration of the poll, but there was quite an amount of important business transacted.

The retiring president, S. J. Matthewson, occupied the chair, and was supported by J. Bevans Giles, vice president; W. J. Egan, past president; Max Murdoch, treasurer, and H. W. Wadsworth, secretary.

The annual report showed a net increase of 377 members during the year, making a total membership of 7,007.

A Retiring Speech.

Before retiring from office, the president, S. J. Matthewson, expressed thanks for the support given him, and pointed out how much responsibility rested upon the directors in regard to investment of funds. In this connection, he threw out the suggestion that the association should consider the advisability of appointing an architect or estate agent to value properties on which loans were made.

All other business being concluded, the audience were relieved to hear the retiring president with a nervous tremor of excitement exclaim: "Gentlemen, the psychological moment has now arrived." Amid cheers he declared J. Bevans Giles, traveler for Radnor Water, elected by a majority of 185 votes. No sooner had the excitement subdued, than Chas. Gurd, his opponent, rushed forward and clasping "Bev." by the hand, declared: "Gentlemen, there's many a slip 'twixt the cup and the lip—I've slipped."

The audience was not slow to applaud this show of good feeling, and every one was pleased to see the two rivals stand hand in hand.

The Banquet.

More than four hundred members sat down to the annual feast provided by the association at the Windsor Hotel on the 19th, and a right jolly crowd they were.

Labor King Talks.

The Hon. Mackenzie King was warmly received, and after stirring up a patriotic feeling, referred to the rapid development of Canada, and stated emphatically that what confederation meant in politics, transportation meant in trade, and that unless the country could be held together by transportation facilities, it could not be united as it ought. Consequently there ought to be no feeling against the expenditure of money toward the increasing of such facilities as the deepening of harbors and the furtherance of public works. It is all for the good of Canada. He further mentioned that he had traveled round the world, and knew how far Canada's trade extended. It was not confined to land, but was stretching across the oceans both east and west. This not only made it necessary for trade interests to consider the accommodation to carry this trade, but for the government to consider the necessary provisions for the protection of that trade.

A Plea for Unity.

C. J. Doherty stated that what Canada needed was not merely the means of transportation, but a close study of the conditions in all sections of the country; and these conditions were met by the commercial travelers whose business brought them in contact with people from one end of the country to the other. They could aid in creating a feeling of pure Canadian patriotism which recognized neither east nor west, without racial differences or clash of creed, in which all could unite in a common pride of Canadian citizenship.

Max Murdoch then proposed the toast of "Our Guests," to which Chas. M. Hays, president of the Grand Trunk, responded.

Travelers' Superior Knowledge.

The latter indulged in an amount of pleasant badinage with the travelers regarding their much more intimate knowledge of train conditions. "You know better than I do what time No. 3 and No. 5 go out. You can tell me what conductor is on board. Moreover you know what stations these trains stop at —where they should stop. In fact, you can possibly give me very forcible arguments as to why the tariff on excess baggage should be reduced." He predicted that within three years the Grand Trunk Pacific would extend to the coast.

"With the growth of transportation interests the relations between the people and the transportation companies is bound to become a most important question, which may even take the place of the tariff as a public issue. It will be a question you will have with you all the time, and we may not always see things eye to eye, as to what rates and service shall be. But I am glad to meet you tonight, and if I can in future meet you in connection with these transportation interests, and give you the reasons for the faith we have, I have a strong belief that we shall not be far apart, and that we together shall proceed in doing, what we are both interested in doing—developing to the utmost extent the commercial interests and advantages of Canada."

Several other toasts were proposed and briefly responded to, and at the conclusion S. Wotherspoon proposed "The Press," to which a representative of the MacLean Publishing Co. replied.

The officers elected to fill the remaining positions were:

Ed. Duckett (A. McDougall Varnish Co.) Vice-Pres.; Max Murdoch, Treasurer. Directors: H. M. Levine (Montreal Shirt Co.); Eug. Poitevin (L. H. Hebert Co.); M. W. Hackett (Lymans Limited); W. C. Murray (E. W. Gillett Co., Limited); W. J Irving (Jas. Smart, Limited.)

"Chat Over the Table."

The wit from "Bit's" table was as sharp as his razors. They're Tit Bits. all right!

"I heard that a couple of telegrams were received at the Montreal office of the president's company, one prior to the declaration of the poll reading: "Waters troubled. Rise in the Springs." One later read: "Waters subsided. Now calm and settled."

"That's a fine show Poultry Johnny Gunn has on. He's going to make Guelph and Ottawa sit up."

"Say, Max Murdoch's a worker, O. K."

"Who said Bev. Giles had "Little Baptiste" under his arm?"

It is rumored that the rate on excess baggage was reduced on December 20th. Why?

Over 400 big men, and all obedient to little "Bevans." The banquet was the most successful ever held. Order was perfect, and this was due mainly to the wisdom of the president running one item of the programme on top of the next one, thus not giving an opportunity for talking which has in the past been a noticeable embarrassment.

Although the travelers' dinner is never taken seriously or what is spoken regarded in a grave manner, yet the remarks of C. C. Ballantyne could not fail to make the most uninterested listener sit up and take notice.

Juniors were in evidence more so than in past years. This is an encouraging sign.

"Bobby" Wilkins was there with the goods, as usual, and was "Nae sae bad." In fact he was the only person that attempted a joke.

Those were nice bluepoints, but they came from malpecque beds.

And let me the canakin clink, clink,
And let me the canakin clink.

A traveler's a man;
A life's but a span;
Why then, let a traveler drink.

(Apologies to Iago.)

PRIZES FOR HOLIDAY ADS.

Some excellent samples of holiday ads. have been forwarded to Hardware and Metal in the competition recently announced, in which two prizes of $5 each are offered for the best announcements of Christmas goods, one prize to go to the winning competitor in towns and cities over 5,000 population and the other cheque to be sent to the merchant or clerk writing what is considered the best ad. appearing in a paper published in a Canadian town or village having a population of less than 5,000.

As has been frequently announced prizes of $5 each are offered for the best window displays of holiday goods, the same dividing line of 5,000 population being used to separate the retailers in the larger cities from those in the smaller places and give the latter an equal opportunity to show the merit of their displays, prepared, as a rule, under less favorable conditions.

In these competitions it is aimed to encourage a greater interest in holiday advertising, and to allow readers in different parts of the country to see samples of the ads. and displays prepared by their brother clerks and merchants in other sections. The advantage is mutual as the one who sends samples of his own work will most likely be the most interested student of the work of other competitors.

Send copies of your holiday advertisements and a photo of your Christmas window to Hardware and Metal this week. The competitions close on New Year's Day.

HOW TRADE PAPERS HELP.

The clerk owes it to his employer and to himself to endeavor by every means in his power to improve his knowledge of the trade in which he is engaged. It is not sufficient to know the stock in the store. The clerk who is going to make a success of his work is the one who studies the business from every standpoint, who is anxious to assimilate new ideas, who considers methods of salesmanship and endeavors to find ways of reading and satisfying his customers. He should not make it his sole ambition to sell goods, but should strive to satisfy the customers as well so that the trade of that particular person will be placed with the same store in future. To be of real value to his employer, a clerk must know something of the art of effective display, so that the store will be kept bright and pleasing to customers. In fact, there is no branch of the trade that the salesman should not keep in touch with, in his efforts to improve his own insight into profitable and progressive business methods.

This can be done by observation and by reading. "When I was a clerk my employer kept telling me that I should never fail to read the trade papers carefully and digest mentally everything that they said," remarked a Berlin hardware merchant the other day. "I was brought up on Hardware and Metal, so to speak, and to what I saw there, I attribute a great deal of the success that has come to me since I started out in business for myself. I still watch it closely. Undoubtedly a great deal of useful information can be obtained by paying close attention to the ideas of other men as reflected in the trade journal. The clerk who is anxious to make something of himself should not neglect this ready source of information relating to all branches of the business in which he has engaged.

TO TEST FIXED PRICES.

There is to be another judicial test in California of the right of manufacturers of special products to establish a standard price and enforce its observance by contract upon wholesale and retail sellers. It is getting to be a matter of interest and importance in a considerable line of productio Some time ago a manufacturer of olive oil in California, who had a special brand of his own, brought suit for damages against a retail dealer for cutting the price, the observance of which had been a condition of its sale. He won his case.

The court held that fixing a price to be observed throughout the trade was not an effort at monopoly, as only a particular brand of the goods was affected, which the plaintiff alone produced, and the competition of others was not restrained. The producer was under no obligation to sell to any particular dealer or to anybody at all, and might do so on his own terms. Maintaining a standard price was only a reasonable means of "securing the legitimate benefits of the reputation which his product may have attained."

The new suit is being brought by a company manufacturing a cereal food which has a brand of its own, against a department store in San Francisco. This store offered through its advertisements the article at a price below that fixed by the manufacturer.

The principal contention of the price cutters in such cases is that when they have purchased the goods they have a right to dispose of them at whatever price they see fit to ask. They claim that the manufacturer who gets his own price cannot enforce upon those who buy his product a limit below which they cannot go. He may not be obliged, they say, to sell except upon his own terms, but having once sold he cannot enforce the terms by any contract.

The outcome of this case will be followed with interest by the Canadian trade. Whether the manufacturer will have the assistance of judicial authority in maintaining his price is the question that will be determined.

STOCK-TAKING METHODS.

Stock-taking time is now close at hand and hardwaremen would do well to give the matter close consideration. The taking of stock is an operation which must be carried out thoroughly if the merchant desires to find exactly where he stands financially at the end of the year. Only by a careful listing of the stock is it possible to accurately gauge the amount of business done, the relative activity of different lines and the possibilities of each department. Stock-taking is the barometer of business; it indicates when all is plain sailing and gives warning when storms are ahead.

Some merchants do things on a haphazard scale. The natural result is that they do not get much good out of it. They are not able at the end to tell just what business was done during the year, nor are they thoroughly acquainted with the stock that is left in the store. Further, the lack of system in stock-taking entails some loss of trade. It is only by adherence to a fixed plan, which makes allowance for attention to customers during the day, that trade is conducted throughout without any undue hindrances. In the series of articles now appearing, Hardware and Metal is endeavoring to throw light on this question by showing what methods are pursued in various hardware stores. Perusal of the articles will doubtless be of value to hardwaremen at this time of year when they are planning for the work.

A SUGGESTION BOX.

The first of the year is the time when new ideas are most frequently taken up. Merchants then take a retrospective view of the year's work, estimate where they have succeeded and where failed, and think of ideas to improve business in the future. It is the logical time to inaugurate new plans and methods of conducting the store.

In order to get new ideas, many employers, both departmental and private, have introduced the suggestion box idea. That is to say, they offer a reward to employes who make a deserving suggestion tending to economy or efficiency in the conduct of the business. The plan is a good one. A clerk who keeps his eyes open is bound to acquire an insight into different phases of the trade and is in a position to make suggestions toward the improvement of conditions. The employer who encourages his staff to take an interest in the question of improving the store will find that it pays him.

TRADE PAPERS WIN OUT.

Toronto assessed The MacLean Publishing Co. as a business concern at 60 per cent., claiming that the assessment act applied to daily newspapers only, and that trade papers were not newspapers because they did not give general news.

The MacLean Co. at once entered an appeal on the ground that trade papers were newspapers within the meaning of the Ontario Assessment Act; they were specialized newspapers; being in the same class as the country weeklies in furnishing exclusive news for their class of readers. It was shown that the best country weeklies devoted themselves entirely to their own field, that they gave no general news whatever, and The Freeholder, Cornwall, published by the first vice-president of the Canadian Press Association was produced as a type of the modern country paper.

The matter came before Judge Winchester, who very promptly decided, on looking over The MacLean Co.'s various publications, that they were clearly newspapers, in that they gave most important political, trade and general news of interest to a very important class in the country.

Questioned by the Judge, the official representing the city, admitted that society, religious and similar publications were newspapers, but argued if a publication gave news to business men it could not be a newspaper. The absurdity of the argument was so apparent that the Judge stopped him, telling him in effect that there was no use his going on; that news that interested merchants and manufacturers was news as much as any other class of news, and of a higher value.

This is apparently the climax of a fight against trade newspapers that has been going on for some years, openly instigated by certain big dailies, supported by leading mail-order houses. The latter argue that trade newspapers are demonstrating to merchants in other cities and towns that advertising in their own local dailies and weeklies and improvement in their business methods will bring them as much up-to-date as the big city stores. The people are being educated by the advertising in the smaller dailies and weeklies to buy at home and they do not respond to the advertising in the big dailies as they used to.

For years they tried to get the post office to impose a higher rate of postage and to harrass them in other ways; but Parliament is legislating for all Canada and not for Toronto and the secret influences at work in the department came to naught.

THE PRICE OF LINSEED OIL.

In Monday's issue of the Montreal Gazette, an interview was published with a prominent paint man, in which he expressed the opinion that there were indications of a lower market on linseed oil. This question is one of general interest to the trade. Many of the importers and crushers were seen by Hardware and Metal with reference to the situation and, while the opinions received where in some cases divergent, the majority inclined to the view that prices would remain firm for some time, at least.

Straight Talks on Hardware Salesmanship

TALK No. 7 BY VICTOR LAURISTON

The Noble Canine—personifying and typifying the entire canine races in Western Ontario—has during the past eight months or so been wearing a sort of wire birdcage on his head. Not because he likes the fashion; but for the protection of the public.

This isn't an essay on dogs, nor on rabies, nor on that oft hotly debated theme, the relative value of the dog and the child. It's just the yarn of the hardwareman who, when the muzzle ordinance first leapt forth upon him, was ready for it, with his business gun loaded to the muzzle.

The muzzle ordinance didn't spring like a tiger from the jungle—not by any means. There were lots of premonitory rumblings and roarings. The papers of the province were full of them. First someone who didn't own a dog suggested that all dogs ought to be muzzled. Then someone who owned a dog, scouted the idea. Then a city council somewhere discussed a muzzling by-law, and turned it down. And then the muzzling order—but we anticipate.

This hardwareman happened to be one of those fellows who reads general news and does his thinking in hardware. When he read the first muzzling suggestion, he communed thus:

"Muzzles? What does a muzzle look like? I've never handled one. But if the dogs are to be muzzled, someone will have to sell the muzzles. That's me. Then where am I to get the muzzles? How much will they cost? How soon can they be delivered?"

He fixed up these thoughts straightway into a letter which he duplicated to half a dozen firms that struck him as likely to know something about dog muzzles. He wanted samples, prices, terms—and, above all, he wanted to know how soon the muzzles could be delivered. Within fifteen minutes after writing, the letters were in the mails.

The rabies scare spread. Muzzling talk grew louder. Someone whispered that a general muzzling order was to be issued. Here and there rival hardwaremen began to take notice. They decided to write for quotations—to-morrow.

Next day the order was out, with its $200 penalty attached. There was a pretty general rush for muzzles. At three stores in this particular town there wasn't a muzzle to be had. "We'll order them for you — telegraph right away—have them here to-morrow, sure," customers were told.

In the fourth store dogs in leash were sitting around, waiting their turn, while clerks hustling at top speed, fitted them with muzzles of which the merchant carried a plentitude in all sorts and sizes; and the quarters were tumbling into the cash register drawer as thick as snowflakes in December.

By the time the other chaps had their muzzles in, sixty-seven per cent. of the dogs in the town and the country immediately adjoining were trotting about with their heads birdcaged, their tails dejected and woe in their brown eyes.

Dogs of all sizes and descriptions were fitted with muzzles.

Of the remaining thirty-three per cent. a good half were irreconcilables who declared they'd go to police court before they'd submit.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66

MONTREAL.

Prices are again unchanged this week, primary market quotations not being wide enough to alter existing quotations. Trade naturally shows the commencing of the mid-winter dullness, although owing to the shortness of stocks in users' hands it is not anticipated that the falling off will be as marked as in former years. In fact some jobbers anticipate a quick revival after the turn of the year, as industrial reports are very favorable to a good demand for the finished article.

All the metals have had their share of the business going although there is no doubt that but for the high prices obtaining in tin this metal would have probably been the most prominent seller. There is a good tone all the way round induced by the prospect of strong business in January, and if the primary markets show more stability satisfactory business should materialize.

The situation in London and New York has not shown any great developments, barring the fact that tin fell away a few points in London, but the syndicate still holds control, and users are not buying more than they are absolutely obliged to. Copper was affected by speculation in London, and in the end fell away slightly in New York. Spelter remained steady in London but at St. Louis the slow decline was not checked. In fact all the metals are on the depressed side in New York. Lead is steady, and showing unusual firmness. The American iron and steel situation is practically unaltered. The industries are marking time until the turn of the year. The pig iron market is quiet but prices are being held. The finished steel market shows more firmness. Production is still on the downgrade.

Pig Iron.—Business continues quiet, and will be so until the new year. With stocks short in the small users' hands business is expected to pick up rapidly. The larger interests are supplied for the time being but they will have to come into the market sooner than they anticipated if reports speak true. Ex-store prices are as follows: Summerlee No. 1, $21.50 to $22; Middlesboro, No. 3, $18.50 to $19, Canadian No. 1, $19.50.

The United States market has been quiet, orders being on the small side but prices are steady and production is still on the downgrade. Hopes are still being pinned on the marked revival of business during January and February. Cleveland warrants show steady quotations and fair trade is reported.

Tin.—Tin quotations are unaltered locally. Business has naturally fallen off. The high prices obtaining is naturally not inducing forward booking, while of course, trade is bound to be quiet at this time. There are evidences, however, that plenty of business is waiting a favorable opportunity to come in. The London market has shown fluctuations but the syndicate have maintained control. Legitimate consumption is reported dull both in London and New York.

Copper.—Prices are unchanged. Like the other metals copper is showing a slackening off, although the smaller users carrying no stocks are buying steadily from day to day. New York has fallen away slightly, and holders are ready to cut for large sales. The consumption on the whole is dull, users having bought enough to last over the Christmas term.

Spelter.—Spelter is firm and unchanged. There is fair business going through from the smaller users. The English market is firm, but St. Louis is still on the down trend.

Lead.—The market is firm and considering the time of the year business has been satisfactory. The smaller users are most prominent. The English market maintains its firmness for the time being.

Scrap.—The market continues quiet, and the demand for both fine and coarse metals has become sluggish. We quote: Heavy copper and wire, 11c; heavy red brass, 10c; heavy lead, 2¾c; light copper and bottoms, 9c; tea lead, 2¾c; machinery cast iron, No. 1, $14.50; No. 1, wrought iron, $12.50; malleable, No. 1, $9; miscellaneous steel, $5; stove plate, $12.50.

TORONTO.

Toronto, December 23.—The local market is dull. Little trading is being carried on, neither buyer nor seller showing a very keen interest just at the present time. Some orders come in still but they are practically all small. One local house reports a fairly good demand for spelter but the trading in other lines is nominal.

The decline noted in spelter elsewhere has not yet had the effect of bringing local figures down. Easier prices are quoted here in lead; otherwise there has been no change in metal quotations.

Tin holds strong and high and the impression here seems to be that it will continue pretty much the same for some time yet.

Pig Iron.—Demand is light as might be expected at this time of year. Local prices remain stationary at: Canadian No. 1, $19.50; No. 2, f.o.b. furnace sellers, $19; Middlesboro, No. 3, $20; Summerlee, No. 2, $22.50; Cleveland, No. 1, $20.50; Clarence No. 3, $20.75; Jarrow, $20.50; Glengarnock, $22.50.

Tin.—There is no tendency to revive interest in tin at this stage and conditions remain dull. Some trading is done but orders are placed only where necessity compels. The local price remains at the high figure of 42 cents. Reports from the primary market are to the effect that the success of the syndicate has failed to create confidence in prices. Nevertheless the syndicate's control is so complete that nearly all orders from America find their way to them. The opinion prevails locally that the syndicate is likely to keep control for some time yet.

Plates and Sheets.—Light trading is being done. The season is now practically over but some orders are being placed for future requirement.

Copper.—The confidence expressed in American circles that an era of lower production has been entered has had a good effect. Still orders and inquiries are at a standstill pretty much at present. The dullness in New York has caused a slight decline but the producers there are comfortably supplied with future orders and show no desire to force sales. The price locally has remained firm.

Lead.—Easier prices are quoted in lead. Domestic, which was given last week at $3.85 is now sold from $3.60 up and imported runs from $3.75 to $3.90. There is not much trading done just now in lead, despite the easier tone to the market.

Spelter.—One local house has received several large orders in spelter during the past week but this is the exception rather than the rule and most firms have not done much in this line. The tendency noted in the primary markets to bring prices down is rather contrary to the opinions held a week ago, when a stiffer tone was anticipated. The local price has not responded.

Old Materials.—The general dullness holds good in the case of scrap materials. Little trading is being done. Prices are: Heavy copper and wire, 11¼ to 11½c; heavy red brass, 10¼c; heavy lead, 3c; light copper and bottoms, 9¾c; tea lead, 2½c; machinery cast iron, No. 1, $14.50; No. 1 wrought iron, $10 to $11; malleable, No. 1, $8 to $10; miscellaneous steel, $6 to $7; stove plate, $13.

U. S. METAL MARKETS.

Cleveland, O., Dec. 22,—The Iron Trade Review to-day says:— Holiday dullness more pronounced than for several years is being experienced in the iron and steel trade. Trading has been extremely light during the past week and production is being curtailed, but prices of crude steel, plates, shapes, sheets and wire products are firmer at present than at any time this month. Manufacturers are showing a strong disposition to maintain prices following the series of meetings held during the past ten days by representatives of the various branches of the steel industry. Except in a few instances consumers are giving little attention to their requirements over the early part of the new year and are confining purchases to cover urgent needs.

HARDWARE MARKETS

MONTREAL.

Dec. 23.—Taking everything into consideration trade has been unusually good for the week preceding Christmas day. The earlier part of the week was marked by rush orders from nearby points for sorting up in carvers, and other cutlery lines, and in razors, shaving sets, manicure sets, scissors, etc. These were promptly attended to, and the dealers in all probability got the goods in time for the closing scenes of their holiday trade. Locally the rush kept right up to the finish. The general opinion among the jobbing houses is that the purely holiday demand has been much above the average—possibly a record.

Staple lines have been moving steadily in a sorting up way, and it is evident, that merchants are working on light stocks all the way round. Builders' hardware still shows up well locally. Snow shovels have quickened with the snow falls but they are not moving with old time force as yet. Sorting up is being done in weather strip, sleigh bells and sleigh heaters. Enamelware is in fair request.

The markets are firm in tone, and unchanged. Booking with the arrival at headquarters of the various traveling men has naturally fallen off. There is a confident feeling that next year's trading is going to be something worth talking about.

Winter Lines.—The demand has shown up surprisingly well this week, and is an evidence of the light stocks in dealer's hands. All lines have been called for, and the general assorted character of the orders have created comment. Snow shovels have improved, but further falls of snow are wanted to give the right strength to the call. Sleigh bells and heaters are being demanded. Weather strip is likewise in fair request. The markets are firm, and there is a good undertone for starting a new year's business.

Christmas Goods.—A few rush orders from nearby points, and fair pressure locally marked the purely Christmas goods demand. Jobbers are pleased with the demand this year, and believe it to be one of the best if not the best on record. A striking feature has been the extended range of articles called for showing that dealers have gone much more progressively into the holiday trade. Cutlery, however, proved the most prominent seller.

Sporting Goods.—There is still a good movement in skates and hockey sticks in a sorting up way. Toboggans and snowshoes continue quiet owing to the absence of much snow. There has been a steady demand for gymnastic supplies, and dumbbells, Indian clubs, home developers. Fencing sticks and basket ball accessories have shown good movement.

Builders' Hardware.—The movement keeps up well so far as the local call is concerned. The country demand has naturally fallen off. The market is unchanged, and we quote: Lock sets (inside) $4.25 per doz. and up; lock sets (outside) $13.20 and up; common rim locks, $1.10 per doz.; porcelain knobs, $1.10 per doz.; sash cords, 32½ to 33c.

Lumbermen's Supplies.—Steady business is being done in axes, axe handles cross-cut saws, boot calks and snowshoes. The market has a good tone and the demand is fully up to the average.

Bolts and Nuts.—The demand has quieted down for the time being. The markets are steady, and prospects look good. We quote: Discount on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Wire.—Until travelers get out again business will be on the quiet side. Good booking is anticipated next month. We quote: Barbed wire, $2.25; plain twist, $2.55; galvanized wire, $2.20; base coiled fencing (9), $2.25; (12), $2.40; staples, bright, $2.60; galvanized, $2.85.

TORONTO.

Toronto, Dec. 23.—There has been a falling off in trade activity but conditions are still exceptionally brick for this time of the year. Not only are there plenty of supplementary and last minute orders coming in for Christmas goods but the demand for general hardware lines is good. The year, which has been a splendid one in every respect, bids fair to wind up with more active conditions than for some seasons past.

No changes in price have been made. A marked characteristic of the hardware market throughout the season has been the steadiness of all lines. There have been but few changes made and none of a material nature.

"We are busy every day right up to closing time," said one jobber, to-day. "It is quite apparent that the trade is finding the Christmas trade heavy. The amount of supplementary orders we are receiving shows that some lines are greatly in demand."

Seasonable Goods.—There has been no noticeable slackening in the demand for winter goods. Sorting orders, some of good sized dimensions, are being received for blankets, lined mitts, sleigh bells and heaters, runners, snow shovels, weather strip and other goods of the same description.

Household Goods.—Orders for kitchen utensils are still in receipt but it cannot be said that the demand is very active. Merchants are busily engaged with the wind-up of the holiday trade and on leaving their sorting-up orders in such lines until the rush is over . Still there is a little better movement in mop handles. brooms, tubs, boilers and tinware than is generally anticipated at this season of the year.

Builders' Hardware.—There is a seasonable demand only in builders' hardware. Trade will pick up, it is believed, as soon as the festive season is passed.

Heating Goods.—"We are much busier than during the same time last year," said the sales manager of a stove firm to-day. "I don't recollect any previous year when there has been so much activity during Christmas week, or for that matter throughout the whole of December. As we are starting stock taking we could get along without so much trade but, of course, are not complaining."

The year's trade has been of the bumper variety and the present activity is going to round off the volume of trade done most handsomely. As the travelers are off the road, the orders now received are all by mail, thus indicating a rather more than seasonable activity in stove sales by the trade.

Sporting Goods.—The call for skates and sporting goods has slackened as practically all merchants are now stocked up. A few sorting orders have been received and small lots are in demand.

Heavy Hardware.—Trading is, generally speaking, satisfactory for the seasoni of the year. Carriage bolt discounts are quoted at: ⅜ and smaller, 70; machine bolts, ⅜ and smaller, 60 and 10; coach screws, 75; stove bolts, 80 and 7½.

Christmas Goods.—Small orders are received for practically all lines. Dealers are rushing in demands for odds and ends of goods to tide them over the holiday season. The jobbing houses are able to look after such orders promptly but it keeps them busy.

ONE MANUFACTURER'S LINE

A firm in Ohio considers the paint business a profitable line to handle in connection with hardware, if the line is a good one and confined to the paints made by one manufacturer. The line should be as complete as the size of the town justifies. It is believed that little attention should be given to getting the business of the average painter, as collections will invariably be slow from this class of customers, but the firm conducts this branch of its business on the theory that it pays to keep the best line in town and finds that persons who are accustomed to dealing elsewhere drop in for articles not obtainable at their regular trading places and pay cash for their purchases. This firm attributes the increase in its paint sales year after year to the fact that paint is displacing the use of wallpaper in many cases, and is being used to cover floors instead of carpets; also to the general tendency of house owners to brighten up their property. It is claimed by this concern that no class of merchants are in a better position to handle this line than hardwaremen and to get the business upon a profitable basis.—Iron Age Hardware.

Ex-President of Wholesale Association Passes Away

Thomas Henry Newman, one of Canada's Best Known Wholesale Hardwaremen, Dies at Montreal, on Wednesday, at the Early Age of 59.

It is with the deepest regret that we record the death at the age of 59 of Thomas Henry Newman, of the firm of Caverhill, Learmont & Co., Montreal. Mr. Newman has been ailing for over two years, and he took two trips to the West Indies to see if the change and the rest would set him again. But although he fought hard the complication of heart trouble and diabetes, proved too much, and he sank away on Wednesday at noon after being unconscious for several hours. He was born on July 11, 1851, in Toronto. Mr. Newman, whose mother was a Miss Caverhill, entered the firm of Crathern & Caverhill as a boy of 14. He went through all the departments, and early showed that business ability which made him so prominent in the wholesale hardware world. The late Mr. Crathern at the Wholesale Hardware Banquet in Montreal, in 1907, said that Mr. Newman sold more goods in three months than he (Mr. Crathern) used to do in twelve. No ordinary salesman could have obtained such a commendation from a critical authority like Mr. Crathern. On the other hand Mr. Newman was equally emphatic in his praise of Mr. Crathern, for he said, at the same banquet, that the ideas, the influence, business training, and in fact any little success achieved by him were due to the personal example of Mr. Crathern. There is no doubt that the pupil was worthy of the master.

It was while Mr. Newman was in charge of the cutlery department that those changes occurred which lead to the retirement of Mr. Crathern, and the formation of the firm of Caverhill, Learmont & Co. Mr. Newman then became a member of the firm, and took a more prominent hand in the development of the house.

Although business took up such a large part of his time, Mr. Newman was twice chairman of the Wholesale Hardware Association, and was always keen in promoting its welfare. He was also active in the Board of Trade, being an ex-chairman of the Transportation Bureau of that organization. He was also an energetic church worker.

Mr. Newman leaves a widow and three sons, Frank Ross Newman, Henry Newman, Jr., who are with the firm, the former having returned from the Winnipeg office early this year to take over his father's work, and John G. Newman, who is Montreal manager for the McClary Manufacturing company, and a daughter, Mrs. Gurd.

THE LATE THOMAS HENRY NEWMAN.

Personal Characteristics.

Kindliness was the dominant characteristic of this notable hardwareman. It was curious that he should have passed away so soon after his splendid friend and teacher, the late James Crathern. Mr. Newman dearly loved in private and in public to refer to the sound teachings he received from Mr. Crathern. In the old days when James Crathern was head of Crathern, Caverhill Co. and afterwards the Caverhill, Learmont Co., Mr. Newman was serving his time as clerk. He imbibed the basis of his success, so he often said, from James Crathern. It is therefore not surprising that in business method Mr. Newman in many ways resembles his former chieftain. That kindliness and consideration for others which always possessed Mr. Newman was inculcated by James Crathern. They were, in fact, like father and son. However Mr. Newman early showed the shrewd qualities of buying and selling, of mastering details that easily placed him in superior positions and then partnership. From the smallest employe in the house up Mr. Newman was known for his kind "Good morning" and pleasant smile.

He was a true and generous friend to his staff and to all who knew him well. But if anyone played him false he was a dangerous foeman and would not readily deal with that party again. However, his best saying was that "It is very difficult to forgive the person who has wronged you—only the superior person can do it." He was one of those superior persons, and the staff of Caverhill Learmont will realize it now.

In his public utterances he never failed to refer in some way to the great British Empire and the illustrious sovereign, our late King. In fact love of the British association was one of his fads. This, however is not surprising when the old family name of Newman is remembered and the connections can be traced back, it is said, to the Royal families. Another of Mr. Newman's neat expressions was "If you do not know what to say, don't say it." At the Board of Trade where he was a prominent figure, his rosy face and pleasing jest were loyally welcomed and whatever he suggested was always on that supreme gracious basis, coupled with the highest code of commercial probity involved in the "greatest good to the greatest number."

At the meeting of the Wholesale Hardware Associations, his voice was always on the side of equity and sound common sense. Any trade agreements were human agreements when he sanctioned them and no dealer's or manufacturer's interests failed to receive that judicial consideration for which he was noted in business and social life.

The smaller merchant many a time came to him for a word of comfort and advice in dark days and Mr. Newman

tided many a good man over difficulties by putting his finances on the right track, or that is he taught the man how to help himself. From the four corners of this country there will be sympathy go out to the man whom many of the merchants never saw but who had felt his influence in encouraging messages and valuable commercial optimism. The man whose personality permeated almost every order, radiated into almost every department and yet presided over the great machine of the big jobbing house with a serenity and success, will live long in the history of Canadian hardware life. It will serve as an indictment against the growler and the grouch, and will lead the younger generation up to the gospel of hope and idealism in all business life.

T. H. Newman was in latter years a martyr to failing health caused largely by overwork in his younger days. He has often told the writer to be sure to speak to him as his eyesight was failing and even with his powerful glasses he would fail sometimes on the street or otherwise to recognize those whom he knew well. He has often remarked that he hoped he hurt no man's feelings in such a way as it would cause him great regret. It is a beautiful monument to leave in business that he was always kind.

HARDWARE TRADE GOSSIP

Ontario.

W. J. Mickus, Preston, is handling a large heating contract in St. George.

A. W. Poole, Toronto manager of the Brandram-Henderson Co., is in Montreal this week.

David Findlay, of Findlay Bros., Carleton Place, was a visitor in Toronto on Tuesday.

Robert Morrow, of Wm. Stairs, Son & Morrow, Halifax, spent several days in Toronto last week.

J. P. Noonan, Mount Forest, has installed a 12-foot silent salesman for the display of electrical fixtures, silverware and cutlery.

Purvis Bros., Sudbury, are again supplying their customers with a calendar, they considering this a productive means of advertising.

Ald. Albert Welch, stove merchant, Toronto, is not a candidate for re-election this year, he having served two years at the council board.

A new plate glass window in Bond's hardware store, Guelph, was broken a day after it was put in, by an oil stove being placed too close to it.

The London Free Press in its issue of Saturday, December 17, gives a sketch of D. H. Howden, of the D. H. Howden Co., hardware wholesalers of that city.

John Caley, formerly with the Plume & Atwood Rolling Mills Co., Thomaston, Conn., has accepted a position with the Ontario Brass Rolling Mills Co., New Toronto.

F. C. Surbeck, manager of Benjamin Moore & Co., West Toronto, is spending a week or so in New York, attending the annual meeting of the managers, etc., of his company.

W. H. Gerke, general manager of the Martin-Senour Company, paint manufacturers, Montreal, spent Tuesday in Toronto. Mr. Gerke reports remarkably successful year's trade in all parts of Canada.

Col. Gartshore, of the McClary Manufacturing Company, London, spent Tuesday and Wednesday of this week in Toronto. The travelers of the McClary Company's staff held their annual conference at London last week.

Parkhill merchants have agreed to close their places of business from January 2, 1911, to April 30, 1911, at 6 p.m., excepting Saturdays. A. W. Humphries & Son and the Steele Hardware Store are included in the list.

Through an outbreak of fire in an adjoining store, McMillan Bros., hardware merchants, Guelph, suffered loss to their stock to the extent of about $1,000, chiefly through water. About two feet of water was left in their cellar.

The Dunn Hardware Co., Port Arthur, have issued a calendar showing a pretty woodland scene, a hunter in the distance, and two settlers about to bush a covey of grouse in the foreground. "Sportsman's Scouts" is the title.

M. Weichel & Son, Elmira, have discontinued their previous custom of sending Christmas calendars to their customers, and have instead given a japanned tray. To the customers of their two stores, 2,600 of these trays have been sent.

At the end of the year the hardware business of F. J. Rosebrugh, Essex, will be taken over by the Essex Hardware Company. Mr. Rosebrugh is selling out on account of his wife's ill health. Ray S. Malott, who has been in Mr. Rosebrugh's employ, will be manager.

Fred. G. McBrien, hardwareman, is again a candidate for alderman in Ward 6, Toronto, and has an excellent chance for election. In 1909 he polled 2,444 votes, while in 1910 he increased the total to 2,565 votes. There is room on the city council for an aggressive young business man like Mr. McBrien.

W. F. Shaw, superintendent of the new steel factory at Cobourg, was present at the last meeting of the town council, when the taxation exemption by-law received its second reading. He is the patentee of the process whereby finest tool steel is made direct from magnetic iron oxidi sand, holding three patents in Canada, and two in the United States. During the winter, Mr. Shaw will prepare patterns for castings, and, as soon as the weather permits, a concrete foundation for the building will be laid. The company will start with twenty combined crucible and reduction furnaces. It is fully anticipated that the by-law will carry on January 3.

Quebec.

A fire broke out on the second floor of the wholesale paint and varnish establishment of Mander Bros., Montreal, on Sunday night. It was extinguished before serious damage had been done.

Robert Munro, of the Canada Paint Co., Montreal, has returned from Lakewood, N. J., much benefited in health. His many friends in the trade will be glad to know that he is in harness again.

Western Provinces.

Fred L. Gimby has opened a hardware business at Meldon, Sask.

James Rae, Medicine Hat, has sold out his stock of hardware.

The Pioneer Hardware Co., of Davidson, Sask., have been incorporated.

Finseth Bros., hardware dealers of Ryley, Alta., have sold to P. P. Kjosness.

W. W. Kearns has opened a tinshop and implement business at Eyebrow, Sask.

A. J. Falconer & Co., have sold the Deloraine, Man., branch of their hardware business.

McLellan & Co., Perdue, Sask., are opening a tinshop in connection with their hardware business.

The stock of Morris & Taylor, hardware and implement dealers, Castor, Alta., has been purchased by the Williston Trading Co.

J. E. McRobie has been appointed assistant hardware appraiser at the Winnipeg Custom House. Mr. McRobie has been connected with the wholesale hardware trade for many years.

The Merritt Mercantile Co., Merritt, B.C., are opening up in the new Collett building with complete lines of hardware, gents' furnishings and ladies' wear.

Maritime Provinces.

Frank McLaren, who for several years conducted a hardware store in Digby, N. S., has returned to his old home in Brighton, and will remain for a couple of months. He has been located in Cobalt for some months.

New Companies.

The Montreal-Midway Oil Co., have incorporated with a capital stock of $600,000, to extract and manufacture petroleum oil and to extract all other oils and minerals.

J. H. McComb, Ltd., have incorporated to manufacture roofing, flooring, paints, varnishes, papers and canvas. Capital stock will be $50,000 and the head office will be Montreal.

IMPROVING THE STORE TONE.

What are you doing to raise the tone of your store?

Are you steadily improving the quality of the goods, to give your customers a maximum value for the price? Your competitor probably is.

Do your methods conform to the golden rule? Are they as liberal as your competitors'?

News and Methods of Canadian Hardwaremen

Threatened Cutting Off of Electric Light in Seaforth is averted by Agreement Between Town and Company—In the Meantime Hardwaremen do big Business in Lamps—Methods Adopted to Increase Holiday Trade—Hardwaremen in a Runaway in London.

Seaforth.—The town of Seaforth was thrown into a state of consternation on Saturday last, by the announcement that the Electric Light, Heat and Power Co. had decided to close up the plant and not supply any more light after Monday night, December 19. This action would have entailed great loss to the merchants who would have been unable to conduct business satisfactorily during the evenings of Christmas week. Residents who depended on electric lighting in their houses were likewise caught unprepared and there was a rush for oil lamps. The hardwaremen did quite a business in lamps and would have been literally beseiged with purchases if the intention of the company had been carried out.

James Scott, president of the company, claimed that the Seaforth council was not showing any tendency to treat with him fairly in the matter of taking over his plant in preparation for Hydro-Electric power and the decision to close down was reached in accordance with that belief. However, the matter has been settled without the current being closed off. A valuation of the plant is to be reached by two men, one appointed by the town and one by the company.

EVERYDAY LINES AS GIFTS.

Chatham, Ont. — "Why not a bathroom?" is the striking headline of a Christmas advertisement of J. C. Wanless, hardwareman, which carries out the idea urged in Hardware and Metal some time ago, of emphasizing the Christmas gift possibilities of everyday lines of business.

"Present your wife with a signed contract for a bathroom," the advertisement adds. "She will appreciate it to the limit. We can instal immediately after the holiday. It will be so well installed that you will be proud of your present all the time. We will gladly estimate the cost for you at any time. Complete bathrooms from $75.00 to $150.00."

Along the same line the advertisement suggests a "Favorite" kitchen range, a Conner ball-bearing washer, a Universal food chopper, and, finally, cutlery. In each case prices are given, following a brief but pointed talk regarding the article referred to; and each article is illustrated by a cut, the advertisement occupying an entire single-column of the newspaper. It will be noticed that the articles are arranged on a diminishing scale so far as price is concerned, the idea evidently being to suggest unconventional Christmas gifts at prices to appeal to all pocket-books.

GOOD CHRISTMAS TRADE.

Peterboro—All the hardware stores report fairly good Christmas trade during the past week, the weather having been conducive to that end. The stores have been vieing with one another in the matter of window dressing, and the window trimmers have been upon their mettle, many new and original ideas being the result.

The Best Stove and Hardware Co. have an excellent display of cutlery, skates and other holiday lines, dressed by Ray Best to good selling advantage.

The Higgins Hardware Co. have a window display of tools. The Peterboro Hardware Co. have two windows of flatware and cutlery, and report a very busy Christmas trade. Skates and other hockey supplies are featured in the north window of the Kingan Hardware Co., attention being drawn to it at night by means of an illuminated sign placed in the foreground of the display.

The wholesale department of the Peterboro Hardware Co. has now been removed entirely to the new quarters provided for it.

SANTA CLAUS' HEADQUARTERS.

Chatham, Ont.—That Jas. E. Gray's Ark and China Hall is Santa Claus headquarters in Chatham, is the line of advertising steadily adopted during the Christmas season.

In addition to his china lines and stoves and ranges, Mr. Gray does an extensive business in toys, novelties and small hardware articles. The Santa Claus line of advertising was a prominent feature under the management of the previous proprietor, Hugh Macaulay, and Mr. Gray has continued and amplified the idea, working it out in several ways.

For five or six weeks before Christmas, large colored posters have appeared on the most prominent local billboards depicting Santa and his reindeer with a load of toys en route for Gray's Ark and China Hall. The appearance of these posters, which occupy the billboards continuously throughout the Christmas season, marks the commencement of the Christmas campaign.

Mr. Gray makes liberal use of newspaper space. He is an all-the-year-round advertiser, but he starts his Christmas campaign in the newspapers quite early. Here the Santa Claus headquarters idea is also utilized.

This year Mr. Gray distributed a couple of weeks before Christmas an attractively illustrated "store paper," comprising eight pages about the size of the Hardware and Metal pages, printed on a good quality of paper, and containing a great deal of advice upon the subject of Christmas buying, as well as some general reading matter to carry out the "newspaper" idea. The illustrations were mostly of a Christmas nature. This paper, entitled "The Chatham Holiday Messenger" was distributed from door to door throughout the city.

For many years the store has always had a Santa Claus on hand during Christmas week, usually taking the big part in the window display. The figure is very carefully and realistically gotten up, and provides a striking centre for a toy display. Special signs announcing that this is "Santa Claus headquarters" are usually put up in front of the store.

The aim throughout is to inculcate the idea that this is the place to buy Christmas presents for boys and girls, and to do this year in and year out, thereby creating a Santa Claus tradition, in connection with the store. This form of advertising is very effective, particularly with the children, who are not slow to call the attention of their parents to the attractive things the store has to offer.

APPOINTED HARDWARE APPRAISER.

J. E. McRobie, secretary Winnipeg Retail Hardware Merchants' Association has been appointed assistant hardware appraiser at the Winnipeg Cus-

J .E. McROBIE, Winnipeg.

toms House. Mr. McRobie is one of the oldest and best known hardwaremen in the West having traveled for many years over Western territory for eastern and western houses. For a number of years Mr. McRobie has been secretary of the commercial travelers' club at Winnipeg.

Fred Brown, of the Purdom Hardware with W. H. Ward, met with an accident the other day when a wheel of the wagon they were riding in caught in a street railway switch, and both were thrown out. Mr. Brown had his face cut..

BRUSHES! BRUSHES!

Our well-known line of Brushes are once more on the way to your store. The samples shown by our representatives are undoubtedly the best value exhibited in the West to-day. **WHITING'S** famous brushes are well represented and you will be pleased with our selection. English Scrubs and Horse Brushes imported by us will fill every housekeeper with delight. The line embraces all the popular shades and sizes, and the prices are very low in comparison with the quality.

We manufacture all grades of Wire Cloth and General Wire Work.

We solicit your inquiries.

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Dec. 22.—Ordering by mail keeps up satisfactorily, and the indications are that the general hardware trade will not weaken as is usually the case the latter part of December. There are splendid orders coming in for heavy hardware and builders' supplies for the coming year. Enamelware and lanterns are also being ordered freely, and it is evident that stocks of household goods are getting low.

Sheet zinc has been advanced, as has also copper lanterns. Solder which has been advancing by degrees for some time is about to take another advance of one cent.

Stock-taking is going on in most of the local houses, and everyone is busy with the present ordering, and it is evident that after the first of the year a very brisk trade will open up.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corugated iron, 28 gauge, $3.87; pressed standing seamed roofing, 28, painted. $2.83; galvanized. $3.87; 26, $3.24.

Galvanized Ware — Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.65; No. 2, and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to 1, $5; No. 2 and larger, $4.75; featherweight, $6.15.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks — Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 45 p.c.; smaller lots, 40 p.c.

Iron Pipe—Black, ¼-in., $2.45; ⅜-in., $2.75; ½-in., $3.30; ¾-in., $4.10; 1-in., $5.80; 1¼-in., $8; 1½-in., $9.50; 2-in., $12.70; 2½-in., $20.80; 3-in., $27.40; 3½-in., $34.20; 4-in., $39; 4½-in., $43.50; Galvanized, 1¼ in., $3.40; ⅜-in., $3.70; ½-in., $4; ¾-in., $5.25; 1-in., $7.60; 1¼ in., $10.35; 1½-in., $12.70; 2-in., $17.

Logging Chains—5-16, $6; ⅜, $5.50; 7-16, $1.70.

Lanterns—Cold blast, per dozen, $7; coppered, $9.50; dash, $9.75.

Poultry Netting—57½ per cent.

Pig Lead—$5. Lead Pipe—$6.

Rivets and Burrs—Iron rivets, 55 per cent. Copper, No. 8, 39c; 10, 32c; 12, 35c. Copper burrs, No. 7, 39c; 8, 40c; 13, 43c; 12, 46c. Copper rivets and burrs, No. 8, 31c; 10, 34c. Coppered, No. 8, 18c.

Rope—Sisal, 9½c; pure manila, 11; British manila, 9¾; lath yarn, 9¼c.

Sheet Zinc — Casks, $8.25; broken lots, $8.50.

Steel Squares—45 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No[illegible] 4, 5[illegible] 2½ p.c.; No. 1 scoop[illegible] [illegible]ó p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Base 23c per lb.

Screws—Flat head iron, 80, 10, 10 and 10; brass, 75; round head, iron, 80; brass, 70; coach, 67½ per cent.

Stove Pipes—25 and 2½ p.c.

Terne Plate — I. C., $9.25; I. X., $11.25.

Tin Plates—I. C., charcoal, 20 x 28, full box, $9.75; ½ box, $5.13; I. X., full box, $11.75; ½ box, $6.13; I. X. X., full box, $13.75; ½ box, $6.62½; 20 x 39, I. C., full box, $15.00; ½ box, $7.75; I. X., full box, $17.00; ½ box, $8.75.

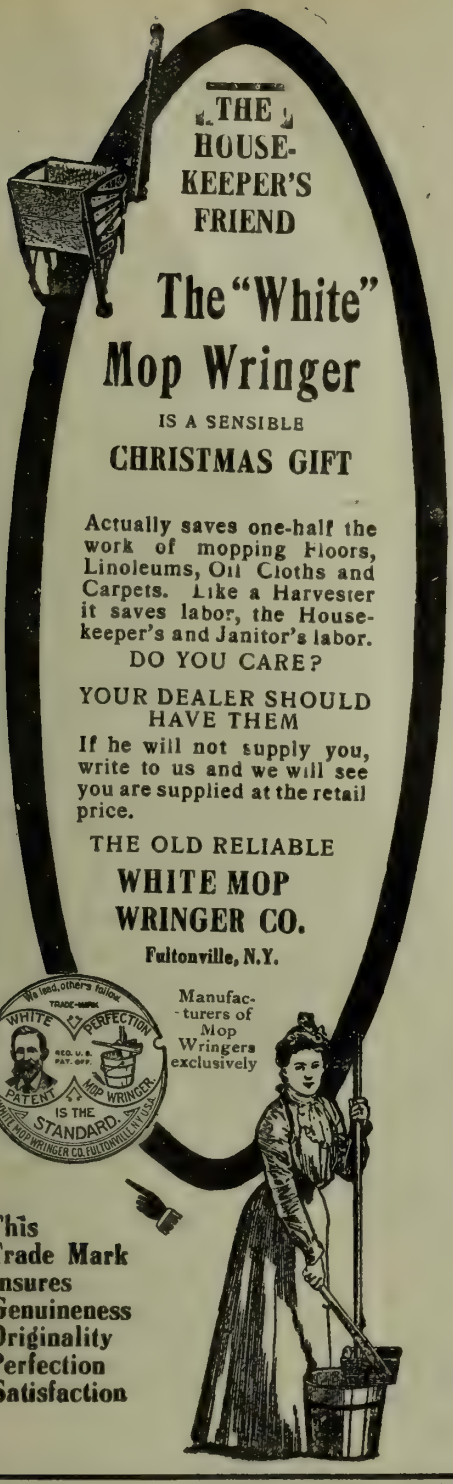
Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 33 1-3.

Wire—Barbed Wire, 100 lbs., $3.05; plain twist, $3.40; staples, $3.00; annealed wire, $3 base; oiled, 10c extra; bright iron, $3.20 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

Paints and Oils.

Paints and Oils.—The ordering just now for full lines is very light, and although travelers have sent in good orders recently for spring shipment, the trade is beginning to weaken again until after the holiday season. Most of the travelers will be in early this week, and only a few special orders may be expected within the next ten days. Up to the present time, putty, glass and varnish have been the leading features, and there seems to have been no particular dullness in the interior finishing. Putty is selling at $3.15 in barrels, and $3.40 100 lb. cases.

Linseed Oil.—Although there was a slight weakness last week in the linseed oil in the East, before the Western market was affected, the markets elsewhere reverted back to the old figures with a stronger tendency than ever. There is a dearth of supplies, and there seems to be no activity on the part of the producers, as the seed is very scarce and going higher. At present the demand is light, but there is little moving for immediate shipment. The price is maintained at $1.15 for raw, and $1.18 for boiled.



Turpentine. — The market continues stiff on Turpentine, as stocks everywhere on the continent are low. There is a good stock of supplies on hand locally, however, and after the first of the year it will not take long for these to move out. Local jobbers anticipate higher prices. The figure to-day is $1.10.

White Lead.—There is a feeling here that the white lead market will have to be advanced next season. In the light of this fact some good orders are being sent in for present prices. Quotations at present are $5.50 to $6.50 according to the brand.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 23c; Searchlight, 21c; Red Rose, 25½c; Keystone Special, 18½c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

CATALOGUES.

1910 Gillettergram. — The Gillette Safety Razor Co. of Canada, Montreal, have been carrying on a most agressive holiday advertising campaign during the holiday season, both in the trade press and in the daily papers and magazines. To top off the campaign a "Gilletergram" was sent to thousands of retail dealers, emphasis being made upon the fact that the Gillette Company had done their part, and it was now up to the dealer to reap the benefits of the advertising by the exercise of salesmanship over the counter, in bringing the goods to the attention of customers, and urging their sale as useful and practical gifts.

TALKS ON PAINT SELLING

No. 6

In the interest of good sense, not to say strict integrity, do not be misled by the phrase "Pure Paint."

There is no more meaningless phrase in the language than this. As well talk of a "Pure House" or "Pure Clothes."

Only a single element can be spoken of as pure. Paint is a combination of many elements. While each of these materials may be individually spoken of as "Pure," their combination eliminates the possibility of a single standard of purity. Thus the phrase means nothing.

The Sherwin-Williams Co. places a standard of purity on each of the raw materials used in its products, which, in combination with the formulae that are based on more than forty years' varied experience, has resulted in a line of paints and varnishes whose fine quality becomes evident to every user.

Is the Sherwin-Williams Agency still open in your locality?

Stoves and Tinware After the Holidays

It is Possible to Make Good Sales in Heating Goods Immediately After the Christmas Rush — Offer Inducements From Odd and Left-Over Lines—A New Year's Resolution Worth Taking.

"What do I do about the stove sales after Christmas? Practically nothing. We can't sell stoves at that time of year in this locality. They may do it in other places, but local conditions forbid it here."

The above answer would be given by dealers in a hundred and one different sections of this country, if the question were propounded to them. They would tell you that local conditions were peculiar—altogether different from any other locality. What was possible elsewhere was not possible there.

When asked why he did not strive to sell stoves in January by advertising his stock, a dealer in heating goods replied: "There is no use advertising then. People never buy stoves at that time of year."

If this statement were turned around to read, "People never buy stoves then because I do not advertise," the true explanation would be given for the slackness of business at that period of the year. Stoves can be sold all the year around, if the dealer has the energy to pay constant attention.

There is no reason why the trade should not be fairly brisk during the month of January. The winter is only just settling down into its steady stride, and many households which need new stoves are still unsupplied. If left to themselves, people will struggle through the winter with a heater or a range which has outlived its usefulness. Timely advertising will bring many orders at this time of year.

The Annual Stock-Taking.

Stock-taking is a necessity in the stove line as well as in hardware or any other mercantile branch. The stove dealer will not likely find his inventory a very difficult one to make, no matter how extensive his stock may be. In the case of the hardwareman who handles stoves, that branch will be included with the rest of the store goods in the stock-taking.

A Preliminary Sale.

The reasons which are cited against the holding of pre-inventory sales in hardware lines do not hold good when it comes to stoves. It does not require any effort to find what stock there is on hand. A merchant can generally count what he has in the store without moving from his office. Furthermore, there are no "dead" lines in stoves, no odds and ends. At least, there should not be anything of that kind; a dealer who would allow stoves to remain in his store until they became so out of date as to be hardly salable would be sadly lacking in progressiveness.

An Offer of Inducements.

In several instances, hardwaremen have secured good results by offering inducements. Their plan was to bring on the stove sale during the first two weeks of January, and to pick out some line of hardware goods to give with each purchase. For instance, the purchaser of a stove would receive a razor, a carving knife, a lamp, or some other article of sufficient value to serve as an inducement. It was always found possible to secure the necessary goods to give as premiums by going over one's hardware stock and selecting articles which were still good, but which had been in the store for some time—the class of goods, in fact, which the merchant invariably endeavors to dispose of at that time of year.

Prepare for Sale.

"January sales can be made very successful," says the advertising manager of an Ontario stove company, "by a course of tacit preparation. Stoves should not be allowed to drop out of sight during the Christmas season. They should not be relegated to the background entirely, and the salesmen should take opportunities to call the attention of customers to them.

"It is not likely that many sales will be made during the Christmas rush, but these hints will be borne in mind by callers at the store. After Christmas is over, people will have more time to think of practical, every-day affairs, and they will then turn over in their minds the "stove hints" thrown out by Jones & Co. If the line is allowed to fall completely out of sight for a month or so, it takes time and effort to revive the interest of the public."

This "preparatory course" should be persisted in right through the Christmas season. As soon as the holidays are over, active steps are in order. Bring the stoves to the fore, advertise them, and give display space in the windows. The campaign must, of a necessity, be "short, sharp and decisive," because stock-taking should be started not later than the middle of January, and special attention cannot be paid to any particular line of goods during that strenuous period of the year.

Feature Tinware.

In connection with the stove sale, it would be wise to feature tinware and kitchen utensils. Interest even in such practical goods requires stimulation during the early winter months.

It is surprising what can be done once interest is aroused. A Brantford firm makes a point of holding a kitchen utensil sale early in February each year. Their 1910 effort in this line was backed up by a brisk advertising campaign, and resulted in the sale of $500 worth of goods—a most surprising volume of business, considering the nature of the goods sold, and the season of the year.

There is no locality where it is not possible to sell stoves in January—or at any period of the year, for that matter. Human nature is the same everywhere. Stoves are needed in all homes, and they can be sold at all times, if the local dealers know their business. There is no trade done in some towns except in the fall, but it is not due to peculiar conditions; it is due rather to peculiar dealers. They only try to sell at the one time, and accept the situation resulting from their own slackness as the inevitable consequence of influences beyond their control.

Let every "unprogresssive" include among his list of New Year's resolutions one to endeavor to make every day of the year a stove selling day, beginning with January 2, 1911.

PROGRESSIVE METHODS.

Get the habit of advertising. Forget the old saying, "Goods well bought are half sold." There is a new saying now that was unheard of two generations ago. It is, "Goods well advertised are as good as sold." This is worth thinking about, and even more than that; it is worth putting into practice.

The ultra-conservatism of a merchant will never make him progressive; therefore success is impossible in this age, because new ideas have come into vogue. We cite as examples that tomatoes are now being sold by the pound, and eggs soon will be. Changes just as radical have occurred in the paint business, and others are likely to follow.

The selling end of a business is where the greatest brains of the dealer are required. Time, forethought and carefully prepared plans are necessary. These cannot be accomplished in a minute. The reason so few succeed is because the majority fail at this point.

The road to success is: Talk, display and advertise goods of quality. Set the right profit, combined with a clean, up-to-date store.

FROST-BITTEN PAINT.

With the winter about to set in, dealers should exercise great care when they sell paint to the consumer for outside use, to warn him against painting if there is any chance for frost or moisture to get into the paint before it has "set." All outside work should be stopped from one to two hours before sundown. Care must also be used that too much drier is not put into the paint at this season. Painting had better be postponed a week, rather than spoil the job with haste.

If work is under cover, or only slightly so, frost is not likely to affect it. Painters, of course, watch such conditions to some extent, but the amateur is ignorant of these little things that cause big trouble.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

Loose-Leaf Books as Office Time Savers

Advantages Claimed Over Bound Books—Disadvantages Enumerated in the Card Ledger—This System Constitutes a Perpetual Ledger, Says Writer—Only One Book Should be Used When Transferring From Bound to Loose-leaf Book.

By Howard R. Wellington.

It is a well recognized fact that the bound book is now a record of the past, only the very conservative houses still maintaining a record of this nature. We believe we are safe in saying that there is no place to-day where a bound book can be used which cannot be better filled by the use of a loose-leaf book of modern type. Strictly speaking, there is actually no difference between a loose-leaf and a bound book. Bind the loose sheets in a binder and lose the key—you then have a bound book. Having disposed of the key, it would be necessary to tear the sheets out in order to remove them, and this can be done with any bound book.

A loose-leaf book may be used in the same way as a bound book, and the same things may be done with it as with a bound book, but in addition, there are a hundred and one other things which may be done which it is impossible to do with the bound book.

One Objection Over-ruled.

But one objection has been raised to the loose-leaf system, especially the ledger, and that is the possibility of the sheets becoming lost or misplaced. This is quite possible, but similarly you could lose five and ten-dollar bills from your cash drawer, as we do not consider it necessary to bind these. With ordinary care it is impossible to misplace or lose a ledger sheet. The term "loose-leaf system" applies to the binding only as there is really no such thing as a loose-leaf system, but it simply means that the sheets may be removed and inserted at the will of the bookkeeper. The ledger is virtually a bound book, except to the person who has the key.

Transposing Sheets.

Probably the most important feature in a loose-leaf ledger is the advantage gained by the transposing of certain sheets, thus having at all times a ledger which is correctly divided or apportioned. For instance, in a bound book, when commencing a set of books, it is necessary to lay out a plan roughly as to the division of the ledger into such accounts as sales, purchases, impersonal accounts, etc., and very often one of these sections overlaps the other so as to mix the accounts, rendering it necessary to continue with this incorrectly-divided book or open a new ledger, the latter being an unusually heavy task, as any bookkeeper will admit. With the loose-leaf book, there never need be a transfer of records from place to place, when the space set apart is used up.

Opening a New Ledger.

Once the initial expense is made, the loose-leaf ledger will prove to be less expensive, as a bookkeeper never has to open a new ledger, simply inserting new sheets as required and filing the old sheets in the same order in a transfer binder; in other words, the ledger is perpetual.

Then again, a ledger keeper becomes familiar with the location of each account in the ledger, and a vast amount of time is saved in posting, as each account remains permanently in the same place.

Loose-leaf records should be used wherever it is desirable to preserve any information for future reference, such as prices, quotations, due dates of drafts and notes, appointments, etc. Especially for temporary uses is the loose-leaf valuable, as the records when of no further use, may be taken out and more recent information of value, inserted without affecting the book in any way.

The Binder.

There are hundreds of binders for loose sheets on the market to-day, some good, some hardly worth the name. In purchasing a binder we should be certain that it will hold the sheets in such a way as to be permanent until the key unlocks the binding device. There must be no possibility of the loss of a sheet through not being bound securely. The binder should be securely locked so that only the person in charge can operate it. This is just as important as the locking up of cash and if regarded as such, there will be no trouble with the loose-leaf ledger.

Another feature to be remembered in purchasing a binder is that the sheet, when once the binder is unlocked, shall be easily detached or inserted, as some of the devices in use are very cumbersome in this respect.

The sheets should present a perfectly flat surface when properly secured, such as the sheets of a high-grade bound book, the latter being the most expensive bound book on the market.

Leaf.

In making a change from a bound book system to a loose-leaf system it is well to adopt only one book at a time so as not to upset the work in any way. The change may be brought about so gradually in this way, that it will not affect the work of the office in any way, and, besides, if there is any doubt about the advantages of the loose-leaf system, it can be easily demonstrated that there are a great many points in its favor.

Use of the Carbon Sheet.

We advocate strongly the use of the carbon sheet where possible, especially in the invoice department—there are a hundred and one different ways of invoicing goods, but no record is better than a carbon copy, showing exactly what was sent the customer. The use of a typewriter even in small stores will save a vast amount of time, besides producing a much more satisfactory result.

Value of Loose-leaf Over Cards.

A loose leaf or a card must be accessible, and once a drawer containing cards is locked for the purpose of securing the cards against being misplaced, it is impossible to use the cards for reference.

It is inconvenient to read the contents of a card unless taken from the drawer—it is inconvenient even to address the names for mailing purposes; in order to make a memo or post an item it is absolutely necessary to remove card from drawer. When replacing the card it is quite easy to misplace it, causing no end of trouble, as a misplaced card is of very little use until located.

WILL HE COME BACK?

When a man comes into your store and asks for a certain article, and you let him go out with the bald statement, "We don't keep it," what sort of an impression does he get of your store?

Does he ask himself, "Why don't they keep it?" And then, if he proceeds to answer it, do you suppose the reply will be especially favorable to you?

Will he wonder if your failure to have that article is due to want of enterprise on your part?

Will he wonder why you did not offer to get it for him?

Will he wonder why you did not tell him your reasons for not having it in stock? Have you put a hook in him with which to again draw him to your store when he wants something else?

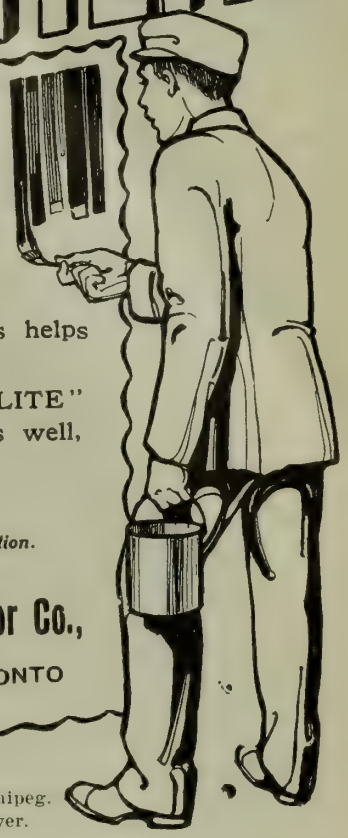
You will never lack opportunities to make a second sale to the customer who is treated courteously at the time of the first sale.

No. 40

PLANNING BEFOREHAND.

With the turn of the year comes a period of time when trade eases off in the natural course of events allowing the dealer the best opportunity in the whole twelve months to go through his stock carefully, and to plan out his general campaign for the year. The man who puts off this work until a later date not only finds that it encroaches upon the time and attention that he should give to his daily trade, but that in the rush things are done in a perfunctory manner. The inventory is hurried, needed improvements in the fixing of the stock have to stand over, while the plan of campaign naturally becomes a hurried one, and the propaganda lacks force.

In these days of reputable paint lines the onus of increasing trade lies on the merchant, and not on the paint line itself. Presuming there was only one good paint line and many bad ones on the market the dealer could sit down, and watch the trade roll in. But as conditions are very different it is the merchant who must set the pace. Success depends upon the way he handles the paint prospects of his district, his advertising matter, his windows and interior displays, his stock and his general treatment of his customers. The dealer who displays the most enthusiasm in these directions; who takes the lead in encouraging the buying of paint; gets to the front. Therefore the man who sits down and thinks out most carefully the plan of campaign he will adopt during the comin twelve months starts with a great advantage.



Take the inventory. Apart from the necessity of going through the stock to find out exactly how the business has emerged from its fiscal year, the inventory is the best of guides as to the future buying. Done carefully the dealer can gauge exactly the trend of trade in the past, and the prospects for the future. He is therefore in the best of shape to order confidently from the manufacturer, and to stock heavier in some directions and vice versa in others. A dealer's success depends a great deal upon the comprehensive character of his stock. If he can so judge the coming demand that he can supply all requirements for any particular color or specialty without carrying too heavy a stock then he is in a most happy position. And so it is with the other efforts that the merchant makes to secure the lead in his district. The man who has carefully thought out the best plan of following up paint prospects stands a much better chance than he who starts on a

ELASTILITE

DEALERS can handle this varnish best. It covers so many kinds of work so perfectly---inside and outside---that it gives satisfaction to all types of customers. This helps the dealer's business.

For highest class trade "ELASTILITE" will give good satisfaction. It brushes well, flows well, holds its finish.

Write for price list and special proposition.

We wish our many Customers and Friends a very Merry Christmas and a Happy and Prosperous New Year.

The Montreal Rolling Mills Co.
MONTREAL

programme of some kind without any previous consideration. Presuming this following up is done by letter. Does it not stand to reason that the merchant who has carefully thought out the most powerful arguments to use stands better chance of swinging trade than the one who just dashes off something before the store closes for the night.

It is the same in the window display, in the newspaper copy, and in the handling of the manufacturers' advertising matter. The man who gets ahead is the man who sits down and thinks and plans out the most complete campaign of which he is capable. What he has done in the past should not be enough for him in the future. He should double his activity, for one circular sent out last year two should be sent out this, and so on. The man who is content with his old programme loses ground.

PAINT AND OIL MARKETS

MONTREAL.

Dec. 23.—The markets continue to show the signs of the times, and beyond a quiet sorting up trade there is little life to business. A large number of travelers are now off their grounds and this of course makes things very slow. Booking for spring shipment shows up well, and confidence is general all the way round. Prices are unchanged this week. Staple lines are firm but sluggish in character. The linseed oil situation is the same and supplies are short with prices the same as last week. Turpentine looks billed for an advance early in the new year.

Turpentine.—Turpentine is unchanged. The demand is quiet but the firmness of the primary markets keep the local figure firm. Indications point to a strengthening tendency early in the new year. We quote: $1.02 to $1.05.

Linseed Oil.—There is no change from last week, and linseed oil prices are firm. Flax seed is still as scarce as ever, and supplies of oil are hard to procure. In fact if the demand were heavier there is little doubt that prices would advance. We continue to quote: $1.06 to $1.10 for raw and $1.09 to $1.13 for boiled.

White Lead.—Good booking continued to be done in white lead for next year's delivery. Immediate delivery is steady, showing that work is still being done in the decorating line. The market is firm and we quote around $6.25 for small lots with a shading of some 25c to 30c for large lots.

Varnish. — The demand, especially from industrial users is very good showing that conditions generally in the different factories must be active. Coach, piano and implement varnishes are selling most prominently.

Putty.—There is but a quiet demand for putty. Prices are firm, with a good undertone. We quote: 100-lb. drums, $2.60; bladders, in barrels, $2.85.

TORONTO.

Toronto, Dec. 23.—The situation is quiet here. Most of the travelers are off the road and the demand is quite nominal in most lines. Local houses are in many cases still engaged in stock-taking and no complaint is heard on the score of the lack of demand.

The chief topic of discussion is with respect to the probable spring quotations on linseed oil. The situation is being watched with interest locally.

Turpentine.—During the past week there was a slight decline in price at Savannah, but toward the end of the week prices again came up to the high point. Latest reports from that market are to the effect that the coming week may reveal still higher prices. The quantity of spirits of turpentine received there last week was 2,000 barrels short of the amount exported, which reduced the stock on hand to a much lower point than is usually found at this season. Supplies coming forward from now till the latter part of March are expected to be light.

Linseed Oil.—The market is in an unsettled condition in regard to linseed oil. It is not expected here that it will be possible to say definitely what prices are to rule, for some time yet. It is stated by one authority that in the United States the flaxseed crop is 12,000,000 bushels short of normal and that the bulk of the flaxseed grown in Canada has been bought up by American dealers at a high price. The crop in South America is now approaching the ripening season and estimates of the probable size are rife. In many quarters it is asserted that the Argentine crop will be large and this would naturally have an effect on the market. The situation locally is affected by the fact that Canadian crushers were conservative in their purchases this year, resulting in an absence of surplus stock in this market. "Conditions are unsettled," said one dealer, "and it is impossible to say at the present with any degree of certainty that prices are likely to be maintained."

Rosin.—Rosin remains stationary, the supply coming forward being quite equal to the amount exported. While the stock on hand is only about half the quantity often held at Savannah, there is sufficient to supply present demands.

White Lead.—The demand is small, prices ranging around $6.15.

Putty.—There is still some activity in putty but it is not very pronounced. Standard quotations stand: Bulk in casks, $2.20; in 100-lb. drums, $2.55; in 25-lb. drums, $2.65; bladder in barrels, $2.75. Pure putty prices remain the same; bulk in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.00.

Petroleum.—There is quite a brisk demand in all lines, with prices steady.

Look Ahead AND Assure Future Profits!

If you are intending to go out of business shortly, this is not important — but if you intend to keep right on, it is necessary now to lay the foundation for your sales in 1915.

If you sell a man good paint this year, it is true that it will not need renewing so soon as an inferior article, but when it does he will come to you. Moreover, in the meantime, he will probably get some of that same good paint from you for another job.

New York Cleveland Chicago

TO INTRODUCE NEW PAINT.

Pinchin, Johnson & Co., London, Eng., whose new paint factory on Carlaw avenue, Toronto, was illustrated in Hardware and Metal some weeks ago, are now arranging to place their goods on the Canadian market, and their traveling salesmen will soon be calling upon the retail trade.

Pinchin, Johnson & Co., whose business was established at London, Eng., in

James E. Ebersole, Toronto, President of Pinchin, Johnson & Co., (Canada), Limited.

1834, are confident of building up a large trade for their Minerva Paints and Varnishes, as is evidenced by the erection and equipment of such a modern plant.

The Canadian business will be known as Pinchin, Johnson & Co., (Canada), Limited, the president being James E. Ebersole, a Canadian with a wide experience in the paint and varnish business in the United States, he returning to Canada a couple of years ago to become general manager of the International Varnish Company, Toronto, whose plant adjoins the new paint factory on Carlaw avenue.

STOVE PRICES UNCHANGED.

At a meeting of the stove manufacturers' association held in Toronto on Dec. 20, it was decided that prices for 1911 would be unchanged from those ruling in 1910. The season has been an exceptionally good one for all the Canadian manufacturers, and stocks at the foundries and in branch warehouses have been practically cleaned out. The early setting in of the cold weather was a great assistance to retailers in disposing of their stocks, and many had to place repeat orders with manufacturers, some of which it was impossible for the foundrymen to fill. The iron market is holding very firm in Canada, and as labor continues scarce, prices of stoves and ranges will be firmly maintained in 1912.

1911

BEFORE closing the current year, The Canada Paint Company desire to convey to their numerous clients throughout the Dominion of Canada, in Great Britain, and the United States of America, their warm appreciation of the STRONG SUPPORT and expressions of GOOD-WILL received during the year 1910.

THE turnover or output for 1910 has been, BY FAR, the heaviest in volume, and the most satisfactory ever experienced.

THE Canada Paint Company thank you most sincerely for such a GENEROUS FLOW of ORDERS, and although acute market conditions have compelled them to raise all prices to a higher plane, the VALUE has been maintained in all lines, and the advances have been CHEERFULLY PAID by their customers, who have so loyally given them their confidence.

ALL the departments in the works at Montreal, Toronto and Winnipeg are running FULL TIME, preparing for the year 1911, and The Canada Paint Company respectfully solicit early bookings to avoid congestion in the Spring.

MAY YOU HAVE A VERY MERRY CHRISTMAS!

THE

Mixed Paints

It is astonishing to what an extent the mixed paint trade has grown in Canada, in fact throughout the world. This is due very much to the help of the agents in the many stores throughout the country, keeping always in stock a first-class brand of pure paints.

Are you doing it?

Doing what?

Keeping a first-class brand! Let us send you some of the cards and catalogues about

Ramsay's Paints

the pioneer liquid paints of Canada. Then when the time comes to buy for your big 1911 trade you will be ready. Don't put it off and keep going along the same old way. Learn about the leader, and get ready for a stock. .Remember 1911 will be big with possibilities for the pusher of pure goods.

STAR HACK SAW BLADES

Apparently no one questions the superiority of Star Hack Saw Blades and at our present figures there is absolutely no room to question the price.

They are equally good in hand frames or power machines. When used in a machine the feed should be adjusted to suit the stock being cut. The softer the stock the lighter the feed. Such treatment will prevent clogging of the teeth. Open your eyes wide and look at this list of prices:

6	7	8	9	10	11	12	inch
30	32	34	38	42	46	52	cents per dozen.

Notwithstanding the great reduction in prices, the quality of Star Blades has been improved.

Do you believe in— the "Horse Shoe" Fairy Tale?

Miracles do not happen in business, yet—lots of otherwise sensible men believe in Luck.

They will tell you that things happen—that the successful man is the lucky man. But getting down to brass tacks, you know perfectly well that nothing happens.

You know that success is the result of certain causes—

Causes so obvious that believers in the "Horse Shoe" fairy tale pass through life without noting them.

90 per cent. of the successful Hardware Merchants do not believe in luck—

They use "Buying Sense" instead,

And stock the lines which mean profit and reputation for them—**International Varnish Products.**

"ELASTICA" Floor Finish—the one perfect floor finish—the durable, beautiful, waterproof finish that never turns white or cracks.

"LACQUERET"—the Household Beautifier—a prime necessity in every home.

"SATINETTE" White Enamel—the enamel that stays white—made for both interior and exterior work.

FLATTINE FINISH—the finish that produces a full dead or flat appearance **without the labor and expense of rubbing.**

KLEARSTONE Stains (Acid or Oil)—the perfect wood stains.

Every **International product** you sell adds to your reputation and increases your bank balance at the same time.

N.B.—All International Varnish Products are sold in full Imperial Measure cans.

WHAT INTERESTS THE DEALER?

To know that the Quality is right.

To know that his Profit is right.

To know that the goods are popular and easily sold.

We know the quality is right, or we would not be spending a comfortable fortune each year in advertising.

When you compare our discounts and lists with other varnish manufacturers you can determine whether your profit is right. The profit, after all, is what is necessary to keep you in business. We unhesitatingly state that there is more profit on our line than on any other you could buy.

Goods that are popular are easily sold. We are judiciously spending big money advertising to make our line popular. By selling a well advertised article you have back of you the name and reputation of the maker for quality.

By combining your JAP-A-LAC and varnish purchases, we have a proposition to offer, which yields a handsome profit.

All we ask is an opportunity to send you our lists and explain our proposition.

Paint and Varnish Removers.

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	Name of Brand.
The Sherwin-Williams Co., Montreal, Canada.	**"Taxite"**
International Varnish Co, Ltd., Toronto, Canada	**"Klensa"**
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	**"Expedite"**
British American Paint Co., Victoria, B.C.	**"Bapco"**
Mount Royal Color and Varnish Co., Montreal, Canada	**"Scrape-off"**
James Robertson Co., Ltd., Toronto, Canada	**"Robertson's Paint and Varnish Remover"**
Sanderson Pearcy Co., Ltd., Toronto, Canada	**"Devolite"**
Stewart & Wood, Toronto, Canada	**"Solvo"**
Martin-Senour Company, Ltd., Montreal, Canada	**"Martin-Senour Paint and Varnish Remover"**

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

HOLLOW POINT BULLET

A NEW FEATURE IN METALLIC AMMUNITION

The hollow point increases the shocking and killing power of the bullet because of the greater mushrooming qualities over the solid lead bullet.

HOLLOW POINT BULLET
(Before Firing)

HOLLOW POINT BULLET
(After Firing)

SOLID BULLET
(Before Firing)

SOLID BULLET
(After Firing)

.44 CALIBRE

Note the cross section of the unfired hollow point bullet and its mushroomed appearance as compared with the solid bullet after being fired. Sportsmen can increase the efficiency of their rifles and revolvers in game shooting by using hollow point bullets at a trifling added cost over the old solid bullet.

UMC hollow point lead bullets come in the following sizes:

.22 Short, Hollow Point, Black and Smokeless.
.22 Long, Hollow Point, Black and Smokeless
.22 Long Rifle Hollow Point, Black and Smokeless.
.25 Stevens, Hollow Point, Black.
.25 Stevens Short, Hollow Point, Black
.32 Winchester, Hollow Point, Black and Smokeless.
.38 Winchester, Hollow Point, Black and Smokeless.
.44 Winchester, Hollow Point, Black and Smokeless.

"Ontario" Lantern Footwarmer

Have YOU Stocked Any?

The results of our Advertising have been immense. Every mail brings enquiries from consumers which we often have to answer direct, no retailer in the neighborhood being on our list!!

Enquiries from Consumers All Over Canada fully prove how this Novelty attracts.

FOR SALE BY ALL JOBBERS

Ontario Lantern & Lamp Co., Ltd., Hamilton, Ont.

Cummer-Dowswell Wash Day Labor Savers all have that Exclusive "Something Different"

that interests buyers and makes the line READY and STEADY SELLERS.

For Instance :—

TUBS with NO INSIDE OBSTRUCTIONS, but of large capacity, and an opening full size, providing ample space for wringing operations. Then the inside is CORRUGATED IN CENTRE ONLY, leaving full thickness of stave at top and also where bottom is fitted in, A VERY IMPORTANT FEATURE, as it prevents leakage, as in the case where bottom and corrugation meet, and greatly strengthens both chime and top.

Ideal Low Pressure Power

The LEG HOLDER is Bessemer Steel, grips under chime and is **bolted through** both tub and leg (not leg only), making the tub and leg strong and rigid as a bar of iron.

Then it's the most complete, best, and most widely advertised line of Washing Machines, Clothes Wringers (both hand and power), Churns, Egg Crates and Rotary Lawn Clothes Dryers on the market.

All machines of QUALITY and reasonably priced.

MADE BY

CUMMER-DOWSWELL, Limited, Hamilton, Ont., and sold everywhere

H. Boker & Co.'s 'Tree' Brand Cutlery

Tree Brand are the Quality Kind—the kind that keep your men customers on the satisfied list. They take a keen edge and they keep a keen edge—an edge that gives a clean, close, satisfying shave. Please a man with a razor, and you've landed him for good—he'll call again and often, and will know from experience with Tree Brand Razors that he can't do better than buy Tree Brand Pocket Cutlery, Shears, Scissors, etc. Isn't that sane argument? You know "A pleased customer is your best customer." Tree Brand Cutlery will withstand every test to which it can be rightly put. Designed right, made right, finished right—there's no better Cutlery sold under the sun.

The Hohlfeld Line for 1911

OPPORTUNITIES

IN MIDSUMMER

The Financial Post of Canada

pointed out that some of the soundest stocks were at a very low price and, therefore, attractive. Since that time there has been a general advance—in some cases as much as 10 points. This is an example of many opportunities which come to the reader of *The Financial Post*. *The Post* will keep you in close touch with the stock, bond and real estate conditions in the main centres of Canada; and, in addition, our Investors' Information Bureau makes special reports gratis to subscribers, upon request, on any matter of concern to investors.

The Post **will be sent to any address from *now* until Jan. 1st, 1912, for the price of a year's subscription—$3.00. You get from now until Xmas free. Fill in the form attached.**

The Financial Post, Ltd.
Toronto, Can. _____ *1910*

Please send weekly, to address below, one copy of *The Financial Post of Canada* until January 1, 1912, for which I {enclose / will remit} three dollars.

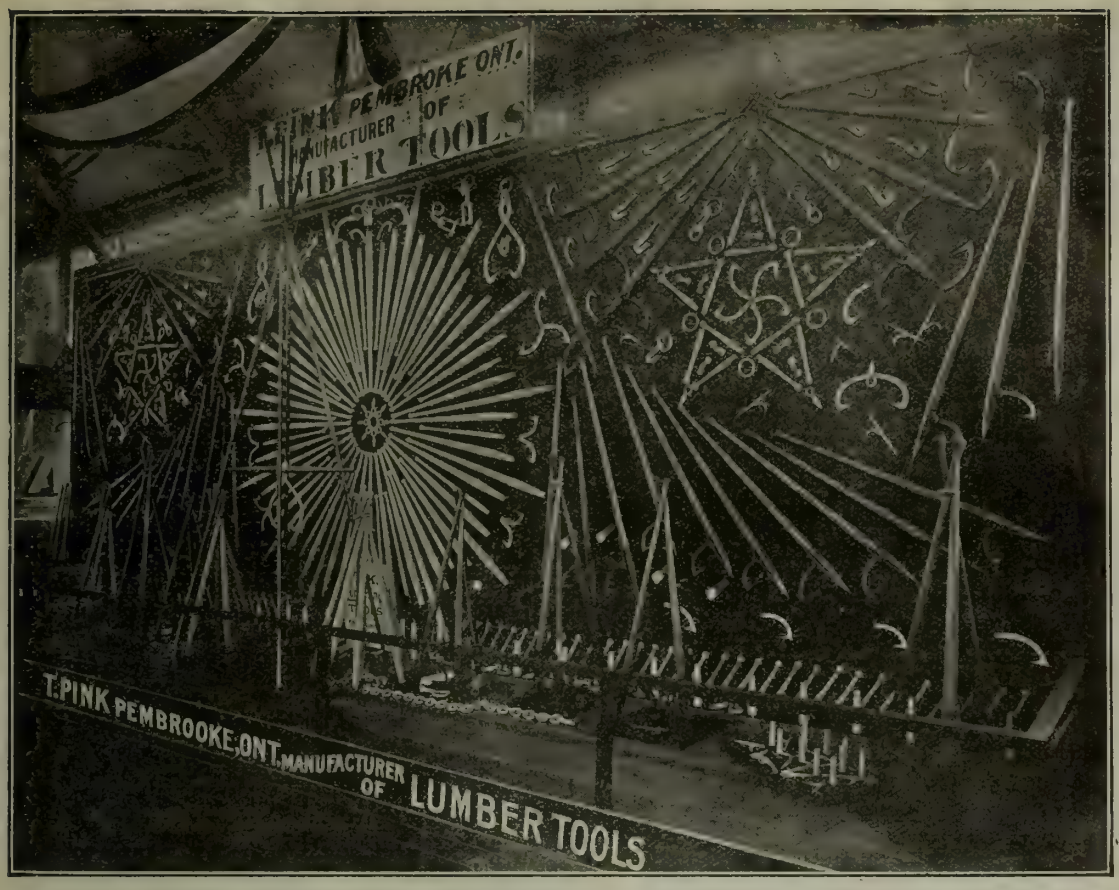
The Financial Post will prove a good investment.

"MONARCH" WIRE FENCE

If you have a call for a cheap bush or portable fence we can supply a "Monarch" perfectly adapted to this need.

The "Monarch" is made in 15 sizes, so you can have one suitable for any purpose, even close enough for hogs. Every wire is No. 9 hard steel, and well galvanized.

The "Monarch" has the best Ring Lock in Canada, and cannot slip nor come loose.



It will sell itself if you have it where your customers can see it.

CONGO
NEVER LEAK ROOFING
The GUARANTEED ROOFING

Congo on Maryland Terra Cotta Company's Buildings—Baltimore, Maryland

We don't suppose you care a rap what Congo is made of—what interests you is *how long it is going to wear.* What it is made of interests us because we give with every roll a *Surety Bond Guarantee,* the like of which no other manufacturer has offered.

Herewith are a few of the features that make it possible for us to guarantee Congo 2 or 3 ply for *10 years.*

It never gets hard or brittle. It never breaks or peels off. It is giving as perfect satisfaction in Europe, India and Australia, where we ship thousands of rolls, as in America.

Congo doesn't run, rot, buckle up or shrink.

The caps, nails and cement which we furnish free, are the best money can buy.

We don't use the old style *tin caps* for Congo, but *galvanized caps* which never rust.

You can satisfy yourself as to its lightness, pliability and wonderful waterproof qualities by a little investigation. As to its wearing properties—we guarantee them. Can any reasonable man ask more? Further information on request.

Every Dealer in Canada Should Sell "Ross" Rifles

Not simply because it is a Canadian-made rifle and the only Canadian-made rifle—but because being of Canadian manufacture it has advantages as well as claims over other rifles.

It can be sold cheaper than any other rifle.—Parts can be secured more expeditiously and at less cost and trouble.

No other rifle has grown so rapidly in general favor, consequently no other rifle has a surer sale.

$25.00 and Upwards.

GUELPH, JANUARY 1st, 1911

INDEX TO ADVERTISERS.—page 70-M

The IRONCLAD *Alarm*

"It Rings to Beat the Band."

IF we placed our IRONCLAD movement in an ordinary alarm case, the chances are it would *turn turtle* within a year. And if it lived to tell the tale, it would be to *tell a tale*—for it would get so *clogged* with dust, it could not tell the *truth.*

But it's CLAD in heavy IRON armor and it can't *keel over.*—It's stocky, sturdy, steady.—If it's *cleaned* every other year, there's *no telling* how long it'll last.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2¾ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.

Stocked by 28 Canadian Wholesalers.

The Western Clock Mfg. Co.,

La Salle, Illinois.

A New Ankle Support

that will help you sell more skates

"PERFECTION"
Steel Ankle Support

The Perfection Support is made of light strong steel with a sliding hinge attachment that permits the wearer's ankle to move forward or backward, but never sideways. It is, therefore, of enormous assistance to beginners, and a great help even to experienced skaters. They are easily attached and the ladies' size is suitable for children.

The Perfection is a brand new idea, but during the short time it has been on the market it has enjoyed an enormous sale.

As the skating season is just beginning send along your enquiry to-day.

The Owen Sound Steel Press Works

OWEN SOUND, ONT.

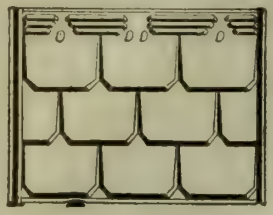
Somebody is Selling "YANKEE TOOLS"

Somebody is Getting the Trade

IF IT'S YOU—Accept our congratulations. You are wise that "Yankee" Tools are as needful to the Mechanic's outfit as a hatchet and saw—that if you cannot hand him the "Yankee" he goes to your competitor and you lose a sale or maybe a good customer.

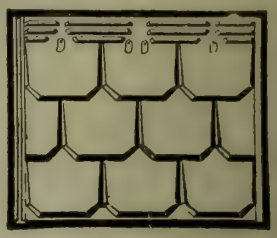
WRITE FOR CATALOG.

IF YOUR COMPETITOR---WHY NOT YOU? You can get more of this trade and ought to have it. We are interested in your getting it. Why not send your advertising matter with your imprint free of expense? Have your jobber send you a sample lot of the best selling "Yankees." There are 35 styles and 75 sizes to select from.



NORTH BROS. MFG. COMPANY

PHILADELPHIA, PA.



The permanent roofing is the one to sell

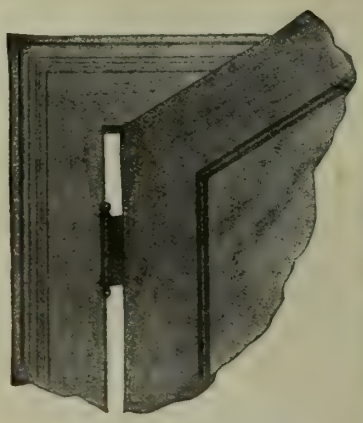
You cannot afford to speculate with roofing sales. One faulty, leaky roof may lose your best customers. Sell roofing you **know** will give absolute satisfaction —roofing that will be in perfect condition 25 years from now.

"EASTLAKE" Metallic Shingles

make a **permanent, waterproof** roof. You can guarantee them. **Actual test has** proven **their quality.** Roofs covered with "Eastlake" 25 years ago are in perfect condition. These goods insure profit and reputation—the **only** goods it pays to handle.

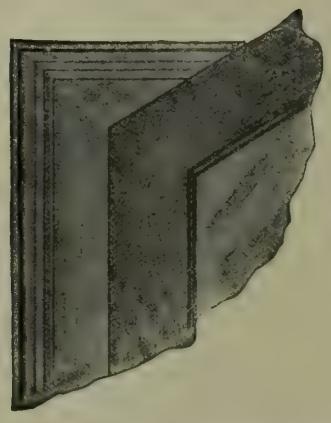
Send us measurements of roofs for complete estimates. Write for illustrated price list No. 4. It will help you make sales.

Manufacturers of "Metallic" Building Materials.



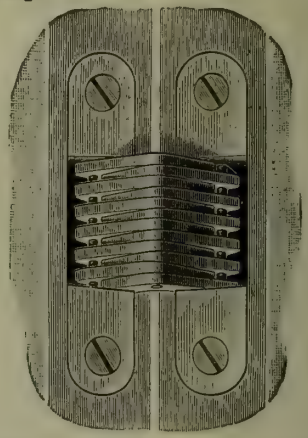
The Metallic Roofing Co Limited
TORONTO & WINNIPEG

2405



Soss Invisible Hinge Co., Limited, 104 Bathurst Street, Toronto

PRODUCTS.—We manufacture the "Soss" Invisible Hinge, protected under patents in U.S. and Canada, and are prepared to furnish same in all sizes, from those suitable for Cabinet Work to such as are required for heavy entrance doors.



COMPARISONS.—There was a time when doors were swung on hinges and fastened by bolts and locks of very crude workmanship. As improvements advanced, the locks were put out of sight, and "Mortise Locks" have been in use in good buildings for many years. The hinge, however, remained much the same, after reaching what is known as the "Butt," until the introduction of the "Soss" Invisible Hinge, which is as great an advance in its way as the mortise lock was over the old-fashioned lock fastened on the outside of the door. The cuts below illustrate the invisible hinge as compared with an ordinary Butt hinge.

Door Mounted with old-fashioned Butt.

Door Mounted with Soss Invisible Hinge.

Invisible Hinge as it appears when door is open

No. 101, suitable for wood ⅛" to ¼" thick (furniture work.) Will carry a door 3' x 18".
No. 102, same as above, but has square corners.
No. 104, wood must be ¼". Will carry a door 5' x 2' x ¼.
No. 108, wood must be 7". Will carry a door 6' x 30" x 1½.
No. 112, wood must be 1½" to 1¾". Will carry a door 6' x 2' 6" x 1½".
No. 116, wood must be 1¾" to 2½".

STOP HINGES.—We can supply any size hinge to stop at any angle desired, but same must be made up especially and at an extra charge.

STOCK CARRIED.—We carry in stock hinges in sizes as above in Brass, Bronze, Nickel and Oxidized Copper.

Prices on application to all leading Hardware Dealers.

The Thos. Davidson Mfg. Co., Ltd.

Montreal and Winnipeg

When you think of Metal Ceiling, think of "Galt."

Dealer, House-owner and Architect all favor "Galt" Art Metal Ceiling

Ernest R. Beckwith, C.E., architect on this job, says of the goods supplied:—

"Besides being one of the prettiest ceilings I have ever seen, it was exceedingly easy to erect. In fact, most of the work was done by unskilled labor owing to the regular tinsmiths being busy.

The special material made for the stage-front was accurate in detail and satisfactory in every way."

If you want to please your customer and his architect; if you want to build up a business in Metal Ceiling and if you want to make the most money from your metal ceiling work, send your orders and enquiries to

The Galt Art Metal Co., Limited, Galt, Ont.

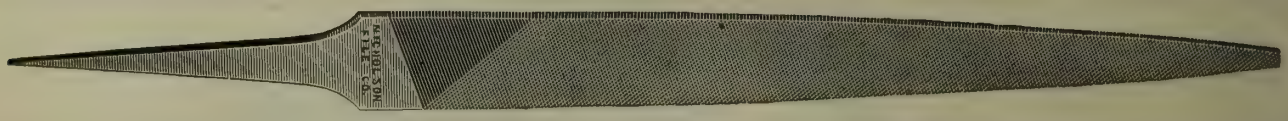
MADE IN CANADA

A GOOD GUN IS A GOOD SELLING GUN



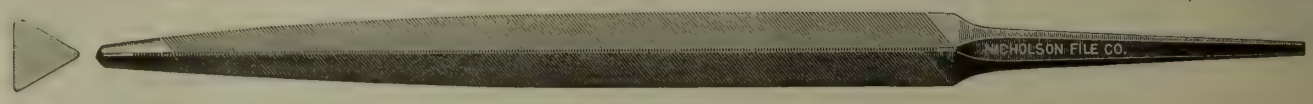
The progressive dealer will want to supply his trade with the gun which combines the best and most modern features in hammerless gun construction.

The Tobin Simplex Gun is designed to meet the requirements of the most exacting buyer. It is sold on a money-back guarantee, and being made in Canada, costs less than imported guns of the same grade.

The Tobin Gun is the strongest light gun, and the lightest strong gun made. The frame and all parts of the action are made of steel drop forging, and the hammers, sears, springs and locking bolts, are of tempered spring steel. Only the best imported fine grain walnut is used in the stock, while the steel of which the barrel is made is that which repeated tests have shown to possess the greatest tensile strength under the strain of excessive loads of nitro-powder.

You should stock the Tobin Gun. Write us for catalogues and information. We can make business for you.

The Tobin Arms Mfg. Co., Ltd. **Tobin Simplex Guns** Woodstock, Ontario



Special Steel—Special Methods
and Long Years of Experience

are the reasons why the files produced by the Nicholson File Co. are well known everywhere as the standard of file quality. These are the well-known factory brands made by the Nicholson File Company in Canada:

AMERICAN ARCADE GREAT WESTERN GLOBE
EAGLE McCLELLAN K & F J. B. SMITH

Sell these and you sell the best.

Nicholson File Co., (DOMINION WORKS) **Port Hope, Ont.**

Don't Experiment

with unknown brands of Safety Razors.

Our

Forged Blade "Pioneer"

is the only Safety Razor made of doubly refined Sheffield Steel, and has held its place in the front rank for over 30 years by sheer merit. It will last for years and will cost your customers next to nothing for repairs. The result is that you earn your customers' goodwill, and get a reputation for handling only high-class goods.

Make Good Profits Carrying Our STEEL SIDINGS

There is a good margin of profit for you in handling PRESTON Steel Siding. That is a good reason why you should not only carry it, but give it a push.

It is an easy line to sell, because it has so many strong selling points. For one thing it is damp-proof. This will be appreciated by those who desire a dry house. It is fire-proof and practically lightning-proof, which appeals to those who want safety and a low insurance rate.

Large range of handsome stone and brick patterns suitable for many different styles of buildings

Write for all the selling points, and our interesting proposition. We've a lot to tell you that it will benefit you to hear.

"IMPERIAL" ANTI-FREEZING WINDMILL FORCE PUMP

With improved vertical three-way, for tubular or other wells.

Six, eight and ten-inch stroke

In Fig. 18 we have aimed to embody every good quality that is essential to a perfect pump. It is light in weight, symmetrical in design, mechanical in construction, and for beauty, strength and finish is without a peer. We are thus enabled to offer the trade a single-acting, underground three-way pump that covers the entire field, and enables the dealer to fill any order, and does away with the expense of carrying from three to five different styles of pumps in stock, different sized flanges are all that is necessary Always fitted with 1¼ flanges unless other size is specified.

THE CONNOR BALL-BEARING WASHER

With the hinged cover now used on this Washer it is no longer necessary for the operator to place the cover and rubbing board dripping wet onto the kitchen floor. With this hinged rubber and cover the water drips back into the machine. It is easily handled. And other features of this machine are a detachable tub; no iron running through the bottom of the tub; Cypress Tubs: nicely finished Ball - Bearings and Motor Springs do most of the work.

Have you the agency for this washer? If not, write at once for sample, prices, terms, etc. You will find it the most satisfactory machine you ever handled.

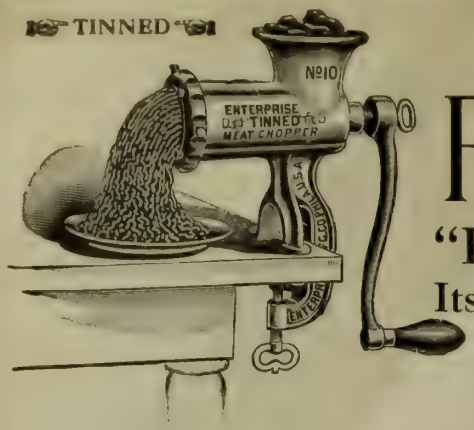
Make Money From Good Pumps—Profit

Unless a metal pump is made just right it will leak at joints or valves.



"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

R. McDougall Co., Limited
GALT, CANADA

"ENTERPRISE"

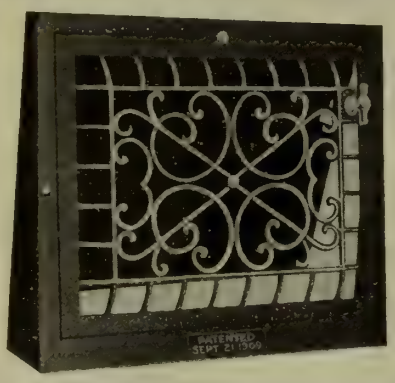
FOR making sausage there is *nothing* equal to the "Enterprise" Meat and Food Chopper.

Its four blade steel knife revolving against a sharpened perforated steel plate cuts exactly like a pair of shears. It *cuts* (don't tear) more meat in less time and is much better than any chopper made.

You know the quality—so do the majority of your customers.
Made in 45 sizes and styles for hand, steam and electric power.

"Enterprise"

Sausage Stuffers and Lard Presses



The patented corrugated spout prevents air entering casing—assuring preservation of the sausage.
Now is the time to feature these goods.

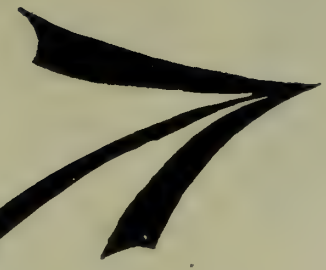
Here's the Range to Feature!

and it is just as good as it looks. The



CHAMPION RANGE

is rendered specially attractive because of the CHAMPION GRATE with the cross-wise, non-warping bars. This grate leads all others because it is more open and more easily shaken, and makes the "Champion" a very favorite range.

Are you selling the "Champion"?
Send for catalogue to-day.

D. J. BARKER & COMPANY
PICTON, ONTARIO

Store Cleaning Time

The Christmas rush is over and hardware merchants will find the next month the most opportune time to make those changes in their stores which they have probably been contemplating for some time.

It will pay you to get your store in good shape before the Spring rush commences.

If you want a new show case or counter and wish to dispose of your old one first write out a brief description of it, insert in HARDWARE AND METAL and you will no doubt find some dealer between Halifax and Vancouver who is looking for a chance to buy at a reasonable figure the very articles you wish to sell.

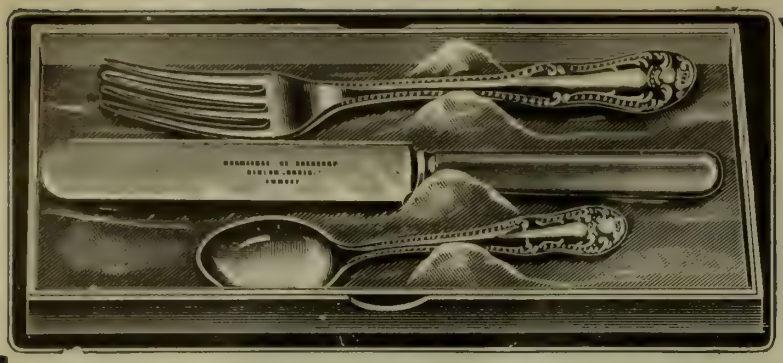
Do you want to buy a new desk? A "want ad." will find some dealer who is re-arranging his store and is anxious to dispose of such a desk at a bargain price.

Have you a set of tinner's tools for sale?

Do you wish to sell some old shelf boxes in order that you may replace them with new ones?

Have you a screw cabinet, a wire cloth rack, a rolling step-ladder and all those fixtures which make your store look neat and enable you to give your customers quick service?

There are a hundred little services our "want ad." department can perform for you.



Rates (payable in advance)

2c. per word for 1st insertion.
1c. per word for subsequent insertion.
5c. additional each insertion when box number is required.

Write or phone our nearest office.

GENUINE ORIGINAL COLD BLAST LANTERNS

WRIGHT'S

Number 4

Cold Blast Lantern for 1911

WHILE we are satisfied that the success of our efforts during the past year to produce a perfect Cold Blast Lantern have met with the complete approbation of our friends, we do not intend to cease our endeavors while there is room for further improvements.

The 1911 Cold Blast Lantern
Retinned Finish,

Rubber Crystal Globe and with Brass Burner, which we shall offer next year, will surpass all previous productions.

It will be to your interests to see our representative before placing your 1911 order.
The No. 4 is fitted with

WRIGHT'S RUBBER CRYSTAL GLOBE

No. 4, price per dozen $6.75

WRIGHT'S

Number 02

Cold Blast Lantern for 1911

As the pioneer Lantern manufacturers of the Dominion, we are prepared to satisfactorily meet all foreign competition.

To this end, and for the purpose of meeting the occasional local demand for a cheaper grade of Cold Blast Lantern, we purpose for 1911 to introduce our No. 02, which will be similar to the No. 4, but with plain globe, tin burner, and plain finish—no parts retinned.

No. 02, price per dozen $5.75

KEMP'S MILK CAN TRIMMINGS

COMPLETE SETS

Comprising one broad hoop roll-rim bottom, concave pattern; body hoop 6 inches wide, 20 gauge; top hoop 4 inches wide, 14 gauge; one cover; one pair malleable side handles; one pair steel top handles. If wanted with malleable top handles, 7 cts. per set extra list.

COMPLETE SETS

Gallons	10	15	20	25	30	40
Case Lots, sets	6	6	6	6	6	6

The roll-rim has no sharp turns, therefore the grain of the metal is not broken, and having a broad wearing surface on the bottom it cannot damage floors. Ample space is left between the bottom and the hoop for the insertion of the body of the can. It is the neatest and strongest in appearance and is supplied with concave bottoms. By examining the cut anyone can readily see that this style of construction makes it the strongest bottom ever produced. They do not cost any more than inferior bottoms. If you want to keep ahead of your competitors use Kemp's Roll-rim Milk Can Bottoms.

Stock-Taking Methods of Large Hardwaremen

The System Carried Out by the Vokes Co., Toronto—Work is Divided into Two Stages—Ways Adopted to Prevent Hindrance to Trade—How one Man Manages to Mark and Clear Out His Old Stock.

The tendency most marked in connection with stock-taking in the hardware store nowadays is to so arrange matters that trade will not suffer while the work is in progress.

Merchants are endeavoring to facilitate stock-taking by every means in their power. Preliminary work has become the rule in many of the larger establishments. In the smaller stores this is not always possible and the old time method of crowding the work into one strenuous week or ten days is still very much in evidence.

The method adopted by the Vokes Hardware Co., Queen St., Toronto, is to divide the work into two stages. First the "overhead stock" — goods which do not sell very readily during winter months—is gone over and listed. A few weeks later the rest of the stock is gone over and the work of filling in the stock books is commenced.

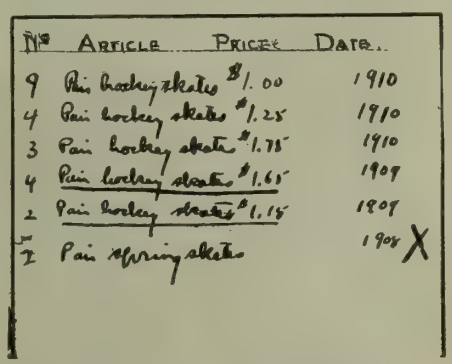
The First Stage.

The early work begins in December and is generally completed before Christmas week. All goods not in active demand at this period of the year are sorted up, counted and listed. The contents of each shelf or drawer are entered on a list and, when all the goods there have been entered, the list is placed at the side of the shelf or the back of the drawer and left until after stock-taking is over.

If in the interim some of the goods are sold, one of two things must be done. Either the clerk must mark off the list the goods thus sold or he must keep a separate record of such sales, to be produced at the proper time for the correction of the lists.

The Second Stage.

The rest of the work is commenced at the first of the year. The stock not previously listed is then gone over and the slips made out. Everything is then entered in the stock books, one man calling off from the lists and another marking down.



The Vokes Co. have a book for each department; for instance, one for cutlery, one for builders' hardware and one for tools. It is thus possible to work in practically all departments at once, and it does not take long to finish up. Business is not interfered with in any respect, as all customers are promptly attended to while the work is in progress.

Marking Old Goods.

This system is somewhat similar to that adopted by a Buffalo hardwareman. He has for some years followed out the idea of listing all goods on slips before entering them in the stock books. The slips are made to serve a double purpose. All goods, which have been in stock for some time, are underlined, while all odd lines or damaged articles which it is desirable to clear out without loss of time, are marked with a cross. The goods are then entered on the stock books and the slips saved for reference.

Immediately after stock-taking, a big sale is held, and all goods marked with a cross are brought out and offered at reduced prices, together with some of the underlined articles. In this way most of the odd goods and old lines are cleared out, and the business of the new year is started with a stock that is comparatively new and up-to-date. The slips are corrected after the sale and then saved for further reference. All underlined goods are supposed to be sold first and the clerks have instructions to see that the old stock is thus turned over.

This method is a somewhat complicated one and entails much work and

No.	Article	Price	Date.
9	Pair hockey skates	$1.00	1910
4	Pair hockey skates	$1.25	1910
3	Pair hockey skates	$1.75	1910
4	Pair hockey skates	$1.65	1909

How Old Goods and Odd Lines are Marked on Loose Slips.

close attention, but it serves as a ready means of keeping down the accumulation of shop-worn and slow-selling goods. In a big establishment some such scheme is often found necessary.

How to Help Trade.

The question of maintaing trade during stock-taking time causes some merchants much worry. If the whole staff is engaged in making the inventory, it is difficult to handle what custom comes to the store. Customers will frequently have to wait for a while, and will quite as often get prefunctory service, the salesman being too rushed to maintain the courteous and suave front that the public has learned to expect. Trade is sometimes lost through this cause.

Thos. Meredith & Co., King street east, Toronto, overcame this by putting only part of their staff on stock-taking. "Four men do it all, the rest of the staff attending to customers," explained Mr. Meredith to Hardware and Metal. "Two men take one side of the store and two the other, and they work right through. It takes longer, but makes it possible to do the work without hindering trade in the meantime."

Mr. Meredith's method is to start right after New Years. As the end of his business year comes at the end of January, he has the whole month to get the work completed. Each shelf is done on a separate sheet and the sheets are numbered. Afterwards these sheets are transcribed into the stock books.

If a sale is made between the time that the list is made up and the end of the month, an entry is made in a book provided for that purpose. This book is consulted in conjunction with the slips when the stock book is finally entered up. This, Mr. Meredith considers the only accurate way of keeping track of all sales made during stock-taking time.

The system followed by Mr. Meredith is used very generally in stores where each member of the staff is not assigned to one department, as is done in many large stores.

AN AMALGAMATION?

A. J. Nesbitt, managing director of the Investment Trust Co., Montreal, is reported to be at the head of the syndicate which has made the offer to purchase all the shares of the Montreal Steel Works. No definite decision has yet been reached as to what will be done with the Montreal Steel Works, but there is a strong probability that an amalgamation will be made with the Ontario Iron and Steel Co., of Welland. When interviewed, Mr. Nesbitt said that he was not prepared to make any statement at present. Mr. Blackwell, the Vice-President of the Investment Trust Co., and a director of the Steel Works, was also very reticent on the matter, but one of the other directors practically confirmed the statement.

OPENING BRANCH WAREHOUSE.

Burrow, Stewart & Milne Co., Hamilton,ma nufacturer of ranges and heating goods, have opened a branch warehouse in Winnipeg on temporary premises. The company are at present constructing a six storey warehouse in that city, which will be completed about March 1 next. Formerly their goods were handled through an agency here but owing to the increase of the western trade it was found necessary to open a branch in a convenient location. The western business is under the management of Lionel Haney, formerly a traveler for Caverhill, Learmont, wholesale hardware company.

Salesmanship Must be Evidenced in Business Methods

The Wise Merchant Will Direct His Business From the Selling Standpoint—All Lines Should be Kept Moving to Prevent the Accumulation of Dead Stocks—Some Practical Illustrations of Good and Bad Methods.

"Salesmanship," said a successful hardware man, recently, "consists of knowing your stock."

"To my mind," says another man, "salesmanship could best be defined as 'knowing your customers.'"

Both are partly right. They have each hit on half the truth. Successful salesmanship consists of knowing your stock and your customers. To know your stock thoroughly, to understand the "talking qualities" of each article, to keep in touch with the vagaries of public demand and know what goods are most salable at certain times; all this would not make a good salesman, if there were not combined with it a knowledge of customers. On the other hand, to know your customers, to possess the gift of accurately gauging the possibility of sales, to understand when it would pay to press the sale of goods which the customer had not come in to buy and when it would offend; all this would be futile, if it did not accompany a thorough insight into the stock of the store.

Retail salesmanship is a science—a science which has many devotees, but few masters, which many merchants and whole legions of clerks calmly ignore.

Where It Begins.

Salesmanship begins with the merchant. The elements which make for success must be reflected in his store methods, his window displays and his advertising. Salesmanship is not just one phase of the retail business; it is, in a sense, the whole business.

The proprietor, although he may never approach a customer, is still a salesman—a good one or a bad one. The merchant who keeps in touch with his stock, who sees that trade in dull lines is stimulated, who buys with a view to sales, whose advertisements are bright and attractive, is a good salesman. The merchant who devotes his attention to buying and the office books, who advertises in the stiff, dogmatic style of a quarter century ago or who does not advertise at all, is a poor salesman.

Attention to Stock.

The merchant, who is a poor salesman, says to himself; "I look after the books, the collections and the buying. I have a staff of clerks to look after the sales."

The proprietor, who is a good salesman says: "My money is made in the sales. Every phase of the business is carried on for the sole purpose of facilitating sales. It is on the selling end that I must concentrate, managing all other departments with a view to that one end."

One of the most important considerations for the merchant is to keep in touch with his stock. If he sits back in his office and lets a staff of dull and apathetic clerks look after the selling end, stock-taling time will find him hopelessly loaded with the surplus of slow-sale lines. Demand is not so evenly divided and of such continuous nature that all lines of goods will be gradually turned over during the year.

To paraphase a well-known saying, "Everything is not sold by him who waits." The merchant who waits for the trade to gradually absorb his stock, will discover before long the self evident truth that, at certain times of the year, certain goods will need pushing, if they are to be sold out. To illustrate the point, two instances might be quoted.

"A competitor of mine once," said a Western Ontario hardwareman not so long ago, "had a very strange notion of the value of sales. He was perfectly contented if his clerks were selling the most common staple lines—nails, tacks, wire and all that kind of goods. If he saw his store full of customers buying nails by the pound, he hailed it as an evidence of prosperity. He carried a fairly good assorted stock and some special lines but no efforts were made to sell any of these goods. They were allowed to collect dust on the shelves. He never advertised, of course. His profit on nails was good—for nails—but his loss on unsold stock must have been enough to stagger a more sane dealer."

"Does he still persist in his obtuse methods or has he seen the error of his ways?"

"Oh, he is not in business any more. Out ranching in the west, I believe."

The Other Side of It.

Now for the opposite side of the story. The other day, a Hardware and Metal representative walked into a Toronto hardware store—one of the best and most prosperous in the province, by the way. At the front of the store, in fairly conspicuous positions were displayed odd lines of goods, with prices prominently placarded. In one place was a basket of lock set parts of various sizes and descriptions, selling at 10 cents apiece. On the top of one showcase was a row of probably half a dozen fancy lamps—going at $1.75. On a table in the centre were a great variety of hardware goods, an "olla podrida table"—a little of everything, not much of anything—all selling at low and attractive prices.

The proprietor explained. No, they were not selling out, nor were they conducting a pre-inventory sale. They were just following out their all-the-year-around policy.

"We watch our stock every day," he declared. "If a certain line is selling slowly, out it comes. We put it up in the front of the store. Customers entering cannot help but see it and our clerks politely call attention to it. If it does not sell them, we presume that some inducement is required to dispose of it. We then offer it at a reduction. It is better, in our opinion, to sell at a smaller profit than not to sell at all."

"And the results?"

"It works well. We keep our stock turning over. No dead lines accumulate with us. Odds and ends of stock, we dispose of as you can see by looking around you. Those lock sets, by the way, are the residue of several different lines. In a few days, they will be off our hands."

Carries Only Salable Goods.

Another case might be quoted. A Woodstock hardwareman has adopted a somewhat similar code of selling ethics. But he goes a step further.

"I will not tolerate a slow selling line," he declared, emphatically, to the writer. "If goods are going slowly, I make an effort to sell by featuring them. I push them hard and offer inducements in price. If they still remain in stock, I come to the conclusion that they are not salable and offer them at cost price. That generally cleans the goods out and then I refuse absolutely to handle that line again, my experience having taught me that I would be tying good money up in goods that realize on themselves too slowly for these brisk times. The most plausible traveler in the business could not sell me any special lines of that kind again."

"But how about seasonable lines, goods which can be sold only at certain periods? You do not expect to sell them all the year around?"

"I have a separate system for them. I push them hard during the selling period. If, at the end of the time, I find more on my hands than I care to carry over until the next season I clear them out by my usual methods. My idea is to carry just enough of such stock from season to season to meet belated, and advance orders—for there are, of course, people who buy skates in summer and fall, and hammocks in winter. If I am compelled to carry over more than a nominal stock, I conclude that I had over-estimated the demand and base my orders for next season accordingly."

It is not necessary for merchants to follow the rather radical precepts of the last quoted dealer, in order to make a success of business. It is necessary, however, to avoid the torpidity and mistaken ideas of the merchant in the first instance. No line can be neglected or forgotten. It does not do to concentrate on staples alone nor to neglect staples in order to feature special lines solely. Attention must be paid to specials and staples alike. Business is a battle in which the general of commerce must win all along the line. A wavering here, a falling back there, will militate against advances in other parts and perhaps turn the tide.

Where Good Profits Offer.

A single instance might be quoted to show what results can be obtained by paying attention to special lines.

A Brantford merchant showed the writer two lone articles in his store—both brass novelty lines of a rather expensive variety. "All that is left of two stocks," he explained. "I may say that those goods were among the best paying I have ever handled."

"I always handle small side lines," he continued. "Opportunities are continually offering for good buys on new lines—goods that have never been offered here. I got these goods dirt cheap. As they were new, I was able to sell them at a good price. But the possibilities are limited. One installment is

all I generally handle. They cease to become a novelty after a while and then they are hard to dispose of. To get in right is important, to get out in time even more so."

That is "salesmanship"—to realize the opportunity for a profitable sale and to see far enough ahead not to exhaust the demand before you stop buying. A side line is a good investment in most cases. It carries a good profit and often brings new trade to the store. But the wise salesman-merchant will not devote so much attention to specialties that he must perforce neglect the staple lines, which are, of course, the backbone of the trade.

Salesmanship, then, is not the mere display of goods nor the words that pass between clerk and customer. For the merchant, the word has a broader meaning. It includes the direction of his whole business and the careful planning of a compaign to keep a complete stock moving.

Improved Hotel Accommodation is Demanded

Matter Brought Up at Annual Meeting of Commercial Travelers' Association—A Successful Year Concluded—Retiring President Lauds Life on the "Road."

Toronto, Dec. 29.—Improved hotel accommodation for the traveling public was one of the principal questions considered at the 38th annual meeting of the Commercial Travelers' Association, held in Toronto to-day. It was introduced by a motion by W. H. Scott and Walter Moore, "that the members of the Commercial Travelers' Association instruct our Board for 1911 to press upon the Ontario Government (1) the necessity that exists, in the interests of the traveling public for the inspection and regulation of all hotels in municipalities adopting local option by-laws; the government's responsibility to the traveling public in permitting municipalities to pass local option by-laws without at the same time making provision for hotels to be under public inspection and control: (3) the duty of the government to assume control of all hotels, catering to supply the public with meals and board, or to enact that all municipalities passing local option by-laws shall assume the responsibility and control of all houses for the accommodation of the public."

Mr. Scott estimated that between three and four million dollars was spent annually by travelers representing the many business enterprises in Canada. Travelers were therefore entitled to consideration, and the matter of hotel accommodation should be a business proposition and not a matter of sentiment.

No Politics Wanted.

A motion to the effect that a member who enters into Canadian party politics in the name of the association shall be guilty of abusing the privileges of the association and shall be expelled after a due trial by the directorate board of the association and shall forfeit all privileges and benefits in the association was laid on the table on motion of J. H. Lumbers and C. A. E. Colville.

Benefits for Old Members.

It was moved by A. Fielding and Col. Stoneman that the board of directors for 1911 consider the feasibility of a question which has met with the approval of the meeting. It is to the effect that any man who has been a member of the association for thirty years, upon attaining the age of 75 years should be permitted to ask and obtain 10% of his mortuary benefit each year, and that the board consider the question during the coming year and, if it is considered feasible, that they prepare by-laws to that effect to be presented at the next annual meeting. The motion was carried.

The by-law respecting the date of annual meeting was on motion changed to read during the last seven days in December instead of the last week. This assures the holding of meeting between Christmas Day and New Years.

E. Fielding, treasurer, asked the members to consider the question of securing representation for the members of the association in western Canada.

E. FIELDING, Treasurer.

The west is to advance 100 fold according to statistics. Last year's grain crop was grown on only one one-hundredth of the arable land that is yet to be broken and tilled. Mr. Fielding considered that it was to the advantage of the association to consolidate it by some such means. He moved, seconded by Jos. Oliver, that the new directorate board consider this question and bring in some amendments, if they considered it advisable, next year. By such a provision the association could keep in touch with its western members and increase its activities in proportion to the growth of the country. The motion carried.

List of Officers.

Officers for the new year are:

President—Robt. Gemmell.

1st Vice-Pres.—S. M. Sterling.

2nd Vice-Pres.—Jas. G. Cane. (acclamation.)

Treas.—E. Fielding.

Board of Directors for Toronto.—F. J. Zammers, Geo. W. Moore, John Everett, W. H. Scott, C. J. Tuthill, Alex. Cook, J. W. Charles, D. H. MacKay, Jos. Pease.

Hamilton Board—Arthur F. Hatch, E. O. Zimmerman, Chas. C. Smye, H. J. Wright, Geo. M. McGregor.

Berlin Board—W. J. Moody, F. G. Doering.

Montreal Board—Wm. Williamson.

Jas. Sargant is permanent secretary.

The retiring president, John Gibson, said: "The year 1910 has been one of progress and prosperity as all reports show. Transportation facilities have increased from year to year and we feel that the future will bring increased satisfaction. The 'road' is one occupation that is not overdone, with every new industry it expands, offering opportunities to young men of common sense and ambition. There has never been a strike among the members and never as a body and seldom as individuals have complaints been made against employers. The 'Road' pays better salaries than are offered in most trades and the opportunities are not wanting. There are now between 20,000 and 25,000 travelers in the Dominion. The position is one of trust. Travelers represent millions of capital and have a broad interest in many of the activities in which he has dealings. Success and advancement comes only for merit. The way is opened to higher positions and many of the leading merchants are men who were once identified with the road."

During the past two years, Mr. Gibson's term of office, the membership of the association has grown from 8,640 to 10,099. There have been 163 deaths.

Many Names Added.

The annual report of the Board of Directors showed that 773 names had been added to the membership list during the past year, the membership now being over 10,099. The total amount paid out during the year for mortuary benefits was $64,482.50.

The financial statement shows receipts to the amount of $142,717.50. Investments in debentures totalled $61,619.88. The relief fund shows a balance of $2,084.51 after paying $1,220.00 in relief claims.

Jos. Oliver presented the claims of the Commercial Travelers' Mutual Benefit Association, pointing out that $44,000 had been paid to the wives and orphans of members during 1909 and $29,000 in 1910. He asked the members to give this branch of the association due consideration.

A testimonial will be prepared for the retiring president, John Gibson, who has held office since 1908.

A motion was passed authorizing the appointment of a board of five members to find out the cost of a building, containing sample rooms, billiard and bowling rooms, lunch room, etc. and report at the next meeting.

NEW EDITOR APPOINTED.

James G. Lorriman, B.A., sales and advertising manager of Metal Shingle & Siding Co., Preston, has been engaged as editor of Hardware and Metal to replace W. Wrigley, who severed his connection with the MacLean Publishing Co. Dec. 24.

Mr. Lorriman has had a splendid training to fit him for the position of editor of Hardware and Metal. He is an honor graduate of Toronto University and has had an excellent business training. For a couple of years he was a "drummer" and had an opportunity of meeting the retail dealer face to face and studying the problems he is endeavoring to solve.

For nearly three years he filled the position of Montreal editor of Hardware and Metal and became so well acquainted with retail dealers, jobbers, manufacturers, and travellers, that although it is nearly four years since he left Montreal many firms still inquire about him or refer to some article he wrote in which they were specially interested.

As sales and advertising manager of Metal Shingle & Siding Co., Mr. Lorriman has been brought into close contact with the hardware dealer as the distributor of their goods and the farmer as the ultimate buyer. The big problem with every hardware dealer to-day is how to interest the farmer and get a fair share of his business. Owing to his previous experience on Hardware and Metal in Montreal and his four years with Metal Shingle & Siding Co., Mr. Lorriman is probably better fitted than any other man to give the retail trade some practical suggestions on this important question.

We have outlined a progressive editorial policy for the year 1911 and will add a number of bright, attractive features which will make every page of intense interest to every man connected with the hardware trade.

THE NEW YEAR.

With the dawn of a new year but a few days off, the mind naturally casts back over the events of the past twelve months. This is a time for reviewing the past as well as looking to the future, for critically analysing the results obtained and the contributing causes.

It can be said, without any reservation whatever, that 1910 was a good year from the business standpoint. All branches of trade have flourished and certainly none more so than hardware. The prosperity with which the country has been blessed has been shared in by the hardwareman, as the cheery, optimistic reports from all sections of the land attest. Trade has been busy in all departments. Many merchants declare that for them the past year was a record breaker. As a slight offset, a few have been heard from who report that their business was not up to the mark; in such cases, however, there have invariably been local conditions to account for it. The regularity with which new hardware stores have been opened in the western provinces attests the strength there and demonstrates the confident feeling that prevails with reference to future prospects.

As a natural sequence, the hardware wholesalers have enjoyed a big year. One Toronto house declares 1910 to have been the biggest year in its history, in respect to volume of business. Other houses, while not going to this length, agree that conditions have been eminently satisfactory.

With regard to the future, fullest confidence is felt. With James J. Hill posing as a prophet of gloom, optimism has received a check in the United States and continued prosperity in fullest measure is not now regarded as certain on the other side of the line. But no matter what transpires in the United States, trade conditions in Canada during 1911 should be healthy. The good crops of 1910 have assured western growth and progress and the east can be counted upon to reflect the conditions existing beyond the Great Lakes. Everywhere in the manufacturing and mercantile worlds preparations are being made for a prosperous new year.

It is a wise plan at the end of the year for a merchant to look ahead and map out, as far as is possible, his plan of campaign. Profiting by his mistakes in the past, he can see where his methods have been at fault and plan to correct them. He can also see in what directions his success has been most pronounced and what branches of business have been most profitable, and arrange to continue the featuring of these lines, applying the same methods to the stimulation of demand in other lines. If new departments are to be inaugurated or new methods tried, the first of the year is the time to arrange all such matters. The dealer will then know just what he intends to do during the year and will be in a position to carry out his plans systematically and to cope with all exigencies.

CLEAN UP THE STORE.

In overhauling his business at the first of the year, the merchant should not stop at stock taking. The store itself needs to be thoroughly gone over and cleaned. During the January lull, time can be found to do the work on a systematic basis and the opportunity should not be allowed to slip.

A bright and attractive store is one of the essential adjuncts to a successful business. Wornout fixtures, dirty and dusty ceilings, accumulation of old stock in corners of the store, are the worst advertisements a business could have. If the store fixtures have become antiquated, the money expended in new cases and "silent salesmen" will be a good investment in the end.

It would pay a merchant to take a critical look through his store and try to see things from the standpoint of the customer or casual caller. It would perhaps open his eyes to many shortcomings, faulty arrangements of goods and lack of effective display. Then let him ponder the question, "How can I improve the interior of my store?" He would discover numerous ways of rearranging certain lines and, after the ideas had been carried out, would be delighted with the improvement made. Too many dealers cling to old ways and ideas in store management. Some day they waken up to find that they have fallen behind in the race. The really successful dealer is the man who believes in keeping his store attractive and up-to-date.

THE RETAILER'S ADVERTISING.

At the first of the year, a merchant will always make a few new resolutions. In a great many cases it would be wise to resolve on paying more attention to advertising.

The retail merchant often finds the advertising problem a difficult one. He does not make the best use of his space and consequently does not get the best possible results. Too many advertisements are written along the old lines, consisting of bombastic statements and obscure generalities, giving no prices or definite information with reference to the stock carried. Frequently, the mer-

chant neglects to change his ad. often enough and readers tire of seeing the same matter and get to expect nothing new or interesting in that particular advertisement.

To make advertisement effective, the writer should bear a few prime essentials in mind. Change the matter as often as possible; for variety, which is the spice of life, is one of the secrets of continued success in advertising. Make your matter as bright and readable as possible. Do not jot down the first thought that comes into your mind; think it over, revise and polish it until it is certain to possess the qualities that attract. To do this, it is advisable to use short sentences. The reader finds it hard to follow a long drawn-out statement. A short reference, full of snap, is more effective than any amount of rhetorical outpouring.

A catchy opening sentence, is one of the first essentials. To arrest the eye and induce the reader to scan through the ad., a good initial remark is found more effective than the name of the firm. To serve this purpose, some dealers have a "slogan" which they use conspicuously in all their advertising matter, sometimes at the start and sometimes at the bottom of the reading matter, but always where it will be picked out by the eye quite readily. A slogan is a sentence or phrase which explains in laconic form the policy of the firm or the nature of their goods, or possibly both. It tells in a nutshell, the story that the advertisement proceeds to give more fully. A vivid slogan will linger in the memory long after the page on which it appears has been tossed aside. In time it will be remembered and recognized as the trade motto of the merchant employing it.

Some indication should be given of values. People are not likely to be influenced to buy unless an idea of the cost of the advertised goods is given. Any particularly good value in a certain line should be featured and that article made the leader, focussing attention on it.

If attention is paid to ad. writing along these lines, the merchant will find that he has raised the standard of his announcements and in time more direct results will be noticeable.

SUPPORTING HOME INTERESTS.

There is a movement on foot in England to hold an "All-British" week among the shops, the object being to stimulate public sentiment in favor of patronizing British-made goods. The Ealing branch of the Union Jack Industries League, have advanced the idea, suggesting that for the space of one week all merchants in the district devote their store windows exclusively to the display of goods made in Britain. The opposition of foreign-made goods is very strong in the old countries, and it seems quite apparent that home industries would reap appreciable benefits from the proposed movement, designed, as it is, to impress on the people that their trade should be given in preference to the product of British concerns. That the move might become in time not only an annual affair in the Ealing district, but national in scope, is the earnest belief of the promoters.

Straight Talks on Hardware Salesmanship

TALK No. 8 BY VICTOR LAURISTON

"No, sir," declared the hardwareman, decisively, "I wouldn't take another consignment as a gift. There's absolutely no demand for it."

The traveler, frowning, meditatively chewed the butt-end of his pencil.

"That's odd," he remarked. "Why, Jackson, just up street, was completely sold out when I called, and gave me a double order."

The hardwareman shrugged his shoulders.

"That may be," he remarked, in a tone that intimated a world of disbelief. "but I'm not going to order. I've half a gross piled back there on the shelves now, filling up valuable space, and that's quite enough."

Smiling, the traveler laid a gentle hand on the merchant's shoulder.

"My friend," he said, thoughtfully, "you astound me—positively astound me. You're a first-class business man. Up and down the line everyone tells me that, and right till this very minute I never thought it was news. Yet you spend good money for something that you never mean to sell, and to make matters worse, you waste a lot of good shelf space to accommodate it.

"Why," he added, thoughtfully, "the minute Jackson's shipment reached him, he piled the stuff on a counter, planted the pile full of show cards, used the advertising dope that accompanied it in a glaring window display, and called the attention of his customers personally to the new stove polish and told them what it would do. While you, not content with wasting good money by buying it, waste a lot of better money by not trying to sell it, and waste another chunk of cash which represents the shelf space the stuff takes up."

"I don't believe Jackson ever sold a box of his polish," muttered the merchant as the traveler went out. "It's one of the slowest sellers I ever struck."

Then, the afternoon being a trifle dull, curiosity lured him to the back of the store. He routed the packages of stove polish from the shelves, dusted them off, transferred them to the top of a silent salesman near the front of the store, and spent a little time designing a few neat show cards and price tags. A customer dropped in as he was putting the finishing touch on the job.

"I've a first-rate article in stove polish here," remarked the merchant, in the course of business.

"That's just what you have," retorted the customer. "My wife's been using it right along and says it's a good thing. She bought a package at Jackson's—didn't know you handled it, or she'd have come to you."

Which illustrates this good old bit of hardware gospel: "It's pretty hard to find anything dead in a stock as long as there's something live behind the counter."

"When I boost a specialty, I'm doing the work the manufacturer ought to do," you say. "Why should I pull his coals out of the fire?"

Why? Because you're the one that benefits by the coal-pulling.

People will come to you for nails, and

paint and wire. These things are staples. Their existence in a hardware store is a well-known fact.

But when you stock some novelty, or even when you decide to feature some special line of paint, or wire, people don't know it till you tell them. Introduce the new line to the people—and don't do it in a whisper. Newspaper advertising, window display, showcase display, price tags, show cards, and, finally, personal urging—run the whole gamut. Where these are intelligently used, the new line won't linger long upon the shelves.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MONTREAL.

During the year tin undoubtedly usurped the place that was previously taken by copper, and was the main feature of the metal situation. Taken under control in London by a syndicate, there has been a squeeze established for the last four months of the year in Straits tin. Despite hammerings the control has been maintained, and all signs of weakness has been met by renewed heavy buying. Heavy consumption in the States, combined with a shortness in supplies, helped the bulling movement. As the local markets naturally are controlled by the primary markets, unless for the time being, any spot complication makes its appearance, it can be understood why tin, although it opened the year at 35½c, closed at the price of 42. It might be thought that the advancing prices would have checked the demand, but owing to the shortness of stocks in users' hands, the metal was wanted all the way along, and so merchants experienced a steady demand, although there was an absence of forward buying.

Copper has been strangled by overproduction. Month after month the statistics issued by the producers showed that there was very little improvement in the situation. Consumption was good and exports showed activity, but all the same there was an increase in stocks. The reason of this was the over-production from the mines. Records have been broken at a very time when it was generally admitted that all that copper wanted to regain stability was restriction in production, as was the case with the steel industry after the last great panic. But although there has been rumors as to mergers, combinations, etc., all looking to a careful nursing of the copper situation, nothing materialised. The result is that copper, despite a good consumptive year, ends weak. The local situation is a reflection of conditions in the primary market. Starting the year at 14½c, it finishes at 14c. and yet there has been an exceptionally steady consumptive demand. There is but one way to put the metal on a solid basis, and that is to give the consumptive demand a chance to catch up with the supply by restricting production, which could easily be done if the large interests really combined.

This has been a good year for pig iron both imported and domestic. The greater part of the year the large domestic plants have been tied up with business owing to the withdrawal of two of the great plants from the open market, as they wanted all their own iron for themselves. This naturally restricted the range of buying, and also tended to help the imported iron market. Many habitual users of domestic iron were compelled, owing to lack of delivery, to buy imported grades at the higher price. Thus both domestic and imported pig iron was in good demand. Towards the end of the year, the depression in the States affected the home furnaces in this respect that producers from the other side came across and cut prices, and naturally there has been some slashing. But even with this, furnaces will not quote these prices for anything else but immediate delivery, because it is expected that the situation will improve in the States with the turn of the year.

Spelter has been in good demand all the way through, and has proved the most steady seller. The larger interests have bought exceedingly well, and when they were out of the market the smaller users, buying steadily, helped things along. Spelter is being used more extensively as time goes on, and the tendency is towards a firm, if not advancing, market. The European syndicate lost control of the English market for a time, but soon regained it, and prices have been kept steady. St. Louis showed a marked retrogression in the latter part of the year, and the bottom seems out of the market. Locally prices have kept firm, in sympathy with London, and there has been little change as from the commencement of the year. In fact, prices are identically the same, 6¼c, although there has been some slight fluctuations during the twelve months.

Lead has been in steady demand, although the market on the whole has been devoid of any strong feature. The metal opened the year at 3.75, and closed at the same price both for imported and domestic. The English market has been on the weak side, but price changes have not been so great, and the metal has been able to hold its head above water.

Altogether trade done locally has been above the average, and merchants are satisfied. There is no doubt that if tin had not been bulled, and copper depressed by unwise production, that both these metals would have been magnificent sellers. But just as the high prices in the one restricted buyers, so the low prices in the other acted in the same way, because users always hold off when they think that there is a probability of lower prices.

TORONTO.

December 30.—The year has been fairly good in metals. While the volume of trade has perhaps exceeded that of most recent years it does not equal the "monumental record of 1907," as one local dealer put it. The market has tapered off during the past few months, due to the uncertain condition of several of the metals; otherwise, the year's business would probably have equalled all records. However, it is generally felt that conditions have been on the whole quite satisfactory and the future is regarded as practically sure to bring continued good conditions. It is impossible to accurately define the prospects for 1911 but there is nothing at present to warrant the belief that prosperity will not reign.

The feature of the year's operations has been the tin situation. A syndicate in London has secured control of the tin market and "bull" manipulation has forced the price up from 35½ to 42. The prevailing price to-day is so high that little business is being done and, in fact, the volume of trade during the past few months has been small, most orders being of the hand-to-mouth variety. Tin has not, therefore, been as satisfactory as other metals.

Copper has not been characterized by as firm a tone as had been hoped for. Despite the general recognition of the necessity for limitation of the production, the output has been increased rather than decreased. Prices as a natural result have sagged and, where 14½c was obtained at the first of the year, the prevailing prices now range from 13c to 13½c. The margin of profit on copper has been pared too closely to make it profitable and altogether the metal has been more or less of a drug on the market. Reports of limitation of production during the months of November and December are received as auguries of better things in the future but absolute credence is not yet placed in such statements.

Pig iron has been largely in demand and it is stated that locally the trade has shown healthy signs of growth. Prices have remained firm throughout the year and it is considered that 1911 holds out every prospect of a greater demand.

Plates and Sheets have sold with much readiness. In fact, at some seasons of the year, the demand far overtopped the supply and sellers found it difficult to satisfy their customers. It was particularly the case with Canada plates. In the early fall the English makers ceased production and no amount of solicitation could urge them to supply Canadian orders. A case is known where plates ordered in July are still undelivered. As a result of the shortage, Canada plates have gone up in price 25c.

Lead has been fairly strong all through the year, good demand going hand in hand with a more or less ample supply. Prices have fluctuated slightly but present quotations stand on a par with prices at the beginning of the year.

Spelter has been very active. Toward the latter part of the year the supply has been rather lighter than the demand but price has remained firm nevertheless. At the beginning of the year spelter sold at $6; to-day prices range from $6.15 to $6.25. The spelter situation has been well toned all through and the line is deemed to have been profitable.

HARDWARE MARKETS

MONTREAL.

Remarkable steadiness in prices marked the hardware market during the year. Probably there never has been a year in which prices have remained so firm and so undisturbed. All the main staples practically opened and closed the year at the same price and although wire and tacks and various other lines have fluctuated a few cents, yer there has been so little change in the situation that it can be considered hardly worth mentioning when the whole range of prices are concerned. Probably of all the departments builders' hardware has proved the most steady seller. Right from the start of the year the various lines constituting builders' hardware sold well and this was continued right up to the end, for although the country trade fell off during the winter months, the local trade kept up. Building has been so good all the way around that it naturally stimulated the sale of hardware, and this combined with the fact that merchants are paying much more attention to this department make builders' hardware probably the most prominent seller (that is so far as the whole twelve months are concerned) of all the lines.

Bolts and nuts have sold well during the year, and in fact it would be somewhat invidious to pick out any of the lines as being more prominent than the others. The whole of the trading has been marked by certain cautiousness in buying, but if individual orders have not been heavy the aggregate volume of business done week by week has been above the average. Jobbers have been in a position to ship promptly, and so the merchants having found the value of running on light stocks when they can depend upon prompt shipment have kept to that course and have bought frequently and in small lots. Under these circumstances booking has not been heavy, and it does not seem as if this coming year will see any different. There is a confident tone all the way around, and merchants seem pretty well assured as to the extent of the consumptive buying. Taking what may be quoted the seasonable lines the Christmas demand for this year has been much above the average. Merchants have bought more extensively and with wider range, and there is no doubt that the Christmas of 1910 marks a distinct advance in the buying of Christmas goods by the hardware merchant. From accounts which have already been received it is evident that few have regretted the fact that they made strong attempts to capture the trade.

Sporting goods have had an exceptionally good year and the shortage of skates which opened 1910 is apparently to be repeated this year. Toboggans and snowshoes again felt the want of heavy snow falls, but the trade done has been very good even if not up to the average. Lawn goods too, had a very good season, and it is likely that this will be repeated during the coming spring.

All the way around there has been little spectacular to write about and the chief feature has been, as we have said, a remarkable steadiness in prices marked by consistent buying, and confidence as to the future.

TORONTO.

December 30.—The past year has been a splendid one in every respect. Not only has the volume of business been large—larger perhaps than ever before—but the collections have been good. In no previous year has the tendency to pay promptly and willingly been more pronounced—a sure evidence of general prosperity in the trade.

One local jobbing house declares the past year to have been the best in its history, in point of volume of business. The demand has been steady from start to finish and at several seasons it has been found difficult to keep pace with the orders. The Christmas trade was heavier than ever before and a tendency was shown to handle a better class of goods. Holiday goods were kept moving almost up to the last day, supplementary orders pouring in rapidly.

The prospects for the coming year are held on all sides to be good. "There is no cloud in the sky," said a local jobber, in discussing trade possibilities for 1911. "Of course, it is not possible to say beforehand with any degree of certainty just what the future holds, but at present there is no reason to feel that the volume of business will not be quite up to the record of the past year."

One of the busiest lines right through the year was builders' hardware. The country has experienced a distinct stimulation in building operations and every district has seen a great deal done. In consequence, the demand for builders' hardware has been continuously heavy. The long stretch of mild weather during the early winter season permitted an unusual prolongation of building work with the result that hardware supplies continued active until a later date than customery.

A feature of the year's business has been the stability of prices. Few changes have been made and there has been no radical alteration in any branch. In consequence, no gains or losses have been made through changes in value of stock, but the general trade conditions have been more satisfactory as a result of the stability of the market.

Sporting goods have had a steady run and the demand for skates and hockey goods has been exceptionally heavy. One supply house was cleared out of skates before the first snow came and supplementary orders from the west were received before the season opened. These are indications, not only of an enlarged market, but of a newly acquired tendency on the part of merchants to lay in stocks bright and early.

Stoves and heating goods have sold in such quantity that the manufacturers have worked day and night at some seasons to meet the demand. That the year's business has been the best on record, is the confident statement of the local salesmanager of a large manufacturing firm. "Our business has never been equalled," he declared. "Every branch, from coast to coast, has had larger sales than last year and more satisfactory returns generally. In point of collections we are well satisfied also. Except in a very few districts, money seems to have been plentiful and has been readily obtainable. "The stove and furnace sales were helped by the mild weather which prevailed up to the middle of December, business continuing brisk right up to the last day before Christmas. The heavy volume of business transacted in December helped materially to round off the year's sales. Prices were stationary throughout the year and the probabilities are all in favor of the same quotations holding through 1911.

The trade in Christmas goods has been larger than in any previous year. Dealers seem to be awakening to the possibilities of urging an active campaign during the holiday season and are buying more of such goods as first-class cutlery, cut glass, brass goods and metal toys. Not only has the range of goods carried at the festive season widened considerably, but there has been a tendency also to handle better quality. In some sections, the Christmas trade has increased by 25 and 30 per cent.

Heavy hardware, wire, bolts and nuts have seen a steady demand, quite in keeping with the activity shown in other lines.

HANDLED TOYS LARGELY.

St. Thomas.—Ingram & Davey Ltd. made a bid for the Christmas trade by issuing a two-page supplement full newspaper size, advertising on one side silverware, cutlery, razors, lighting fixtures, brass goods, carpet sweepers, reading lamps, guns, rifles and bathroom fixtures. The other side was taken up almost entirely with toys. A most complete line was carried, including skates, hockey supplies, all manner of games, mechanical toys, rocking horses, sleighs, metal toys and folders.

The supplement was issued early and in order to encourage early shopping, the announcement was made: "By making your selection early there is the decided advantage of choosing from a complete stock. Your purchase can be put away if desired until called for."

A GUESSING CONTEST.

London—Hardware merchants of London are hard after the gift-buying public with attractive window displays of brass and copper goods, knives and forks in sets, fancy spoons, kettles, and all the other things that might be expected to come under the head of holiday goods.

Purdom's Hardware is conducting a guessing contest in which customers or others are invited to make an estimate of the number of coffee beans in a fine copper percolater on display in one of their windows. The person guessing nearest will be presented with the article.

D. H. Howden, head of D. H. Howden & Co., is mentioned as a candidate for the board of water commissioners.

Exhibitors at the armouries this week are the Commercial Electric Company, London; Canadian Tungsten Lamp Company, Hamilton; Chapman & Walker, electric motors, Toronto; Ferranti Motor Company, Toronto; and the Westinghouse Company.

Boy Scout Supplies Will Prove Paying Line

The Movement is Rapidly Spreading, and the Demand for Supplies Will Increase Correspondingly — Many Scout Articles Should be Sold in Hardware Stores — Start in Bright and Early.

"The Boy Scout Movement is still in its infancy," General Baden-Powell is reported to have said, during the course of his visit to this country. "What is more, it has come to stay."

As "B-P" is the originator and head of the movement, it is safe to assume that he can accurately gauge the future possibilities of the idea. If the boy scout movement is destined to grow and expand until every boy of British birth becomes enrolled, the idea contains vast possibilities. Certainly, from the commercial standpoint, it is well worth consideration.

A boy scout needs, in addition to his "sombrero," scarf and suit, a staff, a knife, an axe and a belt. The logical place for at least some of these articles to be sold is the hardware store. If the hardwareman does not care to handle the clothes, it is quite within the ordinary bounds of the trade to carry the other scout necessities.

If the movement is to spread, as "B-P" predicts—and there is every evidence that it will—the demand for these goods will be extremely large. Figure it out this way. In a place of 5,000 population there will be several hundred boys enrolled as scouts. That means several hundred staves, belts, knives and axes. To the hardwareman, who takes up the line, it means a fair share at least of the trade.

This estimate of the amount of business involved is a moderate one. At the present time "patrols" are being formed in every corner of the Empire. Probably no place of any size in Canada, except in a few districts, lacks its devotees to the cause. "Scout talk" is on the lips of every manly Canadian boy. More and more are the lads joining in and eagerly donning the khaki uniform and broad-brimmed hat. It does not seem at all improbable that the time will come when every lad will be a scout and require his outfit. The trade from this source is certain to attain to much larger proportions and to be of a continuous nature.

Start in This Year.

With snow on the ground and the prospect of several long winter months ahead, it may seem a little unseasonable to talk boy scouts. The wise merchant, however, indulges in some hard thinking around the first of the year and lays down a few new resolutions. He could not resolve on anything better than to pursue during the coming year the policy of embracing opportunities for new trade. By carefully considering the possibilities that the future holds, he can perceive chances ahead. Let one new resolution this year be: "To get in early on the field and sell boy scout supplies." It is not too early to begin planning now for a campaign along that line during the coming year.

Scouts Active in Winter.

"We expect that the scout 'kit' will be enlarged before long to include overcoats, winter caps and gloves," said a man, who is following the situation closely. "You will find that the patrols will not confine their operations to the milder seasons, but will be out all the year around."

Demand then will be steady and there will be no cessation of activity during the winter months. The merchant who waits until spring before considering the idea of carrying scout supplies will often find that he has allowed his more progressive competitor to slip in ahead of him. Hardwaremen who have not taken up the line would find it to their benefit to start into it before the spring season opens.

Pushing the Idea.

During the holiday season, a Toronto sporting goods store made a bold bid for patronage by having a boy scout department. They not only handled the staves, but advertised regular goods along the one line—"Skates for Boy Scouts," "Snowshoes for Boy Scouts," etc. Boys who belonged felt that they wanted to do all their buying there and the store did a splendid volume of business.

An enterprising hardwareman might start in at once and pave the way for an active trade in scout supplies. By putting in a window display of skates, hockey sticks and other sporting goods, as well as knives and articles that appeal to boys, together with scout staves, axes and knives, the interest of every boy in town could be aroused. They would come to associate that store with scout supplies.

Interest Being Aroused.

That hardwaremen are becoming interested is evidenced by enquiries received by Hardware and Metal from different members of the trade. One man writes to ask where the supplies can be obtained. The salesmanager of a Toronto jobbing house reports that he has had a number of enquiries and intends to go into the goods more fully in future. This can be taken as evidence that at least some members of the trade believe there is a splendid opening for business and intend to take up the idea.

Successful Men as Leaders

By W. C. Freeman.

Every man who goes into business of any kind goes into it to make money. Some men succeed; others fail, while others plod along in a mediocre way, making a living only, but they always try to follow their more fortunate competitors.

This law of average applies in all lines and the same reason governs all cases.

Analyze the great successes in various lines in this country to-day and you will find that back of each success are earnest, capable business men and steady advertisers. Their business grows every year. They make every effort to go forward. They are never satisfied.

In every community there are one or two merchants that set the pace—they are usually the inspiration for the whole community. Other merchants say—"If So-an-so has succeeded, why should not I?"

A man who is struggling toward success with the right ideas is never envious of the man higher up. On the contrary, he will study the things that have made the man higher up successful, and will try to improve on some of the things he has done to attain success.

A gentleman who went into the retail business some months ago sat around a luncheon table with other business men, and they asked him how he liked the retail end of the business.

He replied that he liked it very much and thought there was a great future ahead of him if he followed the example of the successful merchants in his city.

They asked him the names of men whom he regarded as being successful merchants and he told them, but he did not mention any of the men who sat around the table, although they are in a measure successful.

One of the merchants this young man had in mind is over seventy years of age, but he is still on the job every day, is constantly trying to improve every department in his big shop — never content — always reaching higher up, and I might add always advertising. There is never any let-up in that.

It will pay every merchant in every community to follow the lead of the successful men. The greatest help, however, in climbing the hill of success is that help which is given by clean, reliable advertising.

A NEW NAME.

After New Year's the Kemp Manufacturing Co., Toronto, will be known as the Sheet Metal Products Company, of Canada, Limited. This announcement was made to-day by A. E. Kemp, the head of the concern. The new company which will have its headquarters on Gerrard street, will also include the Macdonald Manufacturing Co., Toronto, the Kemp Manufacturing and Metal Co., Winnipeg, and the Kemp Manufacturing Co., Montreal.

HARDWARE TRADE GOSSIP

Ontario.

H. Occomore, of Guelph, has been nominated for alderman.

J. Cassellman, hardwareman, Toronto, has been succeeded by Silas L. Anderson.

The plant of the Canadian Cordage Company at Peterboro has been closed down and the company has gone into liquidation.

Mr. Livingstone, of the Dominion Linseed Oil Co., Baden, has been ill for the last few weeks, but latest reports are very encouraging.

W. H. Turnbull, hardwareman, of Brantford has been nominated for the mayoralty. Ross Rastall will be his opponent for the office.

A handsome calendar and booklet has been received from the Capewell Horse Nail Co., Toronto. The booklet contains a list of the Capewell products and some strong "driving" arguments.

Hardware and Metal has received a calendar from Ludger Gravel, 26 Place Jacques-Cartier, Montreal. The calendar contains a complete list of all goods carried by this firm, with illustrations.

The employes of the Bernhardt & Gies hardware store, Preston, presented Isaac Eby, a member of the staff, with an address and smoking chair. Andy Spalding made the presentation, referring to an important event soon to take place.

The addition to the factory of the A. B. Jardine Co., Drumond Tool Works was opened on Friday evening, Dec. 24. The place had been decorated with bunting and presented a bright appearance. The Simpert-Jardine orchestra furnished music and a social time was spent in cards, other games and dancing.

The Thomas Birkett & Son Co. wholesale hardware hockey team, Ottawa, have elected officers as follows: Hon. President, Thomas Birkett; President, T. M. Birkett; Vice-President, J. T. Douglas; Secretary-Treasurer, A. J. Veale; Executive, Alex. Taylor, A. Lacroix and A. J. Veale. The club has entered in the Capital league, and the "orange and green" will be kept well to the fore.

Quebec.

H. B. Carbray, son of Hubert Carbray, has accepted a position with the Miller, Morse Co., hardware wholesalers, Winnipeg.

The employes in the stove foundry of the Perrin Plow & Stove Co., Rideau, presented B. Knapp, superintendent of the stove department, with a large leather-covered library chair and an electric library reading lamp.

C. M. Woodburn, late with T. B. Lee, and well known to the hardware and cutlery trade, has accepted a reengagement with his old firm, E. F. Walter & Co., Montreal. Mr. Woodburn was with this firm for six years, leaving them at the time of fire when business was not resumed for some time. E. K. Watson, late of E. K. Watson & Co., Montreal, is now connected with E. F. Walter & Co., as salesmanager. He and Mr. Woodburn will be in charge of the firm's exhibit at the hardware convention.

Western Provinces.

C. E. Noble, hardware, Vancouver, has sold.

The Alberta Rolling Mills Co., of Medicine Hat, is incorporated.

Graham Bros., Macklin, Sask., have purchased Geo. Anderson's tinshop.

Geo. Thompson is commencing in groceries and hardware at St. James, Manitoba.

G. H. Plaxton hardwareman, of Mortlach, Sask., has sold to W. A. Macdonald.

G. L. Noble, Lethbridge, intends to manage his hardware business and also the Crown lumber yard for the winter.

F. and J. Field's hardware store, Brawardine, Man., was burned out in a fire which swept the business section of the town.

Fred Johnston has disposed of his hardware business at Stewart, B. C., and has returned to Vancouver to spend the winter there.

The Trail Hardware Co., Trail B.C., has opened for business. The store has been completely renovated and painted, and a complete stock of hardware, stoves and tinware will be carried. Donald James Ferguson, an experienced hardwareman, is manager.

Patmore Bros., plumbers and hardwaremen, Cranbrook, have been making a specialty of ranges this Christmas season and have found a brisk demand for the article they are handling. A new feature in their store is a very handsome glass case of bathroom fixtures.

Cunningham's, Ltd., successors to Cunningham-Sanderson, Ltd., hardware merchants and contractors, had a formal opening of their new store at 1012 to 1016 Granville street, Vancouver, on Thursday, Dec. 15. Over 5,000 people called during the day, and of these the first 3,000 were given nickel-plated trays. The first 300 children were presented with carts.

A company has been organized under the name of the Moose Mountain Co., to take over the business now conducted by the Moose Mountain Lumber & Hardware Co., at Arcola, Kisbey, Forget, Stoughton and Heward, points in Saskatchewan. The new company is composed mainly of present employes, including A. M. Watt, Arcola; C. Campbell, Forget; J. R. Reid and A. J. Partridge, Kisbey; J. E. Johnson, Heward; F. W. James and R. T. Drew, Stoughton, and D. B. Jones, Winnipeg. The same managers will continue in charge of the different branches, and D. B. Jones will be general manager, with head offices at Winnipeg. The new company takes possession on January 1.

United States.

The Theo. J. Ely Mfg. Co., Girard, Pa., makers of mop sticks, mop wringers, carpet beaters and kindred articles, were burned out, their factory being completely destroyed.

HANDSOME CALENDAR.

The B. Greening Wire Co., Hamilton, have issued a handsome calendar, showing the extensive plant of the company with likenesses of the officers and founders of the business. The illustration gives an adequate idea of the size of the industry, which has grown to such large proportions that it ranks in the forefront of Canadian manufacturing concerns.

The present officers are S. O. Greening, president; H. B. Greening, managing director and R. H. Merriman, secretary.

PAINT PRICES.

Writing in the Zenith, George F. Hunt says: The idea that the present price of paint is "too high" and will not be maintained is altogether wrong. Paint is not high in price when based on cost to produce, and present values are here to stay. It is safe to assert that prices for high-grade mixed paints, specialties and varnishes will never return to the abnormally low figures which have ruled in the past.

On account of the exceedingly high cost ruling for linseed oil during the past two seasons, manufacturers of standard brands of mixed paints have been doing business at little above actual cost, until the last advance became effective, and, even now, the profit to the grinders of high-grade paint is a very slim one. The advances in paint prices are more than offset by the high prices obtained by the Northwestern farmer for everything which he produced this year. The difference in the price of paints between now and twelve months ago certainly is not going to stand in the way of property owners protecting and preserving their buildings. Paint is not a luxury, but a necessity, and its use cannot be deferred from year to year without consequent damage and serious loss to property owners. The aggregate difference in the cost of paint at present prices, as compared with those of a year ago, is an enormous sum, but the difference in the cost to the individual consumer is a comparatively small item. Consumption of paint will be just as great in 1911 as in any former year, providing the consuming public knows the facts and conditions which have brought about the present level of prices. The dealer who expects to place his order for paints and varnishes for spring at to-day's prices should not hold off in the hope of a lower price, but should buy now. He should likewise advance his retail selling prices to a basis commensurate with his advance in cost. The paint value is in the can and manufacturers and distributors are doing everything possible to acquaint the consuming public with present conditions and are assisting the dealer in every way to establish and maintain a price which will insure a fair and equitable return for him on his investment. To buy and sell paint without advancing retail prices to an equitable basis is simply inviting bankruptcy.

News and Methods of Canadian Hardwaremen

Holiday Advertising Heavily Carried by Dealers in Many Parts —Effective Window Displays Designed by Hardwaremen — Prize Winners in Hardware and Metal Competition.

REVOLVING TABLES.

St. John, N.B.—T. McAvity & Sons have introduced a new feature in their display windows in the way of revolving tables which are proving very effective in attracting attention to the goods shown. The tables are automatic affairs, operated by electricity and are installed in two of the five windows. Both have been fitted with high pyramids on which different classes of goods can be shown. Last week one of them was utilized in displaying table silverware, spoons, (of all sizes), forks, knives, carving sets, etc. The display form was made up of half a dozen circular shelves, tapering from a large size at the bottom to smaller ones at the top, the whole being surmounted by a silver candelabra. In the other a display of carving knives, bread knives and in fact every kind of kitchen or dining-room cutlery was shown, fastened on a high recessed form, while about the base were various other forms of silver or steel wares, suitable for Christmas gifts.

Another window was occupied with a display of sleds of all description, piled in studied disorder in the centre and suspended from the ceiling.

Still another had a tastefully arranged collection of skates, straps, etc. They were laid on the floor of the window and fastened to covered walls at the side and rear, in nearly every case a price tag being attached. The remaining window was occupied with tool chests of different sizes and other articles either useful or amusing for the children.

The windows of McLean, Holt & Co., dealers in stoves and kitchen hardware, were very attractively trimmed for the Christmas season. In one of the windows a combination range, for coal, wood and gas, occupied a central position. It was all set up as it would appear in the home of the buyer. Since the announcement of the gas company that gas would be supplied for cooking purposes at $1, this firm has been booming the sale of these combination ranges. At one side of the window was a refrigerator and in the foreground, a table set with enamelware dishes, the whole idea conveying a picture of a model kitchen.

In the other window a large cabinet range was shown surrounded by an extensive display of nickel-plated ware of all kinds, with neat price cards attached. Both windows attracted considerable attention and reflected much credit on the skill of the designer and trimmer, R. H. Irwin.

Mr. Irwin reports that business during 1910 showed a very satisfactory increase over 1909. Sales of stoves and ranges were considerably ahead of other years. W. E. H.

A PROFITABLE LINE.

A good many fires are caused at this season of year by too much dust and accumulation of dirt around radiators. Not only do radiators, which are kept free of dust, do away with this danger, but they radiate more heat. At this time then, brushes for cleaning out narrow spaces between coils, would be a profitable line. The price is reasonable and, no doubt they could be sold in large numbers.

GREATER EFFORTS MADE.

Guelph.—Local hardwaremen made greater efforts this year than ever before to capture a large share of the holiday trade. Not only did they carry larger lines of Christmas goods, but they paid considerable attention to window displays and advertised much more heavily than in past years.

During the week preceding Christmas, the Bond Hardware Co. carried a two-column ad. the full length of the page in the local papers and used this liberal space to boom all lines of goods. The slogan, "Buy it at Bond's," was used effectively.

McMillan Bros. took two-column space, almost the full length of the page and ran a series of elaborately illustrated advertisements, making a "special drive on lamps." Cutlery, razors, meat cutters and boys' tool outfits were among the articles to which special prominence was given.

Satisfaction with the bulk of trade done is expressed on all sides and it is safe to state that next Christmas will see even greater efforts made.

A PRIZE WINDOW.

In Hardware and Metal's fall window dressing competition, for places over 5,000 in population, second place was awarded to H. E. Burgess, for Brown & Mitchell, Brandon. The window designed by Mr. Burgess proved a very effective one, as the accompanying illustration shows. It proved a splendid business getter for the store.

A soft wood back for the window was covered with a suitable sitting room paper and installed in sections. The electric lights were colored doubly with light red tissue paper so as to give it a twilight effect. Dark red tissue paper was used for the inside of the mica doors and an electric light extension was run down the stove pipe and hung in the centre of the fire pot. Placed on the centre table, surrounded by books and magazines was a nickel-plated rayo lamp. At night the lamp was lighted and turned low. The floor was covered with black canton flannel, a rich looking but inexpensive article. A rug was placed on the floor in front of the stove on which was placed a stuffed cat.

A realistic home scene was presented and the designer is worthy of commendation for the completeness with which each detail was carried out.

AN INGENIOUS CONTRIVANCE.

Woodstock.—The miniature scenic railway, designed by Frank Jordan, one of the clerks with A. H. Gingerich, 478 Dundas Street, has created a very good impression. It was put in the window a week before Christmas and, from the very start, drew much attention. Crowds of people stood at the window from morning to night. Mr. Gingerich writes to Hardware and Metal: "The advertising we got from the scenic railway was much more than the cost of the article. People came into our store that we had not seen before."

The railway was made by Mr. Jordan in his spare time, starting about eight weeks before it was ready to place in the window. The incline was at the back of the window, about three feet high. The car was made in the shape of an auto with steering apparatus and a toy man. The car started slowly and made four sharp turns, carried by its own momentum. It was then taken up grade by an ingenious electrically driven belt. The car ran as long as 12 and 14 hours a day without a stop.

Fall Window Designed by H. E. Burgess for Brown & Mitchell, Brandon, Awarded Second Prize in Hardware and Metal Competition for places over 5,000.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises should not fail to use the Want Ad. Advertisement page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere who is looking for just such a proposition as you have to offer.

Rates: 2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion when box number is required.

BUSINESS CHANCES

FOR SALE—One set tinsmith tools and machines, also tinshop and plumbing business. Reason for selling, unable to handle with department store. Apply F. E. NICHOL, Killam, Alta. (1)

FOR SALE—Retail hardware business, established 20 years ago by Geo. B. Morris and conducted by the present owners for the last 4 years. In connection with the winding up of the existing partnership, the business is offered as a going concern. Correspondence invited. McMillan Bros., Guelph. (25tf)

WANTED—A man with a $5,000 to $10,000 hardware stock and $10,000 cash to take up a first-class hardware proposition in the West. Address Box 549, Edmonton. (55)

COMMISSION LINES WANTED

WANTED by responsible, energetice firm about to open an agency in Calgary, lines on commission, or will buy outright if necessary. Address Room 37, Herald Block, Calgery, Alberta. (55)

TINSMITHS' HELPER AND PATTERN BOOK, by H. K. Vosburgh.—A useful handbook for tinners and sheet metal workers. It treats of simpler problems in pattern cutting occurring daily in shops. Contents include Diagrams and Patterns Epitome of Mensuration, Tables, Rules and Recipes Price $1.00, postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Avenue, Toronto.

Nature has solved the problem of distribution. It uses a multitude of agents to effect the distribution of its products.

Nature does not expect every seed to fall upon fallow ground and to take root. But, it achieves a profitable percentage upon its distribution. This is all that an advertiser has to do to reap a profitable harvest on his outlay.

Differences in Special and Cut Prices

Story of a Price Cutting Incident Which Reflected on the Originator—Washing Powder Had Regular Price of 25 Cents—Cut to 22 and 20, and Eventually 18 Cents—Profit All Given Away—Ads. Suggested Illustrating Special Prices.

By Henry Johnson, Jr., in Canadian Grocer.

Special Prices.

Special prices and cut prices are two different things. Special prices are right, correct, legitimate; cut prices are demoralizing to merchant and customer alike. Let me illustrate.

When I went behind the counter in 1878 I think I remember a certain brand of washing powder as a staple, and I know that B——'s was there. These were in small packages, designed, I think, to sell at 10 cents each. But it is like yesterday that I recall the day in about 1883, when I saw G——t washing powder for the first time. Here was a package of "Washing Powder" of such generous size as to carry the impression that there was enough for a wash, and to scrub with, and to use for cleaning, without necessitating a continual running to the store for more. In other words, this was a package that seemed really worth while. And the selling price, as the salesman so well put it, was the popular figure of 25 cents —easy to learn, to remember, and to make change for. It seemed all right, and we stocked it and sold a lot of it. I should premise here, however, that, as I have said before in these columns, our business was of a staple character, far removed from fancy fruits, shelled nuts and olive oils; and the elder Johnson had some old-fashioned notions about selling at legitimate prices, irrespective of what might be called "regular" prices.

How the Prices Were Cut.

Hence it was not long before G——t was sold by us at 22 cents; in fact I think that was the price at which we started it. Well, the result was that almost immediately everybody was selling at 22 cents; then those who did not know, as the elder Johnson did know, just what was a legitimate, businesslike margin, cut the price to 20 cents, then 18 cents, and the profit was a minus quantity. That is price-cutting.

Use of Special Prices.

Now here is the difference. Special prices are legitimate, and a valuable feature for the advertiser, because the concession is made on goods and brands under his own individual control. When you advertise Smith's 30 cent coffee for a week at the special price of 28 cents, 5 pounds for $1.15, you are advertising Smith and only Smith. You are not demoralizing anybody's business. You are not working up any demand on which the other fellow can trade. You are not trading on anybody else's work or good will. Your neighbor cannot gain any advantage from what you do, for obviously he cannot sell Smith's goods, nor even say his goods are "the same as Smith's," because the densest competitor will see that thus he would only be playing your game for you. So the special price, named for a certain definite time, or on certain quantities, applies to your business only. The reduced or special price has its proper uses, and the live merchant will use it regularly in building his trade.

Suggestion for Coffee Ad.

I have told you that "Mother" knows values, and she certainly does. She may not, however, have tried your service in certain lines—probably coffee, as coffee is one of the things about which she is characteristically conservative. You may have got her to try your cranberries, and uncolored Ceylon tea, and various other things, by your snappy little ads.; but she still holds off on coffee, because coffee either makes or unmakes the breakfast, and "Father likes his coffee just so, or his day is spoiled, etc." As you progress in this work of planning out little catchy evening readings for the family, you will inevitably get around to your coffee department; you will kind of wake up to the fact that the coffee trade should be yours, and that you can get it if you go after it. Thus you will say:

> Smith's Bokava Coffee at 30 cents a pound is really out of the ordinary; rich, mild, full "bouquet," very flavory. This week, per pound, 28 cents. By all means try it.

And as "Mother" reads that over—and goes back over it a second time, as she has got used to looking for your talks by this time, she concludes to take the plunge, and next morning she does try it. It is up to you, then, as a good merchant, to see that the coffee is right; and, if you do, you will have added one good customer to your list.

Retain Purchaser's Confidence.

The right way to do this is to offer one coffee at a time, at a special price, for the period stated, and never be guilty of extending the time by a day, nor give anybody the special figure after the time has expired. This will gain you the confidence of your readers, who respect a man in just the proportion as he shows plainly that he means just what he says.

Say:

> Smith's pure Ceylon tea, regular 60 cents, special at 54 cents this week. You, who are familiar with Smith's teas know how cheering is the cup of pure Ceylon, when properly selected for flavor and body—not for looks. This is the kind you want. Order it this week.

All of which does not mean for a minute that you shall not quote a company's tea you are selling; no, not at all. But when you quote such a brand, name the price fixed on it by the company, and back up the work those people are doing to give you an assured, legitimate margin. When you name prices on such things you are indicating to all the "Mothers" in your town that "Smith has everything." And you are also taking proper advantage of the money the importer is spending to establish a demand of which you are entitled to reap your share of benefit. You can greatly increase your share by backing up the importer's general advertising by your own local advertising in this way.

In this way you build your business on legitimate demand, honestly cultivated. Your house is not founded on sand, but on the rock of solid facts. You are in a position to make good any time on your representations. And you are not harming a single legitimate business interest. This is a good deal to say, when you come to think of it. It contravenes a good deal of what we hear about it being impossible to get business unless you offer "inducements" — "inducements" in this case meaning cut prices. For really the man who depends on that kind of inducements to his trade is working on sorry lines. He will have no following but the chronic bargain hunter: and the bargain hunter never did any grocer any lasting good.

Enforcing of Fixed Prices.

It is a question both of law and of ethics, to what extent it is feasible, practicable and good public policy to enforce the maintenance of prices such as the manufacturer or producer names on his brands. I feel very strongly that the manufacturer should be backed up by every grocer. I am satisfied, too, that I can show that the owner of a trademark or trade-name, can protect his goods against the cutter.

But simply as a matter of farsighted business, the retailer will fare best who adopts the policy of upholding the established price on every article on which the maker is broad enough to fix a price. Think over the case of a certain company's brand of tea, as sketched above. Think of the careful planning and thought which has gone into the establishment of a demand based on quality at the prices named by the importer. Think of the skill behind the blends. Is not such a line entitled to your support; and will it not pay you to support it?

MANUFACTURERS AGENT WANTED.

Leading American Hammock Manufacturer having lost Canadian representative by death desire to establish successful agent now calling on Hardware, Sporting Goods and Departmental store trade. Will be in Toronto, Wednesday, January 4th. Address or call N. W. Campbell, King Edward Hotel, Toronto. (Advertisement.)

EXPERIENCE

IS THE GREATEST OF ALL TEACHERS

It is the result of Experiment and experiment is at all times a more or less expensive proposition. The man who buys a cheap Furnace experiments. The first cost is usually the determining factor with the man who is looking for bargains. It is the factor which makes saleable the cheaply constructed Furnace, and the purchaser has to pay for the experience.

Selling an inferior Furnace to the customer who does not understand Furnace construction, doesn't improve a dealer's chances of business success. A householder may be fooled into buying a good-looker, but the next time—you can bank on it he will want the good heater.

"Pease Economys" are the concrete result of half a century of scientific research and practical experience in Furnace manufacture. There are over 78,000 of these celebrated heaters in use to-day (thousands of them for over twenty years). They are the highest grade and highest priced Heaters manufactured, and the enormous record of sales is a guarantee that the Economy is the one Furnace manufactured which has passed clear beyond the experimental stage.

The Dealer will find the "Economy" a business builder, and the purchaser will find it all that its name signifies—"ECONOMY."

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected By Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Winnipeg, Dec. 26.—Owing to the Christmas season the wholesale trade has been rather quiet during the last week, as all the travelers are off the road. Spring bookings already secured have been very satisfactory and travelers report the general retail trade throughout the west to be in a flourishing condition. The taking of stock is still in progress in the majority of the wholesale establishments but will be completed within the next week or two.

Prices in all lines remain steady, but a general readjustment will be made about the first of the year.

Winnipeg Hardware Quotations.

Axe Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.80; p.g. oak, $2.75

Auger Bits—"Irwin" bits, 47½; other lines, 75 per cent

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

Bar Iron — Bar iron, $2.50; Swedish iron, $4.75; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $13.

Blocks—Steel, 45; wood, 60 per cent.

Cut Nails—$3.10 per keg base; pressed spikes, $3.50 base, usual extras.

Copper—Planished copper, 30c per lb.; tinned, 24c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corugated iron, 28 gauge, $3.87; pressed standing seamed roofing, 28, painted, $2.83; galvanized, $3.87; 26, $3.24.

Paints and Oils.

Trade in all paints and oils has been very quiet during the last week owing to the Christmas season. Wholesalers and jobbers are, however, satisfied with the business this fall, while that for the spring already shows quite an increase over last year. Linseed oil remains stiff at $1.15 for raw and $1.18 for boiled. Turpentine is also steady and firm at last week's quotations, while in varnish the trade is keeping up very well, and in fact for all inside finishing material an active demand continues.

Petroleum and Gasolene.—A steady trade continues in all grades of oil, both crude and refined, a decline of ½c per pound having taken place in a few cases.

Petroleum and Gasolene—Silver Star, in bbls., per gal., 15c; Sunlight, 18c; Family Safety, 22½c; Searchlight, 20½c; Red Rose, 25½c; Keystone Special, 18c; Pemoline, in bulk, 19c; Silverlight, in bulk, 15c; Acme lamp, in bulk, 27c; White Rose, in bulk, 22½c; National Light, in bulk, 21c; Engine Gasolene, 24c; White Lily, 26c; Royal, 24c.

CATALOGUES.

Handsome Calendar. — The Horton Manufacturing Company, Bristol, Conn., have gotten out a calendar for 1912 which is typical of the class of trade they are engaged in. It is called "The Tragedy," and is reproduced in full colors from an attractive fishing scene painted by Oliver Kemp. The calendar will be sent free to all dealers who handle "Bristol" steel fishing rods and other fishing tackle. A charge of 15 cents is made to all others.

Cost Accounting.—An excellent book has been written by Frank E. Goodwin, entitled "Cost Accounting Pathfinder," which should be read and studied by every merchant who has any doubt about the percentage of his total sales it costs him to do business. The fact that many merchants "drift" into business without much knowledge of bookkeeping methods, and flounder along in an effort to make the business pay, is well known, and the controversies frequently heard on the subject of how costs should be figured, whether on the invoice or selling price, also indicates that there is room for much study on this point by those who disagree with the principle that costs should be based on the selling price of the goods. Mr. Goodwin's book goes into these questions thoroughly and is worthy of the closest study. It is well bound in cloth, and sells at $1 from the Technical Book Department of the MacLean Publishing Co., Toronto.

Do you use big box car black capital letters in your advertising? Circuses do, but they appeal to a different kind of crowd.

Do you try to sell each customer what is really best for him, or merely try to pick his pocket as soon as possible?

Do you lie or juggle words in your advertising? Exaggeration does more harm than good.

TALKS ON PAINT SELLING

No. 7

From September 1st of this year to October 24th—a little less than two months—this Company received exactly 35,621 direct inquiries from property owners as a result of our national campaign of magazine advertising.

This is an average of 717 inquiries every working day during that period, and they are still running from 300 to 500 a day.

These inquiries were mostly created by the publicity given to the work of our Decorative Department and what it can do for the property owner. The demand for our "Model Cottage-Bungalow Portfolio" has exceeded all our expectations. Every one of these inquiries is promptly answered and the portfolio is sent, together with the name and address of the nearest S-W Agent. At the same time, the names and addresses of the inquirers are sent promptly to the Agents in their respective localities for further action.

It is impossible to estimate the amount of business that has resulted to our Agents all over the country through this campaign. We do know, however, that notwithstanding the advances in prices necessitated by market conditions, our Agency business has shown a most satisfactory increase.

What now becomes of the claims made by some, that intelligent advertising is a doubtful quantity, or that it only increases the cost of the products? The constantly increasing sale of S-W Paints, Varnishes, Stains and Enamels through our Agents is the best answer to that question.

Have you written in for our Agency Proposition yet?

Stove Dealers Need Tinsmithing Department

Efficient Service in That Branch is a Sure Means of Gaining and Holding Trade—Stove Dealers Without Tinsmithing Staff Are Handicapped in Many Essential Respects.

"To make a success of stoves a dealer should have an efficient tinsmithing department," said a Western Ontario merchant recently.

"I speak from experience," he continued. "Until a few months ago I carried a couple of tinsmiths and did on the whole a fairly satisfactory business. Trade got dull, however, and I decided to let them go. The result has been much trouble and some loss of trade. I regret very much having dropped the department, and am now arranging to get back into the tinsmithing again."

He had found that customers who had purchased stoves and furnaces from him came back to have repair work done, new pipes fitted, etc. He had had to refer them to other places. What stoves he had sold had been installed in the purchasers' houses with difficulty and delay, owing to his lack of efficient help. Customers had become disgruntled, and he plainly saw that his trade in heating lines was sure to decline if he did not get back to the old way.

A tinsmithing department is needed, in the first place, for the convenience of customers. When a stove or furnace has been bought at one store, the purchasers prefer to have their repair work handled by the same firm. In the seccond place, it is a means of gaining and holding trade.

It gains trade by bringing the firm into touch with a large circle of prospective customers. A man may want his eavetroughing repaired or new pipes fitted to his kitchen range. He has Smith & Co. attend to the work. Smith's man doess the work quickly and satisfactorily. He may, in addition, be asked to look at a stove which has been giving some trouble, housewives having a faculty of craftily seeking gratiutous advice on such points. He is able to tell her what is the matter and how to avoid future trouble. The housewife is grateful and will always turn what trade the family may have to offer over to Smith & Co. If a new range is needed the store of Smith & Co. is given first chance. In this way a tinsmithing department brings a firm into touch with a large number of homes and associates the firm name with everything pertaining to heating and ventilating.

Likewise, trade is held by having efficient tinsmiths on the staff. After a man has bought a stove at one store, he prefers to go back to the same place when necessity arises for new parts, new pipes or repair work of some kind. If he has to go elsewhere, he comes to look on Smith & Co. as a one-horse concern which does not handlle all branches of the trade and will almost certainly transfer his custom.

It frequently happens that stove agencies are placed with tradesmen in widely different branches of trade—seed merchants, furniture dealers, implement dealers, even with farmers and individuals disassociated with any form of retail trade. This is most often the case in small places where the number of hardware and stove stores is limited. Manufacturers who cannot find a hardware or stove dealer to handle their,lines will sometimes create an agency by placing a stock in some other store. In such cases, the merchant generally acts on commission and the risk is borne by the manufacturer. Cases, doubtless, are known where a good business has been established in this way. Very frequently, however, the results are anything but satisfactory.

In the first place, the merchant taking up the stove agency knows nothing about stoves and his sstaff is perhaps in even greater darkness with reference to the stock. They cannot intelligently sell stoves. As the stock is carried at the manufacturer's risk, the chances are that no effort will be made to get a comprehensive grasp of the subject, the merchant preferring to concentrate his attention and the energies of his staff on the legitimate branches of his trade, in which he has his own money tied up. As a further handicap, no tinsmithing department is carried.

The above is quoted to point another moral. Stoves do not sell readily unless the salesmen know their stock through and through. A furniture clerk, whose knowledge stops at furniture, cannot sell stoves successfully. Neither can the hardware clerk who has never allowed his business grasp to extend beyond nails, lanterns, mitts and other hardware staples. Clerks who can sell, and tinsmiths to handle the work incidental to stoves and furnaces, are necessary adjuncts to a successful business. Customers will not buy from salesmen who seemingly know nothing more about the stock than they do themselves. Stoves are not bought at a venture; purchasers refuse to take chances and will buy only when convinced that a certain stove is as good as they can get, and will give fullest satisfaction. The clerk who cannot, by force of explanation and demonstration, carry conviction on these points, will never sell stoves. Furthermore, customers require prompt and careful installation. Otherwise their custom will soon be transferred to another firm which can give what they want.

Do you print your entire catalogue in each advertisement? You should not. Nobody wants to read your invoice.

Do you always state the price in each advertisement? That's the principal point the reader wants to know.

Hardware Letter Box

J. E. Hussey, Melbourne, Ont.—Can you furnish information with reference to the installation of a dumb-waiter in a private house and the probable cost?

It all depends on what kind is required. A handy carpenter can, with the help of pulleys and rope, put together a lift in a verv short time. The necessary material for a job of this kind can be obtained from any hardware wholesale house. If a regular dumb-waiter is desired, the material can be secured from any elevator company. There is a wide range in dumb-waiters from the elaborate electrical kinds, which are worked by electrical appliances to the simple 100-lb. waiter. The metal material for the latter can be secured from the elevator companies for $20, in addition to which the box, rope and guide strip would have to be supplied. This variety of dumb-waiter is used very largely in private houses, particularly where it is operated only between the basement and the ground floor.—Editor.

A. I. Wright, Hamilton: Can you tell me who are the manufacturers of folding tin lunch boxes?

E. T. Wright & Co., Hamilton.—Editor.

McLeod Hardware Co., Sydney, N.S.—Can you let us know the name of manufacturers of metal shelf boxes in Canada.

Cameron & Campbell, Toronto.—Editor.

Bernhardt & Gies, Preston, Ont. —Where are boy scout supplies made?

The stuff is made and handled by jobbing houses. Other articles, such as knives and axes, are made in England, and are handled by some clothing manufacturers. The Miller Manufacturing Co., Mutual Street, Toronto, make a specialty of scout supplies.

J. R. Myers, Stratford.—Can you tell me the manufacturers or jobbers of fire place tools, fenders, etc.

James Cartland & Son, Birmingham, England, manufacture all such lines which can be secured from most hardware jobbers and from H. F. McIntosh, 28 Toronto St., Toronto.—Editor.

Collingwood Hardware, Ltd.—Can you tell us the makers or agents of interior grates for fireplaces and the makers of brass kerbs for tile hearths, brass rests and fire brasses. We would also like the address of the agents who handle enamelled tiles for fireplaces, loose and slabbed.

Interior grates for fireplaces are made by A. Whitaker, Windsor. Jas Cartland & Son, Birmingham, Eng., make brass kerbs, rests, etc. H. F. McIntosh, 28 Toronto Street, Toronto, is agent for enamelled tiles for fireplaces.—Editor.

Wm. Black, Durham.—Kindly inform me who the manufacturers of Herringbone Wire lath are.—Metal Shingle and Siding Co., Preston.—Editor.

Have You Read about Our Fight Against Catalog Houses?

THE October "Hammer," our house magazine, tells all about it—the trade papers are full of it—the most sensational, significant and scientific move ever planned and executed against the Catalog House—against a business force that is *menacing the very existence of thousands of retailers.*

We don't sell Catalog Houses—we make it impossible for them to buy from jobbers. We tell the consumer, in our national advertising, that Catalog Houses are not licensed to sell our revolvers. The same warning is printed on every revolver box.

These are the opening moves—watch our plans unfold from week to week. If other manufacturers will follow suit the Catalog House problem is solved.

The finest revolver in the world; price maintenance that insures a fair profit; and no Catalog House competitors—isn't that the sort of proposition for a retailer to tie up to?

The Ultimate Effect of Parcel Post

Writer Thinks That the Express Companies are The Chief Opponents—Why This is a Mistaken Impression—The Retail Merchant is the Chief Obstacle—Parcel Post Would Tend to Break Up Prosperous Rural Communities and Congest the Cities.

A Sarnia, Ont., reader in a letter respecting Parcel Post, says :

"You say that cheap parcel post is desired by the mail order houses; very likely. But this old story has been going the rounds until it is threadbare. The real opponents of parcel post are the express companies, who do not want any interference with their present monopoly at fancy prices.

"After a good many years' experience of shopping in small towns in Ontario I venture the opinion that the local dealer himself is a loser by the excessive cost of getting small parcels, not so much directly, but in ways that he does not perceive. It prevents him from procuring things that are not in stock, promptly, and at a reasonable price ; and this in turn drives people to the catalogue houses, not so much because of prices but because they have the assortment.

"Here is the way the thing occurs : A customer asks for something that is not in stock. It may be a specialty, or a novelty, or repairs, but anyway it is not in stock, and the dealer says : 'Haven't got it—anything else ?' Some times he will express regret, and sometimes he will behave as though the enquiry were a reflection on his methods of store-keeping. So the customer trys another store, with no better result ; and then, thrown on his own resources, hunts up the mail order catalogue, which is now as common as the big bible on the parlor table used to be twenty years ago.

"If he finds what he wants he mentally adds the express charges, and grumbles at the expense. Just at this point his attention is attention is attracted by some other items, and it occurs to him that by ordering a good sized parcel he will save some freight. Consequently he sends five or ten dollars out of town when he only intended to send one or two.

"Needless to say, this does not account for every instance, but it is a good rule for local dealers never to refuse business for anything that can be procured and delivered at a fair price. At present the express rate on small parcels between Ontario points averages about $10 per cwt. with a minimum of 35 cents. It is absurd, and altogether beyond the fair cost of the service, or the value to the ultimate consumer."

A Common Mistake.

EDITORIAL NOTE.—Hardware and Metal was glad to receive this letter because it gives an opportunity of pointing out a common fallacy on the part of many people. It shows that the writer of that letter has also been drawn into the trap skillfully laid by the quiet manipulations of the mail order houses who are anxious to have everyone believe that the express companies are the only opposition to such a measure.

When he says that the real opponents of parcel post are the express companies, he is mistaken. To prove this one has only to ask himself the question: How long would it take to establish parcel post if the merchants were quite willing that it should come? The great opponents are the merchants, not the express companies. No one will undertake to dispute the inference that the express companies charge fancy prices. This has been the general impression, and the finding of the Commission appointed to investigate express conditions in Canada arrived at that conclusion. We can therefore expect that within the coming three months some amelioration with respect to the excessive rates charged by these express companies, and consequently we should not be able to say at the end of that time that we ought to have the parcel post on account of these high rates.

Where Merchants Err.

What the writer subsequently says contains on the whole several truths. It is true that in most towns, villages and country sections, there are merchants who do not pay enough attention to assortment and who are not overanxious sometimes to serve a customer with an article not in stock. But in a town the size of Sarnia, one is constrained to question the inference that frequently he is unable to get goods required from some merchant. The whole trouble in connection with this misundestanding lies in the fact that merchants in all lines of trade do not advertise their goods through the public press or otherwise, sufficiently to let the general public know the assortment they carry. If every merchant boomed his own business in proportion to the manner that the mail order houses do, there would be very little business leave any town, village or rural community.

This is what the trade newspapers of the MacLean Publishing Co. have been pointing out for years, and a great many cases are known where the mail order business has been greatly reduced simply because merchants have adopted more aggressive measures.

To get back to the main issne: the retail merchants base their opposition to parcel post on the assumption that a parcel post would give the mail order concerns greatly augmented power in competition with local merchants in all the smaller cities, towns, etc., in every province.

These houses have already appropriated a large portion of the trade of a great many retail merchants. Add to their present advantages, the services of the government in providing them with greatly reduced transportation rates and rural mail delivery, and the effect of the intensified competition against retail merchants becomes to the latter alarmingly evident.

But here is the situation in brief: the question concerns not alone the survival or the prosperity of the retail merchants; it concerns, through them, also the prosperity and individual welfare of our rural population and our smaller cities, towns, and villages, whose merchants are the main support of public improvements, of libraries, of the professions and of civic progress in general.

A parcel post, therefore, means more than cheaper transportation or resistance to any extortions on the part of express companies; its evident vital relationship to commercial and political condtions in every community demands attention.

It is for these reasons, it is maintained that the contention of the great and, so far, unsurmountable obstacle—the retail merchant—to the parcel post should be given proper recognition.

Draws Life From Rural Sections.

What has been said above is fully substantiated by the New York Journal of Commerce, one of the leading lights on trade and commercial questions in the United States. It says: "The strongest advocates of parcel post are the large department and mail order stores in centers of distribution for merchandise. Some of them now send catalogues and circulars all over the country and take orders by mail, but their business is restricted by the necessity of delivering most of their goods by express.

"If they can get the government to carry and deliver them a thousand miles at the same rate as from the village post office to the outlying farms, what will be the effect upon the local storekeeper? He may find the most profitable part of his trade drying up, and he cannot prosper by merely buying and selling farm produce. Retail trade in villages is important for the conservation of community life. Its prosperity is good for all the neighboring country and its languishing would be a calamity. Parcel post would tend to its extinction and counteract the effort to encourage living in the country, by increasing the tendency to congregate in cities and large towns. Trade and industrial life need to be diffused and not concentrated more and more, and the government ought not to divert its mail service to increasing congestion and drawing the life from rural towns by blighting their commercial side."

No. 41

A NEW YEAR'S RESOLUTION.

Here is a new year resolution for every hardware merchant without exception: "I will push my paints harder than ever during the coming twelve months; I will not be content to let them lie hidden at the back of the store and leave them to sell themselves; I will run windows that are a credit to the brand that I carry; I will keep a stock that will be a credit to the store; I will utilize the advertising matter that my manufacturer sends me to the best of my ability, I will canvass the district thoroughly; and to cap it all I will be enthusiastic in the selling of paint and in the great consumptive field awaiting the article."

A merchant who makes such a resolution as this and sticks to it religiously cannot fail to make a success of his paint department. It is the man who is but half confident over the prospect; who is afraid that things will not pan out so well as expected who fails to make his paint department go. Many merchant as we have pointed out often before are inclined to look upon their paints as a minor side line kept because customers ask for them. They make little effort to push sales, with the result that houses, barns, and fences are allowed to deteriorate all through the district for the want of energy on the part of the merchant. He neglects what should be a major, and not a minor, part of his store for the want of enthusiasm.

Enthusiasm is the master key. If once the merchant becomes enthusiastic over the possibilities of paints he will soon touch the dollars and cents that lie behind them. But the dealer must understand this, that the right way to sell paints is not to sit behind his counters and expect the consumers to come to him. He must go out and educate the consumer to the value of paint. He must arouse the spirit of emulation among the property owners so that no man will allow his neighbor to lead him in the matter of using paint, and in doing this educational work, the dealer is not only working for himself but for the community, because paint is a valuable asset to every man. A man who paints his house regularly is adding to its value as a selling proposition and he is preserving it for his own use. The housewife should be told that paint is a disinfectant as well as a beautifier and that a house made cheerful by paint must necessarily be the abode of health and happiness. The dealer is the only man who can do this educational work

ELASTILITE

DEALERS can handle this varnish best. It covers so many kinds of work so perfectly---inside and outside---that it gives satisfaction to all types of customers. This helps the dealer's business.

For highest class trade "ELASTILITE" will give good satisfaction. It brushes well, flows well, holds its finish.

and he can do it easily if he is thoroughly enthusiastic.

The paint dealers in the States are much more alive to the profitable field that paint selling gives them. They recognize that no line of goods offers better profits than paint; that no line of goods has a better selling field if properly encouraged; and that no line of goods has the co-operation behind it as offered by the paint manufacturer.

There is no doubt that if the dealer were a practical painter a lot more paint could be sold but all the same he can easily pick up those selling points which will give him a strong campaign and above all he is helped in every way by the manufacturer who spares neither time nor money to help forward sales.

Confidence in one's goods is the first requisite to success, it is an easy matter to pass this confidence on to a customer.

PAINT AND OIL MARKETS

MONTREAL.

Taking a yearly review of the paint and oil markets the dominant feature is undoubtedly the bulling movement in linseed oil. Although it was expected in January that there would be much higher prices in linseed oil it was not anticipated that the inflation would become so pronounced. Flax seed was soaring, and a good many merchants taking a speculative eye as to the future, bought much more heavily and were exceedingly glad because they did so, but as we said few anticipated such soaring of prices as occurred, and users have had to pay heavily for their oil. Shortages of seed in the States were followed by a drain from outside sources on the Canadian market, and during the last few months of the year it was extremely difficult to obtain any quantity of oil, in fact grinders and holders have been disinclined to part with the oil and unlike what is usually the case the buyer of many barrels was very unwelcome. Although of course the market has fluctuated because the English market up to a certain point controls the situation—and the English market is naturally of a more speculative character than the Canadian one—the advance in oil has been practically steady from the commencement of the year. Starting at 80c for raw and 83c for boiled, linseed finished up at the price of $1.06 to $1.10 for raw and $1.09 to $1.13 for boiled. And what of the future? There seems little prospect of any relief in the immediate future. There is great shortage of flax seed in Canada. The United States are short fully 10 million bushels alone and have been the biggest buyers of our flax seed. It is not expected that Argentine can help matters very much, and with a world wide shortage of flax it seems hardly possible for linseed oil to be much lower or even to remain as low as it is now during 1911 or until it is more fully known what the flax seed market for Canada will be. It can be seen that with linseed oil so high all products which contain a percentage of the former article naturally felt the advancing movement and this was especially noticeable in liquid paints which suffered advances on three or four occasions.

Turpentine likewise experienced a bulling movement. No doubt linseed had a sympathetic effect on the product but there was a shortage at Savannah and the demand all the way through has been above the normal so that on the whole turpentine showed an advance in figures. Starting the year at 78c to 80c for single barrels turpentine concluded the year at the price of $1.02 to $1.05. Here again it is not expected that the early part of the New Year will see any recession in prices, but turpentine so far as a relief in the tension is concerned is much more favorably placed than linseed.

White lead owing to want of unanimity between the grinders was, until towards the end of the year, selling at a price that was excessively low considering the advance in linseed oil, and as a matter of fact grinders were practically selling at cost and in some cases below cost. Towards the end of the year the grinders got together and raised their prices 25c and more, so that white lead ended with a stronger tone than would otherwise have been the case. The year opened around $5.50 and closed at $6.25.

Putty likewise felt the influence of the higher prices all the way around and showed an advance over the commencement of the year of 60c. This has been a good year for putty and although there has been in this line and in all the others some discontent amongst merchants as to the higher prices the demand has not been affected and it is certain that users fully realize that if quality is to be maintained the price must be commensurate with conditions.

Other lines such as varnishes, red lead and white zinc have all felt the influence of the advance in raw materials and have shown higher prices. The tone of the market has been exceptionally good, because the demand has not been affected by the higher prices and all the way around there is a general feeling of confidence as to the future. Undoubtedly in the past the consumer, had been paying too little for his paints and paint constituents. He must use paints. He wants to use paints and a few extra cents a gallon or a pound will not stop him, if the merchant's selling force is strong enough, from making a purchase.

TORONTO.

December 31.—"A splendid year" is the terse phrase employed on all sides to sum up the paint and oil business transacted during the past year. Without exception the manufacturers and jobbers have been busy, and the volume of trade has been well in advance of the previous twelve months, despite the fact that exceptionally high prices have prevailed. Shortage of crops and other causes have led to a distinct advance in most lines, and quotations made to-day are very considerably in excess of the figures given at the first of the year.

Look Ahead AND Assure Future Profits!

If you are intending to go out of business shortly, this is not important — but if you intend to keep right on, it is necessary **now** to lay the foundation for your sales in 1915.

If you sell a man good paint this year, it is true that it will not need renewing so soon as an inferior article, but when it **does** he will come to you. Moreover, in the meantime, he will probably get some of that same good paint from you for another job.

HALIFAX, N. S.

The continued upward trend has at frequent stages of the year caused supply men to fear a falling off in demand, but the buyers seem to have accepted the inevitable, and continued to handle the goods freely. It is true that, in some lines, the trade has tapered off a little during the past month or six weeks, more perhaps than is customary at this season, but this has not been sufficiently marked to have any effect on the showing for the year.

Satisfaction is expressed on all sides and it is confidently expected that the coming year will see the continuation of prosperous conditions.

Linseed oil has advanced in price gradually, owing to a shortage in the flaxseed crops, until to-day it sells at $1.10 and $1.12 for raw, and $1.13 and $1.15 for boiled, the lower quotation in each case being for ten barrel orders. At the first of the year linseed oil was selling around 81 cents, which was then deemed to be a pretty high figure. Starting off in the first week of the year, however, it advanced 3 cents and in two weeks more went up 2c more. Through February and March the price fluctuated up and down, until on March 26 it took a marked trend upward, an advance of 9c being made at that time. In April it crept upward, 12c being added to the price, but through May it declined more or less regularly. As the report of the shortage in flaxseed became more certain, the market appreciably stiffened, advancing by gradual stages to the present high-water mark. The prospects for the future are at present uncertain. The tendency has been lately to look for easier quotations, but to-day the market is reported firmer.

Turpentine started the year at 80c and to-day sells at $1.05—the sharp advance being due to shortage at Savannah and the primary markets. The advance began during the latter part of January, when 7c was added to the price. An easier tendency was noticeable from then on until the end of July, when an increase of 4c was registered. From that time until the present there has been a steady advance. Storms in the seas around Cuba have been partially instrumental in boosting the price on several occasions, but the advance was in all cases maintained. Parties who claim to be in touch with present conditions say that the market will be very firm for the next two months.

White lead has not advanced in keeping with oil and turpentine. Early in January a pronounced increase of 30c was made, but the tone for the next six months was easier. In September the advance in other lines brought about an increase in white lead, ranging from 15c to 25c, and again in the early part of December an all around increase of 35c was registered. The last advance was made only after careful consideration on the part of the makers. The price of white lead is still much lower, however, than the cost of oil and turpentine warrants.

Putty has been in steady demand, and prices have had an upward tendency. The present quotations range from 45c to 60c above the prices asked at the first of the year. The sale of putty has continued brisk the whole year around with no cessation at any stage. An increase was expected some weeks ago, owing to the advance of the freight rates, but the change did not materialize.

Petroleum has been active during 1910, but the prices asked at the present are a little easier than at the same period last year. The steadiness usually expected in petroleum lines has been in evidence, and the prices have been more or less fixed at all seasons. A great volume of business was transacted during the past fall and early winter, and the year's business has been quite satisfactory on the whole.

Glass has sold well at prices which have been firm, but not overly high.

"The high prices have not hindered business, although the situation has had one result," said a local commission agent. "Orders have been smaller—and more frequent. On the whole, the year's business has been good, and no one should have room to complain."

DURABILITY OF PAINT.

From replies made by 83 leading builders, says the "Master Painter," it has been learned that exterior painting lasts on an average five years; interior painting, seven years. The percentage of depreciation per year is 20 and 17 respectively. A brick house adds two more years of life to exterior. The average depreciation for the brick building is a little over 14 per cent. for both inside and outside.

On a frame store building painting lasts on an average five years, inside and out; depreciation, 20 per cent. On brick store buildings the average wear of the paint is six years, inside and out; depreciation, a little over 16 per cent.

LANTERN IMPROVEMENTS.

E. T. Wright & Co., Hamilton, are improving the No. 4 cold blast lantern which they brought to a high degree of perfection during 1910. It is their intention to offer a cheaper grade of the Genuine Original Cold Blast, which will be of similar construction to the No. 4, but fitted with plain globe and tin burner, and not retinned. With the No. 4 Retinned Cold Blast and the No. 02 Plain Finish Cold Blast Lantern, E. T. Wright & Co. will be able to supply the local demand for a high grade Cold Blast Lantern, or meet any competition arising from the importation of foreign made goods.

Do you put glaring printed signs on packages? No customer wants to be a walking signboard for your store.

Do you notice whether every corner is thoroughly clean and every article ready for a customer to see or handle? Do you use enough light for close inspection of the goods? If you don't customers will distrust you. — Farm Machinery.

Standard Paint and Varnish Works Co.

WINDSOR, ONT. *Limited*

STAR HACK SAW BLADES

Apparently no one questions the superiority of Star Hack Saw Blades and at our present figures there is absolutely no room to question the price.

They are equally good in hand frames or power machines. When used in a machine the feed should be adjusted to suit the stock being cut. The softer the stock the lighter the feed. Such treatment will prevent clogging of the teeth. Open your eyes wide and look at this list of prices:

6	7	8	9	10	11	12	inch
30	32	34	38	42	46	52	cents per dozen.

Notwithstanding the great reduction in prices, the quality of Star Blades has been improved.

Are you selling TILE-LIKE?

It is a colored Varnish and Stain combined, which requires no stirring, and is uniform in eolor from start to finish.

TILE-LIKE

is extremely easy to apply, and for this reason is much used by the amateur house decorator in his own home.

Will not hide the grain of the wood, and is specially suited for all kinds of interior work, wherever wear and tear is considerable.

Will not scratch white nor show heel marks. Can be used on furniture, floors, linoleum, etc., with best effect.

Made of pure Kauri Gum, and CONTAINS NO ROSIN.

Send for Colour Card and Prices.

FOR SALE BY ALL JOBBERS

Ontario Lantern & Lamp Co., Ltd., Hamilton, Ont.

Cummer-Dowswell Wash Day Labor Savers all have that Exclusive "Something Different"

that interests buyers and makes the line READY and STEADY SELLERS.

For Instance :—

TUBS with NO INSIDE OBSTRUCTIONS, but of large capacity, and an opening full size, providing ample space for wringing operations. Then the inside is CORRUGATED IN CENTRE ONLY, leaving full thickness of stave at top and also where bottom is fitted in, A VERY IMPORTANT FEATURE, as it prevents leakage, as in the case where bottom and corrugation meet, and greatly strengthens both chime and top.

Ideal Low Pressure Power

The LEG HOLDER is Bessemer Steel, grips under chime and is **bolted through** both tub and leg (not leg only), making the tub and leg strong and rigid as a bar of iron.

Then it's the most complete, best, and most widely advertised line of Washing Machines, Clothes Wringers (both hand and power), Churns, Egg Crates and Rotary Lawn Clothes Dryers on the market.

All machines of QUALITY and reasonably priced.

H. Boker & Co.'s 'Tree' Brand Cutlery

Tree Brand are the Quality Kind—the kind that keep your men customers on the satisfied list. They take a keen edge and they keep a keen edge—an edge that gives a clean, close, satisfying shave. Please a man with a razor, and you've landed him for good—he'll call again and often, and will know from experience with Tree Brand Razors that he can't do better than buy Tree Brand Pocket Cutlery, Shears, Scissors, etc. Isn't that sane argument? You know "A pleased customer is your best customer." Tree Brand Cutlery will withstand every test to which it can be rightly put. Designed right, made right, finished right—there's no better Cutlery sold under the sun.

"Safelock" Stays *cannot* Slip

This is a mighty strong selling point. It means that the fence will stand up to the hardest usage from animals or the elements and still keep its height and shape unimpaired. And the fact that the strand wires do not have to be kinked, owing to the positive permanent grip of the lock, means that every wire will stand its full strain. The "Safelock" is absolutely the strongest wire fence made—you can sell it as such and the test of time will bear you out to the letter. There's good money in handling "SAFELOCK." Write us about the exclusive agency for your locality. Don't put it off—Write to-day.

Amatite ROOFING

It has a rough surface of *real mineral matter* on the weather side. It is evident to anyone that it is no more necessary to paint such a surface than it is necessary to paint a stone wall. Stone needs no paint; neither does Amatite. It is strong enough in itself to bear the brunt of rain and wind and sun without a coat of paint.

To paint Amatite would be a waste of time and trouble. Amatite will last for many years without any care whatever. It is made to be *trouble proof* as well as *weather proof*.

No paint is good enough to make a durable roof; a thick layer of pitch, faced with a real mineral surface, is far better—*and that means Amatite.*

Further information will be sent on request to nearest office.

Dealers Have Almost Doubled Their Sales of Ross Sporting Rifles

Illustrated Catalogue upon request

A Rifle must make good or sales will stop.

No other new article is more generally or intelligently discussed than a new rifle.

The Ross Sporting Rifle has meet the keenest criticism, stood every test, and made good.

Dealers everywhere appreciate the advantage of handling a rifle that can be procured quickly, that can be depended upon in every emergency, that gives general satisfaction and is in ever increasing demand. That is the Ross Rifle.

$25.00 and upwards.

Simply a case of **BUY** and **SELL** with the

Androck Door Mat

The winter season is here, and with it extra work for the busy housekeeper, cleaning up the snow and dirt that is being tracked all over the house. Show her the Androck Mat.

It has a scraping surface in every direction. All the dirt is left outside.

Ask for our illustrated price list. There's a good profit for you.
